In conclusion, Mr. President, the overall direction of the bill is toward a safe and environmentally sound waste disposal program. I praise the reasonable approach taken by the Environment Committee to make meaningful changes in the bill, and the excellent work accomplished by Senators SIMPSON and HART and their staffs.●

CONFIRMATION OF ELLIOTT ABRAMS AS ASSISTANT SECRETARY OF STATE FOR HUMAN RIGHTS AND HUMANITARIAN AFFAIRS

● Mr. KENNEDY. Mr. President, on November 20, the Senate unanimously confirmed the nomination of Elliott Abrams to Assistant Secretary of State for Human Rights and Humanitarian Affairs. Mr. Abrams is an excellent choice for this critical position. He has proven himself an able diplomat and an individual concerned with human rights.

In nominating Mr. Abrams for this position, I am hopeful that the Reagan administration will reconsider its disappointing record of downgrading human rights as a major consideration in our relations with other countries. Its policy of quiet diplomacy has been a substitute for action. If that stance continues, it will destroy America's credibility as a nation dedicated to liberty, freedom, and fundamental human rights around the world.

The defining element in the character of America, setting us apart from our adversaries, has always been our unyielding commitment to the "unalienable rights of life, liberty, and the pursuit of happiness." And in espousing the cause of human rights, we are not only true to our national traditions, but we strengthen the international framework for the protection of these rights.

The international community, since the founding of the United Nations and the adoption of the "Universal Declaration of Human Rights," has declared that violation of fundamental human rights is a matter of legitimate concern to all nations.

It is not a sign of weakness to proclaim the cause of human rights. Twenty years ago, a President of the United States stood up for human rights, and then he stood up against the Soviet Union during the Cuban missile crisis. And today we can continue to stand up for America without foresaking the values for which America must always stand.

In our best days, we have held high the standard that all individuals have the right to live in peace and freedom. I look forward to working with Mr. Abrams to insure that the United States remains true to that proud and ancient heritage, and retains an effective human rights policy as a major consideration of its relationship with other nations.●

THE NEW TRADE REALITIES

● Mr. EAST. Mr. President, I recommend to my colleagues an excellent editorial on trade policy by columnist and business spokesman Anthony Harrigan. Mr. Harrigan is president of the U.S. Industrial Council, which is based in Nashville, Tenn.

Mr. Harrigan's editorial admirably summarizes the problem facing our free enterprise system in a world market that is increasingly characterized by restrictive trade practices.

In particular, he describes the current plight of the domestic textile and apparel industries.

I ask that the complete text of Mr. Harrigan's editorial be printed in the RECORD.

The editorial follows:

THE NEW TRADE REALITIES

(By Anthony H. Harrigan)

At a time when Americans are profoundly concerned about unemployment, the Executive and Legislative branches of our government have a responsibility to prevent the destruction of America's basic industries by foreign countries that dump their products in the U.S. market.

The problem with the dumping of low-cost—and often subsidized—products ranges from steel to textiles. The American steel industry is about to file a complaint with the International Trade Commission that foreign producers are dumping steel that is heavily subsidized by their governments.

Another case in point involves the textile industry, which employs 2.5 million workers.

That means it provides one out of every eight manufacturing jobs in the United States.

There is great concern in the textile industry because the textile-apparel trade deficit jumped 49 per cent in August over the same month a year ago, with imports running 26 per cent higher. Imports of textile and apparel products totaled $1.1 billion, while exports amounted to $401 million.

Incidentally, America's trade deficit with Japan will jump 50 percent this year to a record $14 billion.

Despite massive investment in new equipment, the American textile and apparel industry cannot hope to compete with textile companies in foreign countries where the wage scale may be 20 cents an hour.

There are free trade purists that say the United States should surrender the textile industry to producers in the Third World. But they don't say what will happen to the 2.5 million people employed in U.S. textile and apparel plants or to the states that lose vital revenue from this industry.

If the textie industry is surrendered, if it is deemed expendable, what will be next industry to go? Will it be argued in a few years that America should surrender automobile manufacturing to the Japanese? As for the steel industry, private companies in America are forced to compete against nationalized steel industries abroad, steel producers that receive massive subsidies from their governments.

The textile and apparel industry takes the eminently reasonable position that the current status of foreign trade is neither fair nor equitable to the United States because of foreign government-aided industries, noncompliance with trade agreements, and the absence of comparable wage environment and safety standards.

The issue is not an academic one at this point. The GATT Multi-fiber Agreement is scheduled to expire this year. It includes an annual 6 per cent growth factor which allows textile and apparel imports to capture an ever-growing share of the U.S. domestic market.

This agreement must be renegotiated to protect a vital American industry and its employees. There's no reason why the U.S. should sign an agreement that gives advantages to Japan and the newly industrialized countries of Asia. It is time for the United States to play hard ball in its international affairs. The new textile and apparel agreement should take into consideration domestic market conditions and the need to maintain a basic American industry.

This isn't a matter of protection of one or two industries. It is a recognition of the changed character of international trade and of the determination of foreign producers to dominate the American domestic market for practically every product. Ideally, the world would operate on the basis of pure free trade. But pure free trade don't exist in a world of government-subsidized producers, cartels, and selection of companies for penetration of the American market (market share not immediate profits being the objective).

Americans must become aware of the various forms of international economic warfare being employed by foreign countries. If they don't become aware of the trade realities, and if the U.S. government fails to demonstrate concern for American economic interests, the United States will lose much of its manufacturing. It will become a hewer of wood and drawer of water for industrializing foreign countries, and the American people will be much poorer in the years ahead.

Administration and Congressional action with respect to the multi-fiber agreement will be a test of our government's realism and determination with respect to trade challenges.●

THE FIRST AMENDMENT

● Mr. MITCHELL. Mr. President, on November 9, 1981, A. M. Rosenthal, executive editor of the New York Times spoke at Colby College in Waterville, Maine. Mr. Rosenthal's speech is a thoughtful appraisal of what the first amendment means to our society.

I request that the text of his speech be printed in the RECORD.

The text of the speech follows:

SPEECH BY A. M. ROSENTHAL AT CONVOCATION FOR ELIJAH PARISH LOVEJOY AWARD

Let me tell you a little true story about how a reporter I knew operated. Every day he would go out and cover his beat the best way he knew and the only way he knew; by talking to people in the town about what concerned them, about the cost of living, about the feel of life, about what they thought about their leaders, about politics.

Every night that reporter went home, wrote a story and then carefully burned his notes or flushed them down the toilet. It was a pity, because he knew he might forget what he couldn't write that day if he burned his notes. But he also knew the police had permission to search his files any time.

A lot of people did not want to talk to the reporter because they felt he might reveal their names on purpose or through a slip of the typewriter. They were defenseless people and they were afraid.

The reporter never urged them to talk because he understood their fear. Others, however, did talk to the reporter-precisely because they felt powerless and wanted somebody to tell the truths they knew. They accepted his word that he would suffer imprisonment before telling their names.

The government became very annoyed at this reporter. They questioned him directly about his sources and, of course, he did not respond.

They bugged his home and followed him wherever he went, and they searched his office and tracked his phone calls. Finally, the government got really angry and said, you can't write about us any more, you can't have access, go away. But some of the people about whom he had written and whose names he had never revealed, kissed him when he went away and gave him roses, and everybody said he was a hero, and later he was loaded with honors.

I was the reporter, and the beat I covered was Communist Poland. That was the first time I had to operate worrying about the police and courts and the first time I had to burn notes and think about going to jail. I thought it would be the last, because I resolved never again to work in a totalitarian society.

Now it is twenty years later, and I am the editor of the same newspaper for which I was a reporter in Poland. I spend my time dealing with news and with staff matters, but there is one subject that now takes up a considerable amount of my time and thoughts and that has to do with whether reporters should burn their notes, whether they are going to go to jail, what are the possibilities of a sudden police search, whether people who once talked to us will talk any more, whether other papers can be fined out of existence, whether the police will secretly commandeer our phone records to find our sources of information, whether we will be allowed to cover the administration of justice, how to get the police to reveal necessary information.

New York, not Warsaw.

I do not tell you all this to imply that we have gone totalitarian or that the Republic will fall. But I do tell you that the process essential to a free press, one of the institutions that will help guarantee that we do not go totalitarian, that the Republic will not fall, is under attack, and not from our enemies or the enemies of freedom. That we could handle. No, it is under attack from some of the very people whose professions have helped create and strengthen a free press, some of the lawyers and judges of our country, honorable men and women who traditionally have been the philosophic allies of the free press. And it is under attack from Federal legislators and politicians who certainly do not see themselves as enemies of a free press. They just think the American press is a little too free for their tastes.

They want to prevent the press from printing certain kinds of information. They say that obviously this does not affect such respected newspapers as The Times or The Washington Post or The Boston Globe. All they're aiming at, they say, is certain nasty fringe publications. Now I happen to agree that some of their targets are indeed nasty and fringe, but it is precisely the fringes—not just the center—that the First Amendment was designed to protect.

Simply see what has happened in the past few years. A dozen or so reporters and editors have been sent to jail for no other crime than trying to protect their sources—exactly what I did in Poland every day and for which Americans praised me. Others are now under orders to reveal sources or face jail. The courts have permitted newsrooms to be searched. Thousands of memoranda and files have been subpoenaed in different actions around the country. One large newspaper—our own—has been fined hundreds of thousands of dollars. Now every small newspaper lives under the threat of being fined into bankruptcy at the decision of a judge. Laws erected by state governments to protect the reporter's right to work freely have been destroyed by some courts.

Many judges have decided that reporters can be barred from essential parts of the court process, pretrial hearings, which constitute so important a part of the administration of justice. Other courts have placed severe restraints on participants in the judicial process, preventing press and public from finding out what is going on. A wall of judicial protection has been built around information held by the police behind which they can operate in relative secrecy.

In more and more cases, courts have upheld the principle of prior restraint, that is preventing the press from publishing what it feels should be published. Until a few years ago this was unthinkable.

And in case after case, by demanding notes and files and sending reporters to jail for not revealing sources, courts in effect have ruled that they have the power to enforce publication of what reporters and editors feel should not be published, because the information is either confidential or simply inaccurate, untrustworthy, or damaging to innocent people, just raw material.

In totality courts now have ruled themselves overseers of essential decision-making processes of the free press that the First Amendment was designed to safeguard from government encroachment—what to publish, when to publish, how to operate, what to think.

To understand why all this is so important to the press and the public, it is necessary to understand not only the law, but the nature of news and how it is gathered. And newspaper people have not succeeded in giving the public a real understanding of the news process.

Virtually all the news that is printed in newspapers or broadcast on TV is official news. That is, it is information disseminated by one governmental or business or professional source or another.

A President makes a speech, a legislator introduces a bill, a company issues an earnings statement, an investigative body issues a report, a consumer group demands action, a union strikes, a government department asks

for money, a civil rights group protests discrimination. It is news that the prime mover or central subject usually wants printed. Now, this kind of news is extremely important and essential to an informed citizenry.

In totalitarian societies, most of what we would consider official news is secret. In our country our leading institutions and figures disseminate news because it is in their interest to do so, and their interest often includes the pressures and need to inform the public and engage in a public dialogue. That is part of the contract of freedom.

But it is still official news.

There is another kind of news—news that institutions or leaders or professions or organizations do not want made public.

It can be as big as the Pentagon Papers or Watergate or CIA violations or as small as minor chicanery within a city council, or questionable business ethics in a manufacturing company or even conflict of interest in a newspaper.

Most often this information is held by dissidents, people who feel they cannot afford to be identified with its publication. Sometimes they volunteer the information; sometimes the reporter comes across it in the course of inquiry or because of a trusted relationship with the source. A dissident need not be a radical or a shadowy operator with a hot story to tell. A dissident can be an ambassador who thinks administration policy is wrong and wants it known, but not at the price of his own immediate retirement.

A four-star general can dissent with the chief of staff and a clerk who sees waste can dissent with his government department chief.

What binds all dissidents together is the fact that they hold information that is of public interest but which either out of self interest or fear they will not make public if they are to become known as the source—that is, unless they are guaranteed confidentiality. Confidentiality is a last resort for a good reporter. She or he makes every effort to name sources, because the source is an important part of information and lends strength to the story. The so-called anonymous source is only a last resort.

The press is usually portrayed as some huge, all-powerful machine strip-mining the defenseless government of its secrets.

The fact is that only a small part of any newspaper or television program, daily or over the year, contains information uncomfortable to government or institutions—too small a part. But without press confidentiality, the dissident information would vanish and the press would become a handout press.

I do not think there is a plot against the press on the part of the courts. I do think that there is a resentment against the press that comes from many things. I do feel that most of that resentment comes from the virtues rather than the failures of the press—the unpleasant virtues of telling the people the truth about Vietnam, Watergate, corruption in government, or in business, the aggressiveness and cantankerousness which are part of our makeup and function.

We annoy the hell out of people. And we have our faults, by God, we have our faults. There are scores of publications I wouldn't read, let alone work for. And there are a few for which I have loathing and contempt.

But there is a difference between resenting the press or even loathing it, and trying to control it.

The First Amendment was written not to protect the press from the admiration of government but from the loathing of government—all branches of government.

Courts and the press are involved, it seems to me, in two philosophic differences. One is that some judges feel that it is incumbent upon them to protect what the government says is the national security of the United States. National security usually turns out to be a matter of political or diplomatic interest or plain embarrassment. The price of prior restraint, a fancy way of saying judicial censorship, strikes me as a very expensive price indeed to pay to save government face.

Remember what the government said would happen if we published the Pentagon Papers? National calamity, revelation of state secrets, disaster upon disaster. The government position was a fraud and the government, I believe, knew it.

Here is a quote that might interest you: "One shudders to think of what our future would be like if The New York Times had not exposed a policy of mistakes and misdeed and published the Pentagon Papers." That quotation comes from the then Vice President of the United States, Walter Mondale, about a year ago in Kansas City, about ten years after we published the Pentagon Papers.

More important to most judges and lawyers is the issue of access and confidentiality in relation to a fair trial. An ambiguous decision by the Supreme Court on court closing, called *Gannett v. De Pasquale*, created a great deal of confusion, and for a while judges were closing trials right and left. Later, the *Richmond Newspapers* versus *Virginia* decision clarified that somewhat, but still allowed judges to close pre-trial hearings.

That may not sound like much except when you realize that about eighty-nine percent of all indictments are settled before the case ever comes to a full trial. Without access to pre-trial hearings, the press and the public lose access to the heart of the whole judicial process.

I do not believe that the issue is one of a fair trial versus a free press, and I do not believe that the First and Sixth Amendments need ever be in true conflict. Let me read to you what Hans Linde, a Justice of the Oregon State Supreme Court had to say: "The supposed conflict between the constitutional right to a fair trial and a free press rests on a simple fallacy. There are often genuine conflicts among competing objectives and individual interests, and I do not minimize their importance. We can even speak of competing rights, but not of conflicting constitutional rights. For what is a constitutional right? It is a claim that runs against the government—usually not a claim that the government do something for you or me, but that it refrain from doing something to us. The Constitution prescribes how government is to behave and how not. The Constitution does not make rules for private persons, unless they act on behalf or in lieu of a government. Only a government can violate a constitutional command."

If a judge believes that the actions of the press may violate a defendant's rights, the remedy is not to wipe out the First Amendment by barring the press or eliminating its requirements for confidentiality and access, but simply by using his powers to strengthen the Sixth Amendment—by control of the courthouse, by continuation or change of venues, by sequestration of jurors and witnesses, by instructions to jurors—and even by freeing defendants. Surely better than a guilty man go free than the First Amendment be repealed.

The most controversial of the incidents involving conflict between a reporter and the courts was the Farber case. Millions of words have been written about it by now, but I will go into it only briefly.

On May 17, 1978, a subpoena was issued to The New York Times and its reporter Myron Farber for all notes, all records, all memoranda, all correspondence, all recordings of all interviews with all witnesses for the prosecution and all witnesses for the defense in a murder trial taking place in New Jersey.

The subpoena called for the production of more than 5,000 documents—that is an estimate. No justification was presented other than a single affidavit by the defense lawyer saying that it was his belief that something in the files would be helpful to the defense.

No attempt was made to show that even a single document in those thousands was relevant. There was no attempt to show that anything was critical to the defense. There was no attempt to show that the information could not have been obtained through other sources. It seemed, purely and simply, a fishing expedition—a diversion on the part of the attorney.

The Times, Mr. Farber, and their attorneys tried repeatedly and unsuccessfully just to obtain a hearing on the relevancy of materiality of the documents. We never got that hearing nor was the shield law which specifically protected reporters in such cases respected in any way by the courts.

What we had here was a plain attempt to divert attention from the heart of the case by making a reporter and his newspaper the defendants, a growing trend among lawyers. We never said that we would not under any circumstances turn over any of the notes. What we did insist upon was what we saw as our constitutional right to a hearing to demonstrate whether there was any relevancy or materiality in the documents. We never received such a hearing, and for insisting upon our constitutional rights, The Times was fined $287,000, and Mr. Farber spent 40 days in jail. Later courts upheld our basic position that we were entitled to a hearing but it did not apply to us.

As Judge Harold Medina once put it, any judge who knows his business and who has a stiff backbone can afford a fair trial without any invasion of the freedom of the press.

In that speech of his, Judge Medina laid it pretty heavily on judges who he thought violated the First Amendment. He also laid it pretty heavily on reporters and editors and publishers who were too quick to compromise. He gave them a piece of advice: "Fight like hell every inch of the way."

Well, we are fighting, and it seems that almost every time we turn around, there is a new battle to be fought.

One had to do with the seizure of the telephone records of our Atlanta bureau by the Department of Justice. They were not investigating us, they were investigating the Ku Klux Klan, which we also had been investigating, without informing us, or giving us a chance to fight, Southern Bell bowed to a subpoena of the Department of Justice and turned over all the records from our Atlanta bureau and from the home of our bureau chief. The purpose of the subpoena was to find out who our reporters were talking to.

This clandestine investigation of a reporter's work is a clear violation of the spirit of the First Amendment. I'm happy to say that that particular threat has been considerably eased. Because of complaints from the press and the bar, the Justice Department issued new guidelines that made unnotified seizure much less likely. Right now a new quite important threat confronts the press and will be fought out in the courts. Congress has adopted legislation that would make it a crime for newspapers to print the names of United States intelligence agents, past or present, if the newspapers had reason to believe that such printing would affect United States intelligence operations.

Now that bill is not aimed against the New York Times or the Washington Post or the Boston Globe. It is supposed to be aimed against the nasty fringes. There are a couple of publications, which indeed I consider reprehensible, that makes a practice of identi-

fying United States intelligence agents. Usually those names are no secret at all to foreign intelligence groups, but they could indeed cause trouble.

Papers like The New York Times do not generally print the names of intelligence agents. In fact, we avoid it unless we think that there's a strong public interest in doing so.

This bill strikes virtually every First Amendment lawyer as clearly unconstitutional because it would amount to legislation forbidding certain types of information, even if public, from being printed in the press.

It is not simply a theoretical matter, however important that is. The fact is if that legislation had existed, it might, for instance, have been impossible to print a large part of the Watergate story because some of the people who participated in it were indeed former CIA agents and even had connections with the CIA at the time.

It would have been totally impossible for The New York Times, for one, to conduct its current investigation of the transfer of secret communications material and weapons to the Libyans, because the people at the heart of this odious operation so damaging to the interests and honor of the United States, are former CIA agents and there is every reason to suspect that people now in the CIA had knowledge of the whole sickening betrayal of American interests. Two Times reporters have devoted their full time for months, traveling all around the world, tracking down this network of agents and former agents engaged in selling American interests to the Libyans. If this legislation had been in existence, that investigation would probably not have been possible. The sad but important truth that the intelligence "old school tie" seems to have been the connecting link in this operation—to strengthen a dictator called a madman by our own leaders, and to strengthen him at the expense of the United States—would have been kept from the public.

The press is not asking for privilege. That word implies some special gift to be bestowed upon the press or withheld from the press at somebody's discretion—a judge's or a legislator's or a policeman's. No, we are not talking about the privilege of the press, but the right and ability and duty of the press to function in any meaningful sense.

Yes, this all concerns editors, reporters and publishers, but I beseech you to consider that this concerns each of you as citizens of a country based on freedom of thought and expression.

Every individual American has to ask herself or himself some questions:

Do you want a society in which newspapers have to operate under the fear of being fined to death? Do you want a society in which newspaper offices can be searched without advance hearings? Do you want a society in which the public does not know what is taking place in vital parts of the court processes?

Do you want a society in which the police process is made virtually secret?

Do you want a society that is the totality of all these things?

Please think about it. If your answer is "No, I don't want that kind of society," then fight like hell every inch of the way.●

THE PEACE MOVEMENT

● Mr. EAST. Mr. President, at a time when a so-called peace movement seems to be gaining strength in the free nations of Europe, a leading West German public servant has ably defended the right and duty of free peoples to defend themselves against tyranny and aggression. I ask that the translation of an article by Franz Ludwig Schenk Graf von Stauffenberg be printed in the RECORD.

The aritcle follows:

PEACE MOVEMENT

Among active Christians of both denominations—and encompassing, for the most part, people who are not politically oriented—a "peace movement" is growing which regards even one-sided disarmament by the West as preferable to the present East-West arms race.

Franz Ludwig Schenk Graf von Stauffenberg, a member of the Bundestag from the Christian Social Union, has repeatedly and intensively concerned himself with this movement. This is borne out by the following letter in which he replies to a letter written to him by a Catholic. Stauffenberg, Catholic as well, and the son of the resistance fighter who attempted to assassinate Hitler on 20 July 1944, was asked "how seriously you take the message (of the Pope)". In an address given in February of this year at the peace memorial in Hiroshima, John Paul II had called for the banning of all nuclear weapons. The author of the letter also referred to a statement which the Vatican addressed to the United Nations in 1977: "If the damage caused is no longer in proportion to the values one seeks to maintain, then it is better to suffer injustice than to defend oneself. At least when it is a matter of defending oneself by such means."

The following letter is Count Stauffenberg's answer to these remarks.

Reply by a Member of the Bundestag, who takes the "peace movement" seriously, to a pacifist:

"A peace that surrenders in the face of violence, opening up an easy, comfortable avenue to total domination by evil, is meaningless."

Dear Mr. S.,

Thank you very much for your letter . . . I wholeheartedly sympathize with your commitment to and your passionate plea for peace. Deep concern for the future, our own and our children's, was my sole motiviation in "going into politics". It was for this reason only that I left my profession.

Our discussion would be easier if the power to maintain and secure peace were ours alone, and if the decision on peace rested with the Federal Government and parliament, with the social groups and our citizens. People are appalled to observe that, since the end of World War II, peace has not only been threatened constantly throughout the world . . . Korea, Indo-China and Malaysia, Africa and the Middle East, Hungary, Poland and Czechoslovakia—these are only some examples of the wars and strife in our generation. Innumerable conferences, cease-fires and peace treaties have not changed anything in the final analysis. The proclamation of a new "policy of détente" caused the overwhelming longing for peace to crystallize into concrete hopes and raised eager expectations. And now, after twelve years, peace has not become more secure, the danger seems greater, the hopes have been disappointed and the expectations betrayed.

"Denial of danger a new virtue."

People resist being condemned to a life of anxiety and fear, who could fail to understand that? When a genuine path out of the situation of anxiety is nowhere to be seen, when the cause of fear seems to be insurmountable, many people feel driven to deny their fear; they repress their anxiety. That, too, is understandable. What one cannot accept, however, is that the denial of danger and the refusal to recognize a threat are elevated to the level of a new virtue, a new philosophy of life or even a new theology.

A fervent longing for peace, similar to that which characterizes Europe today, also existed in the 1930s. At the 1938 Munich conference the Western powers, for the sake of peace, abandoned their resistance to the goals and designs of the National Socialists. Chamberlain returned to London and, before an enthusiastic crowd, proclaimed "peace for our time". Who would deny today that the Munich pact encouraged Hitler to move towards war, accelerating the outbreak of World War II? . . .

"The freedom of our children. Victims of our fear."

At that time, too, devout Christians were passionately committed to unconditional peace. Many thought that they had found a leader in Karl Barth, the greatly admired theologian. The — negative — answer he gave is enclosed, and speaks for itself . . . It expresses better than I could hope to what must be the central concern of those who are truly committed to peace: the right kind of peace, as Karl Barth puts it. Not an empty, meaningles peace, devoid of any sense of human dignity, love or God, that surrenders in the face of violence, opening up an easy, comfortable avenue to total domination by evil.

Certainly the Sermon on the Mount is valid for Christians. Certainly, too, the difficult commandment is also valid that Christians should turn the other cheek. But neither reference to the Holy Gospel sheds light upon our plight, nor do the words of the Holy Father which you cite. It takes two to make and maintain peace. A one-sided renunciation of adequate security and a credible defence does not bring about peace, but at best the illusion of peace for a short respite.

Against this background it is no coincidence that the calls for peace heard today in our country are directed almost exclusively towards the West—the Federal Government, the Americans, the English, the French, but not towards those who, through the madness of their arms buildup during the past few years, have destroyed the balance of forces in Europe and consequently threatened—indeed, broken—the peace. In our country I hear protests against the Bundeswehr, which has no nuclear weapons. I hear almost nothing about the horror and the dreadful sufferings caused by 85,000 Soviet soldiers in Afghanistan during the past one-and-a-half years. And yet surely no one would maintain that, through excessive levels of military personnel and equipment, the Afghan mountain tribes have brought on the situation of war and death they are forced to endure today.

The political demands made by some "peace movements" in our country, sometimes through quite violent demonstrations, seem to me to have little to do with the Christian virtue of non-violence. Is "fearlessly turning the other cheek" really what is being called for? Or is the root of the matter not, rather, a dread of the first strike, and the foolhardy hope of avoiding these strikes by satisfying the greed of the brutal opponent? These are not Christians fearlessly meeting violence with non-violence. Rather, these are the faint-hearted, willing to sacrifice the lives and freedom of our children in the illusory hope of finding refuge from their fears.

"Broad discussion concerning peace needed."

In the past weeks I have often tried to put myself in the place of the demonstrators, at the Evangelical Church convention and elsewhere, who put their stakes on the hope for peace, attacking the defence of peace and freedom. Do they realize that they are denouncing the desperate workers who, on 17 June 1953, rebelled against oppression by Moscow and the East German regime as disturbers of the peace, while, in a reversal of roles, portraying the Communist oppressors as unfortunate victims? I have asked myself whether some of the Social Democrats in the camp of Eppler, Jansen, Schöfberger or Hansen are aware that they—certainly un-

intentionally, but according to the same logic inevitably—are blaming the great Social Democratic resistance fighters such as Otto Wels, Julius Leber and Adolf Reichwein, who stood up and opposed violence, for disturbing the peace, while excusing the actions of their Nazi opponents and murderers as justified self-defence on the part of the victim.

"Will fear keep us from hearing?"

A broad discussion concerning peace and security today is both justified and necessary. However, the fact is often disregarded that the demands made today of the Western allies were fulfilled long ago. People forget that, years ago, the American president onesidedly dispensed with the introduction of both a new generation of bombers and the neutron bomb as an effective means of protection against Moscow's tank divisions—in the hope of finding Moscow willing to keep the peace and to disarm. No mention is made of the fact that the NATO allies in Europe decided against an increase in the number of their conventional weapons as well as, to a great extent, their modernization, although no similar actions by the Eastern side were forthcoming (apart from the mere transfer of some divisions and a few tanks from two known sites in East Germany to other, unknown, sites in Eastern Europe). During the same period the Soviet Union, finding its hopes confirmed, increased its arms buildup—including its long- and medium-range nuclear missiles as well as its fighter planes, naval forces, tank units and so on.

I certainly do not want to question the sincerity of the objectives of those who drew up the "Krefeld Appeal".[1]

They are no doubt experienced and informed people. Of course they have the right to scold NATO, the Federal Government, the allies—and publicly, if they feel like it. However, anyone who has had access to the statistics and facts shedding light on the actual development of military strength in East and West during the last few years, anyone who has watched the East take brazen advantage of the West's longing for détente in order to gain the upper hand in the military sphere, anyone who has listened to the Communists talk of peace while continuing their armsbuildup, anyone who, aware of all of this, has not constantly—for all the world to see and hear—exhorted the disturbers of the peace to turn towards peace, has squandered his moral right to set himself up as a defender of peace in one-sided appeals addressed to the victims of the Soviet striving for power.

The smaller the risk appears to the superior aggressor, the greater the danger to peace. The burnt-out villages of Afghanistan, the fallen resistance fighters from the mountain villages, tormented women and maimed children cry out, reminding us daily of this dreadful truth. Will we, in our fear, still find it in our hearts to hear them? Or will we make our shabby peace with all of this? Will we, perhaps, wait until from newly opened extensions of the Gulag Archipelago the moans of our own friends and relatives, or our own cries, can be heard so that we can assure ourselves once more that no one had any idea, that everyone had only wanted what was best?

"We must not run away from our anxieties!"

It is everyone's legitimate right to experience an all-encompassing sense of fear in the face of the destructive power of the arsenals of modern weapons. The exhortation "Fear not!" can in any case reach only those who know what fear is. But it does not call upon us simply to run away from our anxieties, putting the reasons behind it and the terrible reality out of our minds.

"Fear not!" is not a mere consolation, but both a promise and an exhortation. Trusting in God, we must also stand up to the troubles and terrors of our earthly lives—with a full sense of our responsibility to our Creator and our fellow men and fearlessly, because we know that we are secure in God's hand.

Yours sincerely,

FRANZ LUDWIG GRAF STAUFFENBERG.●

[1] The "Krefeld Appeal" calls for a ban on the stationing of nuclear weapons in European territory; it rejects the part of NATO's 1979 decision concerning modernization of its nuclear potential and advocates arms control negotiations as well as unilateral disarmament, if necessary.

BETH LAUBSTEIN: WOMAN OF COURAGE

● Mr. DODD. Mr. President, a few weeks ago, newspapers in Connecticut carried a story of a young woman of exemplary courage and determination. Beth Laubstein of Woodbridge learned not too long ago that she was suffering from Hodgkin's disease.

Rather than letting this realization shatter her spirits, Beth resolved to fight back by helping raise funds to research and combat this terrible disease as well as other forms of cancer.

Her efforts in organizing marathon softball and racquetball sessions have raised thousands of dollars for the American Cancer Society. They demonstrate imagination thoughtfulness dedication, and unquenchable spirit.

I ask that accounts of her work be printed in the RECORD.

The articles follow:

VICTIM LEADS CANCER CRUSADE

(By Jodi Amatulli)

WOODBRIDGE.—At age 19, Beth Laubstein was not ready to face cancer.

Yet, she had no choice.

Last fall, while a student at Ithaca College in New York, doctors diagnosed a tumor they found in Beth's chest as Hodgkin's disease.

Within the hour, Beth, the daughter of Ansonia physician Dr. Melvin B. Laubstein, was on a plane back to her Woodbridge home.

Ten months later, Beth has two operations and seven months of chemotherapy behind her.

In front of her are an undetermined amount of radiation treatments and a great deal of uncertainty shared by every cancer patient.

Victims of cancer are frequently preoccupied with thoughts of death. Not Beth. She is too busy making plans to take care of her body by jogging and playing racquetball and tennis. For Beth is going to beat cancer.

As far as she is concerned, there is no doubt about it.

LOOKS TO FUTURE

Looking to the future, she plans to return to school to pursue her degree in recreation.

For the present she is holding down a full-time job at the West Rock Clubhouse in Woodbridge where she is planning a racquetball marathon to raise money for the American Cancer Society.

"I'm winning my battle against cancer," Beth said. "Now I'd like to raise at least $25,000 to give someone else the same chance."

A cook-out at 6 p.m. Sept. 18 on the clubhouse grounds will kick off the event that is open to the public. Ticket information is available by contacting the club.

The racquetathon will begin at 8 a.m. Sept. 19 and feature four players who will attempt to play the indoor racquet sport for 64 consecutive hours.

The clubhouse players are Billy and Jim Montgomery, Jeff Falco and Laurie Liptak.

MONEY RAISED

Beth said the money is being raised through pledges for hours played by the recquetballers, and through paid ads in an ad book, a raffle and a bake sale.

"A similar marathon was recently held in Illinois," Beth said. "It raised $46,000, I would like to beat that figure."

Beth said that every dollar raised will be donated to the society for cancer research. Research, she said, that she now better appreciates because of her bout with Hodgkins disease.

She explained that 30 years ago her case would have probably been hopeless.

Today, doctors can expect to cure 80 percent of those patients diagnosed with Hodgkins 3B (the stage at which it was discovered in Miss-Laubstein).

Beth would like to see that cure rate increase to 100 percent in her lifetime. And if the money raised in next month's racquetathon helps in any small way, her efforts, she said, will have been worthwhile.

GAME MAKES GUINNESS AND $20,000 FOR CANCER

(By Joseph T. Brady)

A long, long racquetball game in Woodbridge turned out to be worth $20,000 for the American Cancer Society this weekend, while proceeds from a marathon softball game in Shelton are still being counted.

"I wasn't prepared for what was coming," said a tired Beth Laubstein this morning.

Ms. Laubstein, a Hodgkins disease victim, had coordinated the record-setting racquetball contest at the West Rock Clubhouse.

Jeffrey Falco of Woodbridge and Laura Liptac of East Haven stepped off the courts at 8 p.m. Monday night, 72 hours after they began.

The couple earned a place in the Guinness Book of World Records, topping the previous mark of 64 consecutive hours.

Another pair of players had stopped after 36 hours. Players took a two-minute break after each game and a five-minute break after each hour of play.

More important, through hourly pledges and other fundraising activities, they had raised $20,000 for the fight against cancer.

"I feel great—it was a super success," Ms. Laubstein said today.

Asked if she would ever organize a similar event, she said "I don't know. I'm still sleepy."

COLD RAIN

Ms. Laubstein also praised the efforts of 20 hearty softball players, who launched their own marathon in Shelton last weekend.

Under the direction of Glen Leonard, teams sponsored by Al's Luncheonette and Huntington Chevron battled fatigue and dismal weather for about 34 hours before giving way to a cold downpour at 4:30 a.m. Saturday.

The teams were shooting for a world record of more than 90 hours, but the rain forced the disappointed group off a muddy White Hills Athletic Complex field.

Lou Salemme, one of the participants, said the Al's Luncheonette squad had thus far raised more than $1,000 for the American Cancer Society through pledges and contributions.

He said he could not give the overall total because he did not know how much Huntington Chevron had received.

"They had a very good effort," said Ms. Laubstein. "I had six months to organize my marathon and they only had six weeks."●

GRIDIRON CHAMPS OF WASHINGTON STATE

● Mr. GORTON. Mr. President, I listened with great interest to the remarks of

the senior Senator from Iowa about the success of several football teams in his State. I have to respectfully point out, however, that in the Evergreen State we are enjoying success on the gridiron that cannot be matched anywhere else in the Nation.

The University of Washington Huskies—the defending Pacific Ten Conference champions—will again represent that conference in the Rose Bowl. The Huskies will be making their third trip to the Rose Bowl in 4 years under the capable coaching of Don James.

On the eastern edge of my State, the fighting Cougars of Washington State University will make their first bowl appearance in 51 years in the Holiday Bowl on December 18. Jim Walden, in only his fourth year as the Cougars' head coach, has led Washington State to its third best season ever, and its winningest season since the late Babe Hollingbery took the Cougars to the Rose Bowl in 1931.

The fair city of Tacoma enjoys the prestige of having two universities—the University of Puget Sound and Pacific Lutheran University—that have excellent football programs.

UPS is ranked fourth this week in the NCAA Division II poll—the highest of any team west of the Mississippi River. With a 10–1 season record, the Loggers also have their winningest season ever. Coach Ron Simonson, in his fourth year as head coach, has accumulated an impressive 32–9 record. The Loggers meet sixth-ranked North Dakota State University this weekend as the division playoffs begin. I am certain that all Washingtonians will be eagerly awaiting the final outcome.

Pacific Lutheran finished its regular season undefeated in nine games and on top of the NAIA Division II poll. Although Frosty Westering's Lutes lost a close one to second-ranked William Jewell College in the playoffs this past weekend, the team continues to be a favorite with football fans in Washington.

Therefore, Mr. President, in reply to the message delivered to me on behalf of the people of Iowa by their senior Senator, the people of Washington have asked me to deliver this message to my distinguished colleagues from States of Iowa, Utah and North Dakota: "Go Huskies, Go Cougars, Go Loggers." ●

JAMES TOBIN: ECONOMIST

● Mr. DODD. Mr. President, Prof. James Tobin of Yale University in New Haven, Conn., last month was awarded the "Nobel Memorial Prize in Economic Science" for his study of financial markets.

It is difficult to overstate the contributions Dr. Tobin has made to the field of economics as well as in public life. In 1950, Dr. Tobin joined the Yale faculty and quickly earned a national reputation in the fields of econometrics and economic theory. His recent work in portfolio selection theory, which relates to investor behavior, reflects pioneering influential thinking.

Dr. Tobin served on President Kennedy's Council of Economic Advisers. While on the Council, Dr. Tobin specialized in the areas of debt management, econometric studies, forecasting, international finance and money and banking. He argued early in 1961 in favor of an expansionary monetary policy and, in so doing, expressed concern that the unduly tight monetary policies of the Federal Reserve Board would frustrate President Kennedy's efforts to promote economic growth through fiscal policy.

While a Member of the House of Representatives, I had the honor to work with Dr. Tobin on matters relating to budgetary control. His expertise contributed much to the work of the House Rules Committee task force on Federal spending limitation, where alternative proposals for reining in the Federal budget were being considered. I found his advice invaluable, and my understanding of the Federal budget process was significantly enhanced as a result.

In a recent article in the New York Review of Books, Professor Tobin contributes a lucid analysis of current economic trends and theories. The article illustrates the qualities of wide-ranging knowledge, historical perspective, economic insight and public spirit that led the Nobel committee to honor Professor Tobin. I ask that it be printed in the RECORD.

The article follows:

REAGANOMICS AND ECONOMICS

(By James Tobin)

The economic program of the Reagan administration, like that of the Thatcher government in Britain, manifests a conservative counterrevolution in the theory, ideology, and practice of economic policy. The aim of the counterrevolution is to shrink the economic influence of government, especially central government, relative to that of private enterprise and free markets. Three kinds of policies are at stake, concerning respectively (1) macroeconomic stabilization—the use of fiscal, monetary, and other policies affecting national production, employment, prices, and other variables of economy-wide significance; (2) economic inequality—the use of the public fisc to redistribute income and wealth; (3) resource allocation—national priorities among various public and private goods; (4) regulation of economic activities and markets. I shall speak principally about the first two categories.

I have referred to a counterrevolution, so I should remind you of the revolution to which it is the counter. That took place some thirty-five to forty-five years ago, just before and after the Second World War, in this country and in other Western capitalist democracies. Radical changes occurred in the practice of economic policy and in the theory of political economy. Live memory of the Great Depression created a broad consensus that the state must assume responsibility for maintaining prosperity, as well as for protecting individual citizens against the inevitabe insecurites of life in a market economy.

The New Deal in the United States and social democratic movements in Europe were the agencies of these changes. They also expanded government investment in schools, housing, transportation, and other public goods, and augmented the market power of workers, trade unions, and farmers vis-a-vis business. Over three postwar decades these changes were largely accepted by all mainstream political parties and extended by governments of various political colors. Though rumblings of discontent have been heard in increasing volume over the past fifteen years, only recently have the counterrevolutionaries gained political power.

I shall confine myself mainly to the United States and the first two issues on the agenda of the revolution and counterrevolution—macroeconomic stabilization, and redistribution of income and wealth. Two acts of Congress symbolize the revolution. The Employment Act of 1946 dedicated federal power to the achievement of "maximum employment, production, and purchasing power." Ten years earlier, under the Social Security Act, the federal government recognized an obligation to protect individual citizens from personal economic misfortunes—workers without jobs, aged without funds, children without fathers. The New Deal had already put the federal government in the business of welfare and work relief, insurance of bank deposits and mortgages, and other "safety nets". By 1947, then, the federal government had assumed responsibilities both to maintain general prosperity and to insure and indemnify the worst individual casualties of depression and economic change.

These really were new responsibilities. Fiscal and monetary policies were not significantly dedicated to macroeconomic stabilization before the late 1930s. In 1929–1934 both Hoover and Roosevelt raised taxes and sought vainly to balance the federal budget; they were worried about the Depression's effect on the budget, not the budget's impact on the economy. Throughout the precipitous decline of 1929–1932 monetary policy gave second priority to the Amercan economy, and primary emphasis to defending U.S. gold reserves and the gold value of the dollar—until the disasters of the winter of 1932–1933 forced Roosevelt to suspend gold convertibility and devalue the dollar. As for relief of the victims of the Depression, Hoover—a Quaker who had earned worldwide fame as a humanitarian in directing relief efforts in devastated parts of Europe after the First World War—regarded it in principle as the responsibility of private charity and local government, not the federal treasury. Roosevelt, fortunately, was a pragmatist.

Similar redefinitions of the economic responsibilities of central government occurred in other advanced democracies in the 1930s and 1940s. In Britain two wartime reports by Lord Beveridge, one on social insurance and one on full employment, set the stage for postwar macroeconomic strategy and "welfare state" legislation.

To these political developments there were important intellectual counterparts and foundations. A revolution in macroeconomies and in the theory of monetary and fiscal policy began with J. M. Keynes's General Theory of Employment, Interest, and Money in 1936 and spread through the English-speaking world and after the war to continental Europe and Japan. This provided the rationale for the full-employment commitments of the several countries, along with guidance on how to implement them. The business cycle was no longer to be seen, as both orthodox and Marxist economists saw it, as an inevitable and functional characteristic of capitalism. According to Keynesian theory, economy-wide fluctuations in economic activity are wasteful; they can be avoided by active fiscal and monetary intervention, so-called stabilization policies.

Keynesian macroeconomics does not logically lead to any position for or against welfare-state measures. But, again in contrast to both right and left, it certainly does not say that redistribution of income and wealth by taxation and transfer is fatal to capitalism, or even damaging. In Keynes' personal view, "The outstanding faults of the economic society in which we live are its failure to provide for full employment and its arbitrary and inequitable distribution of wealth and incomes." He was confident that both flaws could be corrected without sacrificing the efficiency and progressiveness of market capitalism, for which he had the same respect as his classical forebears and

colleagues. Twenty years later Paul Samuelson, the principal architect of the synthesis of Keynesian and neoclassical theories that became the orthodox main current of American economics, expressed this optimistic view very clearly:

"A community can have full employment, can at the same time have the rate of capital formation it wants, and can accomplish all this compatibly with the degree of income-redistributing taxation it ethically desires."

Keynes and Samuelson are saying, in other words, that an amalgam of capitalism and social democracy is both workable and robust. In contrast, both extreme right and extreme left argue that capitalism cannot afford or survive egalitarian policies.

The postwar era, especially its first twenty-five years, appeared to justify the optimism of Keynes and Samuelson. In no other period of similar length have productivity per worker and living standards grown so fast, or aggregate production and employment advanced so steadily, or world trade expanded so greatly. The last ten years have been disappointing compared to the 1950s and 1960s. But we should not lose perspective.

The main source of disappointment and disillusionment with the revolution was the stagflation of the 1970s—the combination of high inflation and high unemployment. Even during the era of their apparent success, Keynesian policies for full employment and countercyclical stabilization aroused chronic anxieties about inflation. Indeed the principal advocates themselves, beginning in the 1940s, warned that full employment, removing the wage discipline exerted by unemployment and the threat of layoffs, might not be compatible with price stability. Some of them foresaw the need for direct restraints on wages and prices to reconcile the two goals. The economy would have a "secular" or long-term bias toward inflation, they observed, if wages and prices rose freely in expanding industries, and during economy-wide booms, but fell slowly if at all in declining sectors and during short recessions.

Moreover, inflationary bias was exacerbated by social welfare legislation, extended and expanded as it was by postwar administrations and Congresses of both parties, most dramatically beginning with the Great Society programs of the late 1960s. Social insurance dulls to some degree the incentive to seek and accept employment, especially the less remunerative or attractive jobs.

Probably more important were developments that fall under the fourth of my initial classifications. The Rooseveltian political coalition opened old-fashioned interest-group politics to large groups that previously had been excluded. Like all governments, our federal government has always catered ad hoc to private business interests with political clout, as our history of tariffs, "internal improvements," land grants, bank charters, and subsidies amply illustrates. Beginning in the 1930s trade unions gained federal protection for organizing and bargaining. Wages, hours, and conditions of work became subject to federal standards. Farmers were not only subsidized but organized into federally administered cartels. The promotion of monopolistic powers for unions of workers and farmers was justified by J. K. Galbraith and others as "countervailing" the monopolistic powers of big business, to the benefit of the society as a whole.

This dubious proposition was never congenial to liberal Keynesians devoted principally to full employment and diminished inequality. In any event, these countervailing powers increased inflationary bias. Workers, unionized or not, had more power to gain wage increases in booms but resist cuts in downturns. Agricultural price supports diminished the downward trends and cyclical declines of food and materials prices that contributed so much to price stability in the 1920s and earlier.

Nevertheless, the inflation record of the United States was very good until the late 1960's. That deficit financing of the Vietnam War then overheated an economy already operating at capacity was no surprise to any economist, Keynesian, monetarist, or classical. That inflation accelerated during the 1970's, in spite of monetary policies that triggered three recessions, in spite of unemployment higher than in the two previous decades, is the great disappointment to theory and policy that set the stage for the counter-revolution. Many observers would explain the stagflation by the series of external shocks, unprecedented in their severity, that hammered the world economy during the 1970's: The depreciation of the dollar after Nixon proclaimed it inconvertible into gold in 1971, the worldwide commodity shortages and speculative booms in 1973, the two big OPEC shocks, 1973–1974 and 1979. Others blame over-stimulative monetary and fiscal policies in 1972–1973 and 1977–1978. The controversy is far from being resolved, but the Reagan administration is sure of its diagnosis: the disappointments of the 1970's were the inevitable outcome of mistaken policies followed throughout the post-war decades.

To the revolution that took place some thirty-five to forty-five years ago, Reaganomics is, like Thatcherism in the UK, the political and ideological counterrevolution. Just as Keynesian theory inspired the revolution, so a wave of professional reaction to the synthesis of Keynesian and neoclassical doctrines that became orthodoxy in the 1960's sustains the counterrevolution. In both instances, of course, there are many divergences among economic theory, popular ideology, and actual policy. Nonetheless, in both cases, a common tide of opinion floods academic journals, popular media, political rhetoric, Congress or Parliament, and the guiding philosophies of president or prime minister. Rightly or wrongly, the revolution is blamed for the "stagflationary" disappointments of the 1970's, the high rates of unemployment, inflation, and interest, the depressed stock market, the slowdowns of productivity growth and capital formation. The old doctrines and policies, new forty years ago, are discredited, replaced by new doctrines and policies, old forty years ago.

Respecting stabilization, the new doctrine is that active fiscal and monetary intervention—characterized or caricatured as "fine-tuning"—is the problem, not the solution. The government should forswear countercyclical policies and let the market economy stabilize itself, as it will, given confidence that government policies will be stable. Thus the central bank should tie itself, or be tied to, a fixed-rate rule of monetary growth, independent of the state of the economy. Likewise federal tax and expenditure legislation should not be responsive to business conditions. Various proposals to make macroeconomic policies blind to cyclical fluctuations, including constitutional amendments to require annual budget balancing and to restrict government expenditure and monetary growth, are currently before the country and the Congress and are viewed benignly by the Reagan administration.

One of the arguments against the countercyclical policies of the past is that they fostered inflation by removing from business firms and workers the incentive to lower prices and wages during recessions in order to protect sales and jobs—why not just wait until the government pumps up demand again? In Britain, Margaret Thatcher has put her countrymen and women on notice that the only way they can restore the jobs and prosperity lost in the current slump is to disinflate. Her Majesty's government will do nothing about it.

The same warning has been repeatedly issued in America by Chairman Paul Volcker of the Federal Reserve, who, unfortunately for the effectiveness of the warnings, does not quite command the same audience as a head of government. President Reagan has not made Volcker's threat credible to those who determine wages and prices; instead he was undermined it by promising disinflation without tears, an instant spurt of rapid growth, falling unemployment, and declining inflation. Recently, it is true, his Treasury secretary has lapsed into old Keynesian "error," urging the Fed to loosen up a bit to forestall incipient recession. On the other hand, the administration is not fine-tuning fiscal policy in an anti-recessionary direction. Instead, its current fine-tuning is aimed in the other direction—it is trying like Hoover and Roosevelt in the early 1930s to offset the effects of the recession on the budget deficit by cutting the budget further. (However, recent statements by OMB director Stockman show awareness of the futility of aiming at specific budget deficits in a weakening economy.)

The renunciation of stabilization policy implies, if actually carried through, that the government no longer has meaningful goals for real economic variables—e.g., for employment and unemployment, national production and its growth. Of course, any political administration will publish its projections, scenarios, and hopes. But these will mean nothing if the government eschews measures to make them come true. The Thatcher and Reagan governments both say that they are providing a stable monetary and fiscal framework within which private enterprise and free markets will restore prosperity and non-inflationary growth. Another way to put it is that whatever economic outcomes private agents generate within the framework are by definition optimal. This is how the current chairman of the Council of Economic Advisers, Murray Weidenbaum, puts the case, even if his client doesn't yet quite understand it that way.

Clearly this is a 180-degree reversal of the commitment of the Employment Act of 1964, not to mention the Full Employment and Balanced Growth Act of 1978 (the "Humphrey-Hawkins Bill"). To be sure, employment goals have been slipping for a long time. The unemployment rate was 3 percent at the end of the Korean War, 4 percent at the peak of the bottom in the mid-1950s when the Fed applied the brakes by raising interest rates, and 5 percent at the next cyclical peak in 1960. The Kennedy-Johnson administration officially adopted a full-employment goal of 4 percent unemployment, achieved it in 1965, and overachieved it during the Vietnam War. During the 1970s operational unemployment targets were not made explicit, but policy moves revealed implicit targets of 5 percent, then 6 percent, now probably 7 percent or more.

The slippage of course reflects the primacy given to the frustrating battle against inflation. But if and when the battle is won, I doubt that the Federal Reserve and the administration would risk reigniting inflation by relaxing the monetary screws enough to permit much reduction of unemployment from the 7 to 8 percent range. More likely they would settle for a resumption of normal sustainable real growth at prevailing rates of capital utilization, and would not provide financing for temporarily higher growth to absorb the slack created during the anti-inflationary fight. This scenario is, by the way, explicit in the projection of the UK Treasury.

In the US today macroeconomic policy and prospect are dominated by Federal Reserve monetary policy. The Reagan administration assigned disinflation to the Fed, chided the governors for past mistakes, and urged them to be tough. The Fed is being tough, and as Chairman Volcker has repeatedly made clear, proposes to be gradually but resolutely tougher every year until in-

flation rates are insignificantly different from zero. As Volcker and his colleagues appreciate much better than President Reagan and his associates, Federal Reserve money-supply policies will not allow room for real economic growth unless wage and price inflation melts by a point or two a year. Given the stubbornness of built-in wage and cost inflation, there is likely to be considerable economic pain and damage during a transition of several years.

The administration rejects on principle any direct wage and price policies, formal or informal, even diffuse persuasive appeals by the president. In their absence, the only mechanism by which monetary deceleration produces disinflation is by creating sufficient economic distress that workers and employees, desperate to protect jobs and solvency, settle for lower wage and price increases than those currently prevailing. We can see this process at work across the Atlantic, where midway in Mrs. Thatcher's five-year term the record unemployment rates are in double digits while inflation rates are still in double digits but slowly declining.

A Thatcher scenario was not quite what the Reagan administration had in mind. The "supply-side" tax cuts were intended to unleash a surge of investment, enterprise, and productive effort. Supply-siders were impatient with traditional conservative orthodoxies that tax stimuli must wait for budget balance and disinflation. Exploiting the eager competition of both parties in Congress, they succeeded in promoting tax cuts that outdistanced the budget cuts of the redoubtable Mr. Stockman. But the tax bill only solidified the firm resolve of Mr. Volcker, and he is bound to win a fiscal-monetary tug-of-war. As the securities markets perceived, the situation is a Catch-22. Interest rates cannot be low enough to sustain expansion unless the economy is in recession.

I turn now to a second dimension of the counterrevolution, the distribution of income and wealth as affected by federal taxes and transfers.

Equality of opportunity has been an American ideal and an American excuse. The ideal of capitalism in a democracy is a fair race from an even start. Big prizes go to the swift, but all participants are rewarded—the more rewarded the faster everybody runs. True, economic and social outcomes are highly unequal. The excuses are that the racers all have the same opportunities and that differential prices generate even larger rewards for all participants.

Opportunities are actually far from equal. We Americans escaped the feudal castes of the Old World, but erected our own racial, religious, and ethnic barriers. Even as these are overcome, the hard fact remains that the children of parent of high economic and social status gain a head start—better education at home and school, better nutrition and medical care, as well as more gifts and bequests of worldly goods. To give children these advantages has indeed been traditionally a strong motivation for work, saving, and enterprise.

Wealth breeds wealth and poverty breeds poverty. Despite legendary examples of spectacular social mobility, the unequal outcomes of one generation are generally the unequal opportunities of the next. Here as in other democracies, governments have sought to arrest the momentum of inequality by free public education, social insurance, "war on poverty" measures, and progressive taxation.

The U.S. budget and tax legislation of 1981 is a historic reversal of direction and purpose. Existing institutions, commitments, and "safety nets" can't be rapidly dismantled, but the message is clear enough; inequality of opportunity is no longer a concern of the federal government.

The government has virtually abandoned all pretense of taxing transfers of wealth between generations. Capital gains on assets so transferred are excused from income tax, and now most of them will be free of cstate and gift taxes as well. In the hasty competition of both parties for the favor of wealthy constituents, Congress casually liberalized these taxes without concern for unchecked dynastic wealth and inequality of opportunity.

Capital income, in contrast to wage income, is increasingly free of federal tax. Even before the 1981 tax law, the Treasury calculated that only one-third of capital income showed up as taxable personal income.[1] Taxable capital gains are seldom realized; when they are the top rate will now be only 20 percent. Deferment of tax on income saved for retirement, easily accessible via employer or do-it-yourself plans, effectively frees the returns of such saving from tax and generally moves the principal into a lower bracket. The new tax-exempt All Savers' certificates carry no risk and beat the current inflation rate by several points.

The monetary-fiscal policies of the administration are, in fact, a recipe for high interest rates; the tax bill eases the pain for upper-bracket taxpayers, who can escape tax on interest receipts while claiming deductions for interest paid on mortgages, consumer debt, and other loans. The sophisticated rich know how, or know lawyers who know how, to combine depreciation and interest deductions with preferential capital gains rates to shelter salaries and self-employment incomes from taxation. Though many tears were shed in the successful effort to reduce those high-bracket taxes alleged to deter saving and investment, especially the 70 percent rate now abruptly lowered to 50 percent, few inhibitants of those brackets paid such taxes or will pay them now.

The government is a partner in business enterprise, and recent legislation impairs its equity—almost to the point where the Treasury's share in investment costs and risks exceeds its share in prospective earnings. This is the result of combining greatly accelerated depreciation, "15–10–5–3," with the investment tax credit—its value multiplied by leaseback arrangements—and interest deductions.

At the low end of the economic spectrum, federal efforts to bolster incomes and opportunities are being abandoned. As federal funds for welfare, food stamps, Medicaid, jobs and training, aid to education, and other residues of the war on poverty are reduced and combined into block grants, the beneficiaries will be at the mercy of local legislators and taxpayers. This process is just beginning. About $150 billion in 1984 tax revenues have been given away, and thanks to bracket indexing none will be recouped by inflation thereafter. The president has now donned his budget-balancing hat and presses Congress to redeem his promises by making budget cuts even greater than those enacted earlier this year. They won't be found in defense, public-debt interest, or even in social security. There will be further cuts in social programs, more doses of the "new federalism" that devolves these responsibilities and their funding on to states and localities.

The Reagan economic program is advertised to cure inflation and unemployment, to revive productivity, investment, hard work, and thrift. It probably cannot achieve those wonderful results. What it is sure to do is redistribute wealth, power, and opportunity to the wealthy and powerful and their heirs. If that is its principal outcome, the public will become considerably disenchanted.

Despite its free-market ideology, the administration has done little to dismantle regulations and subsidies that are costly, inefficient, and inflationary. Agricultural programs still not only subsidize producers but do so in ways that raise prices to consumers. Taxpayers, consumers, and shippers pay for our high-cost, noncompetitive merchant marine. The Carter administration deregulated airlines, but analogous measures for surface transport are stalled. The current administration is ready enough to liberalize or discontinue regulations of business when the opposing values are consumer protection or environmental conservation. It is by no means so devoted to market freedom, competition, and consumer interest as to challenge important business, labor, and farm constituencies. These politically sacred cows have been around a long time, and no other administration have mustered the will or the power to kill them either. But an administration that claims a popular mandate for counterrevolution should not leave unscathed the most objectionable features of the old order.

The outlook for the American economy in the 1980s contains some bright spots and some dark prospects. On the bright side, it seems unlikely that the U.S. and the world will be hit by external shocks of the magnitude of those of the 1970s. Though the present oil glut may not continue, Americans are now much better adapted to high oil prices and much better prepared to cope with future increases. To the extent that productivity and capital formation were held back in the 1970s by energy shocks and uncertainty about how to adapt to them, they should rebound in the 1980s.

On the dark side, the purely monetary cure for inflation can hold down the economy for half the decade, with capital formation discouraged either by high real interest rates, or by gloomy profit expectations, or both. The "new federalism," as is only beginning to be realized, will have devastating effects on the finances of many state and local governments and on the services they render, especially to the poor. Meanwhile the tax cuts will be widening the gulf between the living standards of the rich and those of the poor, without the promised compensation in the conquest of stagflation. In the end, I think, a democratic policy will not tolerate in its government and central bank an economic strategy of indifference to the real state of the economy.●

[1] Eugene Steuerle, "Is Income from Capital Subject to Individual Income Taxation?" Office of Tax Analysis Paper 42, October 1980.

U.S. POLICY TOWARD BOLIVIA

● Mr. KENNEDY. Mr. President, yesterday, the U.S. Senate confirmed the nomination of Edwin G. Corr as U.S. Ambassador to Bolivia. He is an outstanding diplomat and well respected for his performance in previous assignments as a representative of the United States.

However, at this time we must not forget that in August 1980 the United States withdrew its Ambassador from La Paz in protest to a violent military coup which prevented that nation's constitutionally elected government from taking office—an action which I strongly supported.

I have always felt that the United States should maintain diplomatic relations with other countries in order to further our national interest and to resolve differences, if possible, through dialog and negotiation. In the case of Bolivia, we have maintained these relations at a lower level because of its military regime's overthrow of democratic institutions, repression of fundamental human rights, and active involvement in illegal drug trafficking.

Unfortunately, real questions remain about the Reagan administration's support for democracy and human rights in

Latin America. It is therefore essential for the administration to insure that the Bolivian Government understands that it must restore democracy, end its abuses of human rights, and respect the rule of law. There must be thorough investigations of persistent and disturbing reports of arbitrary arrest, ongoing torture, and killing by Bolivian security forces. There must be an end to the involvement of the Bolivian military in the illegal drug trade. We must continue to urge the Bolivian Government to restore political freedoms, including freedom of the press, and to move that country back toward democracy. Only in this way can we aid the democratic forces still active in Bolivia.

Mr. President, I hope the new Ambassador will take this message to the present leaders in Bolivia.●

A NEW APPROACH TO EMPLOYMENT TRAINING

● Mr. QUAYLE. Mr. President, our economy faces many problems of which inflation and unemployment may be the most visible but the lack of productivity growth is certainly the most inportant. Without reversing the decline in productivity trends, we will not regain our international competitive edge nor will we be able to provide high levels of employment without inflation. It is not my purpose here to assess the basic causes of the decline in productivity nor to offer a new panacea for its cure. But we can all agree that this Nation has not made the commitment to the improvement of its human capital that must accompany the regeneration of our physical plant.

The improvement of the skills and abilities of our labor force is an enormous task and it is a task in which many sectors of our economy must play a vital role. The primary role belongs to private enterprise and we must insure that governmental policies do not inhibit private investment in training, that they encourage rather than discourage investment in human capital even as our policies encourage investment in plant and equipment. The education system, basically the responsibility of our State and local governments and their educational agencies, have an enormous role to play. But the Federal Government also has a role to play and today I want to deal with one aspect of the Federal Government's role and responsibility in the improved utilization of our human resources.

There are segments of our society who are unable to make the transition into the mainstream of our economic system—who special help to take advantage of economic opportunities for which other institutions do not prepare them. The Federal Government has, I believe, a responsibility to help those who cannot succeed in the labor market because they have not, for one reason or another, been helped by those institutions which help the vast majority of our citizenry. This is a matter both of social justice and economic necessity. We cannot afford a class that does not participate in our prosperity and we need to utilize all our sources of productive labor in order to insure our prosperity.

Increasing the productivity of our work force and assisting the economically disadvantaged in our society to enter the economic mainstream have never been matters of partisan dispute. It is my firm intention in developing a new employment training policy for our Nation to proceed on a bipartisan basis and to develop a program that will have the active support of a broad spectrum of society.

I am encouraged in this hope by the support for this endeavor that I am receiving from both the chairman of the Labor and Human Resources Committee Mr. HATCH, and its ranking minority member, Mr. KENNEDY. The Subcommittee on Employment and Productivity has held hearings and many consultations and it seems to me appropriate to state at this time an outline of the principles on which we propose to develop a revised employment training program.

Our present programs suffer from a number of major deficiencies and any new program must be directed at curing these defects while at the same time providing a method of transition from the old to the new that does not disrupt the considerable strengths that do exist in the present program.

The first need for a new program is to strengthen the involvement of the private sector. It may be hackneyed truth that 85 percent of all jobs are in the private sector—but it is a truth and no program designed to train people for jobs can ever be unmindful of that fact.

Second, we must remember that the Federal Government is not the repository of all wisdom nor of all good intentions. This is a nation of incredible diversity and no program can be successful that does not fully recognize that diversity by giving to the States a preponderant voice in designing programs to meet their needs as they are perceived locally.

Third, we must be clear in our purpose. Training programs are designed to prepare people for jobs and if we lose that orientation they become a disguised and inefficient form of income maintenance.

Fourth, we must have a system which is result-oriented rather than one in which the Federal Government is concerned with form rather than substance. We must measure outcomes and avoid nonproductive concern with process and procedure.

Last, we must devise a system in which the various parts are integrated rather than a panoply of separate systems that run without proper coordination.

In order to move the debate from broad principles into the direction of specifics, I believe that the following outline can be the basis for developing a new program. The principles below are not cast in concrete and they leave many important points for future discussion and negotiation but I hope they will be a useful point from which to begin the development of a new employment training program in our country.

OUTLINE OF A NEW APPROACH

I. THE DELIVERY SYSTEM

In order to accommodate the basic principles of business sector involvement and State flexibility with the need for a reasonable transition from one system to another, I propose the following.

1. PLANNING

A private sector-oriented council will be given the responsibility for planning the employment training program within a service delivery area. (See 2 below.) The exact composition of the council and the procedure for its appointment needs to be worked out but the following principles shall be controlling: The business community must have effective control; both State and local governments must play a significant role; and there must be appropriate representation of the needs of client groups.

This planning council will, it must be emphasized be a decisionmaking body, not an advisory one, and will determine the nature of the occupations to be trained for, the institutions to be used, the mix of services, that is, the basic structure of the program in the area.

2. SERVICE DELIVERY AREA

The Governor will be given discretion to change the service delivery area as defined under present law in order to make it more compatible with labor market needs and local realities. He will not be limited by uniform population criteria. States, at present, have bewildering variety of sub-State areas that are used for employment training-related purposes and business organizations are also organized on a variety of geographical bases. It is not possible, and certainly not desirable, for the Federal Government to define a uniform rule for the best geographical boundaries in which to organize and deliver employment training programs. The Governor is the one with knowledge of the State and his determination should be the controlling one.

3. GRANT ADMINISTRATION

The Governor will be given discretion to transfer responsibility for administering the grant from the present recipient to the council. It is expected that the Governor's discretion will be influenced by the capacity of the council to administer the grant, the administrative efficiency of the existing arrangements, and the desire of the business community to take on this additional task.

The Governor's discretion would be exercised on a case-by-case basis to take full advantage of the diversity of local situations. It is assumed that the council would subcontract its functions, other than planning.

The fundamental design of this system is that the Governor will determine the administrative components in his State. However, there is no Federal mandate requiring uniformity of results in the different States and the extent of change will, as it should, vary from State to State.

II. PROGRAM STRUCTURE

1. GRANTS

Under present law, localities receive five separate grants for employment

training. Under the proposal each service delivery area will receive a single grant of Federal funds for employment training with a minimum percentage to be spent on youth. This percentage will be determined by a formula based on local demographic factors.

2. DISTRIBUTION FORMULA

There will be a distribution formula to service delivery areas designed in such a way that changes in the area will not affect the level of funding.

3. ELIGIBILITY

Eligibility will be limited to the economically disadvantaged. Whether we can design a criterion that is more effective for targeting to those most in need of services that the current income test is an open question.

4. PERFORMANCE CRITERIA

The use of effective, comprehensible and enforceable performance standards is a key element in the new program. It is key for two reasons: First, the standards define the purpose of the program; second, their use permits the elimination of Federal regulations that concentrate on process rather than results. The performance criteria will be different for youth (under 18 or thereabout) and adult programs. For adult program, the measure will be earnings gained from preprogram experience to a representative period (perhaps 6 months) after program termination with some additional credit for reductions in income maintenance payments and/or termination from the welfare rolls.

While the basic standard will be Federal, some provision will be needed for State adaptation of that standard to take account of local conditions. For youth, the measure will be the acquisition of competencies which are determined by the council as acceptable in the local labor market.

5. SERVICES

Funds may be used for any service deemed by the council to be necessary for preparing persons for productive employment. However, allowance payments and other income transfer payments would be either prohibited or limited to cases of extraordinary circumstances.

This outline deals only with decentralized programs. Federal programs for special populations (such as Indians or migrants) and the Job Corps are left for later considerations.

III. THE EMPLOYMENT SERVICE (THE WAGNER-PEYSER ACT)

Under current law, the employment service operates under a State plan prepared by an agency designated under State law. There is no effective means of coordinating its activities with those of the training agencies. Under the proposal, the private sector-oriented council would be given planning authority for the employment service in the service delivery area. This plan would be reviewed at the State level. Vesting planning authority over both the training and employment service systems in a single private sector-oriented council will provide an institutional mechanism for coordinating these two systems and avoiding the duplication of effort that all to frequently exists today. This mechanism, rather than a Federal definition of roles, was chosen to provide for maximum flexibility to adapt to local circumstances.

IV. A BROADER LOOK

This outline has not addressed a number of vital concerns. To name a few: The relation to vocational education, the dislocated worker, the problems of shortages in critical skills, and the relationship of affirmative action to training programs.

RELATION TO VOCATIONAL EDUCATION

I hope that the council with planning authority over training programs and employment services can be a useful implement for other labor market activities. Perhaps, at State option, it could provide a link to vocational education and perhaps vocational rehabilitation services. Clearly, such linkages must be available and should be explored either in this, or in other legislation. We must insure that Federal legislation does not stand in the way of State and local initiatives to merge or coordinate labor-market related programs.

THE DISLOCATED WORKER

The dislocated worker must be a matter of particular concern. Whether formerly employed in a declining industry or occupation, he differs from the disadvantaged worker in that he does have a substantial employment record but he shares with that other worker a future just as bleak. He must have an opportunity for retraining or for relocation—the difficult question in the present context is how and by whom that opportunity can be provided. We must, at least, make sure that those opportunities are provided while the worker is drawing unemployment compensation and not wait until those payments have been exhausted. We must explore possibilities of identifying workers who have no reasonable expectation of return to their industry or occupation within the first few weeks of their drawing unemployment compensation and offer them the opportunity of retraining through existing vocational institutions. The planning council could play a significant role in setting criteria for identifying such workers and the appropriate training for them.

SKILL SHORTAGES

The actual and potential shortages of workers with critical skills needed both for defense readiness and for a reviving and productive economy was a constant theme in the hearings before the subcommittee. While the problem is clear, the appropriate solutions are not, and neither is the question of the appropriate role of the Federal Government. Among approaches that deserve exploration would seem to be: Building a training component into procurement contracts requiring the use of critical skills; carefully targeted tax credits for upgrading and on the job training in selected situations; simplifying the rules governing the donation of Government surplus machines and equipment to vocational schools to enable them to upgrade the quality of their instruction; and amendments to both the Vocational Education and the Defense Production Acts to emphasize the need for, and provide resources for, training in the highest skill levels.

AFFIRMATIVE ACTION

Training of persons for jobs for which they do not qualify—from entry level to the highest level—is the best way to insure that all segments of our society can take their rightful places in the job market. Our training programs lack a structural connection with the affirmative action program; they often work at cross purposes when they should be mutually reinforcing. New employment training legislation must have provisions that encourage employers to hire, train and upgrade the disadvantaged as one means of meeting their affirmative action responsibilities.

CONCLUSION

We are at the very beginning of developing new legislation and I look forward to working with interested persons in moving from this broad framework to an enactable program. I have, of course, been in close touch with the administration and know that we will work together toward a program that can be an integral part of the President's program for economic recovery.●

SUCCESS STORY

● Mr. METZENBAUM. Mr. President, it is always inspiring to come across a good and honest success story—an idea born, a business started and a profit made, all amidst much hard work. I have come across a perfect example of such a success story in the case of Martin Blinder and Larry Ross.

Martin Blinder, before coming up with the idea of starting the art publishing business, was 21 years old and the youngest stockbroker on Wall Street. During his 3 years on Wall Street, he became attracted to art as a unique investment which offers the added advantage of being aesthetically pleasing. He and Larry Ross decided to transform their hobby into a profession. Together they formed Martin Lawrence Limited Editions—with only an initial investment of $500.

They distribute such prominent artists as Salvador Dali and Victor Vasarely. Their success have made them one of the four or five top art publishing companies worldwide. Their publishing business, plus the sales of their six galleries in Hawaii and southern California, gross more than $20 million annually.

The best part of their success arises from their personal attention to detail. From the first step of selecting which original prints are to be produced to the last step of overseeing the work on the plates used to make the lithographs, they provide the direction. Their success is understandable.

Mr. President, I think Marty Blinder and Larry Ross are proof-positive that the free enterprise system still works, and success can still be attained by young entrepreneurs determined to succeed. Their success speaks well for the system.

Nation's Business did a great story on them, entitled "The Art of Making a Million." I submit it for the RECORD.

The article follows:

[From the Nation's Business, April 1981]

THE ART OF MAKING A MILLION

Anyone who still believes you have to have money to make money has never met Larry Ross and Martin Blinder. These two young men transformed their avocation into their vocation—and developed a thriving art-publishing business, making a million bucks in the process.

When the bearded team founded Martin Lawrence Limited Editions in 1975, they had little more to go on than determination and a keen appreciation for fine art. Both were art collectors and in their mid-20s. Their initial investment of only $500 went toward subleasing an office, buying a desk and obtaining a telephone.

Today their business, based in Van Nuys, Calif., a Los Angeles suburb, grosses more than $20 million annually. They own four galleries in Hawaii and two in Southern California and distribute limited editions of fine-art prints to some 1,200 other galleries throughout the world. Among the prominent artists they distribute are Salvador Dali and Victor Vasarely.

Such artists have chosen to work in the print medium to make their work available to more collectors. The artist and the publisher together select which original prints are to be produced in limited editions. The work is designed by the artist, printed under his direct supervision and then numbered and hand-signed by the artist. Each print is original in that the artist personally works on the plates used to make the lithographs. When the predetermined number of prints has been "pulled," the plates are destroyed.

Ross and Blinder attribute the success of their company—it is now among the top four or five art publishers worldwide—to creative marketing in an otherwise staid industry. "We take a Madison Avenue approach to fine art," says Blinder.

For example, in 1977, they offered Lincoln in Dalivision in an edition of 1,190 hand-signed lithographs, heavily advertised and imaginatively packaged in portfolios that included special viewing monocles and framable certificates of authenticity. When seen through the monocle from the proper perspective, Lincoln in Dalivision, otherwise an abstract, is a portrait of the American President.

Two other factors have also helped them succeed: The first is the continuing interest in art as an investment. "Often, the appreciation in value far outstrips inflation," says Blinder. He ought to know. After graduating from Adelphi University, he became, at 21, Wall Street's youngest stockbroker.

When Blinder and Ross offered Lincoln in Dalivision four years ago, the prints were priced at $750 each; today they sell for as much as $12,000. The original oil painting by Dali is also owned by Martin Lawrence Limited Editions. Asking price: $1.9 million.

The second success factor was an unexpected meeting in 1976 with Dali himself. At the time, Martin Lawrence Limited Editions was doing respectably well, buying and selling art and publishing the works of talented but little-known California artists. But the firm still had not published the work of a renowned contemporary artist, something Ross and Blinder knew could rapidly propel their young enterprise to success.

They decided on Dali, the master of surrealism and a legendary recluse, who they knew was staying at a New York hotel. They tried calling him. Dali answered. Ross and Blinder were astounded. "We lucked out," says Ross.

Three days later, they arrived in New York for a meeting with Dali's business manager and left with the rights to publish many of Dali's works. "Everything seemed to snowball after that," says Blinder.

So booming is their international business that travel to Europe has become routine. In fact, it is not unusual for them to conduct business in, say, Paris in the morning, New York in early afternoon, and Los Angeles over a late dinner—all in the same day! For those days they draw straws, literally. "The loser goes," says Blinder.

Despite such a frenetic schedule, they still manage to pursue interests outside of art. For Ross, a car collector, it is exotic and luxury automobiles; for Blinder, also a collector, it is comic books, baseball cards and "gadgets."

The $500 Martin Lawrence investment is still multiplying, with a gallery just opened in Sherman Oaks, Calif. Eventually they want to own a string of galleries around the world. They are also branching out into music publishing.

Financial success aside, Ross and Blinder derive personal fulfillment from what they do. "Many people think of art as being too expensive to own," says Blinder, "but we help make it possible for many individuals of modest means to enjoy both the esthetic and investment value of fine art." ●

QUAYLE EMPLOYMENT TRAINING PROPOSAL

● Mr. KENNEDY. Mr. President, one of the hallmarks of employment and training policy in this country has been bipartisan cooperation. Since 1961, when President John Kennedy first proposed the Manpower Development and Training Act, Republicans and Democrats have worked together on initiatives to train and place the disadvantaged and unemployed. Over the last 20 years we have launched a variety of programs to meet changing economic conditions and different national priorities. While programs and national needs changed during this period, the national commitment to assist the unemployed has been constant. Republicans and Democrats alike have recognized the Nation's economic well-being requires a trained and productive work force.

Rising unemployment and the current recession could jeopardize this consensus. Over 8.5 million Americans are currently out of work and the administration's own advisers predict unemployment will go to 9 percent and perhaps higher. Rather than moving to ease the difficulties facing the unemployed by providing jobs and training, the administration has indicated its intention to seek additional budget cuts in the very programs designed to assist these workers.

This shortsighted policy will significantly lessen the benefits of the President's economic recovery program for far too many. As history has shown us, a rising tide does not lift all boats. Only those with skills, education, and experience will be able to take advantage of the opportunities generated by an expanding economy. Even when times are good, there are millions of Americans working for less than a living wage. In 1979, 4.6 million people employed full time earned less than a poverty level income.

These individuals tend to be young, minority, from poor families and have less formal education than the average worker. Many of them are women heading households. These workers are hardest hit in a recession and are forced to rely on welfare and other forms of public assistance to make ends meet. These are the very individuals who can benefit most from training. Yet these are the individuals the administration is punishing when it eliminates training programs, curtails funds for vocational and adult education, and removes the incentives for the poor to seek work rather than welfare. Hopefully the administration's predictions for an end to the recession next spring will prove accurate and the economic recovery will take hold, but it is unlikely that those most vulnerable in an economic downturn will realize any of the benefits.

The decades of the 1980's and 1990's present another chance to address this critical problem. Unlike earlier decades when a surplus of unskilled workers competed for entry level jobs, economists are predicting a shortage of skilled labor for the rest of the century. Technological advances will create new industries, careers and occupations, and an unprecedented demand for trained workers. Declining birth rates, increased longevity and other demographic shifts will escalate the bidding for skilled employees. The labor surplus of the sixties and seventies will be gone. For the first time in this century, the demand for skilled workers will exceed the supply.

This changing economy offers both a challenge and an opportunity. The challenge will be to take seriously the predictions about our labor markets and use that knowledge to develop sensible policies to prepare people for new, more demanding occupations.

This dynamic also presents an opportunity to increase employment among the millions of disadvantaged and structurally unemployed by improving their skills to enable them to compete more effectively.

While the overall track record for CETA is mixed there is an increasing body of evidence that training is cost effective in improving the long-term earnings and employment of the disadvantaged:

Participants in classroom training earned an average of $300 more a year than a comparable group not in training.

Those who trained on the job earned between $400 and $900 more a year.

Almost 70 percent of those who completed training were employed 2 years after leaving the program and the vast majority were working in the private sector.

Every dollar spent for on-the-job training returns $2.18 in benefits to the community. Positive cost benefits are also realized for Job Corps and classroom training.

Other tangible benefits include reductions in crime, welfare payments, and other income transfers.

The issue in the reauthorization of CETA must be considered in light of this experience and the changing economy. The central question to be answered is, What Federal policy is most appropriate to meet the coming challenge and how can it most effectively be carried out?

Questions of resources and delivery systems should follow.

I commend Senator QUAYLE for having begun the debate and for recognizing the importance of the Federal role and the need for national leadership on this issue. I welcome the opportunity to work with him and other members of the committee to achieve a bipartisan approach to this important national problem.

The nature of the economic challenge we face suggests the principles of a revamped employment policy:

The need is to transform the crazy quilt of federally supported employment and training programs into a coherent system that can respond to the country's changing manpower needs.

This reform should not be limited to CETA. It should encompass the employment service, vocational education, WIN, and other related programs.

The responsibilities of Federal, State, and local governments must be reexamined. The proper role of business, education and labor must be sorted out. New partnerships must be forged.

Governors must play a greater role in coordinating related programs in their States, but decisionmaking should continue to rest with community officials most familiar with local needs. States can do more to monitor and evaluate the effectiveness of local programs in meeting national objectives.

Local elected officials, as the chief economic developers of their communities, must be participants in planning and directing human resource programs.

Business must be a willing and active partner if these programs are to succeed. If business is to hire program graduates, employers must have a say in designing programs that will produce the skilled workers they seek.

Labor must be at the table to represent the views, concerns and interests of workers. Experience both in the United States and abroad has shown labor management cooperation to be an effective means of solving the problems of dislocated workers.

Adequate resources should be budgeted to meet the country's critical employment and training needs. Ways should be found to augment limited public dollars with private sector resources.

Resources must be allocated in a way to maximize their impact on regions. communities and individuals with the greatest need.

Fewer Federal resources will require new economies of scale. One alternative is to reduce the number of separate jurisdictions funded directly from Washington. Financial incentives should be used to encourage smaller jurisdictions to combine their programs. Continued direct funding of major cities and counties should be provided.

A menu of labor market services should be available but priority should be given to identifying industries and occupations that are growing and providing workers with the training and education they need to compete for these jobs.

Services should be available to all workers, with the most expensive rationed according to a sliding scale of need.

Priority should be given to assisting those with the greatest problems—disadvantaged youth, women who are heads of households, and the structurally unemployed, dislocated workers from hard-pressed regions.

The objective must be to improve the employability and earnings of those who participate. More resources must be invested in the disadvantaged and the commitments made for a sustained period if the desired gains are to be achieved.

The special needs of youth must be dealt with through programs that emphasize basic education as well as work experience. Performance standards should emphasize benchmarks of employability rather than placement and short-term earnings.

For women the goal must be to narrow the earnings gap as well as increase earnings.

The system should be national while allowing local communities the flexibility to design the best means to solve both local and national problems.

A permanent authorization should be sought and a smooth transition from the current legislation arranged to minimize the disruption to communities and individuals.

I believe the principles I have outlined are compatible with many of the objectives Senator QUAYLE has proposed. I, too, look forward to continuing the public debate in the weeks and months ahead, and I welcome the ideas and comments of all who are interested in this important national issue.●

WHAT'S NEXT FOR CETA

● Mr. HATCH. Mr. President, our Nation is wrestling with many aspects of unemployment: Dislocated workers in distressed industries, training for the "hard-to-employ," job creation in the economy as a whole, attractiveness of welfare as an alternative to work, and the shortage of skilled labor in some industries. No one needs to be reminded of our 8 percent unemployment rate overall and our 19 percent rate for youth. The central question we face is how best to deal with the issues of unemployment and training. For many years we have dealt only with the symptoms of unemployment in the form of increased welfare benefits, public service jobs, and more Government spending for contracted services. Clearly we must take a longer look at such efforts, however well-intentioned, and develop a strategy which will address the underlying causes of unemployment and skills shortages.

One of the mainstays of America's program in this area has been the Comprehensive Employment and Training Act (CETA). Having undergone many evolutions since its inception in the early 1970's, it is time to step back and evaluate all of its components, their effectiveness, their costs, their accomplishments, and their potential to meet current demands on the labor market.

CETA is due for reauthorization next year and there is broad consensus that any revisions in it, whether they turn out to be major or minor, should be made only after exhaustive oversight of the existing program and its administrative apparatus, a thoughtful analysis of what goals are to be met in a Federal employment and training policy. I want to commend my colleague, Senator QUAYLE, for his initiative in holding early hearings by the Employment and Productivity Subcommittee to discuss some broad concepts in employment and training.

These hearings produced valuable input from current CETA prime sponsors, State governments, community-based organizations, private sector contractors, client groups, and business. All of these groups and individuals have helped the subcommittee enormously in shaping a tentative blueprint for the reauthorization of a federally-assisted employment and training program.

After the administration's views and recommendations are taken into careful account, there is no reason why the Labor and Human Resources Committee cannot proceed to a timely consideration of the new bill, a measure which I hope will have support from all sectors behind it, ranging from President Reagan to our colleagues on the other side of the aisle.

Allow me to emphasize one point, however, in conclusion. While CETA has contributed many measurable achievements to society, there is an indisputable need for some major changes in its construction and goals.

We should not settle for a reauthorization which perpetuates its worst aspects along with the good. Among that which needs to be done: The delivery system needs to be streamlined, regulations pruned, target populations better defined, performance standards instituted, the active participation of business in the actual planning and structuring of programs encouraged, and, finally, human capital development programs separated from income maintenance programs. If we can accomplish such a necessary overhaul, I have no doubt that the potential for improved effectiveness and accountability of these programs will justify their continuation.

I look forward to cosponsoring a bill along with Senator QUAYLE which incorporates these changes and which should have broad bipartisan support.●

FARNHAM DUDGEON

● Mr. HUDDLESTON. Mr. President, today I have the distinct pleasure of bringing to the attention of the Senate a newspaper article that appeared in the November 15, 1981, Frankfort State Journal. Although the story has as its major focus the history and future prospects of a building at the corner of Main and High Streets in Kentucky's capital city, it also has much to say about the life and forward looking attitude of one of Kentucky's outstanding civic leaders, the present owner of the building, my good friend, Farnham Dudgeon.

Farnham's attention to the nature of "lot 193" only serves to point up his keen awareness of the need to preserve our historical heritage in a functional, commonsense manner. This awareness is,

however, not restricted to matters of historical preservation.

In his positions as mayor of Frankfort, a city commissioner, and a leader of many community service organizations, Farnham has demonstrated time and time again an unsurpassed flair for recognizing the big picture. The State Journal's reference to Farnham's role in the development of the Capital Plaza, the cornerstone of the revitalization and continuing growth of the area, is a prime example. It is a truly wise man who has a broad enough historical perspective to preserve the integrity of a mid-19th century building while at the same time displaying enough foresight and initiative to play the key role in providing the impetus for the building complex vital to the future of Frankfort.

Such a man is my friend Farnham Dudgeon. I commend the aforementioned article concerning him and his little corner of the world to the attention of my colleagues.

The article follows:

SPIRIT OF LOT 193 LIVING ON E. MAIN

Dig down a foot or two in the ground around Frankfort and a part of the Capital City's illustrious history often reveals itself.

Studying bones, bricks, bottles, bullets, even shell-encrusted stones helps trace the development of Frankfort.

When a new sidewalk and steps were under construction at 100 E. Main, Farnham Dudgeon noticed pieces of red brick were uncovered during the excavation. Had he found a card of wool, perhaps a hat, or an old bottle of grog, the history of the corner lot at Main and High, which he purchased in 1954 as the result of an advertisement in the State Journal, would have been confirmed beyond doubt. Yet the chips of brick were further confirmation his lot once contained a tavern, which may have been named the Sign of the Cocked Hat.

For almost 30 years, 100 East Maine has been the home of Dudgeon's Community and Suburban Press Service, a weekly and daily newspaper syndicate. That's one of the lives of the structure on the familiar corner, referred to in older official documents as Lot 193 or the "Cocked Hat Lot." Since the turn of the 1800's, it has probably been the site of a hatting business and tavern, definitely a residence, Rebecca-Ruth Candy, Wiley Floor Covering and Appliances, a publishing and printing shop (Dudgeon's); in the months ahead it could become the home of a sophisticated computer. "Something was here before this building was built, there is an another foundation under it," he explained.

Blue and manila folders in Dudgeon's office hold much of the story of the corner lot, papers prepared by Nettie Glenn and William J. Hearn, Kentucky historians who have devoted a great deal of time and effort to study ing the Capital City's past. Their letters and studies trace the bricks and mortar, and the people who put them on the Cocked Hat Lot, number 193 in the old deed books. Dudgeon believes his, and other historic buildings in Frankfort, have a life, a spirit; to the Mod generation they have "vibes." And, they create a sense of attachment and vitality which, he believes, demands such structures be spiffied-up periodically, given a fresh coat of paint, a new sidewalk, an refurbished interior, even made the subject of a straw poll about shutters for the windows.

Dudgeon bought 100 East Main in 1954 from A. C. Wiley who moved his floor covering and appliance business to Broadway.

"When we took it over one of our first considerations was renovating it, to turn it to our needs. We considered restoring it to its original appearance . . . but we didn't . . . perhaps we didn't have the vision or the sense of history which exists today.

"We bought it to conduct a business. It had some historic value, although no famous person lived there that we know of. But we tried, as we went along, to adapt it, to keep it up," he said.

In 1954, only nine years after the end of World War II, the national and local emphasis was on urban renewal, tearing down aged, blighted areas and replacing old and dilapidated structures with modern, more functional buildings. The historic preservation movement, which in the past 20 years has saved thousands of structures of all kinds, was in its infancy and had a very small constituency. (Ironically, Dudgeon once served as chairman of the city's Urban Renewal Authority, and played a significant part in the development of the Capital Plaza.)

He was one of the first property owners in the post WWII era to renovate a downtown property. "We did it early, and I think it's a good example of what can be done with many pieces of property.

"If a building can be kept productive and useful, it ought to be renovated. It's better to make certain old structures functional rather than just eliminating them. After all, a building is, to a degree, a living, vital thing . . . it deserves care. Look at what renovation has done to buildings on Broadway, to the one which the courthouse will occupy . . ."

The present 100 East Main building, its stone walls between 18 and 24 inches thick, was erected between 1854 and 1871. A map of the city of 1854 didn't show it; the 1871 map did. "At one time it was probably a combination house and business, built by some sort of a tradesman who lived on the Main St. floor and had his shop on the High Street side. The simple lines indicate to me the builder came from a rural background, perhaps English or Irish. I've seen many buildings in Ireland which resemble it," Dudgeon said.

According to Hearn, the Sign of the Cocked Hat "refers to an early 1800 hatting business in Frankfort. Mr. James McClean owned and had his business on some part of Lot 193 in the first quarter of the 19th century." An advertisement in the Frankfort newspaper "Palladium" of November, 1801, announced a hatting business had been started in the "house lately occupied by Adam Caldwell by James McClean," and that he "hopes to merit a share of the public patronage by the unremitting industry and attention to the orders of his customers." In 1810 another newspaper advertisement in the "Argus of Western America" of 1810, it was announced the partnership operating the hatting business was dissolved and N. B. William Porter became the sole proprietor.

In her research of the history of Lot 193, Mrs. Glenn said a plat of Frankfort was recorded with the Clerk of the Court of Appeals in 1805, specifying lots in the city were to be rectangular and of equal size." The exception was Lot 193, "its triangular base resting on High St., its top pointing up Cemetery Hill." The sides of the triangle were Montgomery (now Main St.), Broadway and High. "It looks like a cocked hat lot," Dudgeon chuckled.

By 1815, Haydon Edward deeded Lot 193 which had been divided into smaller parcels, to Richard Taylor. "Entries seem to indicate," Mrs. Glenn explained, "that around 1814 innkeeper Richard Taylor decided to widen his business operations and he chose Lot 193 for this purpose. The thirsty traveler entered the tavern on the ground floor (High St.). To the right was a bar, to the left a fireplace with a wide and generous hearth where the cooking was done."

"Sleeping rooms on the second floor had three-quarter bunks or a double bed, chair, wash stand, pitcher and bowl."

And, there was the necessary privy in the rear of the tavern, situated on a very small lot which Dudgeon had to buy when he purchased the building.

The chips of red brick he saw when the new sidewalk and steps were built last summer which convinced Dudgeon a tavern preceded him some 170 years ago. Mrs. Glenn found an ordinance passed June 12, 1820, in which it was, "ordained by the trustees of Frankfort that the part of the lot commonly called the Cocked Hat frounting on Montgomery St. (Main today) which extends from the intersection of High and Montgomery to the part owned by Benjamin Hickman he and they are directed to make a foot pavement with brick at least eight feet wide, well secured with suitable line of kurb (sic) stones and graduated agreeable to the direction of the committee for supervising the pavement."

When the Capital Ave. bridge was completed in 1938, a traffic plan existed calling for Capital Ave. to be extended through 100 East Main to the area now occupied by the State Office Building. In 1954, just after he bought the site, Dudgeon was in City Hall and found out the city's master traffic plan called for the same extension to the location of the 14-story state building. The talking stage is as far as the proposal ever got.

"Thousands of people go by this corner every day. When we painted last summer we took down the shutters and debated whether to put them back. There was a great deal of comment pro and con so we conducted a straw poll. The shutters won. I've asked myself, how many lives does a building have?"●

RECORD OPEN UNTIL 4 P.M.

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today the RECORD be kept open until 4 p.m. today for the introduction of bills, resolutions, and RECORD inserts.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. BAKER. Mr. President, there is one item on the calendar today that is cleared for consideration on this side. and that is Calendar Order No. 390, Senate Concurrent Resolution 45. Could I inquire of the minority leader if that item is cleared on his side of the aisle?

Mr. ROBERT C. BYRD. The item has been cleared.

Mr. BAKER. I thank the minority leader.

RIGHTS OF THE PEOPLE OF AFGHANISTAN

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 390, Senate Concurrent Resolution 45.

The PRESIDING OFFICER. The clerk will state the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 45) expressing the sense of the Congress with respect to the rights of the people of Afganistan.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to the consideration of the concurrent resolution.

Mr. ROBERT C. BYRD. Mr. President, as a cosponsor of Senate Concurrent Resolution 45, I believe it to be imperative that the Congress go on record in expressing our deep concern over the continued occupation of Afghanistan by the Soviet Union.

Since the Soviet invasion, I have taken the floor no less than 15 times so as to keep attention focused on this brutal act.

It has been nearly 2 years since the Soviets sent 85,000 troops into that small nonalined Moslem nation, in a brutal attempt to bring that country into the Russian orbit. Yet, the people of Afghanistan have demonstrated a remarkable resolve against the occupation of their country by a foreign nation which holds values completely alien to all Afghans.

Last week, the United Nations General Assembly, by an overwhelming majority, urged the withdrawal of Soviet forces from Afghanistan. It was the third time since the invasion that the world community has censured the Soviet Union for that action. The vote in the United Nations, which was conducted on November 18, found 116 nations voting in support of the resolution, 23 opposed, with 12 abstentions. It was an impressive refutation of the Soviet occupation of Afghanistan.

The resolve of the Afghan resistance has been documented time and time again through press reports of journalists who have been smuggled into Afghanistan. The rebels have become more effective in carrying out coordinated attacks on Soviet troops and the remnants of the Afghan Army, most of whom have deserted to the rebel side.

The Soviets still maintain the capacity to take temporary control of rural districts. However, the rebels quickly return once they have left. Soviet convoys can travel the main roads only if they are heavily defended. The resistance has demonstrated an impressive capacity to inflict heavy casualties among Soviet troops who are armed with the most sophisticated weapons in their military arsenals.

Mr. President, the tenacity of the rebels is most impressive. But it is also a strong tribute to their great desire to recapture their status as a free and independent nation. They just will not allow themselves to become another satellite of the Soviet Union.

It is entirely appropriate for the Senate to go on record today in opposition to the continued Soviet aggression in Afghanistan. It demonstrates to all, friend and foe alike, that the United States has not forgotten this infamous deed perpetrated on the people of Afghanistan. It demonstrates we will not forget this occupation until the last Soviet troop is withdrawn from that country and the Afghans are left in peace to determine what form of government best suits them.

Mr. GRASSLEY. Mr. President, I rise to urge the adoption of Senate Concurrent Resolution 45, a resolution expressing support for the people of Afghanistan.

On November 19, the United Nations General Assembly voted overwhelmingly to condemn the Soviet invasion of Afghanistan. I was encouraged to note that the traditional majority, consisting of the Soviet Union, its allies, and nations professing nonalinement, did not hold together on the vote. Of the 78 nonalined nations, 65 voted in favor of the resolution, against only 13 in opposition. The debate in the United Nations and the approach of the second anniversary of the Soviet invasion on December 27, 1979, make consideration of this resolution a timely event indeed.

As I said when I introduced the resolution, my purpose is not to endorse any particular policy option. That is something for the Congress to debate in the future. The purpose of the resolution is simple; it expresses the support of the Congress of the United States, representing the people of the United States, for the people of Afghanistan in their struggle against Soviet imperialism.

Mr. President, I have said it before, but I think it bears repeating, that I am somewhat dismayed at the lack of sustained outrage in this country at the Soviet invasion of its weaker neighbor. Until the Soviet invasion, Afghanistan was a nonalined nation. It conducted its own foreign and domestic affairs and had actually made significant progress economically and socially in the decade of democratic freedoms and representative government brought about by the 1964 constitution.

Now, however, it has been brutally subjugated by the Soviet Union. As people who enjoy the freedom to participate in the Government of our Nation—freedom that has been secured and maintained at incalculable cost by previous generations—we ought to resolutely condemn the Soviet Union's cynical disregard for individual liberty and national sovereignty.

In her speech before the United Nations in support of the resolution to condemn the Soviet invasion, our permanent representative to the United Nations, Ambassador Jeane Kirkpatrick, made one of the most forthright statements on the invasion of Afghanistan and the subsequent brutalization of its people I have seen from an American official. Without objection, I ask that the text of Ambassador Kirkpatrick's speech be printed in the RECORD.

Mr. President, I do not anticipate that our consideration of the implications of the Soviet occupation of Afghanistan will end soon, because I do not anticipate that the Soviet occupation will end soon. I do hope, and firmly believe, that we will not forget our traditional commitment to individual freedom and national sovereignty when we consider our response to the invasion and occupation of Afghanistan.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

STATEMENT BY AMBASSADOR JEANE J. KIRKPATRICK

The Soviet invasion of Afghanistan, launched on Christmas Eve nearly two years ago, was a momentous event that altered the climate and, indeed, the course of world politics. The invasion was a grave violation of the United Nations Charter, which enjoins all Members to "refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state." As such, the Soviet invasion of Afghanistan shook the very foundations of world order.

The far-reaching consequences of this event should by now be apparent to all of us. It had a shattering effect upon the prospects for the continued stability of South Asia and the Persian Gulf, deepening anxieties throughout this vital region and raising the specter of a wider conflict. It also severely aggravated tensions between East and West. More than any single event in recent years, the Soviet invasion impelled a widespread reassessment of the world situation based upon a new and more sober appreciation of the danger that the policies of the Soviet Union now pose to global stability and world peace. The invasion thus marked a watershed in the postwar era, bringing to a definitive conclusion a period of optimism concerning the evolution of Soviet policy and intentions.

Nowhere, of course, have the consequences been more immediately or harshly felt than in Afghanistan itself. No sector of Afghan society has been spared the consequences of the Soviet occupation and the ruthless effort to impose upon the Afghan people a Communist totalitarian system—an effort that began in 1978 with the initial Communist coup overthrowing the Daoud government. Almost three million people, about one-fifth of the entire Afghan population, have been forced to flee their country and now constitute the largest single refugee group in the world. Tens of thousands of people have been killed. Afghanistan's educated class has been decimated. Whole villages have been destroyed, their inhabitants killed or forced to flee. Mosques have been desecrated and religious leaders jailed or murdered. Schools have been turned into centers of political indoctrination. The country's economic and social infrastructure of roads, power and communication networks, hospitals, and educational institutions has been badly damaged and in many instances completely destroyed.

It is rarely noted that Afghanistan made significant economic and social progress during the decade of democratic freedoms and representative government brought about by the 1964 constitution. All this—and more—has now been undone.

There have been many attempts in the past to conquer Afghanistan. But nothing in the country's long history—with the possible exception of the devastating attacks more than 750 years ago by Genghis Khan—resembles the destruction wreaked in Afghanistan since 1978.

The Soviet Union and the Kabul regime have tried to conceal this destruction by sealing the country off from journalists and other foreign observers, and from humanitarian organizations such as the International Red Cross. Nevertheless, the truth about the situation there and about the terrible human suffering is becoming known to the world.

How far the Soviets are willing to go in their war against Afghanistan is indicated by the kind of weapons they have used there, including little boobytrap mines which the Soviets scatter by the thousands along the paths used by refugees and other civilians. These mines are frequently disguised as ordinary household items or toys. Children, naturally the least wary, are the ones most likely to pick them up. If they do, they risk being killed or having their limbs blown off.

On April 10 of this year, the Soviet Union signed an international convention prohibiting the use of such weapons. At the time, its Permanent Representative to the United Nations called the convention "an illustrative example of the possibility of reaching

agreements on measures aimed at curbing the arms race." The real "illustrative example," however, is contained in the Soviets' continued use in Afghanistan of the kind of anti-personnel weapons prohibited in the treaty. It is an example that illustrates both the character of the Soviet Union's involvement in Afghanistan and its attitude—in this instance, at least—toward a treaty obligation. In this connection, there are many reports from refugees and other victims of the Soviet invasion that lethal and incapacitating chemical weapons are being used in Afghanistan, in violation of both the Geneva Protocol of 1925 and the Biological Weapons Convention of 1972.

It is not possible to justify the Soviet actions in Afghanistan according to any meaningful interpretation of international law. The sole exception to the proscription against the use of force in international relations is provided for in Article 51 of the Charter, which affirms "the inherent right of individual or collective self-defense if an armed attack occurs against a Member of the United Nations." But not even the Soviet Union itself has suggested that it has been the victim of an armed attack.

Moreover, it is hard to imagine how Afghanistan might conceivably have posed a threat to the Soviet Union. For decades the Soviet Union had proclaimed to the whole world, repeatedly, that its relations with Afghanistan were a model of peaceful co-existence, a prime example of neighborly relations between a small country and a big country, each with different systems of government and social structures, but living together in peace without interference. Since 1921 the two countries had signed numerous treaties, affirming and reaffirming Moscow's respect for Afghanistan's independence and territorial integrity and promising non-interference in Afghan affairs. It should not be forgotten, furthermore, that Afghanistan was a member of the Non-Aligned Movement and was not involved in any relationships that Moscow might look upon with concern.

How, then, could it have posed a threat? The argument is advanced that the Soviet Union felt threatened by the turmoil inside Afghanistan. But aside from student riots fomented by Babrak Karmal and his followers in 1965 and a brief period of unrest following the bloodless Daoud coup in 1973, there was no turmoil at all in Afghanistan before April 27, 1978—before, that is to say, the Communists violently seized power in Kabul and, with the help of growing numbers of Soviet "advisers," began forcibly to impose upon the people of Afghanistan a foreign ideology and a totalitarian system.

It is also suggested by apologists for the invasion that the Soviet Union feared that a tide of Islamic fundamentalism might sweep from Afghanistan into its Central Asian provinces. But even if this were true, it would hardly justify the Soviet invasion. In fact, the Afghans are a devout people, but they have not tried to impose their beliefs on others and historically they have allowed minority faiths to live peacefully within their midst. This attitude of tolerance is characteristic of the Afghans except when their faith itself is attacked, as it now is by Communism. They are not tolerant, nor should they be, of an attack upon their freedom, independence, and identity, of which their religion is an important part. But there should be no doubt whatsoever that the threat in this instance is to—not from—the people of Afghanistan.

The Soviet Union also claims, of course, that its forces were invited in by the Kabul regime, which invoked its right to self-defense under Article 51. But so far, neither the Soviet Union nor the Kabul regime has produced a shred of evidence to prove that such an invitation was ever issued. It is hard to imagine what kind of evidence they could produce since, as we know, the invasion preceded the installation of Babrak Karmal, who wasn't even in Afghanistan at the time his predecessor was overthrown and killed by invading Soviet troops. Of late, Babrak Karmal has taken the line that the invitation was issued by the Afghan Communist Party. This, of course, is actually an admission that the invitation was not issued by any government.

The Kabul regime, moreover, has no legitimacy whatsoever in the eyes of the Afghan people. It exists only by virtue of Soviet actions and is, in fact, merely an appendage of Moscow. Soviet personnel direct virtually all aspects of its administration, including the Ministries of Foreign Affairs, Defense, Interior, Information and Culture, Justice, and Economic Planning. Since 1979, Soviet personnel have also commanded the Afghan army down to the brigade level and sometimes down to the company level. The Soviets even control Afghanistan's natural resources, in particular natural gas, which are extracted in a one-sided barter arrangement in exchange for goods used to sustain the Kabul regime.

Suspicions have been raised that the Kabul regime may also have acceded, in a treaty signed earlier this year, to the annexation by the Soviet Union of at least a part of the Wakhan corridor, the narrow strip of land that joins Afghanistan with China. A de facto annexation has already taken place since the area—from which the indigenous Kirghiz tribes have been forced to flee—is now under the control of the Soviet army.

Given the Kabul regime's utter subservience to Moscow, it is hardly surprising that it should have no base of support among the Afghan people. It is propped up by 85,000 Soviet troops. Yet the freedom fighters—poorly armed and trained, and virtually defenseless against some of the most sophisticated weapons in the Soviet arsenal—have been able to deny the Soviets control of perhaps 90 percent of the countryside and have made them contest many of the most important cities. In a desperate attempt to stem the disintegration of the Afghan army, the regime has offered many times normal pay to former enlisted men. Yet still they do not turn up, while draft-age men continue to slip out of the cities to join the resistance and whole units of the army desert en masse. The regime has repeatedly offered an amnesty to refugees who would return to Afghanistan from exile. Yet every week the refugee centers in Pakistan and Iran swell by the thousands.

What is clear today was clear in 1979. Then, as now, the Kabul regime was not threatened by an outside power, justifying defense under Article 51, but was in fact threatened by a popular uprising, a spontaneous popular uprising, of the nation—of the people in whom nationhood inheres and solely inheres in the absence of a legitimate government. It was an uprising against a regime that had slaughtered its own people, destroyed their homes, sent almost half a million people fleeing into exile, and delivered the country to an alien force—an uprising that continues to this very day against the present regime and its Soviet masters.

It is this uprising, and this uprising alone, that is justified to invoke the right of self-defense, for it is defending the independence and very existence of the Afghan nation against a foreign and brutal domination.

Small wonder, then, that the Soviet Union is doing whatever it can to obscure the truth about Afghanistan. There is no other way to understand the charge—repeated by the Soviet Foreign Minister before this body in September—that the real source of the conflict in Afghanistan is foreign interference by the United States and China. This charge is ludicrous but also revealing, for it shows the lengths the Soviet Union is forced to go to conceal the real nature of its policy.

There are only two realities in Afghanistan today: the Soviet occupation and the Afghan nation, and neither is compatible with the other. The Soviet Union can conquer Afghanistan only by eliminating the Afghan nation. This the world must not permit to happen, for if Afghanistan is vanquished, no independent nation will be safe.

The draft resolution now before us, like its predecessors, seeks an end to the occupation of Afghanistan. It calls for:

Immediate withdrawal of all foreign troops;

Restoration of the sovereignty, territorial integrity and non-alignment of Afghanistan;

Restoration of the right of the Afghan people to choose their own form of government and economic and social system, free from outside intervention, coercion or restraint; and

Return of the refugees to their homeland.

My government is firmly committed to these terms.

The struggle of the Afghan nation for survival is consistent with the basic and most cherished purposes of the United Nations, which are to protect national independence and to maintain world peace.

It is only fitting, therefore, that the United Nations should affirm the basic and most cherished purpose of the Afghan nation, which is to regain its ancient homeland so that it may once again be independent and live at peace.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 45) was agreed to.

The preamble was agreed to.

The concurrent resolution (S. Con. Res. 45), with its preamble, reads as follows:

S. CON. RES. 45

Whereas the United States, as the leader of the free world, supports the rights of all peoples to self-determination;

Whereas all the countries of the free world provide practical cooperation where positive United States policy efforts are made;

Whereas the Soviet military invasion of Afghanistan deprives the Afghan people of their right of self-determination and their right to a government consistent with their traditions;

Whereas the Soviet Union is engaging in the systematic destruction of the lives and property of, and is attacking the traditional values of, the people of Afghanistan;

Whereas the Soviet Union is engaging in a systematic policy of economic exploitation in Afghanistan;

Whereas the citizens of the United States and of the rest of the free world must not be allowed to forget the plight of the Afghan people; and

Whereas the valiant Afghan resistance against Soviet aggression has not received the level of moral support and material assistance from the free world which such resistance deserves and requires: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress expresses its deep concern with the denial of the rights of the Afghan people by Soviet forces and recognizes the traditional commitment of the United States Government to the right of all peoples to independence and autonomy and the applicability of this commitment to the current situation in Afganistan.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE HUNGER STRIKE OF ANDREI SAKHAROV AND YELENA BONNER

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be discharged from further consideration of Senate Resolution 246.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 246.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 246) relative to the hunger strike of Andrei Sakharov and Yelena Bonner.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider the resolution.

Mr. MOYNIHAN. Mr. President, I thank the distinguished majority leader for his courtesy in discharging the Committee on Foreign Relations from the resolution and asking that it be laid before the Senate.

Mr. President, I ask that the distinguished Senators from Illinois (Mr. PERCY), from Rhode Island (Mr. PELL), and from Connecticut (Mr. DODD) be added as cosponsors of this resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. Mr. President, if the Senator would yield at that point, if I have not been added as a cosponsor, I would like to be added.

Mr. MOYNIHAN. I am happy and honored to have the Senator from Michigan (Mr. RIEGLE) added as a cosponsor. Mr. President, I ask unanimous consent that Mr. RIEGLE be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, it is with a profound sense of concern that I must rise this afternoon to report to my colleagues on the fate of Andrei Dimitrievich Sakharov, one of the world's most tireless crusaders for human rights and intellectual freedom.

Dr. Sakharov and his wife, Yelena Bonner, have commenced a hunger strike in Gorky, U.S.S.R., to press for the emigration of a young woman engaged to marry Mrs. Bonner's son. Reports have reached the West through friends of the Sakharovs and just this morning, I met with Dr. Shakharov's stepdaughter, Tanya Yankelevich, and his stepson, Aleksei Semyonov, who awaits the release of his fiance.

Dr. Sakharov apparently gave the Soviet leadership a month's advance notice of his intentions in a letter he sent to Soviet President Leonid I. Brezhnev and to the president and vice president of the Soviet Academy of Sciences, Anatoly P. Aleksandrov and Yevgeny P. Velikhov, respectively. Dr. Sakharov, most will recall, was elected to full membership in the academy in 1953 at age 32—an event unprecedented in the history of Soviet science.

Dr. Sakharov seeks nothing more than permission for the emigration of Yelizaveta Alekseyeva, the fiancee of Aleksei Semyonov, Mrs. Bonner's son by a previous marriage, who emigrated to the United States 4 years ago. Miss Alekseyeva lived with the Sakharovs in Moscow until Sakharov's exile last year. She was, at first, allowed to visit them in Gorky but of late, Soviet authorities have discouraged her travels. The Sakharovs were exiled to Gorky last year.

I should note, too, Mr. President, I have received the text of a letter which Dr. Sakharov managed to send to Mr. Robert Bernstein at Random House publishers in New York. Mr. Bernstein is chairman of the organization Helsinki Watch, which seeks to monitor the basket of provisions from the Helsinki accords dealing with human rights. Sakharov's letter, accompanied by a longer letter addressed to all his foreign colleagues, relates the physicist's sense of responsibility for his stepson and his daughter-in-law—they were married by proxy and await official ceremonies in the West—and says that he "cannot take a calm attitude toward their years of suffering." Sakharov notes that he is "counting on help" from those he addresses.

Mr. President, this lonely story from Gorky will receive ample attention in the West because the figure involved is no less than a brilliant Soviet scientist and the 1975 recipient of the Nobel Prize for peace. Yet it is a story surely repeated dozens of times each week in the Soviet Union, the result of repressive policies from a hateful regime that rules not through the consent of the governed but through the totalitarian devices of terror and intimidation.

Andrei Sakharov is, of sorts, a living icon. His story arouses in us all the deepest sense of sympathy not entirely because of who he is, but more because of what he tries to say to us all. He has become a symbol for the world of what it means to become a stranger in one's own land; a prisoner not of action, but of conscience.

If I might indulge the Senate a moment, I think it useful to recount precisely why Sakharov finds himself in exile. Of his career, we know much of its brilliant sparkle, of the remarkable work he did at the Lebedev Institute of Physics in Moscow which built the theoretical foundation for fusion physics. It is one of the ironies of our time that a man so devoted to peace should be so remembered for scientific work which led to the creation of mankind's first thermonuclear weapon. That Sakharov is widely considered the "father" of the Soviet H-bomb should not obscure the value of his work as a scientist. In a sense, his theoretical work also played a large role in setting physicists to work on the entire question of fusion physics and the peaceful application of fusion in energy research.

How did one so revered in the Soviet scientific community, one so honored by Soviet bureaucrats and politicians, reach the point of exile? Simply by speaking the truth, by asking questions profound, and by arguing in favor of the rights of the individual.

Looking back, it is difficult to imagine the subject of Dr. Sakharov's first criticism of official Soviet policy. It was not a tirade against the leadership; it was not a blatant overture to the West. It was merely an argument that gifted students in the Soviet Union should be allowed to study mathematics. Mr. President, that is how it all started.

In the years following Nikita Khrushchev's denunciation of Stalin, a debate of sorts began in the Soviet Union over education policy. Khrushchev had argued that students should spend time gaining "practical" experience as field or factory workers when they reached age 15 or 16. His proposal was perhaps anti-intellectual. It was also a veiled attempt to supplement the U.S.S.R.'s labor force—decimated as it was from the Second World War and the Stalin purges.

Sakharov and his colleague and friend, Yakov B. Zeldovich, argued that gifted students should be allowed to pursue their academic work uninterrupted. They did not make the argument explicitly—they did not need to—but their own careers were ample proof that the most brilliant of theoretical work in the sciences is frequently done by younger people. Sakharov and Zeldovich argued only that gifted students be allowed an exemption from the "practical" learning requirement. What followed was a rather extraordinary—in the Soviet context—public debate over educational reform—one of the first and most important discussions in the post-Stalin era. For the faceless Kremlin bureaucrats who hovered darkly in the shadows, the threat of such public debate was easy to comprehend. They would remember young Sakharov and they, we all know, would soon find occasion to depose Khrushchev.

Sakharov's maturation as a scientist may also have contributed to his growing sense that there were questions about Soviet society that needed to be asked. Though most of his work was unpublished in his years at the Lebedev Institute—that being the fate of those who labor on highly classified projects with significant military implications—Sakharov began turning his intellectual skills to the problems of the universe: quark theory, universe expansion, the distribution of matter. As his thinking evolved from particle physics to universe theory, so his intellectual criticism of the Soviet Union turned from matters of science education to sociopolitical questions.

We know from underground Soviet publications, especially the Chronicle of Current Events, that Sakharov's best-known essay, "Progress, Coexistence and Intellectual Freedom," circulated widely in samizdat circles in the late 1960's. We know of Sakharov's fascination with the Czech political and economic reforms in 1968 and his horror at the resulting Soviet invasion. We know that a memo he circulated in 1970 on the need for economic reform cost him a position he held at the Ministry of Medium Machine Building. And we know that Sakharov lent his considerable prestige and leader-

ship to the formation of a Human Rights Committee within the U.S.S.R., a committee which has served to coordinate and document the wealth of writing and commentary in the Soviet Union's diverse and vibrant dissident culture.

It is, perhaps, hard for us to understand how mere discussion and debate could pose such problems for a suspicious political leadership. There is much of the paranoia in the Kremlin of which we understand too little. But we know that Sakharov has paid an inordinate price for being outspoken, and for being courageous enough to say things quietly which had to be said. That he has now chosen to place his life in peril—that he is joined in this action by his wife—must cause us more than passing concern. Life is the one precious commodity which Sakharov has been allowed to keep. That he should now risk it in the name of truth and freedom is an event we cannot ignore.

In rereading Dr. Sakharov's thoughts on peaceful coexistence, we cannot help but be struck by the similarities to statements issued frequently by Soviet leaders and by U.S. Presidents. We have seen this week a profound commitment to nuclear arms control and reduction issued by our own President. President Reagan recalled a letter he wrote recently to President Brezhnev which said, in part:

> The peoples of the world . . . have very much in common. They want the dignity of having some control over their individual lives, their destiny. They want to work at the craft or trade of their own choosing and to be fairly rewarded. They want to raise their families in peace, without harming anyone or suffering any harm themselves.

Mr. President, these are the very principles for which Andrei Sakharov will now hazard starvation and, even, death. The Soviet leadership has refused his plea. Perhaps they will listen to the President of the United States and today, in offering the following sense of the Senate resolution, it is my sincere hope that they will listen to this body as well. We must associate ourselves with Sakharov's struggle for it is indeed the struggle of all those who cherish peace, freedom, and human dignity.

The resolution asks only that we acknowledge the courage of Dr. Sakharov and his wife and that the Soviet Union acknowledge the commitments it made at Helsinki. It is the least we can do, but do it we must.

Mr. President, Mr. Robert Bernstein, of the Association of American Publishers, has received from Dr. Sakharov a letter describing the circumstances that have led him to his hunger strike and the purposes thereof. It is entitled "A Letter to My Foreign Colleagues." I ask unanimous consent that this letter be printed in the RECORD along with the letter to Mr. Bernstein by which it was received.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OCTOBER 9, 1981.

ASSOCIATION OF AMERICAN PUBLISHERS,
MARTIN LEVIN,
ROBERT BERNSTEIN.

DEAR FRIENDS: I am aware of the interest you are taking in my plight and I am deeply grateful for it.

On November 22,* I and my wife Elena Bonner, having despaired to break through the KGB-built wall by any other means, are forced to begin hunger-strike demanding that our daughter-in-law Liza Alekseyeva be allowed to leave the USSR to join our son.

I repeatedly wrote on this matter, now I am telling about it in more detail in the letter to my colleagues which is enclosed.

I am counting on your help.

With profound respect,

Sincerely,

ANDREI SAKHAROV.

A LETTER TO MY FOREIGN COLLEAGUES

I have written frequently about my son Alyosha and his wife Liza Alekseyeva. After Alyosha's forced emigration three and a half years ago, Liza became the hostage of my public activity. Violating their own international obligations, the Soviet authorities are not giving her permission to emigrate; they are persecuting her, threatening her with arrest, attempting to deprive her of hope and drive her to despair.

In June, 1981, Alyosha and Liza affirmed their fidelity to each other by entering into marriage by proxy in accordance with the laws of the USA (the state of Montana).[1] Although the Soviet authorities do not acknowledge the validity of such marriage; it is, in any case, yet another affirmation of Alyosha and Liza's deep desire to be together.

According to the Helsinki Accords and other international documents signed by the USSR, such a desire is sufficient grounds for Liza to receive permission to emigrate.

I feel a direct responsibility for Liza and Alyosha's difficult fate and cannot take a calm attitude toward their years of suffering. That suffering has been entirely caused by their nearness to me, their confidence in me when I insisted that Alyosha emigrate thinking that Liza would be able to join him later on. I am ready to take responsibility for my own public and publicistic activities in accordance with the laws of the state and I demand an open trial. To use my son and his wife for revenge and to put pressure on me is unworthy, illegal, and intolerable.

There can be no question of any contact with my Soviet colleagues nor of any scientific work while this tragedy of my loved ones continues. It is precisely in this matter that I need help most of all and where, at the same time, such help has the best chance of being meaningful.

Twice I have addressed requests for intervention to the Chairman of the Presidium of the Supreme Soviet, Leonid Brezhnev. In July 1980 I sent him a telegram and in May, 1981 a letter. Neither my telegram nor my letter was answered.

I assume that neither of my requests reached Brezhnev nor even his office but were blocked by the KGB which thought that, having deprived me of my three Hero of Socialist Labor and other awards, the Presidium of the Supreme Soviet of the USSR had, in that fashion, sanctioned any other illegal actions against me.

It is precisely for that reason that I am asking my foreign friends to request the officials of their countries, upon contact with Brezhnev and other high-level Soviet leaders, to bring this problem to their attention and to work toward its resolution—this is the only method of breaking the KGB blockade.

Unfortunately, I still have no evidence of any efforts in that direction.

A year ago I addressed a request to the President of the Academy of Sciences of the U.S.S.R., A. Alexandrov and its Vice President E. Velikhov to defend me against hostage-taking, but I received no answer from them just as my repeated letters and telegrams to Velikhov received no answer.

In February, 1981 I wrote to Academician Ya. Zeldovich with whom I was connected by long years of co-work and by, I thought, friendly relations, and to Academician Yu. Khariton, the head of the Institute where I had worked for 18 years.

In June, 1981 I addressed the same request for help in Liza's case to Academician P. Kapitsa and to Academician B. Kadonteev who is working in controlled fusion. Ya. Zeldovich answered with a letter in which he categorically refused to help me, referring (I am convinced, without basis) to the shakiness of his own position supposedly revealed by his "not being allowed further than Hungary."[2]

Zeldovich, an academician, like myself a three-time recipient of the Hero of Socialist Labor award, had (as I did) access to secret information but was not involved in public or human rights activities. I did not ask him or the other academicians for public actions, only some quiet words.

Academicians Yu. Khariton, P. Kapitsa B. Kadontseev sent absolutely no replies to my letters. Zeldovich's answer and the position of other Soviet scientists has been a bitter disappointment to me, not only on the personal level but as a manifestation of a pernicious abandoning of responsibility and of the possibility of influencing events (I am not only speaking in connection with myself) and, at the same time, this was not done from considerations of principle but because of shamefully petty reasons.

I feel a wall of misunderstanding, indifference, and passivity around me. The tragedy of Liza and Alyosha continues and perhaps—if nothing changes—will last even longer. In this extreme position, after long and painful reflection, my wife, Elena Bonner, a veteran wounded in the Second World War, and I have made the decision to begin a hunger strike on November 22 to demand that Liza be given permission to emigrate from the USSR.

In communicating this decision I hope that you will understand the motives behind this step we are taking; its inner necessity for us in this tragic situation. In the past I have been on hunger strike in support of prisoners of conscience of the USSR.[3]

I consider the defense of our children just as rightful as the defense of other victims of injustice, but in this case it is precisely me and my public activities which have been the cause of human suffering.

I also think that this step is a continuation of my many years of speaking out in defense of the right to freely choose one's country of residence, the lack of which in our country leads to many tragedies.

I am counting on your help!

ANDREI SAKHAROV.

NOVEMBER 4, 1981.

ON DR. SAKHAROV'S "LETTER TO FOREIGN COLLEAGUES"

I would like to draw your attention to the fact that Dr. Sakharov's decision to begin

---

*"November 16" in the original, but later the date was changed.

[1] In fact, there is nothing in the Soviet Law that may prevent the authorities from recognizing a proxy marriage. Moreover, according to the Soviet Matrimonial Code (article 32) "marriages between Soviet citizens and foreigners when contracted outside the USSR provided that the formal requirements established by laws of the place of such contract are met are recognized as authentic (legal) in the USSR."

[2] Position that a person is holding in the Soviet hierarchy is frequently described in terms of where he is allowed to travel: only inside the country, to Eastern Europe (Hungary, for example), or to "capitalist countries."

[3] Dr. Sakharov was on hunger-strike in 1974 during President Nixon's visit to Moscow demanding release of V. Bukovsky and other prisoners of conscience.

a hunger-strike is a result of three years of intensive but unsuccessful and frustrating attempts to obtain permission for Liza Alekseyeva to leave the country.

Even in his first public statement from exile in January 1980 he repeated this demand: "Being in a state of complete isolation and anxiety for members of my family: for my mother-in-law and for my daughter-in-law Liza Alekseyeva—to whom I am no longer able to provide any protection—I demand that Liza Alekseyeva be given an opportunity immediately to leave the USSR." He has been mentioning Alekseyeva's case in the most of public statements ever since.

In November 1980 he broke his contacts with the Soviet Academy of Sciences, partially because of Academy's reluctance to act on behalf of Liza Alekseyeva. In the letter to participants of the Tenth European Conference on Controlled Fusion (Moscow, September 1981) Dr. Sakharov once again expressed his belief that Liza Alekseyeva is held hostage to exert pressure on him.

"The fact of someone's being held hostage because of me is unbearable"—he wrote.

Apparently Dr. Sakharov feels now that he had exhausted all "regular" ways to influence position of authorities toward Liza Alekseyeva.

Recalling the impact of the 1974 hunger-strike on his health I fear the consequences of his decision.

I hope this longstanding problem will be resolved before it will force Dr. Sakharov to resort to apparently the last option he has in his disposal.

Should you choose to undertake any immediate actions I would suggest to contact Soviet Embassy in your country and your country's delegations to the Madrid Conference on Security and Cooperation in Europe that recently has resumed its work.

EFREM YANKELEVICH.

Mr. MOYNIHAN. Mr. President, there was an article in the New York Times of Sunday, November 22, about a group of American scientists, including 18 Nobel laureates, and their efforts to bring about the objectives of Dr. Sakharov has set forth. Also, Mr. President, Tatyana Yankelevich, the step-daughter of Mr. Sakharov, and Alexey Semyonov, the stepson, came to Washington for the purpose of presenting a request that has previously been declined to the Vice Counsel of the Soviet Embassy requesting permission to visit the Soviet Union and their parents.

I ask unanimous consent that this letter be printed in the RECORD at this point, along with the New York Times article.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NOVEMBER 24, 1981.

His Excellency VICE CONSUL A. CHUPLYGIN,
Embassy of the U.S.S.R., Consular Division, Washington, D.C.

DEAR MR. CHUPLYGIN: For two years Soviet Consulate in Washington has been refusing on various pretexts to certify my formal invitation to my wife Elizaveta Alekseyeva to join me in the USA.

In August this year you have stated that Soviet law does not recognize our marriage contracted by proxy in Butte, Montana. I do believe that your statement is incorrect and our marriage is, indeed, legal under Soviet law according to the article 32 of the Matrimonial Code of the USSR. I also doubt if you are in position to pass judgment on this subject.

However it became clear that here is no procedure available to me to challenge your decision not to certify my invitation to my wife.

Thus I am asking you for an entry visa to go to Soviet Union for the purpose of confirming our marriage in Moscow in accordance with Soviet procedure.

My sister Tatyana Yankelevich, her husband Efrem Yankelevich and I also wish to visit our parents Yelena Bonner and Andrei Sakharov in Gorky. As you know actions of the government you represent forced them to begin a hunger-strike on November 22nd. Being in a state of grave concern over their health and life, we wish to see them as soon as possible. The necessity to see them is especially urgent since nobody is allowed to visit them.

We urge you to issue visas immediately,

Sincerely yours,

ALEXEY SEMYONOV.
TATYANA YANKELEVICH.
EFREM YANKELEVICH.

[From the New York Times, Nov. 22, 1981]

U.S. SCIENTISTS APPEAL TO BREZHNEV OVER SAKHAROV

(By Fox Butterfield)

BOSTON, Nov. 21—American scientists have sent messages to Leonid I. Brezhnev, the Soviet leader, and to President Reagan to try to avert a hunger strike by Andrei D. Sakharov, the dissident physicist, which he has said he will begin Sunday to press for the emigration of his stepson's fiancée.

The messages were signed by 25 scientists, including 18 Nobel laureates, among them two winners this year for physics, Nicolaas Bloembergen of Harvard and Arthur Schawlow of Stanford.

At the same time, a number of scientists and specialists on the Soviet Union expressed concern that there was little that Americans could do to influence Moscow because of cutbacks over the last few years in academic exchanges.

The reductions are a result of earlier protests over Soviet human rights violations and the intervention in Afghanistan, as well as a decrease by the Reagan Administration in Federal financing for exchange programs.

EXISTING BAN ON SEMINARS

The National Academy of Science for example, has for the past year imposed a total moratorium on all group exchanges with the Soviet Union for activities like scientific seminars. Under Mr. Reagan's proposed budget for fiscal year 1982-83, grants for the Fulbright program, one of the main academic exchange programs, are to be slashed 40 percent.

"There's not much the American scientific community can do for Sakharov," said Marshall I. Goldman, an economist who is associate director of the Harvard Russian Research Center.

"The fishing line has already been drawn in so much, there's nothing left to pull in. This shows that the point about linkage is that it works as long as there is something to link."

Dr. Sakharov said earlier this week through a letter that he and his wife, Yelena Bonner, had decided on the hunger strike because they had exhausted all other ways to persuade the authorities to let his stepson's fiancée, Yelizaveta Alekseyeva, emigrate to the United States.

STEPSON EMIGRATED 4 YEARS AGO

The stepson, Aleksei Semyonov, who is Miss Bonner's son by an earlier marriage, emigrated four years ago and is a graduate student in mathematics at Brandeis University in Waltham, Mass. They were married last summer in a proxy ceremony in Montana that the Soviet Government does not recognize.

Dr. Sakharov says the Soviet Government is preventing Miss Alekseyeva from leaving as a form of revenge and pressure to curb his public activities. Dr. Sakharov was exiled from his home in Moscow to the industrial city of Gorky 22 months ago.

In a bizarre addition to his original letter describing his plans for the hunger strike, Dr. Sakharov has since charged that the secret police, the K.G.B., have threatened to kill him, using the fast as a cover, and blame his death on Miss Bonner. Dr. Sakharov went on a brief hunger strike in 1974 at the time of President Nixon's visit to Moscow to protest the detention of dissidents.

The scientists' messages to Mr. Brezhnev and Mr. Reagan were organized by Edward D. Lozansky, an émigré physicist whose own wife and son have also not been permitted to leave the Soviet Union.

Among the Nobel laureates who signed are Linus C. Pauling, chemist; David Baltimore and George P. Wald, biologists, and Walter Gilbert, microbiologist.

In addition, Lipman Bers, a Columbia University mathematician who heads the Committee on Human Rights of the National Academy of Science, has organized a letter of protest signed by 25 scientists, including 10 Nobel laureates, mostly in physics. The letter, to be sent to the editor of The New York Times, appeals to the Soviet Government to let Miss Alekseyeva emigrate.

"What possible harm to the Soviet state could result from this young woman's emigration?" the signers ask.

Mr. RIEGLE. Mr. President, I commend the Senator from New York for his initiatives on the matter he has just raised. This is a vitally important matter. I am not only pleased to cosponsor this with him but to add my voice to his in bringing more attention and concern to this vital matter in which these persons are suffering conditions of deliberate hardship in the Soviet Union.

Mr. MOYNIHAN. Mr. President, I thank the Senator and I thank the distinguished majority leader for allowing the Senate to do something which, let us hope, is not the last we hear of this matter. But let us not fail to recognize the tragedy of the situation in Gorky at this moment.

I thank the Chair.

Mr. PERCY. Mr. President, I wish to congratulate Senator MOYNIHAN on his timely and important initiative, and associate myself with it.

We sometimes lose track of the fact that people asking to emigrate from the U.S.S.R. are not asking for something extraordinary, or contrary to Soviet law or policy. The Soviet State itself signed up to this right in the Helsinki Final Act.

With Sakharov, the Soviet State long ago admitted defeat. He is one of those human beings who always concentrates on what is true, and what is right, not on what is expedient. Soviet authorities failed utterly in a long series of ploys to buy him off, or intimidate him into silence. They finally sent him to Gorkiy, where foreigners are not allowed, hoping the outside world would no longer hear from him or remember him. But the world has continued to hear from Sakharov in Gorkiy, and none of us can forget this brilliant scientist who repudiated his own nuclear discoveries in the cause of peace, and has so consistently called on his native land to honor the basic human rights of its citizens.

Now the Soviet Government is reduced to the pettiest of harassments, in denying permission for the Soviet fiance of his stepson to join her intended abroad. With characteristic courage, after hav-

ing exhausted other means, Sakharov and his wife are now risking their lives in protest. We can do no less than to honor their protest by urging Soviet authorities to change their minds.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 246) was agreed to.

The preamble was agreed to.

The resolution (S. Res. 246), with its preamble, reads as follows:

S. RES. 246

Whereas Andrei Dimitriyevich Sakharov has worked tirelessly and courageously for many years to secure basic human freedoms for citizens and residents of the Soviet Union, particularly those rights and freedoms proclaimed and guaranteed by the Final Act of the Conference on Security and Cooperation in Europe, signed at Helsinki, August 1, 1975;

Whereas Andrei Sakharov was awarded the 1975 Nobel Prize for Peace for his love of truth and strong belief in the inviolability of human beings, his courageous defense of the human spirit, and for his role as the conscience of mankind;

Whereas Andrei Sakharov has been an eloquent and outspoken champion of dissidents in the Soviet Union who have sought to have their government abide by its formal commitments to protect human rights, and who have suffered at the hands of the Soviet state in consequence;

Whereas Andrei Sakharov has been subjected to villainous harassment, punishment, loss of his livelihood, and acts of physical violence by agents of the Soviet state in retaliation for his activities in defense of human rights;

Whereas the harassment and persecution of Andrei Sakharov by the Soviet state has been aggravated by the refusal of Soviet authorities to allow Yelizaveta Alekseyeva, his stepson's fiancé, to join her intended husband, Aleksei Semyonov, in the United States, in flagrant violation of the Helsinki accords signed by the Soviet Union;

Whereas Andrei Sakharov and his wife Yelena Bonner have announced their intention to commence a hunger strike on Sunday, November 22, 1981, in protest of this refusal by Soviet authorities because in Doctor Sakharov's words, they have found the "exploitation of the fates" of Mr. Semyonov and Miss Alekseyeva "for revenge and pressure against me to be mean, illegal, and intolerable";

Whereas the American people share the outrage of Doctor Sakharov and his wife at this illegal refusal of Soviet authorities to allow Miss Alekseyeva to emigrate; and

Whereas the Government of the Soviet Union is responsible and accountable for the fate of Andrei Sakharov and his wife, Yelena; Now, therefore, be it

Resolved, That it is the sense of the Senate that the Congress associates itself fully and completely with the hunger strike protest by Andrei Sakharov and urges the Government of the Soviet Union to abide by its commitments and to permit Yelizaveta Alekseyeva to emigrate.

SEC. 2. The Secretary of State is requested to transmit to the Government of the Soviet Union a copy of this resolution.

Mr. MOYNIHAN. Mr. President. I move to reconsider the vote by which the resolution was agreed to.

Mr. RIEGLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN. I thank the Chair.

DISAPPEARANCE OF SISTERS JEAN REIMER AND HELEN LAVALLEY IN GUATEMALA

Mr. RIEGLE. Mr. President, yesterday I was shocked to learn of the disappearance in Guatemala of two Dominican nuns who have been doing missionary work in that country. Sisters Jean Reimer and Helen Lavalley were both from the State of Michigan. Their abduction—if their disappearance turns out to be that—would be a dismal ending to a grisly year of bloodshed in Guatemala.

According to published reports, 1981 witnessed the execution of over 120 Guatemalan citizens, including women and children, between April and June, as well as the assassination in July of Rev. Stanley Rother and the murder on September 13 of John Troyer, a Mennonite missionary. But even these statistics, as horrifying as they are, do not begin to tell the whole story. There is every reason to believe that murders and kidnappings in remote regions of the country often go unreported. Nor can we begin to imagine the fear that such a reign of terror instills in the population.

Mr. President, it is time we did something to put an end to the slaughter of our own citizens abroad and to the unrestrained brutality of governments whom we support with military and economic aid. The United States has to take a firm stand in opposition to martial government. We must speak out unambiguously against murder. We must stand up for the basic rights of all citizens.

We do not have to stand idly by while our innocent missionaries are abducted and governments we underwrite commit outrageous acts of violence against helpless civilians. We need a thorough investigation of the disappearance of Sisters Jean Reimer and Helen Lavalley. I have circulated a telegram addressed to the President of Guatemala demanding that the disappearance of the two nuns be examined immediately; and I would welcome additional cosignatories.

Finally, Mr. President, I would submit for the record the conclusions of a recent inquiry into human rights abuses in Guatemala, prepared by the Organization of American States. As remarkable as this document is for its condemnation of the Guatemalan regime, it is more remarkable still for its authorship. For it was prepared by Latin Americans themselves, and it demonstrates that Guatemala is guilty of unremitting crimes of aggression against its own people and others it regards as undesirable. This document reinforces the urgent need for us to take action to bring to an end the continuing spiral of death and violence in Latin America, to publicly question our overall policy in that part of the world, and to uphold our obligation to protect the lives and well-being of our citizens abroad.

Mr. President. I ask unanimous consent that the materials to which I have referred in my remarks be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 16, 1981]

OAS RIGHTS UNIT BLAMES GUATEMALA FOR "GREAT MAJORITY" OF KILLINGS THERE

The Inter-American Human Rights Commission has declared the government of Guatemala responsible for a "great majority" of the "thousands of illegal executions" that have occurred in the Central American nation in the last four years.

In a 134-page report distributed yesterday, the seven-member commission concluded that the military government—which the Reagan administration has vowed to support through resumption of military aid—has "instigated or tolerated" an "alarming" level of violence generally.

The commission is an autonomous agency of the Organization of American States. Its reports on rights violations have particular impact in the Western Hemisphere as a judgment by peers. This impact is enhanced because of the standard practice of offering the accused government exhaustive opportunity for rebuttal.

Guatemala, despite occasional declarations that it had nothing to hide, refused repeated efforts by the commission to make an on-scene investigation. As detailed in the report, the commission also received scant cooperation through official exchanges that resulted from denunciations filed by the families of victims.

As a result of its compilations, however, the commission found that those assassinated in Guatemala "are for the most part leaders of opposition political parties, union members, priests, lawyers, journalists, teachers, and thousands of peasants and Indians" killed by "security forces or groups of paramilitary civilians acting with the close collaboration of government authorities."

Noting the absence of any prosecution of rights violators, the commission recommended "total reorganization of the judicial system," giving it the power and resources to prosecute "without fear of reprisals" those responsible.

A spokesman of the Reagan administration, retired Gen. Vernon Walters, discounted rights violations in Guatemala when he made a visit there in May. The U.S. government sought congressional repeal of strictures against military aid but encountered resistance because of Guatemala's record of rights violations. Nevertheless, a $3.2 million sale of military trucks was made in June.

A State Department official said yesterday that the administration agreed not to attempt further military aid without consulting Congress and "no formal consultations" are now under way.

The OAS rights commission also issued a detailed report yesterday on massive, continuing violations in Bolivia. The United States has refused to deal with the military government there because of its alleged ties to the drug trade as well as its human rights performance.

ORGANIZATION OF AMERICAN STATES HUMAN RIGHTS REPORT—CONCLUSIONS AND RECOMMENDATIONS

A. CONCLUSIONS

1. In the light of the events and considerations described above, as a general conclusion the Interamerican Commission on Human Rights points out the alarming violence which has been manifested in recent years in Guatemala, which has been instigated or tolerated by the government, which has not adopted the necessary measures to stop it. This violence has translated into an extremely high number of lives and signifies a generalized deterioration in human rights established by the American Convention of Human Rights.

2. If it is true that the number of victims produced by this violence has reached all

sectors of the society—including the Armed Forces and those who control political and economic power—there is no doubt that the violence has had its greatest impact on leaders of opposition political parties, trade unionists, priests, lawyers, journalists, professors and teachers, as well as thousands of peasants and indigenous peoples who have been assassinated.

3. In the great majority of these cases, deaths caused by the violence can be attributed to the illegal executions and disappearances carried out by the security forces or paramilitary groups who are acting in close collaboration with government authorities, without these authorities providing adequate investigation as to the authors of these crimes.

4. These illegal executions and disappearances, besides violating the right to life, have created an endemic climate of extreme insecurity and terror, which signifies a subversion of the State of Law and, in practice, inhibits the great majority of the sacred rights of the American Convention on Human Rights.

5. The generalized violence which exists in Guatemala has signified, as has been demonstrated in different chapters of this report, that the right to personal freedom, to security and integrity, to justice and due process, to freedom of belief and religion, freedom of thought and expression, to free association, as well as political rights, are by these acts seriously affected and limited, nevertheless the Constitution and Guatemalan law give formal recognition to these rights.

6. The great socio-economic disparities which exist between various sectors of the Guatemalan population have contributed to generalized violence in the country. These disparities, among other aspects, are manifested by the total lack of relationship between the economic growth which Guatemala has experienced in recent years and the quality of life of half of the country's population, whose economic and social rights especially in respect to basic necessities in health, nutrition and education are not fulfilled.

B. RECOMMENDATIONS

In consideration of these conclusions, the Interamerican Commission on Human Rights makes the following recommendations to the Guatemalan Government:

1. Take adequate measures to prevent the occurance of gross violations to the right to life; terminate the participation and tolerance of government authorities and paramilitary groups in the violence and terrorism; investigate and punish rigorously those responsible for such acts.

2. Investigate and punish with full rigor of the law those responsible for illegal executions, disappearances, arbitrary detentions and torturing.

3. Guarantee the liberty of association, the right to meetings, and trade union rights guaranteed in the Guatemalan Constitution and the American Convention of Human Rights.

4. Carry out a profound and total reorganization of Judicial Power which will make this possible. Once the human and material resources are available, give them sufficient autonomy and power to investigate with efficiency and depth human rights violations and to sanction without fear of reprisals, those who are found responsible for these abuses, who ever they may be.

5. Initiate a broad dialogue with the participation of all sectors of Guatemalan society which can contribute to end the violence and allow a solution to social and economic problems through peaceful and democratic processes.

Mr. RIEGLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AN EXPRESSION OF THANKS AND BEST WISHES

Mr. BAKER. Mr. President, the Senate has been in session 9 consecutive days, totaling 76½ session hours, and recording 51 rollcall votes. This does not include the long hours which the conference committee contributed.

Admittedly, this situation has been far from ideal. I am aware that the long hours have been most difficult for Members and their families, for staff members and their families, and for everyone that plans the day around the Senate clock. I know that there are no doubt better things that could have been done this past weekend outside of legislative activities.

But, Mr. President, I am also aware that our presence throughout this difficult period was vital and indeed essential. It was an obligation that was as imperative as anything else we do in our legislative lives.

I wish to once again thank all my colleagues for the patience and cooperation that they have extended to the leadership, and to everyone, the best at Turkey Time.

ADJOURNMENT UNTIL MONDAY, NOVEMBER 30, 1981

Mr. BAKER. Mr. President, admitting now for the record there were times in the last 2 weeks when I thought this moment would never arrive, I now move, in accordance with the provisions of House Concurrent Resolution 228, that the Senate stand in adjournment.

The motion was agreed to; and at 1:05 p.m. the Senate adjourned until Monday, November 30, 1981, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate November 24, 1981:

DEPARTMENT OF STATE

John Hathaway Reed, of Maine, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic Socialist Republic of Sri Lanka, and to serve concurrently and without additional compensation as Asbassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Maldives.

The following-named Career Members of the Senior Foreign Service, class of Career Minister, for the personal rank of Career Ambassador in recognition of especially distinguished service over a sustained period:

Alfred Leroy Atherton, Jr., of Florida.
Arthur W. Hummel, Jr., of Maryland.
Walter J. Stoessel, Jr., of the District of Columbia.

THE JUDICIARY

J. Owen Forrester, of Georgia, to be U.S. district judge for the northern district of Georgia vice Newell Edenfield, retired.

Sam A. Crow, of Kansas, to be U.S. district judge for the district of Kansas vice Frank G. Theis, retired.

DEPARTMENT OF COMMERCE

Peter McCoy, of California, to be Under Secretary of Commerce for Travel and Tourism (new position).

FEDERAL ELECTION COMMISSION

Joan D. Aikens, of Pennsylvania, to be a Member of the Federal Election Commission for the remainder of the term expiring April 30, 1983, vice Max Friedersdorf, resigned.

Lee Ann Elliott, of Illinois, to be a Member of the Federal Election Commission for a term expiring April 30, 1987, vice Joan D. Aikens, term expired.

CONFIRMATIONS

Executive nominations confirmed by the Senate November 24, 1981:

THE JUDICIARY

Jesse E. Eschbach, of Indiana, to be U.S. circuit judge for the seventh circuit.

James C. Cacheris, of Virginia, to be U.S. district judge for the eastern district of Virginia.

Richard A. Posner, of Illinois, to be U.S. circuit judge for the seventh circuit.

John H. Moore, II, of Florida, to be U.S. district judge for the middle district of Florida.

David V. O'Brien, of the Virgin Islands, to be U.S. district judge for the district of the Virgin Islands for the term of 8 years.

Clyde H. Hamilton, of South Carolina, to be U.S. district judge for the district of South Carolina vice Robert F. Chapman, elevated.

DEPARTMENT OF JUSTICE

Jim J. Marquez, of Kansas, to be U.S. attorney for the district of Kansas for the term of 4 years.

Robert N. Miller, of Colorado, to be U.S. attorney for the district of Colorado for the term of 4 years.

James M. Rosenbaum, of Minnesota, to be U.S. attorney for the district of Minnesota for the term of 4 years.

Ronald D. Daniels, Jr., of New Hampshire, to be U.S. Marshal for the district of New Hampshire for the term of 4 years.

HOUSE OF REPRESENTATIVES—*Tuesday, November 24, 1981*

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

REGISTRATIONS

The following registrations were submitted for the third calendar quarter 1981:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§302(e).

(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the third calendar quarter 1981:

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§302(e).
(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)

6. $.....TOTAL for this Quarter (Add items "1" through "5")
7. $.....Received during previous Quarters of calendar year

8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $.....''Expense money'' and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and address of Contributor* ("*Period*" from Jan. 1 through....., 19.....)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures

9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year

11. $.....TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

A. Robert J. Aagre, 1615 H Street NW., Washington, D.C. 20062.
B. Chamber of Commerce of the United States, 1615 H Street NW., Washington, D.C. 20062.
D. (6) $1,171. E. (9) $192.

E. (9) $7,500.

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following reports for the second calendar quarter of 1981 were received too late to be included in the published reports for that quarter:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)

6. $.....TOTAL for this Quarter (Add items "1" through "5")
7. $.....Received during previous Quarters of calendar year

8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $.....Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and address of Contributor* ("*Period*" from Jan. 1 through....., 19.....)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures

9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year

11. $.....TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

A. Action for Children's Television, 46 Austin Street, Newtonville, Mass. 02160.
D. (6) $26,220.36. E. (9) $727.

A. Actors Equity Association, 165 West 46th Street, New York, N.Y. 10036.

QUARTERLY LOBBY POSTCARD

The following Quarterly Lobby Postcards were filed with the Clerk of the House of Representatives for the third calendar quarter of 1981:

A POSTCARD MAY BE USED WHEN A REGISTRANT HAS NOT INCURRED REPORTABLE RECEIPTS AND EXPENDITURES AND HAS NOT ENGAGED IN ANY LOBBYING ACTIVITY DURING THE QUARTER.

NOTE: THE FOLLOWING INFORMATION IS BEING PROVIDED FOR INFORMATIONAL PURPOSES ONLY.

The Postcard has been reproduced below:

HLF3

QUARTERLY LOBBY POSTCARD

To be submitted in lieu of a Quarterly Report when registrant has not incurred reportable receipts or expenditures and has not engaged in any lobbying activity during the quarter.

IMPORTANT: File a separate postcard for each employer or client

REGISTRANT_____

Business Address_____
(*number, street/P.O. Box*)

_____ _____
(*city, state, zip code*)

Employer_____

(If REGISTRANT is an agent of someone OTHER THAN "EMPLOYER" state below whose interest is represented. If not applicable, state "NONE".)

CLIENT_____

For the period (check one box only): 19____

☐ April 10 Report (Jan. 1—Mar. 31) ☐ Oct. 10 (July 1—Sept. 30)

☐ July 10 Report (April 1—June 30) ☐ Jan. 10 (Oct. 1—Dec. 31)

I certify that the above named registrant did not engage in any lobbying activities or incur reportable receipts or expenditures in connection with previous or future lobbying activities. I am aware that the Act requires a resumption of reporting in the event that activity commences; otherwise I can continue to submit a postcard in lieu of a report.

HOUSE OF REPRESENTATIVES—*Monday, November 30, 1981*

The House met at 12 o'clock noon.

Rev. Don Duvall, pastor, First Baptist Church, Dripping Springs, Tex., offered the following prayer:

Lord, we pray that You would teach us how to live and love so we can be an example to others. Help each of us to have a vision of complete honesty and freedom.

Give us the courage to seek Your wisdom and knowledge and the strength to stand on sound convictions as we make decisions each day.

Make us aware that faith properly used can still move mountains; love properly used can change worlds. This we pray in Jesus' name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last legislative day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a concurrent resolution of the House of the following title:

H. Con. Res. 220. Concurrent resolution providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1098) entitled "An act to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes."

The message also announced that the Senate had passed bills and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 708. An act to amend and clarify the Foreign Corrupt Practices Act of 1977;

S. 1192. An act to amend the National Visitor Center Facilities Act of 1968 to provide for the rehabilitation and completion of Union Station in Washington, District of Columbia, and for other purposes; and

S. Con. Res. 45. Concurrent resolution expressing the sense of the Congress with respect to the rights of the people of Afghanistan.

WHITE HOUSE CONFERENCE ON AGING

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, in the past, White House Conferences on the Aging have produced important results in legislation affecting the elderly. Medicare and the Older Americans Act are two outstanding contributions of past conferences.

Today, the 1981 Conference opens and the heavy shadow of White House politics has already cast doubt on the outcome. I and many Members of Congress are hopeful, Mr. President, that you will lift the restraints that have been placed on the representatives of our 26 million senior citizens. If there ever was a need and a time for free expression to help this important segment of our country, it is now.

Mr. President, you, as the oldest elected President of the United States, should recognize that the elderly have a great deal to contribute. Please give them a chance.

CHAIRMAN ROSTENKOWSKI CALLS FOR NEW, REALISTIC ECONOMIC POLICY

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. STARK) is recognized for 5 minutes.

● Mr. STARK. Mr. Speaker, on November 19, 1981, our colleague, the chairman of the Ways and Means Committee (Mr. ROSTENKOWSKI), addressed the members of the American Stock Exchange gathered in Chicago on the state of the economy and on the desperate need for a new, more realistic economic policy by the administration.

Our chairman's speech was both challenging and thought provoking. I would like to include it at this point in the RECORD for the benefit of all the Members.

Our colleague's speech documents how the tax bill of this summer "went too far" and why the administration and the business community must now work together with the Congress to repair the damage:

He (the President) has got to make it clear that he is prepared to accept some trade-offs between tax increases and budget cuts; between deeper cuts in domestic programs and smaller increases in defense spending. He's got to get out of the laboratory—and out on the streets where social and economic policy is ultimately made.

Mr. Speaker, the full text of Mr. ROSTENKOWSKI's speech is as follows:

I've spent so many years defending presidential policy that I find the role of "Mr.-I-told-you-so" not only strange, but uneasy. Many of you on the American Stock Exchange supported the President's tax and budget bills. I and most others in Congress—Democrats and Republicans—shared (and continue to share) the President's original goals of increased savings, investment and productivity. We all agreed that capital formation incentives were needed to rev up productivity. Last April, when the Administration was still talking about two tax bills, I introduced the original list of savings and investment tax reforms—including expanded individual retirement accounts and Keogh Plans for long-term savings and a drop in the maximum tax rate capital gains from 70 to 50 percent.

Where most Democrats ultimately disagreed with the President was over the size and duration of the tax cut. My original proposal of a one-year, $40 billion tax bill ran smack into an ideological wall. The notion that Congress would willingly extend—or even increase—the personal tax cut if the economy grew was rejected by the President and his supply-side advisors. Instead, they demanded (and won) a three-year cut—followed by an indexed income tax system—amounting to $750 billion over the next five years. They put all their chips on the table. There was no hedging against the possibility that the economy would fail to take flight. Apparently, no one (with the belated exception of David Stockman) had the least doubt that Americans would be less than bullish on Reaganomics.

Matching $750 billion in tax cuts against $200 billion in budget cuts (completely putting aside defense spending) does not invite overconfidence from the "hard money" managers. A balanced budget in 1984—the battle cry of Reaganomics—has now been abandoned. The resulting Federal assault on the credit markets will only stiffen long-term interest rates.

David Stockman's candid admission that the Administration's economic assumptions were little more than wishful thinking—that the pursuit of political victory overrode any consideration of economic reality—have futher destroyed faith in the President's economic theories.

No one ever told us that a full blown recession was to initiate the supply-side miracle. No one told us that unemployment would reach nine percent—or that economic growth may only hit one percent for all of next year.

No longer is the Administration talking about a shallow recession. Predictions of a strong recovery by mid-year are less and less convincing, as the supply-siders jockey for position with the monetarists for dominance at the White House.

The President is receiving little help from his own party in Congress—especially those who face election next year. Senate Republicans are backing away from budget cuts and looking hard at tax increases as a way of closing the enormous deficit gap.

So much for history. The onset of a recession—contrary to all forecasts—is not novel to Washington. Nor are the embarrassing contradictions and disarray within the Administration.

The question is "what now"?

It's the President's call. He has proven himself a formidable politician—an unquestioned leader who can arouse public support and focus the heat on Congress. The country wants Ronald Reagan to succeed.

But, Wall Street and business leaders like you are not going to cling to Reaganomics in its present form. From now on, seeing is believing. The President must send a strong message to the financial markets that the day of the "rosy scenario" is over—that he is ready to produce a credible budget, based on credible economic assumptions and credible odds of fighting it through Congress.

The President has two choices as he presents his budget in January. He can "hang tough," claiming that Congress is to blame for the recession. And then add billions more in social cuts to the list for 1983 and beyond.

Or he can concede that his theory was faulty and return to a more conservative approach to the boom and bust syndrome in national economic policy by adopting a formula that tempers today's highly expansive fiscal policy and tight monetary policy.

He may not be able to balance the budget in 1984, but it's absolutely essential to give you in the private sector the confidence that deficits can be brought down to manageable levels.

And that means setting a new balance of spending and tax measures next year. It's going to take a bit of tongue biting and political moxie, but the President must face the fact that the tax bill went too far. The revenue hemorrhage is too great. He's also got to face the fact that Congress is indeed a representative body—that we're a pretty fair measure of how much punishment this nation will take—that budget cuts, especially in social programs, have very real, very human, limits.

He's got to make it clear that he is prepared to accept some trade-offs between tax increases and budget cuts; between deeper cuts in domestic programs and smaller increases in defense spending. He's got to get out of the laboratory—and out on the streets where social and economic policy is ultimately made.

Until you and the millions of Americans who invest in your companies believe that economic policy is shifting to a sounder foundation, interest rates will continue to strangle growth. All those billions of dollars in capital formation incentives will sit out there gathering dust. The tentative equilibrium between wages and prices will break down and the inflationary race will be on. And bitterness bred by the highest rate of unemployment since the Depression will turn the economic debate into a political street fight.

Business pressure provided the margin of victory for the President's original economic plan. The euphoria of last November's mandate for change—the prospect of so many billions of dollars in tax relief—and the residual frustration with Washington—presented an invitation you couldn't turn down. I'll never forget trying to turn around a vote on the tax bill as the telephones rang off the hook in the next office, and telegrams from CEOs and plant managers arrived in mail sacks. More than any other factor in the closing days of the tax debate, the business lobby tipped the balance. Take it from a man who's fought this fight for 23 years, it was a superb performance.

But that season is over. Much of what was said last summer has faded; much of what was promised is forgotten. The economy is now headed into winter. And the mandate for change is even more critical now than it was a year ago. The business sector has proven its power to force change. You have a unique compact with this Administration. It's time you returned to the White House and the Treasury with an appeal for realism. If dogma continues to prevail over discretion, next year will be traumatic.

I am not a lawyer or an economist. I am a pragmatic politician—a realist. I am chairman of the Ways and Means Committee, the most critical economic forum in Congress. The last thing we wanted in 1981 was a political battle over the economy—and it's the last thing we want in 1982.

If the economy continues to slide at its present rate, the country can't stand the delay of a political battle.

You have the opportunity to use your influence not only to change the structure of economic policy—but also in the way that policy is brought to Capitol Hill. I hope you can convince the Administration that it is far more productive to seek compromise with Congress than an all-out political victory over Congress. A new era of diplomacy along Pennyslvania Avenue would be a welcome turn.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BEILENSON) to revise and extend their remarks and include extraneous material:)

Mr. STARK, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. COELHO, for 5 minutes, today.

Mr. ALEXANDER, for 30 minutes each day on December 7, 8, 9, 10, and 11.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. BEREUTER) and to include extraneous matter:)

Mr. NELLIGAN.

Mr. GILMAN.

(The following Members (at the request of Mr. BEILENSON) and to include extraneous matter:)

Mr. BEILENSON.

Mr. D'AMOURS.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. PEASE.

Mr. AUCOIN.

Mr. FAUNTROY.

SENATE BILL AND CONCURRENT RESOLUTION REFERRED

A bill and a concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 708. An act to amend and clarify the Foreign Corrupt Practices Act of 1977; to the Committee on Energy and Commerce.

S. Con. Res. 45. Concurrent resolution expressing the sense of the Congress with respect to the rights of the people of Afghanistan; to the Committee on Foreign Affairs.

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on November 23, 1981, present to the President, for his approval, a joint resolution of the House of the following title:

H.J. Res. 368. Joint resolution making further continuing appropriations for the fiscal year 1982.

ADJOURNMENT

Mr. BEILENSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 6 minutes p.m.) under its previous order, the House adjourned until Thursday, December 3, 1981, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2575. A letter from the Comptroller General of the United States, transmitting his review of the proposed rescissions and deferrals of budget authority contained in the message from the President dated October 23, 1981, pursuant to section 1014 (b) and (c) of Public Law 93-344; to the Committee on Appropriations.

2576. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a list of contract award dates for the period November 15, 1981, to February 15, 1982, pursuant to 10 U.S.C. 139; to the Committee on Armed Services.

2577. A letter from the Deputy Assistant Secretary of Defense (Facilities, Environment, and Economic Adjustment), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Naval and Marine Corps Reserve, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

2578. A letter from the Deputy Assistant Secretary of Defense (Facilities, Environment, and Economic Adjustment), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Army Reserve, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

2579. A letter from the District of Columbia Auditor, transmitting a report on "Acquisition and Renovation of 1133 North Capitol Street", pursuant to section 455 of Public Law 93-198; to the Committee on the District of Columbia.

2580. A letter from the Secretary of Transportation, transmitting a report on separation of passenger and freight operations in the Northeast corridor, pursuant to section 703(3)(B)(v) of Public Law 94-210; to the Committee on Energy and Commerce.

2581. A letter from the General Counsel, Department of Energy, transmitting notice of a meeting relating to the International Energy Program to be on December 1, 1981, in Paris, France; to the Committee on Energy and Commerce.

2582. A letter from the Director of Policy, Planning and Analysis, Department of Energy, transmitting the ninth report on the Economic Impact of Energy Actions covering the period July 1, 1980 through June 30, 1981, pursuant to section 18(d), Public Law 93-275; to the Committee on Energy and Commerce.

2583. A letter from the Secretary of State, transmitting notice of determination to furnish assistance to private sector organizations operating within the country of Nicaragua, pursuant to section 620(g) of the Foreign Assistance Act of 1961; to the Committee on Foreign Affairs.

2584. A letter from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

2585. A letter from the Assistant Secretary for Congressional Relations, transmitting a text of agreements between the American Institute in Taiwan and the Coordination Council for North American Affairs, pursuant to section 12(a) of Public Law 96-8; to the Committee on Foreign Affairs.

2586. A letter from the Assistant Secretary for Congressional Relations, transmitting notice of the State Department's intention to consent to a request by the Government of Brazil for permission to transfer certain U.S. origin defense articles to the Government of the Republic of Korea, pursuant to section 3(a) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2587. A letter from the Assistant Secretary of the Treasury for Legislative Affairs, transmitting additional reports of the International Bank for Reconstruction, and the Asian Development Bank, pursuant to public law; to the Committee on Foreign Affairs.

2588. A letter from the Secretary of Defense, transmitting the semiannual report on the activities of the audit, inspection, and investigative units of the Department of Defense, covering the period ended September 30, 1981, pursuant to section 8(a)(1) of Public Law 95-452; to the Committee on Government Operations.

2589. A letter from the Assistant Secretary for Administration, Department of Housing and Urban Development, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2590. A letter from the Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during October 1981, pursuant to section 234 of the Legislative Reorganization Act of 1970; to the Committee on Government Operations.

2591. A letter from the Comptroller General of the United States, transmitting a report on the Department of Defense's effectiveness and efficiency in managing land on military bases (PLRD-82-9, November 25, 1981); jointly, to the Committees on Government Operations and Armed Services.

2592. A letter from the Comptroller General of the United States, transmitting the third report, required annually by the Outer Continental Shelf Lands Act Amendments of 1978, concerning (OCS) wells to be shut-in or to flare natural gas, (EMD-8-17, November 19, 1981); jointly, to the Committees on Government Operations and Interior and Insular Affairs.

2593. A letter from the Plan Administrator, Farm Credit Banks of Omaha, transmitting the annual report of the District's Retirement Plan for calendar year 1980, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

2594. A letter from the Comptroller General of the United States, transmitting a report and recommendation concerning the claim of the Virginian-Pilot and the Ledger-Star for advertising provided for the Naval Facilities Engineering Command, Norfolk, Va., pursuant to the act of April 10, 1928 (45 Stat. 413, 31 U.S.C. 236); to the Committee on the Judiciary.

2595. A letter from the U.S. Trade Representative, transmitting a draft of proposed legislation to amend section 2 of the International Coffee Agreement Act of 1980; to the Committee on Ways and Means.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. RODINO (for himself, Mr. BUTLER, Mr. BROOKS, Mr. EVANS of Georgia, Mr. FISH, Mr. HUGHES, Mr. HYDE, Mr. IRELAND, Mr. JOHNSTON, Mr. MAZZOLI, Mr. MCCLORY, Mr. MOORHEAD, Mr. RAILSBACK, and Mr. WHITLEY):

H.R. 5106. A bill to amend the Clayton Act to modify the amount of damages payable to foreign states and instrumentalities of foreign states which sue for violations of the antitrust laws; to the Committee on the Judiciary.

By Mr. RODINO (for himself, Mr. EVANS of Georgia, and Mr. BUTLER):

H.R. 5107. A bill to amend title 28, United States Code, to provide improved retirement benefits for bankruptcy judges, and for other purposes; to the Committee on the Judiciary.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

226. By the SPEAKER: Memorial of the House of Representatives of the Commonwealth of Pennsylvania, relative to Americans listed missing in action during the Vietnam conflict; to the Committee on Foreign Affairs.

227. Also, memorial of the Assembly Legislature of the State of New York, relative to Ireland; to the Committee on Foreign Affairs.

228. Also, memorial of the Legislature of the State of Ohio, relative to enforcement of the antitrust laws of the United States; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. BARNES introduced a bill (H.R. 5108) for the relief of Jane Dubs, Catherine B. Hanna, Mona Hardee, and Jane Herndon-Smith, which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 2: Mr. STUMP.

H.R. 374: Mr. MATSUI.

H.R. 375: Mr. FORD of Tennessee and Mr. MOTTL.

H.R. 2007: Mr. QUILLEN and Mr. HUTTO.

H.R. 2102: Mr. ROBERTS of South Dakota, Mr. MINETA, Mr. DOUGHERTY, Mr. JAMES K. COYNE, Mrs. CHISHOLM, and Mr. CARNEY.

H.R. 2782: Mr. SPENCE, Mr. WILSON, Mr. LOTT, Mr. WHITTAKER, Mr. HUTTO, Mr. FROST, Mr. GOODLING, and Mr. BEVILL.

H.R. 3595: Mr. BEDELL, Mr. BROWN of California, Mr. SIMON, Mr. HUTTO, Mr. GRAY, Mrs. CHISHOLM, Mr. HOWARD, Mr. FAUNTROY, Mr. WON PAT, Mr. FORSYTHE, Mr. HUGHES, Mr. STOKES, and Mr. DYSON.

H.R. 4673: Mr. MINETA and Mr. JAMES K. COYNE.

H.R. 4773: Mr. FORSYTHE, Mr. WEAVER, Mr. PORTER, Mr. KOGOVSEK, Mr. GINGRICH, Mr. BURGENER, Mr. SENSENBRENNER, Mr. FRENZEL, Mr. JAMES K. COYNE, Mr. WILSON, Mr. GREGG, Mr. GEPHARDT, Mr. MORRISON, Mr. JEFFORDS, Mr. MOLLOHAN, Mr. CHENEY, Mr. MCCLORY, Mr. CLINGER, Mr. EDGAR, Mr. BLILEY, Mr. HILER, Mr. ARCHER, and Mr. CONABLE.

H.R. 4815: Mr. MCDADE, Mr. BEVILL, and Mr. SMITH of Pennsylvania.

H.R. 5004: Mr. MCEWEN, Mr. WYLIE, Mr. HALL of Ohio, and Mr. HOLLAND.

H. Con. Res. 192: Mr. MOLLOHAN.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

292. The SPEAKER presented a petition of the Council of the Village of Wayne, Wood County, Ohio, relative to the deregulation of natural gas prices; which was referred to the Committee on Energy and Commerce.

SENATE—*Monday, November 30, 1981*

The Senate met at 12 noon and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Father in Heaven, we thank Thee for the blessings of the Thanksgiving recess, for caring times with family and friends; for relaxation, rest and renewal. Now these next 2 weeks the Senate faces imponderables, stubborn issues, which defy solution. In this place, Father, is concentrated the greatest personal and political power in the modern world. Yet it seems that nothing done here really works. Despite all the study, debate, struggle, and decision, international tension grows, the economy continues to decline, divorce, family failures, alcoholism, drug abuse, violence, crime, youth rebellion increase to epidemic proportions. It is almost as if the best efforts of this powerful body are an exercise in futility.

Lord God, more than human wisdom is called for. Grant to the Senators and their staffs superhuman ability to address the impossible in the resources of Almighty God. Do in our midst what God alone can do. Break in and through our human best, that justice, truth and peace may prevail. In the name of God we pray. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

BREATH

Mr. BAKER. Mr. President, while returning to Washington after Thanksgiving, my mind traveled to Dorothy and her immortal words, "Oh, Auntie Em, there's no place like home."

Tom Absher, in his poem, "Breath," walks along a somewhat similar path, and I ask unanimous consent that his poem may be printed in the RECORD.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

BREATH

Sometimes late at night I am drawn into my
children's rooms to stand by their
beds and watch them sleep.
With the house quiet I can hear each child
make a soft groove in the darkness.
Everything in the room moves inside that
rhythm, the gentle gathering entering
deeply in the body then the smooth
deliverance.
The sound holds me to it and I feel my own
breath joining in our one whisper
passing through the silence like a sail.

ORDER OF PROCEDURE TODAY

Mr. BAKER. Mr. President, according to my recollection and in keeping with the order entered before the Senate adjourned for the Thanksgiving holiday, there is a unanimous-consent order to dispense with the reading of the Journal, to provide that no resolution shall come over under the rule, to dispense with the call of the calendar, and to provide for a 30-minute period for the transaction of routine morning business with speeches therein limited to 5 minutes each. Is my recollection correct?

The PRESIDENT pro tempore. The majority leader is correct.

Mr. BAKER. I thank the Chair.

Mr. President, at no later than 1 p.m., according, also, to an order previously entered, the Senate will turn to consideration of H.R. 4995, the Department of Defense appropriations bill. It is my hope that good progress can be made on that measure today. I shall consult with the distinguished managers of the bill in the course of the day on how long they feel the Senate can act profitably on this measure. I am prepared to ask the Senate to remain reasonably late this evening if progress can be made on this measure, for it will be my hope that the bill can be completed by tomorrow at the close of business.

Mr. President, there are a number of other matters that can be taken up, including a number of appropriation bills that I hope can be disposed of before it is necessary for the Senate to consider another continuing resolution.

POSTPONEMENT OF RESOLUTION TO PROVIDE TELEVISION/RADIO COVERAGE OF SENATE PROCEEDINGS

Mr. BAKER. Mr. President, I am sensitive to the fact that scheduling the activities of the Senate is an arduous task and that the schedule itself is an arduous undertaking at best. As is often the case, countless constraints and priorities throughout a legislative session do not permit each item which has been reported by a committee to be considered immediately. Senate Resolution 20, which provides for television and radio coverage of the proceedings of the Senate, has been on the calendar since August 13, but the Senate's legislative agenda has been overflowing due to the necessity of formulating a sound economic program for our country. As a result, there has not been enough time to consider each and every legislative possibility.

Mr. President, it was my original hope that the Senate would be able to consider Senate Resolution 20 sometime this year. Because we are already nearing the end of the session and because I believe that this matter should be brought before the Senate without the pressures of the clock, I am today announcing that it is not my intention to proceed with the consideration of Senate Resolution 20 until we reconvene in January of next year. This arrangement should afford each Senator the opportunity publicly to state his opinion on this important concern and to be in a position to participate in the debate when the leadership asks the Senate to proceed to that matter sometime after we reconvene in January.

H. STUART KNIGHT RETIRES AS DIRECTOR OF U.S. SECRET SERVICE

Mr. BAKER. Mr. President, today a man well-known and well-loved by Members of this Senate is retiring—H. Stuart Knight, Director of the U.S. Secret Service. It is a privilege for me to pay tribute both to the extraordinary contribution he has made to the Federal law enforcement profession—and to him personally as a friend and colleague.

Stu Knight has served in the Federal Government for 35 years—32 of those years in the Secret Service. As Director of the Secret Service for the past 8 years, he has unquestionably added to the stability of this Nation—by watching over the safety of the President of the United States.

We would expect a man in his position to possess exceptional skill and ability in his field, and Stu Knight does. But he has brought an added ingredient to his office that has earned the respect of all who have known him. Throughout his career, Stu Knight has exemplified the term "public servant." Without fanfare, he has expended his full energies and resources to fulfill the obligation of his office. And he has done so without partisanship to any person or office. This caliber of leadership is needed throughout the Government. But it is critical in the organization he heads and in the field of law enforcement.

Very recently Members of this Senate listened to testimony reflecting the quality of Stu Knight's leadership. We rose to applaud the heroic, selfless dedication of the men who saved President Reagan's life on March 30. This was one of many episodes during Stu Knight's tenure when we on the Hill, and, indeed the Nation, have stood in awe of the dedication and professionalism of the men and women of the Secret Service.

But the ultimate honor goes to him, who, by example, molded the organization into one of the premier law enforcement agencies in the world today.

In his role as Director of the Secret Service, Stu Knight has worked with leaders of the international law enforcement community, as well as nearly every State and local law enforcement agency in this country. Without question, he has

extended the prestige and reputation of the Secret Service as an able, effective arm of the U.S. Government. This respect that he has earned for himself and his agency has indeed brought honor on all the rest of us in Government.

It is for these reasons that I extend my sincere gratitude to H. Stuart Knight for his contributions to the law enforcement profession, for his honesty, integrity, and leadership which has spanned the administrations of eight Presidents.

Mr. President, I ask that you and all my colleagues join me in saluting this outstanding citizen as he leaves office today. H. Stuart Knight has well earned our accolades and our sincere best wishes.

Mr. President, I have no further need for my time under the standing order. I am prepared to yield it to any Senator or to the control of the minority leader if he so wishes.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader. I shall accept his offer of the time.

THE GENEVA TNF TALKS

Mr. ROBERT C. BYRD. Mr. President, as my colleagues are aware, American-Soviet negotiations on nuclear weapons in the European theater begin in Geneva today.

There should be no misunderstanding as to where the Senate stands on these negotiations. I believe that the Senate completely supports the position and the proposals made by the President on November 18, 1981. I am convinced there is broad bipartisan support for sticking with the NATO Pershing II and cruise missile deployment decision unless the Soviets are willing to eliminate the cause of that allied decision—most particularly the deployment by the Soviets of medium-range ballistic missiles characterized as "SS–20's."

The negotiations will be tough and probably prolonged. There may be no progress for a full year. The Soviets can be expected to make offers and propose solutions calculated to manipulate European public opinion, particularly those elements of public opinion which sincerely oppose the NATO deployment decision. Our success in these negotiations should be measured by certain elements, among which are these:

First, whether we can effect a complete Soviet dismantling of its SS–20 force, or,

Second, whether the alliance will hang together and move forward with the TNF modernization schedule if the Soviet dismantling cannot be achieved.

This will involve American leadership which is at once flexible but strong; which is creative but unwavering; and which is sympathetic to European concerns but committed to an alliance which will not be bullied or blackmailed.

It is a test of NATO's resiliency, a test of American leadership, and a test of this administration's negotiating skill.

The Soviets are impressed only with determination, credible planning, and meaningful action. They may well perceive their interest to lie in stalling the talks, while offering superficially attractive counterproposals aimed at European public opinion. They can be expected to conduct discussions with our principal allies in order to probe potential cracks in NATO solidarity. The U.S. position in these talks is particularly complex since we are negotiating on behalf of the alliance and not simply on behalf of the United States.

This raises a point which some critics of the decision to deploy nuclear missiles on Western European soil seem to overlook. The TNF decision was a decision made by the NATO Alliance as an alliance. It was not some edict foisted on unsuspecting European governments by an American Government desirous of making Europe a superpower battleground. A number of our key allies were players in that decision. They remain central players. The decision must, therefore, remain an alliance decision.

There was legitimate reason for the TNF modernization decision in 1977. The deployment of SS–20 missiles by the Soviets is an act of supreme belligerency. The deployment has been ongoing at a furious pace. By July of 1981, the Soviets had placed 250 SS–20 launchers in the field capable of delivering 750 warheads. Most of these, some 175 systems, or 575 warheads, are aimed at Western European targets. Currently, another 65 SS–20 bases are under construction, with a new start undertaken every week. They are partially completed. An additional 100–150 bases are believed planned before the Soviet program is scheduled to reach its conclusion in the mid-1980's. This is a total of 1,395 warheads, with probably over 1,000 of them zeroed in on the cities and military bases of our European allies.

To illustrate the imbalance of forces in the European theater, I shall ask unanimous consent that a chart developed by the authoritative Institute for Strategic Studies in London be incorporated into the RECORD at the conclusion of my remarks. The chart shows that the Warsaw Pact has a total inventory of 4,430 long- and medium-range nuclear systems in the European theater, whereas NATO has a total of 1,512. By means of a complex formula, the institute arrives at the following comparisons:

The number of available warheads totals 2,004 for the Warsaw Pact, and 1,168 for NATO. The 1,168 total for NATO includes those warheads—some 400 of them—aboard U.S. Poseidon nuclear ballistic-missile firing submarines because they are in fact targeted on the Soviet Union.

Even more striking, if one excludes those weapons which can be delivered by aircraft, and considers only those warheads deliverable by ballistic missiles, one finds that the Warsaw Pact has an inventory of 1,335 systems, with 1,108 warheads "available" whereas the NATO alliance has 342 systems and 242 warheads available. The SS–20 component of the Warsaw Pact inventory comprises 410 of the 1,108 warheads considered available.

It can be readily seen that, even with the inclusion of Poseidon on the Western side, the balance is distinctly unfavorable to NATO, and becoming even more so as the Soviets continue to deploy more SS–20's. The NATO cruise and Pershing II missile program is the only alliance response designed to produce some semblance of balance between these systems. Surely the defeat of this deployment decision would be a psychological blow to the alliance and a major victory for the Soviets.

The "zero option" proposal endorsed by the NATO defense ministers in Scotland on October 21, 1981, which formed the basis of President Reagan's proposal announced last week, is really nothing new. It is but a restatement of the rationale for the original NATO decision. For without SS–20's, no NATO TNF deployment schedule would have been drawn up. So it stands to reason that if the original cause of the NATO deployment were to disappear, then the deployment should be canceled.

A second point is made by the critics of the TNF decision. It is claimed that European targets which can be demolished by the Russian SS–20 missiles can just as easily be demolished by retargetted Soviet intercontinental ballistic missiles. Europe is just as exposed. And American stubbornness in going forward with the NATO TNF modernization is needlessly exacerbating strains within the alliance, fueling an anti-American movement throughout Europe and putting unnecessary pressures on those European governments which strongly support the modernization program. The alliance, these critics claim, would be better off devoting its energies to the numerous economic problems besetting us all, rather than focusing on weaponry which will never be used or is superfluous.

What is one to make of this argument? What is the purpose of the Soviet SS–20 deployment in the first place? Why such a heavy investment in "purposeless missiles?" Is it so difficult to evaluate the psychology of this action? A key goal of Soviet diplomacy over the past 30 years has been the destruction of NATO. Any thinking American, be he a grocer, an auto worker, or a school teacher, can immediately recognize this Soviet behavior for what it is: It is the action of a bully designed to intimidate.

There is only one way to counter this kind of bullying, and that is to make life perceptively more difficult for the Soviet

regime. If the threat of the NATO TNF deployment is not absolutely real, is not a certainty, then the Soviets will continue to act with impunity.

Therefore, the Soviets should know that the Senate is providing strong bipartisan support on this matter, that we stand by our negotiators, and we will not countenance the tactic of intimidation. We support the TNF deployment schedule so long as the SS–20, SS–4, and SS–5 threat remains a reality in Europe.

Mr. President, I ask unanimous consent to have certain material printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ROUTINE MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business not to exceed 30 minutes, in which statements are limited to 5 minutes each.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. RUDMAN). Without objection, it is so ordered.

OUR LONG SILENCE

Mr. PROXMIRE. Mr. President, time after time, history shows us examples of man's inhumanity to man—his capacity

for hatred, his indifference to the plight of others. Most tragic is the tendency to remain silent in the face of great moral questions.

On November 17, Alexandra Johnson wrote an article for the Christian Science Monitor about one man who has not been silent. A man who has explored these unpleasant themes in book after book. This is Elie Wiesel, Chairman of the President's Commission on the Holocaust and author of several seminal works on human rights.

This article makes it clear that Wiesel did not choose his role in life. He was thrown into it by the sheer force of his childhood experiences. His father was killed before his eyes. Later his mother was separated from him at Auschwitz. He suffered through the destruction of his whole family and millions of other Jews around him.

He has spent the rest of his life attempting to keep alive the memory of these atrocities. For he believes that nothing threatens and diminishes man more than silence. He fights to make his voice heard not just to honor the victims of the Holocaust but to break the thickening silence surrounding present day atrocities—mass murder in Cambodia, the massacre in Biafra, human rights violations in Latin America; he has helped focus attention on all of these atrocities.

His need to bear witness to man's dark legacy comes with the realization that silence will not solve our problems. Those in power during World War II, notably the allied heads of government, knew about Nazi atrocities but did not act in time. Their silence cost humanity dearly.

After the war these leaders resolved never to allow another Holocaust to occur. The Genocide Convention was drafted for just that purpose. That was 1948, Mr. President.

Thirty-three years have now passed and we have yet to ratify this treaty. Our voice has been silent for too long. It is time for us to clearly state to the world our support of the right of every man to live. I urge my colleagues to join me in seeking ratification of this convention.

Mr. President, I ask unanimous consent that the article in the Christian Science Monitor be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ELIE WIESEL TRIUMPH OVER THE SILENCE OF THE HOLOCAUST

(By Alexandra Johnson)

In the preface to his latest novel, Elie Wiesel retells the story of the Just Man who tried to save Sodom from destruction. Ignoring his warnings, mocking him with silence, inhabitants shielded themselves with indifference. But still he persisted. Taking pity on him, a child asks, "Why do you go on?" "I'll tell you why," the teacher replies. "In the beginning, I thought I could change man. Today, I know I cannot. If I still shout today, if I still scream, it is to prevent man from ultimately changing me."

Of all Wiesel's parables, those literary prisms through which he refracts his questions, none comes closer in self-portrait and purpose than this one. Like the Just Man, Wiesel is burdened by the survivor's dark legacy: the need to bear witness. To tell the tale that cannot—but must—be told: the Nazi Holocaust, an event which he survived as an adolescent and which he's spent his adult life recounting. If in book after book he's chronicled man's inhumanity to man—the killer's capacity for hatred, the spectator's for indifference—he's also borne witness to the very dignity they threaten. Like the Just Man, he refuses to be contaminated by despair. Rather by witnessing he affirms life even if it means recounting all that conspires to reduce it.

For Wiesel, nothing threatens and diminishes man more than silence. It is the theme and matrix of his work. Every book, every lecture is a study of men's silences—guilty silence redemptive silence Silence as God's presence as His absence In one novel silence is even a character To understand why silence haunts his life and work one must willingly confront the event that spawned it: the world's silence over the Holocaust. A world Wiesel points out that from 1942 on knew but did not act.

With every book he writes, Wiesel triumphs over that silence, speaking for those whom history denied a voice. In keeping alive the memory of the Holocaust, he asks us to honor its victims; to break the silence that afflicts its survivors. Moreover, he asks us to shatter the silence that has grown since then—recent silence over atrocity in Cambodia massacre in Biafra, human rights violation in Latin America.

While, by the very magnitude of its horrors, the Holocaust denies comparison to anything, for Wiesel it serves as a dark measurement against which all subsequent history is gauged. Each of his books bristles with Santayana's observation that "those who cannot remember the past are condemned to repeat it." In his warnings, Elie Wiesel, the survivor of two death camps, hopes to prevent us from such lethal redundancies. In his ceaseless witnessing, past and present he has come to symbolize not only the Holocaust survivor but also, for many, the living conscience of a world of which Auschwitz wasn't the end but the beginning.

In a recent interview in his New York home, Wiesel talked about the shift in emphasis that has attended his work since the 1971 publication of "One Generation After," his final collection of Holocaust essays. Since then, he's stopped writing directly about "the war" (the term he now uses), a decision stemming from his desire to preserve the "sacred dimension" of his subject and prevent its trivialization by others. Instead he's turned to the broader themes that now characterize his work: biblical studies; Hasidic tales; human rights violations, specifically, the plight of Soviet Jewry, the subject of his latest book. The subject that, in turn, sparks our discussion of the recent intensification of anti-Semitic incidents here and abroad; the thickening of silence over human rights; the menace of nuclear confrontation, a possibility he says "obsesses" him.

A man of elaborate courtesy, Wiesel graciously gestured you into his study, a small book-lined room overlooking Central Park. Nesting in a canvas chair, careful not to topple the books that rise in Talmudic columns near his feet, he fixes his listener with a look of focused intensity. One stare back into that face whose sharply defined features lead Francois Mauriac, Wiesel's earliest supporter, to describe him as having "the look of Lazarus." A face that is a kind of silence in itself. A wound with an eye.

Earlier this spring when I visited Wiesel he was busy with last-minute preparations for the White House ceremony during which April 28 and 29 would be officially declared "Day of Remembrance" for the victims of the Holocaust. He flew to Washington where he officiated as chairman of the President's Commission on the Holocaust, the 34-member panel established in 1978 to propose a permanent monument to the 11 million people, 6 million of whom were Jewish, who perished in Nazi camps. The panel has recommended that a national museum be created, dedicated to the research and documentation of the Holocaust and European life before and after the war. While commemorating those who risked their lives sheltering victims from Nazi persecution, the center will also document those in power, notably the Allied heads of government who knew but did not act in time (a subject fully treated in Walter Laquer's recent book, "The Terrible Secret").

On a conference call to Washington, he switched, often in mid-sentence, from English to Hebrew. He's discussing the address he will soon give. His theme: "For the first time in history, being became a crime. We must tell the tale. And two days later, in an emotionally charged ceremony, he did. A visibly moved President Reagan, responding to Wiesel's call to "turn history into a moral endeavor," issued his strongest statement yet on the need to champion and safeguard human rights. A few hours later, however, the White House would qualify the President's words, blunting their impact.

None of this will surprise Mr. Wiesel. As we speak, his conversation is already pocked with doubt over the effect his speech will have. Yet like the Just Man, he will speak even though he knows many will not listen. But many do. And it is always an experience to listen to him. A man who, in conversation, is by turns curious, self-aware, gentle, always sincere. Often his stories are laced with mild self-muckery as, for example, when describing how his students at Boston University petitioned that he teach his own books, a practice he has rigorously avoided. Yielding just once, he devoted one semester to his fiction, another to his nonfiction.

"I don't think they know how many books there were," he smiles ruefully. One is sure they did. Just as they knew that, in class, Wiesel would repeatedly force them back on their own questions. So, too, in interviews are questions answered with parables; often with other questions. For Wiesel, "the essence of man is to be a question. I only have questions," he says in a voice so quiet it seems to be shuffling away.

"For me," he says, "writing isn't an occupation, but a duty. I write as much to understand as to be understood. What obsesses me is how to transmit experience." No one could fault him on that score. The author of 18 books—seven novels, two plays, and nine nonfiction works—he produces a prolific stream of essays while averaging a book a year. An indefatigable lecturer, crisscrossing the globe, he draws large crowds. His annual lecture at New York's 92nd Street YM-YWHA, for example, is sold out months in advance. In turn, his Monday seminar at Boston University, where since 1976 he's been the Andrew H. Mellon Professor of the Humanities, is always filled to capacity. There, students of all religious persuasions enter in concert dialogue on moral and literary issue. It's these students, emblematic of a generation willing to question, in whom Wiesel places most hope for the future.

And it's in the person of Elie Wiesel that many have placed their hope, as evidenced by the honorary doctorates and humanitarian awards that crowd his study walls. In him, many see "the spirit of authenticity, of authority," of the Jewish experience. A man whose work grapples with the issue of Jewish identity before and after the Holocaust. "For me," he says, "to be a Jew today means telling the story of that change." Regarded as a "spiritual archivist," he resolutely details the historic cycle of Judiac themes: the guilt and burden of survival, the need to testify, the duty to celebrate and forge continuity of tradition.

In his literature of survival, Wiesel has sparked a wide contemporary audience that transcends background. His legacy, in a

sense, is his ability to summon the universal lesson out of the deeply partisan problem. In the most profound sense, he is a teacher, a thinker turned activist by an urgent moral passion. And at the center of all his work one discovers the poet, the poet of silence and survival. A writer whose stories of flight and exile, interrogatory and incantory in style, are grounded in a stubborn affirmation of life. If, together, his books constitute a 20th-century Book of Exodus—studies in election and exile—they also constitute a modern Book of Psalms, a celebration of a tradition that has survived 3,500 years of opposition.

Nowhere is this continuity more celebrated than in Wiesel's latest novel. "The Testament." The book was sparked by an incident during a visit he made to the Soviet Union in 1965, when he stood outside Moscow's Central Synagogue watching Russian Jews celebrating Yom Kippur with song. "People," he says, "who will wait an entire year just to celebrate one day." Wiesel, one of the first Western writers to call world attention to the plight of Soviet Jews, says he wrote his novel as "a debt to Soviet Jewry. It's what I owe them for speaking out at great danger to themselves. And in doing so, they united the conscience of world Jewry."

In chilling counterpoint to this recent speaking, Wiesel selected a moment of historic silence as his narrative vehicle. On Aug. 12, 1952, Stalin ordered scores of Russia's finest Jewish writers shot. No record survives. In his novel, he thus amplifies poet Anna Akhmatova's lines from "Requiem," her elegy to an entire generation of Stalin's victims: "No sound. No sound. Yet how many/Innocent lives are ending."

"The Testament," nominated for France's Prix Goncourt, charts the dark political odyssey of Paltiel Kossover, a minor Jewish poet who embodies his real-life counterparts. Set against a broad historical canvas, the novel, written in the form of Kossover's prison diary, traces his drift from judaism to the secular millennialism of Marxism. Kossover's "testament," the reaffirmation of his religious identity, is secretly passed to his son, Grisha, by the prison stenographer, Zupanev. The latter, whose life has been profoundly changed by Kossover's, seeks to transform Grisha's in turn. In giving him the historic record, Zupanev also bequeaths Grisha its moral responsibility: to tell the tale that will change others.

As in all Wiesel's work, "The Testament" takes a hard look at whatever thwarts that telling. In Kossover's misplaced ambitions—political ideas over religious truths, propaganda over poetry—Wiesel implies that in assuming the world's voice, Kossover lost his own. Yet in the tradition of Dante and Akhmatova, poets must first sterilize memory. By consciously remembering and speaking, he knows he's preserving more than his dignity, he's preserving its history. So will Zupanev. So will Grisha.

In reading about Paltiel Kossover, one can't help thinking of the dark displacement of Wiesel's own life. Born in Sighet, a tiny Hungarian village nestled in the Carpathian Mountains now part of Romania, he grew up in a devout family. Insulated by timeless tradition, he studied the Talmud by day, the cabala by night. Had events been different, he says, he would "still be poring over the same page of the same book." It was not to be. In the spring of 1944, with the Russians shelling only 30 miles away, the Nazis rounded up Sighet's 15,000 Jews and jammed them into cattle cars, the first step of the long descent into night. Arriving at Auschwitz, the 15-year-old Wiesel protested to his father. "It's impossible. We live in the 20th century, not the Middle Ages—people cannot be silent." But, condemned from camp to camp, from Auschwitz to Buchenwald, he discovered that the world could indeed be silent. "Where was man in all of this?" he was to ask over and over.

After the Allied liberation, Wiesel refused repatriation to Sighet. (Of his family, only he and two older sisters survived.) Instead, he was sent to France with 400 other orphans. On a French children's-aid scholarship he went to Paris, where he learned French by silently reading Racine to himself. Later, supporting himself as a tutor and translator, he attended the Sorbonne, where from 1947 to 1950 he studied philosophy. In the early '50s, after a trip to Israel, he became a political correspondent for various Israeli newspapers. Describing his coverage of the first Israeli-German conference at Wassenaar, he says, "Nobody could have guessed that it concerned me any more than the other delegates."

For Wiesel, the Holocaust had spawned the most harrowing of paradoxes: While proficient, even prolific, as a journalist, he was unable to utter a single word about his past experience. Words only tamed the present. How could he describe the indescribable? Should he even try? Like most survivors, he transformed the silence that stalked him into an oath. For 10 years. It was only after Francois Mauriac, a writer and humanitarian he greatly admired, urged him to write that Wiesel sat down and produced what is still considered the most searing of all such accounts: "Night." In this highly autobiographical work, whose power issues from its restraint and sparse style. Wiesel chronicles how "the child discovers the old man within himself." As critic George Steiner once wrote, the only way "to review" such a book is to recopy it "line by line, pausing at the names . . . until we know the words by heart."

In 1956 he came to the United States, where, since his naturalization in 1965, he has settled with his family. Yet his true self, he says, "belongs to a world that is not here." It exists only in his books, his "pilgrimages to the past." Written in French and translated by his wife, Marion. Wiesel's books are hallmarked by their unrelenting, spare style, their powerful, aphoristic portraits and dialogue. Noting that all survivors' writing reads "as if it were written by one man." Wiesel scrupulously observes a tradition that "wrote not with words, but against them." Wiesel's "voice," then, is that of all survivors; one that burns and whispers in every sentence.

Acknowledging the burden of responsibility to the past, he says, "It's always there. I feel their presence always. It's so physical." Here, as in his books, it's not what is said but what isn't that startles—the echoing ellipsis. "Their presence," for example, conjures the father killed before Wiesel's eyes, the mother from whom he was separated at arrival at Auschwitz. He is haunted by the dark inheritance of his art. As a voice in "One Generation After" says: "Millions of human beings had to die so that you might become a sculptor, and I, a storyteller."

In writing, Wiesel stresses, the survivor "doesn't create, he re-creates." By re-creating Sighet, repopulating it with its beggars and storytellers, he fulfills his primary duty as a witness. Like Kossover's testament, Wiesel's work transcends the very history that tried to silence him. In the beginning and in the end was the word.

In an interview with translator Lily Edelman, Wiesel once observed, "For almost 3,000 years the Jewish people have had no army, no political leverage, nothing. The only power we have had is in the word. . . . Jews have never believed in statues, we have never believed in buildings. . . . Jewish building is in words, we build words."

"Our memory does not begin with our own," writes Wiesel. "A Jew never says 'I' but 'we.' The source of our strength is history, not geography." In the Jew, he sees the symbol of today's Everyman: practiced in survival, skilled in alliances. The world's survival, he says, is actively dependent on fulfilling "a dynamic collective morality." In the spirit of Camus, his modern philosophic mentor, Wiesel says, "Our fate is never ours alone. If I have one moral message, it's this: Save one person. If you've saved one person, you've saved the world."

Wiesel has acted upon his own words many times. In June 1979, for example, he traveled to Cambodia with the International Rescue Committee to aid those fleeing the Pol Pot regime. "Worse than fear, torture, even humiliation," he said at the time, "is the feeling of abandonment, that you don't count. I've come here because no one came when I was there." Outraged at the sight of the "boat people" set "adrift with no country willing to welcome them ashore." Wiesel could only think of the 1939 incident when 936 German Jews, sailing on the St. Louis, were repelled from Cuban shores and sent back to Nazi Germany, where they perished.

"You must choose to act. A witness you choose to be. A spectator, you are," he notes. Today, though, Wiesel sees "a world drifting rather than choosing." He cites a society dulled by overfamiliarized images of horror; a media generation "without imagination, without memory." In a society that, for Wiesel, came close to suicide at Auschwitz, "ideology is still more important than truth, machines more indispensable than men. . . .

"The world hasn't learned. It didn't want to listen. Is that the world's fault? Is it mine? I don't know. We spoke out at costs nobody can imagine. If survivors had the strength to write those words, we must have the strength to read them." If we silently drift toward a Holocaust universe, ignoring the testimony of our latest witnesses—the Sakharovs and Timermans—Wiesel says our real literary prophets won't be Babel or Camus, but Hitler in "Mein Kampf."

Wiesel describes his dilemma as "a messenger unable to deliver his message." As a writer, he says, "words fall into place, but, in truth, I know where they lead. To where there are no words." What, then, does he think of the current fictionalization of the Holocaust? Novels like Styron's "Sophie's Choice" and Leslie Epstein's "King of the Jews"? While attributing sincere motives to such authors, he nonetheless offers: "It's an either-or-situation. Either it's a novel or it's about Auschwitz. A novel about Auschwitz is either not a novel, or not about Auschwitz."

While saddened by "a certain lack of saredness" that pervades many contemporary Jewish novels, Wiesel is, interestingly, an admirer of postwar German novelists Heinrich Boll and Gunter Grass. Both are writers who, like Wiesel, have been mentioned for a Nobel Prize and have attempted to come to grips with the Holocaust. "They understood that to gain self-respect as men, they first had to earn the respect of their fathers' victims," Wiesel says. On Grass: "His entire body of work is one long outcry of a shattered conscience crushed by the burdens imposed by others."

In America, "where more books are published than 'written.'" Wiesel notes that the public routinely accepts 10 books on the Holocaust "repetitive." He gives one example of why he continues to publish. In August 1979, he visited Kiev with members of the President's Commission on the Holocaust. Laying a wreath at the monument at Babi Yar, where in 1941 the Nazis machine-gunned 100,000 citizens, including 70,000 Jews, over a 10-day period, he noticed there was no mention of them among the Soviet dead. Once again, they were invisible to history.

Wiesel turns to the subject of renewed anti-Semitism here and abroad. Alarmed by its sharp rise, he cites incidents that range from the desecration of synagogues in New York to the slathering of swastikas on the

Simon Wiesenthal Center for Holocaust Studies in Los Angeles. Fearful that acts such as the terrorist bombing of a Paris synagogue will escalate in an increasingly conservative climate, he foresees greater hostility toward Israel. As we talk, he notes the rising tensions in the Mideast. "We now know that a war against the Jews would no longer be limited to Jews alone. It is bound to end in world destruction. It's this that obsesses me most."

For a man who in his youth witnessed both the Holocaust and the resurrection of Israel, Wiesel is constantly poised between fear and hope. While, like the Just Man, he no longer believes he can reshape the world, he hopes that he might safeguard his message by transmitting it to a younger generation. "Each generation is richer in its tradition," he says, "and more burdened in its task. I am deeply moved by my students, by their desire to understand what they know will shock and pain them. All I can do is give them certain tools. I can try to help them formulate the right questions. We all have to raise ourselves to God's questions."

To his students, as to his readers, he urges: "not that you live, but that you choose to live. It is the most important commandment. That means a refusal to capitulate to despair, a refusal to see life through the enemy's eyes. You must try to transform suffering into a vehicle of compassion and meaning. Above all, of meaning." That, in turn, means "asserting the right of spirituality in a world that denies it: it means singing louder and louder. Laughter is man's defiance, it is also his victory."

And in his own life? "I know that each minute I live is grace, a gift, and I must do something with it. There's a feeling of gratitude for small things. I want to be more capable of gratitude in my life. All I want to do now is celebrate."

Listening to Elie Wiesel, one thinks, strangely, of Keats, the poet of negative capability, and his comment, "A man's life of any worth is a continual allegory . . . his works are the comments on it." It's particularly fitting for Wiesel. But here, as always, another writer's words are painfully misplaced. If you're reading these words, let them lead you to those of Elie Wiesel. All other words silence the four that quietly sing in his work and person:

I remember. I am.

WISCONSIN PETITION REGARDING SECRETARY OF THE INTERIOR JAMES G. WATT

Mr. PROXMIRE. Mr. President, I ask unanimous consent that a petition from the State Assembly of the State of Wisconsin memorializing Congress and the President to seek the dismissal of the Secretary of the Interior, James G. Watt, be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

1981 ASSEMBLY JOINT RESOLUTION 70

Whereas, the wise use of our natural resources and the protection of our national heritage are important duties of the federal government; and

Whereas, lands managed by the Department of the Interior are owned by all the people of the United States and should be managed for the benefit of all the people; and

Whereas, James G. Watt has consistently, in public statements and actions, disregarded the interests of the American people by advocating and implementing policies that would destroy decades of bipartisan commitment to environmental protection and preservation of our priceless national heritage; now, therefore, be it

Resolved by the assembly, the senate concurring, That the legislature and the people of the state of Wisconsin hereby urge the Congress and the President of the United States to seek the dismissal of the Secretary of the Interior, James G. Watt; and, be it further

Resolved, That a duly attested copy of this resolution and a list of those who voted in favor thereof and those who opposed be transmitted to each member of this state's congressional delegation.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SYMMS). Without objection, it is so ordered.

SENATOR HARRY F. BYRD, JR., WILL NOT BE A CANDIDATE FOR REELECTION

Mr. WARNER. Mr. President, at 12 noon today our distinguished colleague, the senior Senator from Virginia, in Richmond announced that he would not seek reelection as a U.S. Senator as his term ends with the 97th Congress.

From the very first day that I arrived in the U.S. Senate, my old friend and colleague, HARRY F. BYRD, JR. of Winchester, Va., accorded me the status of a full partner in representing the Commonwealth of Virginia.

Based on a strong mutual respect and complete trust in one another, we were always able to conduct our business here in the U.S. Senate in such a manner as to represent the interests of Virginia as our first priority, and never to let partisan politics or personal differences interfere with that obligation to our constituents.

Mr. President, his strong voice for individual freedom and fiscal responsibility will be sorely missed by me and, I am certain, by my colleagues as he finishes his career of public service in the U.S. Senate with complete dignity and grace.

Mr. President, I ask unanimous consent that a letter from Senator BYRD to me, together with his statement to the people of Virginia, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., November 30, 1981.

Hon. JOHN W. WARNER,
Senate Office Building.

MY DEAR JOHN: As a colleague—and more importantly as a friend—I want to get the attached statement to you at the earliest possible time. As you can probably see in reading between the lines, I had a most difficult time making a decision.

Warm regards,

HARRY F. BYRD, Jr.

A STATEMENT TO THE PEOPLE OF VIRGINIA,
NOVEMBER 30, 1981

Through the years, I have tried to be candid with the people of Virginia.

So I want to say frankly that I have had a most difficult struggle in my own mind as to whether I should seek a fourth term in the Senate of the United States.

In the Summer of 1980—more than a year ago—Mrs. Byrd and I agreed that I would not seek another term, believing that 18 years is long enough.

I know of no greater honor that could come to a person than to represent the five million citizens of Virginia.

But it also is a great responsibility.

I feel a deep obligation to the people of Virginia who in 1976 gave me the largest vote ever given to any Virginian for any public office.

I love Virginia—every mountain, every valley, every seashore—every area of our beloved State. I am deeply grateful to the people of Virginia for giving me the opportunity to serve our State and our Nation.

Through the years, I have continually expressed and voted the strong conviction that the federal government must cease living beyond its means, that excessive federal spending is eroding the purchasing power of our working men and women and mortgaging the future of our young people—and that excessive centralization of power in Washington threatens individual freedom.

The battle to control the cost of government and to balance the budget has been a lonely one.

But last year the people seemed to vote the sentiments I have been expressing. With the election of Ronald Reagan, the atmosphere in Washington has improved.

In 1981, progress has been made toward curbing excessive government and moderating its cost. But final victory is not yet here. The year of 1982 will be a crucial one.

During this important year—the 14 months remaining in my present term—I shall continue to devote my time and energy to helping our Nation lay a sound foundation, one which will control inflation, expand our economy and reduce centralization of power in Washington, D.C.

As I said, three terms in the Senate of the United States—18 years—is a long time. During nearly 200 years, 47 Virginians have served in the Senate—and only six served longer than have I.

I shall not be a candidate for reelection.

Since my term does not expire until 1983, I shall continue for quite a while yet doing what I have been doing for the past 16 years, representing to the best of my ability the people of Virginia in the United States Senate.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired.

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1982

The PRESIDING OFFICER. Under the previous order, the hour of 1 p.m. having arrived, the Senate will now proceed to the consideration of H.R. 4995, which will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year 1982, and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, the defense appropriations bill we are presenting today for fiscal year 1982 contains

recommended appropriations totaling more than $208.5 billion. As drafted, it is a resounding endorsement of President Reagan's major initiative to modernize and strengthen our Armed Forces. The total appropriation is some $37 billion over 1981 funding. It is $7.6 billion over current budget estimates and $11 billion above the House allowance.

The defense funding numbers are always big, and these increases are substantial even by that measure. However, most of the increase above the budget involves two features. One is immediate funding of the October 1 military pay raise—$4.8 billion—and the other is $1.6 billion to finance a 10-percent inflation rate for defense purchases.

MAJOR INCREASES

Very briefly, Mr. President, we are funding the currently unbudgeted military pay costs now because this bill is running so late and because we think it is important to present the full costs of the defense bill in one package. These are entitlements that must be funded sooner or later, and funding them now minimizes program disruption.

The committee is also attempting to be straightforward about inflation. With the actual rate for defense purchases in fiscal year 1981 at a composite 13.3 percent, it is clear that the optimistic projections of the President's budget—8.4 percent—are not going to happen. Even the 10-percent rate funded under our recommendations is moderate.

If we do not provide for a realistic inflation rate, in my opinion, we are kidding the American public and we are kidding ourselves. Fiscal year 1981, for example, took a $2 billion program cut out of defense because of underestimated inflation costs.

In the same vein, we are recommending the financing of cost overruns up front in the case of two major weapons systems, the B–1B bomber and the MX missile. Overbudget funding for these two systems is based on an annual 3-percent cost growth excluding inflation, which is about the low average of cost overruns on all major military weapons systems of recent years.

Our bill is also attempting to take care of another longstanding problem with a recommended budget increase of $400 million for that continuing huge backlog of real property maintenance in all three services. This is double the authorized increase, but I do not think we can continue to address this problem with token increases. Getting military facilities back up to basic operating requirements is something that must be done, and our recommendation is to address that in a realistic manner now, not some time in the future.

On the question of fuel pricing, where we understand the House has preliminarily recommended a $490 million reduction, we are recommending staying with the President's budget and its fuel price forecast. Again, it is my opinion we should not be guilty of underfunding defense needs. If the price of fuel does, indeed, approximate the lower estimates of the House Appropriations Committee, this funding that we recommend can either lapse or can be reprogramed to meet other unanticipated shortfalls.

FUNDING POLICY

The basic policy underlying all these committee recommendations, as the Senate will discern, is to address the priorities established by the President's budget and the initiatives developed by Senate/House conferees on the defense authorization bill. In all but a few instances, we have fully funded the program authorizations, and we have fully funded the budget estimates except where selected reductions can be achieved without impairing readiness or modernization of the armed services.

This also stems from a realization that a long and rocky road lies ahead for the defense appropriation bill before it is finally enacted. It is our hope that in the final analysis we will come out with a bill that is close to what the President has asked for and what we recommend should be funded.

B–1 BOMBER

Let me discuss some specific weapons issues. First, the B–1 bomber. This is a highly controversial issue, and there is deep division over the need and the cost of this strategic bomber. My position is that it is an interim weapon that we must have to span a critical gulf in strategic superiority with the Soviet Union, It is a costly system—more than $20 billion even in 1981 dollars and at current minimum cost estimates. But it is an evolving system that I hope can continue to improve and address our bomber penetration requirements well into the 1990's.

Let me point out that the alternatives to the B–1 are not attractive. It is nearly just as expensive to try to maintain the aging B–52 bomber fleet at full strength into the 1990's. And the Nation would find itself relying on a totally obsolete aircraft as its primary manned offensive weapon in the strategic air arm, if we did so. The B–52 is a big, slow target, totally unsuited for the fast maneuvering needed by a modern penetrating bomber. And even as a cruise missile platform its value is questionable today. It needs more than 10,000 feet of runway to get airborne and is almost fatally slow in gaining required altitude for a quick response launch of cruise missiles.

The B–1B, however, gives us a modern, multimission capability. With application of certain Stealth technologies and other modern electronics and avionics, it is a fast, agile, hard to locate and hard to target penetrator that Air Force Chief of Staff Gen. Lew Allen says will be effective in that mission well into the 1990's.

Down the road, in addition to its continuing mission as a conventional bomber, the B–1B will serve as a fast-climbing, durable cruise missile launcher.

We cannot talk now about the details of the advanced technology bomber—the Stealth bomber—but our committee's recommendation is to provide the full budget request for the B–1 bomber and also supports maximum funding for the new generation of advanced technology that must come behind it.

Accordingly, our recommendation is to provide the full budget request for the B–1B bomber with an additional amount for estimated cost overruns.

MX

With regard to the MX the full budget estimate plus cost growth is recommended for the MX missile under the Research and Development budget although I recognize there is hardly a single Senator who does not have serious questions about the full breadth of the recommended program. I also recognize that the administration has not supplied budget justifications not only on the MX but on other features of the strategic program.

But we must proceed with this funding. We cannot afford the penalty of withholding funding now. And the House of Representatives realized this by upholding the full estimate of the budget.

Deferral of the President's request for MX research and development, according to the Department, would force a 19-month slip in the system's operational availability now planned for late 1986. And the Senate must remember this important weapon system development has already been delayed by controversy and uncertainty over how best to deploy it. Meanwhile, the cost continues to grow with each period of delay.

The most modern and potent missile system in the world is no more effective than its basing. We cannot afford to delay front-end planning and design efforts for which an estimated $345 million is needed this year to develop more secure silos for the MX. At the same time, there is $20 million available for research and development of long-term basing options such as deep basing and continuous patrol aircraft.

The $1.5 billion for missile development includes the full scope of design evaluation and testing for propulsion, guidance, and reentry systems. Missile handling and transportation equipment are included in that estimate, also.

Mr. President, the committee has recommended the full budget estimate plus costs, as I indicated, and I believe this amount should be provided to the Department with no further delay. Others may have differing opinions but I am confident a full debate of the issues should sustain the committee's recommendation.

Whatever amount is finally appropriated, I believe the Appropriations Committees of both Houses should require full budget justifications and subsequent additional review prior to any substantial obligation of the amounts appropriated for these programs.

OTHER WEAPONS

Among other weapon systems, we have recommended the full authorization for the Army's new attack helicopter, which involves a $73.4 million budget increase. We do this even though we learned only a few days ago of a substantial cost increase in this program—a cost increase so substantial that even with this additional funding only 8 aircraft will be procured in fiscal year 1982 instead of the 14 originally budgeted.

Another weapon system that has been

plagued with development problems and cost overruns, the F/A–18 strike fighter, is also recommended at the full budget estimate. The Navy insists it has licked all the serious problems and has given its highest priority to maintaining the production of this dual-role aircraft which is needed in the fleet air arm as both a fighter and attack bomber for the Navy and Marines.

I call the Senate's attention to the fact that the committee is not adopting every proposal advanced by the Pentagon. We have disagreed on the CX proposal for a new airlift system for the Air Force and have included no appropriations for development of a new aircraft. We have, however, provided limited funding for airlift enhancement research and airlift augmentation designed to pursue lower cost alternatives to a new system.

SHIPBUILDING

With regard to the Navy we have agreed in full with the authorized increase of $510.2 million for shipbuilding, and we consider this to be an endorsement of the policy which takes us toward a 600-ship Navy. At the same time, we have included $300 million in this bill which is to be transferred to the Coast Guard for acquisition and improvements of vessels and aircraft. Coast Guard equipment becomes naval equipment in wartime, and this is a method for giving to the Coast Guard the same priority that we have accorded to the other armed services on the expansion and modernization of capital equipment.

The committee's shipbuilding recommendation includes the full budget request of $658 million to begin long-lead procurement for another nuclear carrier and sufficient advance funding to maintain construction of three nuclear attack submarines in 1983 and again in 1984. We have funded the full cost of reactivating the battleship *New Jersey* although we deferred the $88 million requested for the *Iowa* pending better cost estimates. Additional funding has also been recommended for construction of frigates, a landing ship dock, and a helicopter assault ship.

BILL TIMING

Finally, Mr. President, let me discuss briefly the situation regarding the defense appropriation bill this year. Because we are moving so late in the current session of Congress, the committee found it necessary to begin marking up at one point actually ahead of the House Appropriations Committee. As you know, the traditional practice is for the House to originate a bill and pass it before the Senate takes action. However, with time running out on the continuing resolution as well as the congressional session, we found it best to have a reported bill ready for the Senate even before the House had passed its measure. Subsequently, we have transferred the committee's recommended amendments to the House-passed bill so that we can return to the normal procedures of dealing with the House-passed bill.

There was no time for departmental appeals, for assessment of all House proposals, and for other normal practices. For instance, we found it necessary to leave specific program allowances of the other body out of our report and, in fact, the House figures used in the bill summaries have changed slightly as a result of floor amendments in the other body.

The bill that is before the Senate is the House-passed bill with the Senate committee amendments, and it is important to finish the Senate's work on this bill, pass it as quickly as possible, so that we can take this bill to conference and, hopefully, finish congressional action on the defense appropriation bill before the end of this session.

I believe we have a gentlemen's understanding with the members of the committee in the other body to that effect, that we will finish this bill and get it out of conference before we finish this session.

Mr. President, it is impossible to summarize a bill as complex and wide ranging as the defense appropriation bill in a few short remarks. I have only touched on a few of the modernization and readiness initiatives in the bill, but I stand ready to respond to any questions from Senators.

I intend to go further into the reason for our including the inflation item and the cost overrun item.

Before I do so, I would like to inquire of my good friend, the Senator from Mississippi, if he wishes to make a statement at this time?

Mr. STENNIS. Mr. President, I thank the Senator from Alaska.

I consider this a highly important bill, and I consider it a privilege to be associated with the Senator from Alaska, the chairman of our subcommittee, who, with his fine capacity to start with, has worked long and diligently with reference to the subject matter of the bill, the complications that have arisen, and the very large sums of money that are involved.

The Senator from Alaska does not take the spending of money, even for military preparedness, as a casual thing but as a serious matter, and I applaud him for that and emphasize that we must continue to have a full scrutiny of the expenditures for military preparedness, and with a demand that the money be spent with caution and care and that it not be just thrown at a problem, the idea of trying to drown it with money, but trying to get value received for the tax dollar.

This military program is mounting, still mounting, by leaps and bounds, as it has been for a number of years. The present situation is due partly to inflation and other contributory factors, but the cost of effective military preparedness in this day and time is just a very expensive proposition, at the very best.

In the missile age, particularly, so many of these contracts are contracts where the Government is the only customer, and that within itself adds to the costs. But, at the same time, that system is a whole lot better than it would be if we were trying to manufacture these products ourselves.

I notice the Senator from Alaska has made reference here to some of the items that are in this bill, very large sums, that are not in the House bill, which very readily explains the difference between the totals of the two bills. But one thing is so obvious; we put in this bill $4.8 billion extra for the military pay increase which became effective October 1, 1981, this year, and we put that in for the obvious reason that we are spending that money now, and I personally have not favored the idea of some previous years where we carry over the pay part of the military cost for a supplemental bill later in the year.

It made some record look a little better, but it was not totally honest, as I saw it, so I am pleased that we could bring out a bill that included these items and some other matters that go along of the same nature, particularly to support an estimated average inflation rate which, for instance, carries $1.6 billion extra.

I know all the arguments for not putting those amounts in now, but I think it is far better that we bring it in now.

I want to refer to the fact that I am very much pleased that this bill, because of its very nature as well as its amount, has come forth to the Senate floor now for a full debate. That is exactly what we need, and that is the prerogative as well as the responsibility of every Member who feels that he should take part in this debate and, at least, should know the facts of the case. Members who are not on the Armed Services Committee, who are not on the Appropriations Committee, are relatively left, after all, without the facts, without the explanation of the facts, from the standpoint of the Senate Members, unless we have some floor discussion and floor debate.

So I have always favored, and we have had, fairly good debates here for a number of years with reference to these programs.

No. 2, I am totally opposed to the idea of trying to bodily push into a continuing resolution that may be pending just to take care of a continuing interim of time which is usually a few days. I am totally opposed to the idea of trying to force all the appropriations bills, or almost all, into that continuing resolution and thereby put them in issue and thereby possibly cut off what would be a wholesome debate on many of the items.

I think we are destroying our institution of the U.S. Senate when we go that route time after time. I think we are deteriorating greatly and detracting from and actually gradually destroying the committee system in the Senate when we permit these matters to come up primarily in continuing resolutions or even in budget resolutions, subject to amendments without limitation.

We need not fool ourselves—the real work of the Senate, the accomplishments of the Senate, at least, are in the committees. That is where our facts are really developed and that is where the professional expertise is given in the way of testimony as well as staff work and that is the highly valuable process of writing a sound bill. Then there is the experience, I will put it, and understanding and knowledge of the subject matter that is cranked into the bill by the Members themselves who have had a chance to develop and get the facts and also, as I have said, the experience.

So there is the product then that is

brought to the floor and debated for the benefit of the press, the media, the people, and also the membership here of this body. I know that system is sound. I have seen it work for years and years. When we abandon that and try to curtail the debate, we abandon strength and service of the Senate, really, and sound legislation.

I commend those that agreed to have a reasonable debate on this bill and put it up for passage and put it up for amendment. We will fight these things out on the floor here under our rules.

I want to point out that, as I understand the debate now, there is not so much contest after all about the ships, the naval part of the bill. That did not just happen. But it is a different type subject matter. It is a little better understood and it is generally a part of our processes of armament for a long, long time. It is well known, our duties and responsibilities to ourselves and to members of the free world to patrol the sea lanes for the benefit of traffic and communications throughout the free world. It is known that we are the only nation in the free world that has the capacity, the capability, the know-how, and the money to carry on that part of our freedom or our preparedness in the military field. It is known that we have a number of highly capable shipyards and some Federal yards and very capable personnel that are connected with them. And I am glad to see these ship programs move along.

I want to mention in passing that there is some new recognition given to our Reserves and National Guard. I will make a special statement about that before the debate is over. But we have the seed corn, at least, here for more attention that is going to be given to our Reserves and our National Guard in the way of equipment—some new equipment—and some equipment in the field of little things where you can take a relatively few million dollars and spread it around in a number of units. Nothing encourages these Reserves and members of the Guard any more than to give them the benefit of new weapons and new field pieces and equipment that goes with training and makes them front-line military men, so to speak.

I believe I know, by observation, something on this subject. I consider the Guard and Reserves have some of the very finest potential military men that we have and some that are already among the very best. We have Guard units, for instance, Air Guard units particularly that I know of, that train with such intensity and have such talent within their ranks that they outscore the Regulars—and that is no reflection on the regulars—but they outscore the regulars in many fields of endeavor. And you find the men there, they are people that live in the community, they are part of the churches, the schools, the social clubs, and the activities of the community area. They have some love, at least, for the military concept and military training or they would not continue in it. They have enormous talent and many of them have much experience in this very field.

I would greatly extend their responsibilities and their duties, and I would greatly extend the number of men and women involved and the support therefor, and thereby be able to cut down on the enormous numbers that we are accumulating in the regular forces. That is an unusual statement now, but I make it deliberately; that we should build up the manpower more in the Reserves and the Guards, even at the expense of retarding the growth under present conditions of the manpower, personnel power at least in the regulars.

We are accumulating enormous responsibilities of retired pay and the add-up of the salaries that we pay the regulars to where it is a very large proportion of the military dollar. It is a trend that has developed in the last few years and something has to be done about it. I emphasize it now because I do think we have a remedy and, as I have already said, that relates to the Reserves and the National Guard units that we have.

Mr. President, we also have a requirement in the law this year, the authorization bill has required that a report be made by the Department of Defense every year—every year—to the Congress, covering, in concept, the Guard and the Reserve as to what their needs are and their capabilities.

Mr. President, the Senate is not in order.

The PRESIDING OFFICER. The Senator is correct. The Senate will be in order.

Mr. STENNIS. I am told by those that are knowledgeable that we will have a very fine guideline made mandatory on the Department of Defense to be brought in every year for the advanced notice and study by the Congress itself.

I think that will prove to be a highly valuable step in that direction.

Mr. President, the primary points that I have in mind today are these: I do not know of anyone who is informed in this body who fails to realize that we must make a step forward with reference to our strategic forces. Concerning those forces—nuclear and long range, primarily—by the very nature of things, each year we have to be certain that we not drop behind or that we are not overcome, that we are not left out, on knowledgeable and necessary advances or changes, at least, in our weaponry.

The SALT agreements, even though they have done some good so far, have not contributed very much. It is still a race with the Soviets as to who is going to have the most or the best weapons in this field. Conditions are such that we believe, and they believe, that neither side can take a chance on being left out or left second best.

I have no doubt about our present situation being that we are capable of taking care of ourselves, but I do feel that unless we move forward and meet certain developments which have been made in recent years, we will become second rate and will become unable to take care of ourselves, but, more particularly, unable to have a deterring influence on the Soviets.

I look upon these weapons primarily as deterrents, primarily for that purpose. We already have enough to destroy half of their land area, and the Lord only knows what percent of their people. They, in turn, have the same capacity to destroy us, unthinkable as that thought be. There is no weapon defense against these missiles so we have to have the power, the capacity, and let it be known fully that we do have it, so as not to be attacked on the thought that they could destroy us in such a way there would be no capacity to get back.

We have been working along this line for several years in what we call the MX, a new intercontinental ballistic missile. There has been no dissent from that. The missile has gone forward in a regular way. It is a new missile with added concepts, added capacity. One has been in the bill now for several years. I am familiar with it because I was floor manager of the bill during those years. I know the debates we had in the committee and the debates we had here on the floor. I am talking about the missile itself. It has had a good development era, a span of years. As a whole, it is in good shape now. There is no contest about that.

The delay and the dispute, the unsatisfactory part of it all, has been the basing point. What type of basing are we going to have for this land-based missile?

Then it was that we got into the large, underground concept, that it would be a hidden base and an uncertain base because it could not be seen or detected; it would be a moving base because the carriages would move the missiles around from spot to spot and have a constantly hidden and unknown target spot for the Soviets to try to destroy.

We put various strings on that in the way of conditions and limitations, but still we went forward. We had very good discussions in the committee. I said at the beginning of the year 1980 that we were going to move the MX along and bring it to a vote, and after additional hearings, although there were a lot of differences in approaches, there was almost a unanimous vote again, as there had been for 3 or 4 years at least, in favor of this system of basing the MX missile.

Now we have considerable change in the proposal which is before us. That has been studied, carefully studied, by different individuals and by different offices, including the President of the United States, reaching somewhat different conclusions. I do not think we will ever have a system proposed that would be agreed upon by all. Naturally, there is a difference of opinion within the military and within the civilian authorities. Fortunately, we do have very capable men in these fields who have devoted years to these problems.

Whatever may be the final form that the basing mode takes for this missile. I am supporting all of it as it is in the bill rather than trying to hold it up and outguess or second guess somebody—moving forward strongly on this with the knowledge that corrections can and will be made by those in charge of the program and those of us here in the Senate. We are not doing a reckless thing or a careless thing, but we are moving forward on a necessary step. There will be plenty of time later to modify.

There is one thing we cannot afford to do, as I see it, and that is to lose time.

Now I refer to the B–1 bomber. There is no use in relating the details. The B–1 bomber has been before this body for many years, for several years, and for several rollcall votes. Finally, we took the very unfortunate step, as I saw it, which I did not favor, and we put a provision in the law that the President of the United States in the year 1980, whomever he might be—and this was done in 1979—would make a judgment on whether or not the B–1 bomber should be continued.

That was almost a judgment itself by the legislative branch. Maybe it was not necessary, as I saw it.

Anyway, Mr. Carter came in and was really acting under a statute passed by the Congress. He gave a judgment on it, and that was that it should be discontinued. I thought the judgment should have gone the other way but he did not think so.

Anyway, the Congress acceded to that judgment and took the money out of the bill. I was standing right here in this identical place and I remember it so well. We had the appropriation bill already written up and on the floor. But we took the money out under that ruling of the President, except for the research and development money. Then on a rollcall vote we voted to keep that research and development money in the bill. To an extent, that research and development has continued on even until now. The year I was talking about was 1977 or 1978. That research and development money has been spent to some degree during those intervening years since Mr. Carter's ruling and it has been worthwhile. We are reaping the benefits of it now.

So the B–1 bomber, except for some benefits, is the same instrument that we have had all these years. Everybody knows, too, that there is a prospective bomber for the future. I say prospective because those of us who watch these things grow from year to year know you just do not put them together as if you were building an automobile from a model that was already established and approved. You go inch by inch, foot by foot, yard by yard, and process by process and, over and over again, the stops and starts occur. No one knows how long it will take to perfect and deploy this Stealth bomber, although all agree that it is worthwhile and should be moved forward.

That is why I am not too concerned about just how long the B–1 bomber will be able to penetrate, as we say, or how long it will be useful. Who am I to guess or who is the Secretary of Defense to guess about just how long it will be? No one can tell firmly. That is why I do not deter one bit because his estimate was that it might not be useful beyond 1990.

We must have effective instruments in this field. So, with confidence, I can support, even though it is not too happy a thought, these two bomber units going forward at the same time, knowing that we shall be closing the gap and being more careful about not creating a gap and, at the same time, insuring the very best that science can build or that money can buy in the foremost type of developed bomber of the future.

Mr. President, that just about covers the situation as I see it from a practical standpoint, except for forthcoming events in the field of nuclear weaponry controlled by mutual agreements. We called it the SALT treaty in the past—SALT I, SALT II. I am convinced fully that something, if possible, must be done in this field of more effective agreements that can be given surveillance so each side will know whether the other is carrying it out or not. The day has come when that must be given a preeminence that it has not had before.

I feel that so strongly, Mr. President, and I do not think I have been a fanatic on the subject at all. I have personally told the President of the United States that I think the most important problem he has, as well as opportunity, in his 4 years as President, is to get an effective advance agreement in this field, along with the idea that it will take some of our most talented men to act first as his negotiators that are firm and know the subject matter. At the same time, his responsibility should be shown, and I hope it will be shown, by his being active in this field himself and letting it be known right and left that his hand is on the throttle and his hand is giving the guidance and is going to give the guidance as to what the final form of this treaty would be.

Of course, that would be subject, under our constitutional law, to approval or rejection of the U.S. Senate. But in view of those conditions, I have no doubt we do not have any time to lose. Experience proves that we shall be back here next year with arguments and points about these missiles and about the bombers and about other things that go along with it. There will be a lot that can be said, but the question now is, What are we going to do?

Mr. Reagan, with the common consent, I think, of this body and the entire Congress and most of the people, is already arranging to have that conference. So he is going to have to go to it and it is unthinkable that we should send him there limping or lame or inadequately prepared, weaponwise, to cope with this problem. It is a lot of money and it is paving the way for an expenditure of enormous sums of money. But I know from experience that care will be taken and judgments will be made and corrections can and will be made as we go along.

I believe that if events develop such that the money should not be spent, the President and others are not going to go along a willful and reckless expenditure course with these funds. It is an expression of faith and backing up of the ones in responsible positions that we must meet. But by all means, we must not make the mistake here of trying to be too accurate and too demanding that we must know positively that these results can be obtained before we appropriate the money. That would be the worst mistake that we could make. The deterrent value of these weapons—I pray God they will never be used—is the main value, anyway. Unfortunately, that will be true for years to come. So we have to get the best agreement that we can and put up the strongest showing that we can and get the maximum deterrence out of that situation. I believe that it is a new start.

I am delighted that the short-range missiles in Western Europe, too, are being included in these discussions and pray that we shall be able to reach some kind of start, at least, toward settlement in this field of nuclear weapons. Frankly, I have never understood how you are ever going to start a nuclear war and then call it to a halt. Once you go to firing these weapons into the atmosphere and signals sound all around the world, it is virtually impossible to stop such a war as that and such weaponry as that once it has had its start.

That, in broad detail, Mr. President, outlines what I see in this matter. I am very proud that we are having a debate on the bill. We should have it. Every Member should have a right to offer an amendment if he thinks he should, and discussion should follow. That, in itself, is a strong showing of firmness and determination that this matter has been fully considered and that we have started out on this course and we do not expect to stop and we are going to get the value for the dollar to the extent that we can, but that we are going to have a product that is superior. I believe it will be superior; certainly, it will be equal to anything that could possibly be conceived and put into being that might be used against us. There may not be a second chance, after all.

Mr. President, I perhaps will use some time on other subjects later. Again, I express my appreciation to the Senator from Alaska for the way he has worked on this bill.

I yield the floor.

Mr. STEVENS. Mr. President, I thank our distinguished colleague for his comments. I am grateful to him for his kind comments concerning our relationship, and I am delighted to have the opportunity to work with him again on the bill.

(By request of Mr. BAKER, the following statement was ordered to be printed in the RECORD:)

● Mr. GOLDWATER. Mr. President, today the Senate begins consideration of the Department of Defense appropriations bill for fiscal year 1982. There has been a substantial delay already in appropriating these funds, and I strongly urge my colleagues to move forward without further delay. We should enact this bill in expeditious fashion and support it in conference with the House of Representatives.

Any further efforts to reduce this year's defense budget could easily result in a budget which is below the Carter budget of last year. That budget, and the defense posture which resulted, left us in a position where we did not dare challenge the actions of anyone, no matter how aggressive, anywhere in the world. Our country must have a greater degree of security than that.

After all, freedom is the question. Is it worth protecting or not? If not, let us forget the facade and just give up. As my colleagues are well aware, I do not recommend that solution. Our heritage is too precious and the freedom which we enjoy is too important for us to abandon our goals. We have seen this administration begin an important process to achieve peace in the world and that process is necessarily composed of two facets. One facet is negotiations for genuine arms reduction and our President has recently recommitted himself to that goal. The other, and very important, facet is the restoration of our military establishment. These two factors, along with such factors as the restoration of our economy, will determine our national security posture and the future of our Nation.

Mr. President, the appropriations bill we will consider involves very substantial sums of money and that is clear to all of us. What is not quite as clear to some outside observers is that this bill represents a very careful scrutiny of the Defense Department requests. Sure, money can be saved at the Defense Department. One can always find instances or programs where we can save. The Appropriations Committee, and the respective Armed Services Committees before them, have taken a long, hard look at these programs. Some funds were reduced in certain areas and, in others, increases were made to appropriate levels by committees which have analyzed the situation thoroughly. There has been a multitude of hearings, great numbers of witnesses and many field investigations which led to the conclusions listed in this bill. So, although the sums involved in this appropriations bill are indeed large, we can all feel confident that this bill has been very thoroughly scrutinized to insure the most efficient use of the taxpayer's dollar. In addition, we have something else to look forward to under this administration.

We can expect to see real savings, in my view, under the leadership of Secretary of Defense Weinberger and Deputy Secretary of Defense Carlucci. They have deserved reputations in this town for being able to achieve economies, and you can expect them to live up to those reputations. Economies and efficiencies in the defense budget must begin at the top levels of the Pentagon and the individuals at the top are very capable of making that happen. In turn, they deserve our support and our best judgments on their recommendations.

This bill, which we will consider has several very important programs included. As I pointed out to my colleagues several days ago, one of the most important programs is the B–1 bomber. Along with that, this bill supports the President's strategic programs to include the beginnings of the MX missile program and improvements in our command, control and communications capabilities. Along with these major initiatives, the bill represents a continuation of our efforts in several important areas. We have moved the Army forward with the procurement of attack and transport helicopters. The air defense network of the Army also benefits substantially by the procurement items in this bill and, very importantly, the recommendations for tracked combat vehicles will enable our Army to come closer to meeting worldwide requirement.

Substantial sums are also proposed for procurement of Navy and Air Force fighter aircraft and missiles. Most appropriately, in the area of research, development, test, and evaluation, this bill will bolster our defense posture in the out years. Although the individual programs are too numerous to highlight, it is apparent that real progress is inevitable in many aspects of research and development.

Mr. President, I extend my congratulations to the chairman of the Subcommittee on Defense, Senator STEVENS, and his committee members for producing a bill which helps restore our military posture. Not only did they recommend important procurement of hardware, but they have provided solid recommendations in the area of military personnel to insure that we not only have the best equipped personnel in our Armed Forces, but also the best trained and best qualified.

Mr. President, after careful consideration, I heartily urge my fellow colleagues to adopt the provisions of this defense appropriations bill for fiscal year 1982.●

Mr. SCHMITT. Mr. President, I just wanted to say, while the Senator from Alaska is here and the Senator from Mississippi, to compliment them on what they have done on the measure that is before the Senate at this time. It really is a remarkable bill. It is one which I think at least from the Senate's perspective will be known as the truth-in-defense bill.

It does have not only the necessary programs and projects funded but it does recognize what the real world of defense spending is all about.

Mr. President, there is no more important measure before the Senate than this bill because without an adequate national defense all the programs that we as liberals or we as conservatives or as Republicans or as Democrats may be interested in for the country will go for naught.

We must have a national defense, and we must have an adequate defense that recognizes realities currently in place in this world.

The bill the Senator from Alaska has placed before the Senate is one which funds conventional and strategic operations at an adequate level, in fact I think a desirable level.

Some of the other measures implicit in this bill, as well as explicit, deal with procurement, with manpower, inflation, real costs of defense programs, all of which must be dealt with realistically by this body and by the Congress as a whole.

There are some things missing, Mr. President. The air defense both for U.S. borders and for U.S. bases abroad is inadequate. We have a great deal more work to do in that area.

Seapower, particularly that which relates to protecting our sealanes, the merchant marine, is imperfect, and we have a great deal more work to do in that area.

There is not yet sufficient recognition of the strategic minerals crisis that faces this country and faces our national security, and future measures must deal with that far more vigorously and completely than this one does.

There is also an inadequate understanding of the future of defense activities related to space and the commitment that this Nation must make to that in the future.

Mr. President, also if there is one major philosophical problem in the bill it is that we have not yet recognized, we must have nonnuclear alternatives to nuclear strategic weapons, that is, the nonnuclear alternatives that will make weapons of mass destruction obsolete in the future.

The Senator from Alaska recognizes this as do, I think, all members of the committee.

These and other deficiencies are there. We cannot do everything all at once. I believe there is a commitment, however, of the Senate Appropriations Subcommittee and full committee to continue to move along the lines that have been outlined by this bill as we proceed toward its consideration and proceed to conference and eventually a signature by the President.

Again, Mr. President, the Senator from Alaska is to be complimented for his efforts in seeing that the Senate has a chance to deal with a comprehensive appropriation bill relative to national defense, one which I believe will serve the country well, and I congratulate him for it.

Mr. STEVENS. Mr. President, I thank the Senator from New Mexico.

Mr. President, this bill will now be subject to amendment, and the majority leader has indicated that there will be votes this afternoon. I do have some technical amendments which I will present in a moment.

However, let me sum up our position by saying that, as the President now prepares for the new START talks—the Strategic Arms Reduction Talks—it is imperative that the Senate demonstrate our firm resolve to maintain our defensive position and to show the dedication that I feel our people have to totally modernize our weapons systems and proceed with the restoration of superiority over the Soviets in the event those talks are not successful. He has dedicated a great deal of his foreign policy to these new talks.

As the Senator from Mississippi has indicated, the position the President has outlined with regard to missile deployment in Europe is a startling one and a good one. But it must be backed by a firm resolve that if the Soviets are not to meet us halfway and to enter into these new talks with the resolve to reduce the tensions that exist between our nations, this country is dedicated to being capable of maintaining the peace of the world.

Mr. President, one last item, and that is the MX missile system. We understand that there will be an amendment on the MX. There has been a series of amendments over the past years that has prevented the expenditure of moneys on

the MX so that the expenditure of funds by the Department of Defense would commit us to one deployment option. We are not committed to just one deployment option by these moneys. There is an option that has been selected for the first of the MX's.

I believe it is essential for us to realize that this is an evolving program, as the Senator from Mississippi has stated. He has done so well in shepherding these weapons systems through in the past that he knows better than anyone else in this Chamber the negotiations that have gone into the whole procurement scheme so that we are at the position we are in now.

I hope the Senate will stand firm on the major weapons systems and that we will be able to send the President a message reaffirming the position he has taken on behalf of our country as we prepare for these talks abroad.

Mr. President, I ask unanimous consent that the recommendations of the committee, as reported in S. 1857, be considered as committee amendments and agreed to en bloc; that the House bill as thus amended be regarded for the purpose of amendment as original text, provided no point of order shall be considered to have been waived by agreeing to this request.

The PRESIDING OFFICER (Mr. ARMSTRONG). Is there objection to the request of the Senator from Alaska? The Chair hears none, and it is so ordered.

The committee amendments agreed to en bloc are as follows:

On page 2, line 10, strike "$12,288,300,000", and insert "$14,095,781,000";

On page 52, line 7, strike "(e)", through and including "changes" on line 11, and insert the following:

(e) surgery which improves physical appearance but which is not expected to significantly restore functions including, but not limited to, mammary augmentation, face lifts and sex gender changes except that breast reconstructive surgery following mastectomy and reconstructive surgery to correct serious deformities caused by congenital anomalies, accidental injuries and neoplastic surgery are not excluded;

On page 53, line 3, after "midwife,", insert the following: certified nurse practitioner, or for the purpose of conducting a test during fiscal year 1982, by a certified clinical social worker;

On page 61, strike line 15, through and including line 22, and insert the following:

SEC. 765. None of the funds made available by this Act shall be used in any way for the leasing in the United States of military aircraft or vehicles when suitable aircraft or vehicles are commercially available in the private sector.

On page 63, strike line 16, through and including page 64, line 8, and insert the following:

SEC. 771. None of the funds made available by this Act shall be used for the evaluation or procurement of new 9 mm weapons to replace existing .45 and .38 calibre military handguns.

On page 64, strike line 13, through and including page 65, line 7,

SEC. 772. Not to exceed $1,700,000 of the funds available to the Department of Defense for Reserve Personnel shall be available for transfer to appropriations available to the Federal Emergency Management Agency.

On page 65, strike line 12, through and including line 18, and insert the following:

SEC. 773. None of the funds appropriated by this Act shall be obligated under the competitive rate program of the Department of Defense for the transportation of house-

hold goods to or from Alaska and Hawaii.

On page 65, strike line 23, through and including page 66, line 4, and insert the following:

SEC. 774. Notwithstanding the provisions of section 505(c) of the Omnibus Budget Reconciliation Act of 1981, funds made available to the Department of Defense by this Act for payments and arrangements authorized by section 505(c) shall be administered by the Secretary of Defense who shall be responsible for the conduct of programs with such funds and who shall not delegate such responsibility outside of the Department of Defense.

On page 66, strike line 19, through and including page 67, line 8, and insert the following:

SEC. 776. Not to exceed $25,000,000 of the funds provided in this Act for the Civilian Health and Medical Program of the Uniformed Services may be used to conduct a test program, under such terms and conditions as the Secretary of Defense deems appropriate, to provide preventive and basic restorative dental care to such beneficiaries as he determines appropriate.

On page 67, strike line 16, through and including page 68, line 3, and insert the following:

SEC. 777. Funds available to the Department of Defense during the current fiscal year shall be available to establish a program to provide child advocacy and family counseling services to deal with problems of child and spouse abuse.

On page 68, line 17, strike "780", and insert "778";

On page 69, strike line 1, through and including line 7;

On page 69, line 8, strike "782. (a)", and insert "779";

On page 69, strike line 13, through and including page 71, line 3;

On page 71, line 8, strike "$12,563,000", and insert "$13,563,000";

UP AMENDMENT NO. 713

Mr. STEVENS. Mr. President, as I indicated, there are a couple of small items. I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 713:

On page 63, strike section 770 beginning on line 10 and ending on line 15.

Mr. STEVENS. Mr. President, as I explained to the Senate earlier, it was necessary for the committee to begin marking up the Defense appropriations bill this session even before the House had completed action on it. This tight schedule did not permit the usual careful review of all of the general provisions added by the House. Consequently, the committee failed to note the full implications of section 770, which applies to contractor reimbursements for insurance coverage.

We have now determined that this section should not be accepted by the Senate for two reasons:

First, most of it is a repetition of language that was established as permanent law in the fiscal year 1981 Supplemental Appropriations Act. Since it is permanent law it does not need to be carried in every annual appropriation act.

Second, the last phrase in that provision beginning on line 14 may have far reaching consequences not intended by the other body and should be subject to more review before being enacted. Deleting it here will insure that it will be an issue in conference with the House.

That phrase in effect extends the limitation of Federal support of contractor insurance involving defects in materials or workmanship to fortuitous or casualty losses. Both contractors and the Department of Defense tell us this new limitation would not only remove the Federal Government from insuring such losses but may drive the cost of insurance beyond the reach of contractors.

I point out that the American Bar Association has dispatched a letter to all Members of the Senate with regard to this section.

At any rate, more time is needed to assess this particular provision, and my amendment will assure that there is opportunity for adequate review, by deleting the last clause of section 770, which applies to contract reimbursements for insurance coverage. The matter will be in conference.

Mr. President, I ask unanimous consent to have printed in the RECORD the letter I mentioned from the American Bar Association, pertaining to this amendment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AMERICAN BAR ASSOCIATION,
Long Beach, Calif., November 24, 1981.

Hon. TED STEVENS,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR STEVENS: The Section of Public Contract Law, American Bar Association, submits the following comments on the 1982 DOD Appropriation Bill, H.R. 4995. These comments are presented only on behalf of the Public Contract Law Section, and have not been approved by the House of Delegates or the Board of Governors, and should not be construed as representing the position of the American Bar Association.

These comments are directed to Section 770 of the bill, as amended by the Senate Appropriations Committee, and particularly the last thirteen words of this section, which read ". . . or against the costs of fortuitous or casualty losses resulting from such defects."

The quoted language is objectionable on many counts and not justifiable on any basis of which we are aware.

First, it eliminates the allowability of tort liability insurance and workers compensation insurance costs as a part of the pricing or costs of DOD prime and subcontracts. This is a radical departure from existing and carefully considered U.S. Government and DOD policy which encourages and in many instances requires such insurance. See, Defense Acquisition Regulation (DAR) 7-203.22 Insurance—Liability to Third Persons (1966 Dec.) especially paragraph (c). See, also, DAR 10-701, DAR 10-702, DAR 7-303.61, DAR 7-403.56, DAR 7-303.62, DAR 7-403.67. See, especially, DAR 7-104.2 which reflects the statutory requirement of 42 U.S.C. 1657, that the contractor must maintain "such Workman's Compensation Insurance or security as is required by the Defense Base Act. . . ."

Inasmuch as contractors are required as a matter of law or regulation having the force and effect of law to maintain such insurance, we can see no justification for disallowing the cost of such insurance.

Second, the objectionable language of Section 770 would disallow such insurance costs without regard to the question of fault. Under both workers compensation as well as various product liability doctrines, a contractor may be liable even though its conduct was entirely prudent and blameless. Indeed, in some cases, the courts have recognized that it was the government's fault and not that of the contractor which was the primary cause of the accident, but it was the contractor and not the government which was held liable. To disallow the costs of insuring against such risks is to doubly penalize the innocent contractor.

Third, the objectionable language grossly oversimplifies an extremely complex and intricate legal fabric. The allocation of responsibility for casualty losses involving DOD contractors and subcontractors brings into issue many bodies of law and special policy areas. These include product liability law as enunciated by each of the fifty states, and indeed international law since the accident may take place abroad or in space, government contract law, constitutional law, especially since the sovereign immunity of the U.S. Government is frequently involved, as well as casualty insurance and workman's compensation law to mention some of the most prominent. To disallow the costs of handling a significant portion of such risks without a careful consideration of the consequences within these various legal and policy disciplines is, we submit, egregiously ill advised.

Fourth, the objectionable language is unclear and legally inadequate inasmuch as the question of what may constitute a defect in materials or workmanship is not resolved, if indeed it can be resolved. For example, would it be a defect in workmanship and materials if the contractor was in full compliance with the specifications which the government imposed in its contract? How would DOD and its contracting officers and auditors decide in advance which costs of insurance were incurred to cover such defects and which insurance costs were incurred to cover other "fortuitous or casualty losses"? Since insurance is purchased before an accident, it would be impossible to predict the basis for claims at the time of incurring such costs. To be compliant with this section, if enacted, DOD would be incentivized to require contractors to exclude such risks from their general liability insurance coverage. Is it wise to induce such a change, and is the insurance industry willing to make it?

Lastly, and this certainly does not exhaust the reasons which can be advanced in criticism of the objectionable language, the enactment of Section 770 would further erode the industrial base vital to our national security. Putative contractors and subcontractors confronting such a draconian law would be induced to decline to do business on such onerous terms.

Under applicable American Bar Association procedures, the Public Contract Law Section of the Association submitted its Section comments and gave testimony in support of H.R. 5351 of the last Congress, and H.R. 1504 of this Congress. The thrust of both these bills, which were labeled as "Government Contractor's Product Liability Acts," was to alleviate the grossly inequitable product liability risks being borne by blameless government contractors and subcontractors even though they fully complied with the performance requirements of their contracts in every way. Because of the widespread adoption of no-fault bases for liability, government contractors have repeatedly been held liable even though the government was primarily responsible for the accident and damage. H.R. 1504 is still being considered by the House Judiciary Committee, Subcommittee on Government Operations and Administrative Law, which has received much testimony in favor of the policy revision embraced in the bill.

The Public Contract Law Section urges that Section 770 be reconsidered and that

the objectionable language be deleted from the bill. If consideration by the Congress should be given to the question of the allocation of liability risks confronting DOD and other government contractors and subcontractors, such consideration should address and take into account all the legal, social and national security issues involved. We are in favor of an appropriate and equitable reallocation of such risks, which in our considered view should alleviate the plight of contractors rather than increase it.

Very truly yours,

DAVID L. HIRSCH III,
Chairman.

Mr. STENNIS. Mr. President, if the Senator will yield, I believe his reference here is to page 63, near the middle of the page. That language reads: "or against the costs of fortuitous or casualty losses resulting from such defects."

Mr. STEVENS. The Senator is correct.

Mr. STENNIS. Mr. President, I heartily agree with the Senator from Alaska. He has called attention to a very serious clause which may be a major defect in this whole section, even though it is written in good faith. It applies to all contractors in this enormous program and certainly should be deleted for the time being. It will be in conference. I support the Senator.

Mr. STEVENS. I thank the Senator.

The effect of the amendment is to take the entire section out, because the previous portion, not quoted by the Senator from Mississippi, is already permanent law.

Mr. WARNER. Mr. President, I wish to commend and support the senior Senator from Alaska with respect to his amendment to section 770 of the pending bill providing for defense appropriations for fiscal year 1982. His amendment deletes the language, which was contained in both the House and Senate committee versions of the bill, which would have prohibited the use of fiscal year 1982 DOD funds to reimburse a contractor for the cost of commercial insurance for fortuitous or casualty losses resulting from a contractor's own defects in materials and workmanship.

The record should reflect that the amendment leaves intact the permanent provisions of law on this subject in the fiscal year 1981 Supplemental Appropriations Act.

JUSTIFICATION FOR AMENDMENT

Mr. President, the issue of fortuitous and casualty losses in defense contracts, and the division of costs between contractors and the Government, is a most involved and complex subject. It involves the entire interrelationship of contract law, insurance law, and product liability law, and all the regulations and policies involved therein.

INVOLVED PROBLEM

It is most appropriate that the Congress, as well as the executive branch, examine in detail what is involved before amending the laws and regulations on this subject.

DOD OPPOSITION

The Department of Defense is opposed to the inclusion of the language which was deleted and, therefore, supports the amendment.

In a letter of November 25, 1981, addressed to Senators STEVENS, STENNIS, and TOWER, the Office of the Under Secretary of Defense, in referring to the words now stricken by the amendment stated: "This restriction on commercial insurance cost allowability is likely to increase or our contract costs, reduce competition, and cause further erosion in our industrial base."

I ask unanimous consent that the complete DOD letter be printed in the RECORD at this point, Mr. President.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF THE UNDER
SECRETARY OF DEFENSE,
Washington, D.C., November 25, 1981.

Hon. JOHN G. TOWER,
Chairman, Committee on Armed Services, Washington, D.C.

DEAR MR. CHAIRMAN: The Senate mark-up of the FY 1982 Appropriations bill includes the very restrictive language added by the House on the allowability of commercial insurance premium costs on defense contracts. This new language goes far beyond the restrictions contained in the Supplemental Appropriations and Rescission Act, 1981 (Public Law 97–12). Public Law 97–12 provides that a contractor cannot be reimbursed for costs of commercial insurance that would protect the contractor against costs of correcting the contractor's own defects in materials and workmanship, unless the contractor normally maintains such insurance in the general course of his business. DOD is currently in the process of implementing these provisions.

The new general provision is so broadly phrased that it would appear to preclude the reimbursement, under defense contracts, of costs for product liability insurance. Suppliers normally insure against potential liability for damages to third persons resulting from the use of their products, even after the product has been accepted by the purchaser; in this case, the Government.

Since such liability could be great, even where the risk is low, suppliers maintain commercial insurance to protect themselves from potential losses and with respect to small business to protect their corporate survival. Costs for such insurance are considered to be normal business expenses, and it is our position that they should be reimbursable.

This restriction on commercial insurance cost allowability is likely to increase our contract costs, reduce competition, and cause further erosion in our industrial mobilization base. Some defense contractors will elect to become self-insurers; others will remove themselves as a defense supplier. If they choose to self-insure, these costs could greatly exceed the costs of maintaining commercial insurance and would be passed to the Government.

If the contractor chooses not to bid on defense contracts because they are unable to recover their necessary business expenses, our costs will still increase because competition would be reduced. Reducing the number of our suppliers will also impair our efforts to improve our industrial mobilization base.

I strongly believe that it is in the Government's best interest to delete this additional restriction on allowability of commercial insurance costs.

Sincerely,

ROBERT F. TRIMBLE,
Assistant Deputy Under Secretary of Defense for Acquisition.

OTHER ISSUES—PRESENT COST OF COMMERCIAL PREMIUMS

Mr. WARNER. Mr. President, the cost of commercial premiums for third party liability is presently an allowable cost to DOD contractors for liabilities to third parties resulting from defects in workmanship or materials. The cost of these premiums are presently allowable regardless of the type of contract. Defense contracts sometimes require such coverage (Contract providing for indemnity). If the stricken language were to become law, the use of DOD funds would be precluded for this purpose.

SELF INSURANCE

A large portion of DOD contracts contain self-insurance clauses under which the Government becomes the insurer of the contractor in lieu of the contractor obtaining commercial insurance. This policy of long standing is based on being cheapest for the Government.

In recent contracts, the Navy has adopted the practice of not only excluding as an item of allowable cost the cost of commercial insurance, as has been required by the fiscal year 1981 DOD Supplemental Appropriations Act regarding commercial insurance for defense contractors, but has also excluded the customary protection under its self-insurance provision. It can be expected that DOD will expand the area where the Government will neither pay for the insurance nor act as self-insurer, if this bill is not modified.

SUBCONTRACTORS

Mr. President, the language is unclear as to whether subcontractors would be denied the commercial insurance reimbursement. If subcontractors are not reimbursed, issues are raised as to the effect on small business.

OTHER QUESTIONS

Does this proposed language prohibit coverage where defects clearly conform to Government specifications?

Does the Congress intend that premiums for workmen's compensation be disallowed as cost of doing business?

Is there sufficient commercial insurance available to assume the commercial risk?

Can insurance for catastrophic risk only be obtained abroad and at excessive premiums?

Would the nonreimbursement of premiums expense ultimately raise the cost of the hardware, especially if it involves activities such as a manufacturer of ammunition and involvement in unusually hazardous risks?

CONCLUSION

Mr. President, in view of the foregoing considerations, all of the facts and issues should be carefully examined before Congress proceeds with legislation on this involved subject.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 713) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STENNIS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 714

(Purpose: To raise the limitation on the value of ammunition which may be issued from other funds available from $340,000 to $680,000)

Mr. STEVENS. Mr. President, I send another amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 714:

On page 14, line 7, line out "$340,000" and insert in place thereof the number "$680,000".

Mr. STEVENS. Mr. President, this amendment is offered in recognition of the fact that the price of .22 caliber ammunition has doubled since last year. Every year the Defense Appropriations Acts have included the provision that not more than $340,000 worth of ammunition may be issued for the purposes of national competitions or matches. The amendment will raise this limitation to $680,000 to reflect a recent increase in the price of ammunition from 1 cent to 2 cents per round, thereby doubling the cost. Funding for the procurement of ammunition for the National Board for the Promotion of Rifle Practice's competitive matches is from other sources than this particular appropriation account. Therefore, this amendment has no direct dollar effect on this account, but merely raises the limitation on the value of the ammunition that may be issued for use by the National Board for the Promotion of Rifle Practice's competitive matches. I consider it a technical amendment.

Mr. STENNIS. Mr. President, if the Senator will yield, I support his position with reference to this amendment, and I think the amendment should be taken to conference.

Mr. STEVENS. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 714) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STENNIS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 715

(Purpose: To correct a printing error inadvertently omitting italics to reflect the Senate amendment in Committee)

Mr. STEVENS. Mr. President, I send another technical amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 715:

On page 14, line 8, after "section 4311" insert: *Provided*, That competitors at national matches under title 10, United States Code, section 4312, may be paid subsistence and travel allowances in excess of the amounts provided under title 10, United States Code, section 4313

Mr. STEVENS. Mr. President, this amendment provides for increased travel and subsistence payments for competitors of national matches under the direction of the National Board for the Promotion of Rifle Practice.

The fiscal year 1981 Defense Appropriations Act contains this provision which lifts the limitation on the amount which may be paid for this purpose and allows the Department of Defense to establish the amount.

Existing provisions specify that competitors at national matches may receive not more than $1.50 per day for subsistence and 5 cents per mile for travel. Clearly that limitation has long been overcome by inflation.

The Department of Defense has in past appropriations acts had authority that this amendment will give to pay competitors at a rate not to exceed the established DOD travel and per diem allowances.

In short, Mr. President, the adoption of this amendment merely continues the provision which was in the 1981 act which the House of Representatives apparently deleted. It is a discretionary provision to pay the amount that is established by DOD for other purposes.

Mr. STENNIS. Mr. President, if the Senator will yield, I approve the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (UP No. 715) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STENNIS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, we are informed that there are several amendments that will be offered. I hope that Members of the Senate will come forward particularly with the amendments that have been discussed with us.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. STEVENS. I yield.

Mr. BAKER. Mr. President, I join the distinguished Senator from Alaska in urging Senators to come forward and offer their amendments.

It is 2:20 in the afternoon. This matter has been set for some time and was set to convenience the maximum number of Senators and also, may I say, to try to assure that this bill will get to conference and be passed well before the time that we anticipate sine die adjournment of the Senate.

But, Mr. President, at this late date on November 30 we simply cannot squander a day. We simply cannot afford a day.

It is beginning to appear that no one is going to be ready to offer his amendment. We simply have to try as best we can to dispose of as much of this bill today as we can because, as I announced earlier today, I am willing to stay late tonight. I hope we can finish tomorrow. But if we have any chance of doing that and if we have any chance of finishing the necessary work of the Senate in time for a December 18 adjournment, it is imperative that Senators come to the Chamber and offer their amendments.

Mr. President, if we do not have an amendment to be offered shortly and on which there can be serious business transacted it will be the intention of the leadership on this side to put in a live quorum call and ask Senators to come to the Chamber so that we can take a canvass of how many amendments there are and try to do something about scheduling.

We are now 1 hour and 25 minutes into this bill, and it is high time that Senators made an effort to offer amendments if indeed they have amendments to offer.

Mr. STEVENS. Mr. President, I thank the majority leader.

QUORUM CALL

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

The assistant legislative clerk called the roll, and the following Senators entered the Chamber and answered to their names:

[Quorum Call No. 10 Leg.]

Armstrong	Pressler	Stevens
Baker	Stennis	Tower

The PRESIDING OFFICER. A quorum is not present. The clerk will call the roll of the absent Senators.

Mr. BAKER. Mr. President, I move that the Sergeant at Arms be instructed to request the attendance of absent Senators, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from South Dakota (Mr. ABDNOR), the Senator from North Dakota (Mr. ANDREWS), the Senator from Mississippi (Mr. COCHRAN), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Alaska (Mr. MURKOWSKI), the Senator from South Carolina (Mr. THURMOND),

the Senator from Wyoming (Mr. WALLOP), and the Senator from Connecticut (Mr. WEICKER), are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Delaware (Mr. BIDEN), the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Alabama (Mr. HEFLIN), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from Ohio (Mr. METZENBAUM), the Senator from Rhode Island (Mr. PELL), the Senator from Maryland (Mr. SARBANES), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from Nebraska (Mr. ZORINSKY), are necessarily absent.

The PRESIDING OFFICER (Mr. EAST). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 73, nays 1, as follows:

[Rollcall Vote No. 427 Leg.]

YEAS—73

Armstrong	Garn	Moynihan
Baker	Glenn	Nickles
Baucus	Gorton	Nunn
Boren	Grassley	Packwood
Boschwitz	Hart	Percy
Bradley	Hatch	Pressler
Bumpers	Hatfield	Proxmire
Burdick	Hawkins	Pryor
Byrd, Robert C.	Heinz	Randolph
Cannon	Helms	Riegle
Chafee	Hollings	Roth
Chiles	Humphrey	Rudman
Cohen	Inouye	Sasser
D'Amato	Jackson	Schmitt
Danforth	Jepsen	Simpson
DeConcini	Johnston	Specter
Denton	Kasten	Stafford
Dixon	Laxalt	Stennis
Dole	Leahy	Stevens
Domenici	Levin	Symms
Durenberger	Lugar	Tower
Eagleton	Matsunaga	Warner
East	Mattingly	Williams
Exon	Melcher	
Ford	Mitchell	

NAYS—1

Quayle

NOT VOTING—26

Abdnor	Goldwater	Metzenbaum
Andrews	Hayakawa	Murkowski
Bentsen	Heflin	Pell
Biden	Huddleston	Sarbanes
Byrd, Harry F., Jr.	Kassebaum	Thurmond
	Kennedy	Tsongas
Cochran	Long	Wallop
Cranston	Mathias	Weicker
Dodd	McClure	Zorinsky

So the motion was agreed to.

The PRESIDING OFFICER. With the addition of Senators voting who did not answer the quorum call, a quorum is now present.

Mr. BAKER. Mr. President, if I may have the attention of the Senate for a moment, it is absolutely imperative, in my opinion, that we get on with this bill. We are now 2 hours into the debate on this measure. We are close to the end of the session. There has not been one single amendment of consequence that has been offered. There are a number of important amendments that must be dealt with. We have 74 Senators present who answered on this rollcall vote.

Mr. President, I urge Members to come to the floor, to stay on the floor, and to participate in this measure. I am prepared to ask the Senate to remain in late. If we can proceed to dispose of this matter tonight it would please me mightily. If we cannot, I would hope we can finish the matter tomorrow. But it is an important bill, Mr. President. It is one of the vital measures that must be dealt with. It is one that was set with great care to try to accomplish the maximum convenience for the maximum number of Senators. We have to go to conference on this bill. We have a tentative agreement with the other body on when they will go to conference. So, Mr. President, I hope that all Senators will come to the floor now and offer their amendments.

In addition to that, Mr. President, I would hope it might be possible to agree on a time certain for final passage of this measure.

I would like to make a proposal. I do not now make the request, but I do invite reaction to this proposal.

Mr. President, I would hope——

Mr. STENNIS. Mr. President, may we have quiet? This is very important.

The PRESIDING OFFICER. The Senate will be in order.

Mr. BAKER. Mr. President, I would hope we can finish consideration of this measure by 4 p.m. on Wednesday. There are a number of amendments that will have to be dealt with in the meantime but there are two in particular that I would hope we can set now. I would hope, for instance, that we could get a vote on a B–1 amendment, which I understand will be offered, at 2:30 on tomorrow, and an MX vote—I understand there will be an MX amendment—by 2:30 on Wednesday, and final passage by not later than 4 o'clock Wednesday.

Mr. President, as far as I can tell, that would meet the convenience of the greatest number of Senators and would permit us to go on with the dispatch of this important piece of legislation.

I am prepared at this time, Mr. President, to yield the floor or to yield to any Senator who wishes to call up an amendment or any Senator who wishes to comment on this suggestion.

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

UP AMENDMENT NO. 716

(Purpose: To provide funds for research and development on the reactivation of the U.S.S. *Iowa*)

Mr. HEINZ. Mr. President, having listened with great care to the admonitions of the majority leader, I send an amendment to the desk and ask for its immediate consideration.

Mr. JACKSON. That is progress.

Mr. BAKER. Mr. President, that is known as pump priming.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ), for himself and Mr. HOLLINGS, Mr. THURMOND, Mr. SPECTER, Mr. HAYAKAWA, Mr. BRADLEY, Mr. DENTON, Mr. JEPSEN, Mr. WARNER, and Mr. D'AMATO, proposes an unprinted amendment numbered 716.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 21, after the semicolon in line 5, insert "for the reactivation of the U.S.S. Iowa, $88,000,000;".

On page 28, line 10, strike out "$6,111,579,000" and insert in lieu thereof "$6,114,579,000".

Mr. HEINZ. Mr. President, earlier this year, the House and the Senate both authorized the expenditure of funds for the rehabilitation of the battleship *Iowa*. The appropriation bill before us, as reported by the Senate Appropriations Committee, contains at this point no funds to follow through on the DOD authorization that was agreed to. My amendment quite simply, seeks to restore the funds that were authorized and that the administration wants and needs to proceed with reactivation and modernization of that very well-known battleship.

Mr. President, let me point out to my colleagues, especially those on the Appropriations Committee, that this amendment before us would restore $88 million in advanced procurement and $3 million in R.D.T. & E. for the *Iowa*. At the present time, that is included in this one amendment and might, if someone asked for it, be divisible into two separate questions. But I ask, since these two elements go hand in hand, unanimous consent, Mr. President, that the two changes be considered en bloc.

Mr. BUMPERS. Mr. President, reserving the right to object, will the Senator elaborate on the unanimous-consent request?

Mr. HEINZ. Yes, Mr. President. The Senator from Pennsylvania asked unanimous consent, with regard to the amendment—which changes two numbers in this appropriations bill, increasing one by $88 million in advance procurement for the *Iowa*, and $3 million in R.D.T. & E. for the *Iowa*—that the two items be considered en bloc; that is, that it would not, in the future, be in order for them to be divided.

The rationale for that is that they really go hand in hand, they are parts of the same request by the administration.

Mr. BUMPERS. Mr. President, are they in separate parts of the bill?

Mr. HEINZ. The Senator is correct, Mr. President. They are.

Mr. BUMPERS. Mr. President, the Senator says the $3 million is for R.D.T. & E.?

Mr. HEINZ. The Senator is correct.

Mr. BUMPERS. Why would the Senator want to include $88 million for procurement before the $3 million in R.D.T. & E. is appropriated, anyway, Mr. President?

Mr. HEINZ. Mr. President, these two items go hand in hand. The $88 million is for advance procurement. That has been asked for for that purpose by the administration. The R.D.T. & E., obviously, has to do with research and development and is apparently quite necessary in order to follow through over the 2-year period it will take to rehabilitate the *Iowa*.

I say to the Senator further that both of these items were authorized by the House and the Senate Armed Services Committees.

Mr. BUMPERS. Mr. President, why would the Senator propose to be procuring something before the research and development is done?

Mr. HEINZ. Because, Mr. President, in this instance, some of the items, as I understand it, that are going to be researched will be actually funded for procurement and other purposes in future years. In order for us to have an orderly process of accommodating those other procurement decisions, we have to spend the research and development money on those.

Mr. BUMPERS. Could the two expenditures be carried out simultaneously, Mr. President? Is that what the Senator is suggesting?

Mr. HEINZ. Yes, Mr. President.

Mr. BUMPERS. The reason I have questioned the Senator is that normally we do research and development to determine the feasibility of something before we start procuring it. Since the Appropriations Committee chose not to put any money in this bill for the *Iowa*, it seems to me that the Senator is going pretty far afield to suggest doing all of it at one time.

Mr. HEINZ. Let me just say to my good friend, Mr. President, that I am advised that not only did both the authorizing committees see fit to authorize both, but the House Appropriations Committee apparently has appropriated both the $88 million and the $3 million.

If the Senator would prefer, I shall withdraw my unanimous-consent request and we can have two votes.

Mr. BUMPERS. Mr. President, I shall have to object for the time being. Let me meditate on it a little bit and maybe later I can agree.

Mr. HEINZ. Mr. President, the only reason I made the unanimous-consent request is to expedite the business of the Senate. The Senator is perfectly within his right not only to object, but to divide the question. I am not sure what purpose that serves, but he is within his right.

Mr. BUMPERS. Mr. President, I am going to object and ask that it be divided. Later, I may recant and suggest that it be done the way the Senator suggests.

The PRESIDING OFFICER. Objection is heard.

Mr. HEINZ. Mr. President, let me say that there was a time not long past when the U.S. Navy was second to none on the oceans of the world, where not only did it help to defeat our enemies but acted as a deterrent to those who wished to challenge us and our friends. Our allies in the Middle East and all over the world could and did rely on the protection we afforded by our unchallenged domination of the seas.

Today, Mr. President, we are no longer second to none. Today, the Soviet Union has more naval vessels than at any time in their history and more warships than any nation on Earth. We can no longer afford our allies the same level of protection that we once could.

The President of the United States, President Reagan, wants to do something about that. He wants to change that. What the President wants to do is give our Nation the much-needed margin of safety we must have in our military and in our Navy. I also believe that the American people want this change and the security that it will bring us. I want this change and I believe the large majority of this body shares that desire.

However, Mr. President, the American taxpayer has been asked to shoulder a great burden and it is our responsibility to see that the tax dollars they send to Washington are spent judiciously. The reactivation of the battleship U.S.S. *Iowa* is, in my judgment and the judgment of several committees of the Congress, cost effective. For little more than the cost of a frigate, we can provide the United States with a battleship with all its strength, speed, and devastating firepower and all of this within a shorter time frame than a frigate would be built in.

Mr. President, it would be prohibitively expensive in this day and age to build a new battleship—as much as $3 billion.

The *Iowa* features internal and external armor of up to 17 inches thick, triple bottoms and high tensile steel—highly redundant systems built in an era when there was no constraint on cost, quality, or quantity of materials.

Mr. President, the *Iowa* will be tougher than any ship in anyone's navy, ours or the Soviets, This ship was designed to withstand shellfire from Japanese naval gunfire, and the Japanese had some big guns of their own—18 inch guns capable of firing 2,700 pound armor piercing shells at three times the speed of sound—a far more formidable threat than any conventional warhead the Soviets are prepared to throw at us today.

It is no wonder that no U.S. battleship has ever been destroyed in battle.

The *Iowa*'s 16-inch guns are unique and unparalleled for destructive power in support of marines in an amphibious landing, capable of firing a shell the weight of a Volkswagen more than 22 miles with great accuracy—a shell so powerful that, at 4 miles, it can penetrate 30 feet of reinforced concrete.

In addition to her 9 original 16-inch guns and 12 5-inch guns, the reactivated *Iowa* will feature 32 Tomahawk cruise missiles; 16 Harpoon cruise missiles, 4 anticruise missile close-in weapons systems; modern electronic warfare and radar equipment; and modern communications technology—all state-of-the-art systems.

This ship features an unparalleled combination of speed, range stability, and ruggedness. At 35 knots, it can match any nation's capital warships—including the modern nuclear aircraft carrier *Nimitz* or the Soviet *Kirov* battle cruiser—and at 15 knots, it can travel up to 14,000 miles without refueling.

Further, while opponents may argue that the manpower requirements of the *Iowa* would burden a Navy already spread far too thin, the *Iowa* would require less than three-tenths of 1 percent of Navy personnel. In fact, Navy recruiting reports that the battleship program is having a positive impact on recruiting in general, and over 4,000 active duty navymen volunteered for duty on the *New Jersey*, whose reactivitation has already begun.

The *New Jersey*, it is important to note, recently entered drydock—ahead of schedule and within cost.

But being ahead of schedule and on budget is nothing new for battleship reactivation. The last time the *New Jersey* was reactivated in 1967, the reactivation was done on schedule and at a cost of 12.5 percent below budget. I am proud to point out that the yard that did that work was the Philadelphia Navy Yard, in my home State of Pennsylvania.

The issue we face today is the funding of $88 million in advance procurement and $3 million in R.D.T. & E. for the *Iowa*. Without this funding, the *Iowa* will be delayed from service by at least 1 to 1½ years.

This is an intolerable delay. The threat is real and immediate. Mr. President, America at this time is playing catchup with the Soviets. The *Iowa* must follow the *New Jersey* into service for America. I ask my colleagues to join me in making this happen by restoring cost-effective funding for a much-needed battleship.

Mr. STEVENS. Mr. President, I have been here before, and I know what the Senate is going to do with this amendment; but I feel obligated to make a record about it, anyway.

As the Senate will recall, I opposed the reactivation of the *New Jersey*, and we lost on the floor of the Senate. It appears that there is substantial support for the position of the Senator from Pennsylvania, notwithstanding my feelings in the matter. I will just point out a few things that bother me.

The estimate for the *Iowa* is $407.6 million. That is $81.6 million more than for the *New Jersey*.

We had some problems on the *New Jersey*, from my point of view, because I thought we had a firm understanding that the cost of that reactivation would be within a specified limit. We find now, however, that the Navy is moving its ship overhauls that were scheduled in the Long Beach Naval Shipyard to other shipyards in order to take the *New Jersey* into the public shipyard. From the point of view of recordkeeping, this ap-

pears to be cheaper. I do not believe that this is really the case, but this is the way it appears in terms of accounting.

It is my opinion that it is premature to begin reactivation of the *Iowa* now, as suggested by the Senator from Pennsylvania, since we really are unable to determine how much it is going to cost to reactivate the *New Jersey*. It is very difficult to know what that ship is going to cost.

We feel that the annual operating cost for just one battleship, for example, is about $100 million. We do not know. We think that the total procurement costs are going to be about $408 million. There will have to be a battle group operating with each of these battleships, at about $200 million annually. So we really are looking at somewhere around $2.8 billion to $3 billion acquisition costs for a total battle group. For what? They are missile-launching platforms. They are not battleships at all.

As I said, I understand the position of the authorizing committee and particularly the position of the Senator from Pennsylvania. The *Iowa* is tied up at the Philadelphia Naval Shipyard; and it is unquestioned, I believe, that if the funds are provided, it will be reactivated on the east coast.

We are putting a great deal of money into the defense bill, and I think this could have waited. However, as I say, I understand the position of the Senator. Having lost the *New Jersey* round, I do not expect to win this one.

It is difficult for me to understand why we have to go back two generations in order to try to go forward one.

Mr. BUMPERS. Mr. President, I was saddened to hear the distinguished chairman of the Subcommittee on Defense of the Appropriations Committee say that he expected to lose this one. I think that without his very talented opposition to this, we might lose it.

According to the figures I have before me, this appropriation bill is precisely $12 billion higher than the House bill and about $8 billion higher than the President wants.

I heard the distinguished chairman of the Budget Committee, the Senator from New Mexico (Mr. DOMENICI), say on one of the talk shows yesterday that we were going to have to trim $26 billion to $28 billion more from the defense budget over the next 3 years.

I take all these things at face value. I assume that we will have to trim the defense budget, and that places an additional burden on every Member of this body to determine what is the most cost-effective way to spend defense dollars, whether it is the House version of $196 billion or the Senate's roughly $208 billion or the President's request of roughly $202 billion. It does not make any difference what figure you are talking about. The question is: What is the most effective way to build our defenses?

I submit to the Senate that certainly the most effective way is not to bring another battleship out of mothballs.

The Senator from Alaska pointed out that we did indeed lose, and if the Senator will recall at one time we lost by a very narrow margin in our opposition to bringing out the battleship *New Jersey*. It is indeed a majestic looking ship, and if one looks at the color photos that were circulated through this Chamber when we debated bringing the *New Jersey* out, it was impressive. One just almost has to be against defense when he looks at that picture and votes no, not to bring a 40-year-old battleship out of mothballs and try to convince the Soviet Union that we are dead serious about improving our defense posture.

One of the things that I hear constantly, of course, is the numbers game, particularly when we are talking about ships. Tanks are the things that most people love to compare the numbers on and next are ships.

Everyone knows that if we wish to play the numbers game we are going to have to change our entire naval strategy, and we are going to have to change our entire conventional war strategy.

The figure I saw in the spring of this year for the renovation of the battleship *Iowa* was $392 million. That figure is now $407 million.

But there are a couple of points I wish to make even on the $407 million, and that is I believe they call it a class F estimate, which is where four admirals sit around and each one puts a figure in the hat as to what he thinks it will cost to reactivate the battleship *Iowa* and someone pulls out a figure and that is it. Now, I am jesting, of course. But a class F estimate is nothing more than someone's idea of about what it might take to do the job.

What do we get for $407 million, assuming that that figure holds up? Do we get something along the lines of a *Virginia*-class missile-guided nuclear cruiser? The answer is "No."

What we get are a few 16-inch guns which I think most sensible, objective naval experts will tell us were found to be rather obsolete even so recently as the Vietnam war.

And they talk about a carrier deck for at least helicopters and maybe a few V/STOL aircraft. But do not be mislead. That is not included in the $407 million.

There is always an argument about the thickness of the armor plating on these four battleships, that everyone seems to insist on bringing out, and that is that they have 16 inches of steel.

Let me ask the Senator a question. What is the deck of the *Iowa* made out of?

Mr. HEINZ. I assume the Senator is asking a rhetorical question.

Mr. BUMPERS. No; I am asking a question. I wish the Senator to answer.

Mr. HEINZ. The decks of battleships are plank wood over steel.

Mr. BUMPERS. It is teak, is it not?

Mr. HEINZ. It is teak over steel.

Mr. BUMPERS. How substantial does the Senator think teak would be against a cruise missile crashing into the superstructure of this ship?

Mr. HEINZ. Mr. President, will the Senator yield?

Mr. BUMPERS. I am asking a question for an answer.

Mr. HEINZ. The Senator made a case that he would prefer, I gather, to see a *Virginia* class nuclear cruiser built. Does the Senator maintain that such a cruiser could be built for $407 million?

Mr. BUMPERS. Let me tell the Senator something. The U.S.S. *Arkansas*, with which I happen to be rather familiar because my wife christened it, and loves it, cost $340 million. But I know that that ship today costs $1 billion. But we are not going to get anything even close to a CGN40 ship for $407 million which is the estimated cost of this ship.

Mr. HEINZ. Mr. President, will the Senator yield further?

Mr. BUMPERS. I yield.

Mr. HEINZ. How long would it take to build a CGN or *Virginia*-class nuclear cruiser?

Mr. BUMPERS. I do not know the answer to that. I assume it is somewhat longer than this. I can tell the Senator one thing. After we get it built it has a 35-year life expectancy, and after we have spent a half billion dollars on this ship it has a 15-year life expectancy.

Mr. HEINZ. If the Senator will yield further, just let me say that it is my understanding it would take 5 to 6 years to build from scratch a new ship such as the one as he suggests. Today the cost of that, by the Senator's own admission, is $1 billion. What it would be 6 years from now is the Senator and anyone's guess. So it seems to me when we can have the equivalent, maybe better—we can argue about whether it is better or worse—but it certainly has all the firepower and more of a Virginia-class nuclear cruiser, it has far more Tomahawk cruise missiles, it has far more armament, it has far more gun firepower, and we can have it in less than 2 years at a fraction of the $1 billion, at $407 million.

Mr. TOWER. Mr. President, will the Senator yield to me to ask the Senator from Arkansas a question?

Mr. HEINZ. I yield.

Mr. TOWER. The Senator from Arkansas said that the experts say that this is not a good idea. I believe it was words to that effect.

Mr. BUMPERS. No; I did not say that. I did not say that the experts said this is not a good idea. I know a lot of admirals down there who probably want this ship.

Mr. TOWER. What about the marines who fought with it in Vietnam? Were they talking out of their hats or are they wrong? Are they lying to us when they say that they could use that 16-inch gunfire based on their Vietnam experience?

Mr. BUMPERS. Let me tell the Senator that the man who was Secretary of the Navy during a good portion of the Vietnam war is now a Member of the Senate and he will tell the Senator that the *New Jersey* with its 16-inch guns was virtually ineffective in Vietnam.

Mr. TOWER. We have another Secretary of the Navy who holds otherwise and the marines hold otherwise.

Mr. BUMPERS. That is what makes a horserace.

Mr. TOWER. Is the Senator suggesting that the marines are lying to us?

Mr. BUMPERS. I am an ex-marine. The Senator cannot get me to say that marines ever lie.

Mr. TOWER. What about testimony we have had from combat veterans who say it was an enormous help in Vietnam?

Mr. BUMPERS. I am not saying they are lying. I do not know who the marines the Senator is talking about are. I assume marines can be mistaken.

Mr. TOWER. Let us start with General Barrow. Does the Senator question his integrity?

Mr. BUMPERS. Let me ask the Senator this. From a pure cost-effectiveness standpoint is it better to spend $1 billion for a ship that is electronically sophisticated with guided missiles that I think even the marines would love to see offshore or any other place, than it is to drag out a 40-year-old ship and spend a half billion dollars on it for a 15-year life expectancy?

Mr. TOWER. The Senator is engaging in a little misrepresentation here. Yes, the ship was built 40 years ago, but we base ship life on the basis of service life. There is a lot of service life left in this ship. It has more armor than any other ship we have in our inventory, 12 to 18 inches. It is a very survivable ship and from the cost-effectiveness standpoint there is hardly anything we could do that is more cost-effective.

The Marines and the Navy both believe it would be a great force multiplier, and there is expert naval testimony to that effect.

When the U.S. Marines come in and say that if they have to make forcible entry they would dearly love to have those 16-inch guns. I think they know what they are talking about when they are basing it on actual combat experience.

If we want to have a force multiplier at relatively low cost this is the way to go.

I say to the Senator from Arkansas that we have debated this over and over again in this Chamber. He has been beaten on this issue 2 to 1 every time it has come up.

Mr. BUMPERS. That was on the *New Jersey*.

Mr. TOWER. I do not know why he is trying to delay this.

Mr. BUMPERS. The Senator is going to have to beat me every time he tries to bring one of these rust buckets out of mothballs. He is going to have to beat me every time he does that.

Mr. TOWER. "Rust bucket" is a misrepresentation. Do not tell us that. We have had experts all over these ships. The engineering system works beautifully. They are not rust buckets. The average service life of all four of the *Iowa*-class battleships is longer than the average service life of all of the combat vessels in the U.S. Navy.

Mr. BUMPERS. Senator——

Mr. TOWER. You guys are always wanting to bring down the cost of defense, a lot of you are. Well, I will tell you this is the most cost-effective way you can do it and get more ships.

Mr. BUMPERS. You still have not told me why this is cost-effective.

Mr. TOWER. And an effective ship.

Mr. BUMPERS. How is it going to be cost-effective? It is going to cost another $407 million. They talk about helicopters and cruise missiles, but that is not included in the cost. You are talking about another $400 million when you talk about that.

Mr. TOWER. Let me tell you something else, because you do not talk about the crew complement this ship is designed for. There will be room on that vessel for over a battalion of Marines, indeed for about 1,000-1,200 men.

When we are talking about rapid deployment and the need to get some lift into the Marines, here is another partial solution to our problem because we cannot possibly build all the amphibious lift that is required to move two Marine amphibious forces over the next decade, and if we are going to meet our rapid deployment requirements in the near term we are going to have to look to solutions like this, and this is an enormously cost-effective solution, and I hope we will not have to romance this issue over and over again.

Mr. BUMPERS. You are taking over the debate from the Senator from Pennsylvania.

Mr. TOWER. It has been decided upon in the House.

Mr. BUMPERS. Senator, let me ask you this. You got here just a tad late from the time the Senator from Pennsylvania and I were arguing. Will you talk about what the deck of the ship is made of? Everybody talks about 16-inch armor on the sides of the ship and front, but nobody talks about a teak deck.

Mr. HEINZ. Let us talk about the deck since the Senator is concerned about it. Which does the Senator think is stronger, the deck of the CGN or the deck of the ship? Which is stronger if the Senator wants to make comparisons?

Mr. BUMPERS. Well, the CGN would be stronger, and I have been on both of them.

Mr. HEINZ. Does the Senator believe the cruise missile will damage the CGN less than the *Iowa*?

Mr. BUMPERS. Maybe not a cruise missile, but just a nice little shell lobbed on top of that ship.

Mr. HEINZ. A nice little shell. But what the Senator fails to realize is he is talking about a ship that was built to withstand coastal gunfire of a very significant source. The Japanese had huge, 18-inch guns, and this ship, and ships of this class, were built to withstand that kind of attack.

Now, the fact is that there is no way on Earth that a CGN could be more survivable than this ship unless you want to take all the naval architects who operated during World War II and accuse them of perjury, lock them up for having built or being unable to build a decent battleship, and the Senator knows that is not true. The naval architects who built these ships were not fools, they knew what they were doing.

Why, Mr. President——

Mr. BUMPERS. If this is such a red-hot ship why do we not start building battleships?

Mr. HEINZ. For the same reason, Mr. President——

Mr. TOWER. Because you cannot build them at this cost any more. In fact, to reproduce that ship today would cost an enormous amount of money. That is why it is such a bargain.

Mr. BUMPERS. It is going to cost a lot more money.

Mr. TOWER. You cannot build a ship today for anything like the cost-effective price.

Mr. HEINZ. Mr. President, if I may make just one other comment, why is it that we are approaching, first, the *New Jersey*, and now the *Iowa* with a sense of urgency? The reason——

Mr. BUMPERS. Because they are going to be retrofitted in Pennsylvania. That is the reason why we are doing it. That is why we are urging it.

Mr. HEINZ. I will say to my good friend that the *New Jersey* does not have anything to do with Pennsylvania. It is on the west coast, and I supported that. So I thank the Senator to understand that this is not a matter of any parochial interest.

Mr. BUMPERS. Senator, I am not——

Mr. HEINZ. The chances are I might say——

Mr. BUMPERS. I apologize.

Mr. HEINZ. It is no better than 50–50 that this ship will ever be rehabilitated in Philadelphia. There are other yards that want it and have just as good a shot at it as we do.

Mr. BRADLEY. Mr. President, will the Senator yield on that?

Mr. HEINZ. In a minute.

What I want to say to my colleagues, Mr. President, is this: The reason why there is some urgency about first the *New Jersey* and then the *Iowa*, these battleships, is that we have made a strategic commitment of a brand new kind in the last few years in the Middle East, and as of today we simply do not have the wherewithal to back up that commitment.

Now we either believe that there is a potential threat to the oilfields of the Middle East or we do not. But if we do believe there is some kind of threat, we had better have something more than the plans for a rapid deployment force on paper someplace. We had better have the capacity of sending in a task force

group; we had better have the capacity of having some marines that, if necessary, can go ashore; we had better have the ability to support them, and we had better have the ability to defend ourselves.

The reason why the Defense Department and the Navy Department and the President of the United States and the Armed Services Committee want this battleship is that we can get it fast, we can get it within 2 years.

Now, some people might say that is too slow; some people might say that there is a threat today. Well, I would not disagree with that. I would like to have this capability much sooner, Mr. President, but there is no way we can get this much capability any sooner. The other alternatives are 5, 6, or 7 years in the future, the end of this decade, and they are all, even by the Senator from Arkansas' own admission, vastly more expensive.

This is a $400 million proposition. Sure, we could spend $1 billion; we could spend $2 billion, like the Russians did on their Kirov class cruiser, and would we have a ship any sooner? Would we have a ship that was substantially more survivable? No. That is why I say, Mr. President, that this is in our best interests, and if we expect to be credible with the rapid deployment force we had better vote "yes," on this; otherwise the Soviets will know we are just a paper tiger.

I yield to the Senator from New Jersey.

Mr. BRADLEY. The Senator stated this refurbishing might not be at the Penn-Jer-Del Naval Yard in Philadelphia. Could he say for the record where else it might be accomplished?

Mr. HEINZ. The Senator would prefer not to. You never advertise other shipyards, and I would have to say to my friend from New Jersey that by far the best place to have it done would be at the Penn-Jer-Del Shipyard, but I would have to say in all honesty there are other shipyards capable of doing this work. I see the Senator from Virginia on his feet.

Mr. BRADLEY. I would like to suggest——

Mr. HEINZ. The Senator has opened a Pandora's box.

Mr. BRADLEY. We had better not open this box as to where the best shipyard is located. I think the Senator has a meritorious amendment, which I cosponsored, and I am also pleased to agree fully with what the distinguished chairman of the Armed Services Committee had to say about the coincidence of interests here with the Marines and the rapid deployment force and our international defense generally.

Mr. HEINZ. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in support of the amendment to the fiscal year 1982 appropriations bill to reactivate the battleship *Iowa*. I support this amendment for the following reasons:

First, reactivation of the *Iowa* is one cost-effective step in the direction of redressing the current naval imbalance between our country and the Soviet Union. Today, we have only 450 ships in our fleet. This compares to 800 Soviet ships.

To redress this imbalance, the administration is striving to build up to a naval strength of 550 to 600 ships by the 1990's. Reactivating the *Iowa* in addition to the *New Jersey*, which is already in the process of reactivation and modernization, would add two fine fighting ships to the Navy at a cost of one-fifth what it would cost to build two new ships.

Second, the *Iowa* would be a significant asset of fire power to our Rapid Deployment Force. This class of ships has 16-inch guns which can fire a 2,700 pound projectile a distance in excess of 20 miles. This projectile can penetrate over 20 feet of reinforced concrete when fired from a distance of 4 to 5 miles. With these guns, the *Iowa* would provide a strong power projection in many of the volatile areas of the Third World.

Furthermore, the capability of the *Iowa* is not confined to these guns. In addition, this battleship will have other capabilities such as the Tomahawk missile, the Harpoon missile, anticruise missile close-in weapon systems, and many others that are necessary for modern warfare.

Third, the *Iowa* is a highly survivable floating asset. It is armored to a minimum thickness of about 12 to 13 inches of welded armor, and in some places, the thickness is up to 16 inches. Furthermore, the armored hull is not the outer one, but the fourth one in. This increases its survivability because the explosives would have to penetrate the three outer hulls before reaching the 12-inch armor. This ship can indeed take a beating and keep on fighting. Currently, we do not have this level of survivability in our fleet.

In addition, the *Iowa* has a range of 15,000 miles at 17 knots, or 5,000 miles at 30 knots. This endurance level is due to the 9,000 tons of fuel that this battleship can carry. This capacity gives it the ability to respond to emergency situations requiring refueling of other ships that do not have this range.

Mr. President, the *Iowa* has served only 7 years and has over 20 more years of service life that we can tap by reactivating it. The capabilities that I mentioned can be obtained in about 21 months after reactivation; while building another ship would take no less than 6 years.

The *Iowa* reactivation, like that of *New Jersey*, is uncomplicated, and the modernization is simple, direct, and effective. In fact, this ship will be an exact copy of *New Jersey*.

At a time when we are rearming America at a minimum cost, reactivating the *Iowa* is a sound investment that brings quick results. I urge the Senate to vote for this amendment to the appropriations bill.

I cannot imagine the Secretary of the Navy recommending this modernization if it were not advisable and could get us a ship quickly. It would take 5 or 6 years to build a new one, and it would cost five times as much. I cannot imagine the Secretary of Defense approving this ship if it were not the kind of ship that would save money and enable us to obtain a ship quickly at this crucial period, when we need more ships between now and 1985 and 1986. And I cannot imagine the President of the United States approving the ship unless he felt that it was necessary and would save money and we could get it quicker than to build a new ship.

Mr. President, I urge the Senate to approve this ship. It would be foolish to do otherwise. The only commonsense position we can take here is to approve this ship.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, I am not going to extend the debate on this matter. First of all, if the Senator from Pennsylvania was affronted in any way by what I said a moment ago, I apologize. There are a couple of things in here that are made in Arkansas and if anyone tries to take them out, I will be on the floor defending them. It is part of our job to look after our constituents. I understand that. I did not mean to denigrate the State of Pennsylvania at all.

To get back to the subject, I have to ask a few questions that I think are relevant. No. 1, if 16-inch guns are a highly desirable thing, I cannot help but ask why have we not put one on a ship in 35 years?

No. 2, if cruise missiles are desirable, and I believe they are, what is the most invulnerable way to deploy a sea-launched cruise missile? Is it on the deck of a battleship 40 years old with a wooden deck, with vertical launch tubes for the cruise missiles? Or is it on the new Los Angeles class attack submarine where one can put 12 cruise missiles that are absolutely invulnerable?

Everybody here knows that the Navy is busily engaged not only in putting sea-launched cruise missiles on all new attack submarines, but that it is the present plan, and there is money in this budget, to retrofit the existing Los Angeles type attack submarines to put cruise missiles on all of them.

This $407 million is today's figure. And, of course, all of us know it will cost more than $407 million and everybody knows we will not get it completed in 2 years—those things just never turn out that way—to put the best face on it. Is it a wise expenditure of money to put 32 cruise missiles on the desk of a 40-year-old battleship the speed of which will be questionable, and the electronic gear on which will be questionable because you will be retrofitting? You will have to tear out the insides of that ship and start all over again.

Then, let us talk about the personnel problems. I am a person who believes

that we have a good Navy. Everybody talks about how many ships the Soviet Union has and how few we have. Nobody ever mentions the fact that we have twice the tonnage in our Navy that the Soviet Union has and we have twice the tonnage for very good reasons, very good naval reasons. Our Navy has chosen the aircraft carriers and the large battle task groups. I am not quarreling with that. I support the Navy, I support the Marine Corps, I support the modernization of our Navy, and the building of a 600-ship Navy. However, we are now 20,000 enlisted men short in the existing Navy required to man some 467 ships we are sailing today. We are short 2,500 midgrade officers. We are going to have to have 60,000 more men and women in the U.S. Navy to man a 540-ship Navy which we are shooting for in 1987.

So you have to ask yourself this question: Is it sensible from a manpower standpoint alone to retrofit a ship, which I consider highly questionable, that will require 1,500 men to man, whereas the CGN cruiser we were talking about a moment ago requires 508 men? And I think it is a much better ship from the firepower standpoint, from the mission of the battle task group; you name it and it is better.

It has been said that this ship has 16-inch guns and will lob a 1-ton shell 20 miles. That is fine, if you are shooting at somebody who is not going to shoot back. I recommend bringing this ship in to within 20 miles of the shore of any country to which the Soviet Union has not supplied any sophisticated missiles, or any country that the Soviet Union has not given artillery pieces to, which will fire back. Or any country that does not happen to have an airplane capable of flying 20 miles.

But I could not recommend taking it in within 20 miles of the shore of any country that has any of those things.

As I say, if 16-inch guns are so great, why have we not put one on a ship for the past 35 years?

I knew when we were standing here debating the battleship *New Jersey*, Mr. President, that there was a good possibility we were going to have to go through this again and again and again. I said "again" three times because this is the second ship and we have two more. There are four of these battleships.

My final question, Mr. President, is: What is the urgency of rebuilding this ship, retrofitting the battleship *Iowa* right now, before we even find out whether this is a feasible approach or not? The battleship *New Jersey* has been under retrofit for 3 months and it was said here time and time again during the debate on the battleship *New Jersey* that that ship could be retrofitted within 21 months. That is 18 months off. Is that too long to wait to see whether or not we are on the proper course of bringing two battleships, let alone four, out of mothballs, to spend somewhere between $350 million and a half billion dollars to put 32 cruise missiles on a very vulnerable ship for a 15-year life expectancy?

Just look at the cost figures. You can be emotional about this. I love railroads and I love ships. I love to watch them sail the oceans. But how I feel about these things nostalgically as an old marine or how I feel about these things emotionally have nothing to do with the way I feel about these things in outfitting a 540-ship Navy that will mean something to the Soviet Union. One thing it can mean is that we are serious.

But from a cost-effective standpoint, not one Senator in this body believes that the final cost on this ship is going to be $407 million. But assume for the moment that it is. What you are getting is a 40-year-old ship retrofitted to last 15 years, carry 1,500 sailors, and carry 32 cruise missiles that will be in a very vulnerable position, in a vertical position, with a deck that is made of wood.

If people consider that cost effective, if they consider that good naval planning, vote for the Senator's amendment. If you think that does not make sense in light of the manpower requirements of this country, if you do not think that makes good sense from a cost-effective standpoint, and if you think we are going gung-ho to bring four of these ships out of mothballs without ever knowing whether the first one was a good buy or not, then do not vote for the Senator's amendment.

I yield the floor, Mr. President.

Mr. STEVENS. Mr. President, I see my good friend from Alabama seeks the floor.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. DENTON. Mr. President, before beginning my formal remarks, I would like to respond to my friend from Arkansas who asked the question why have we not put 16-inch guns on ships for 35 years. Part of the answer is that there was a feud between the battleship and the carrier sailors, a classic example of interservice politics. The main answer is it was a mistake. This was evidenced when we reactivated the battleship *New Jersey* during the conflict in Vietnam.

I know that the question from the Senator is sincere, and I give him a sincere answer. In Vietnam, we lost hundreds of aircraft at a great cost in lives, as well as dollars, that could have been saved had a battleship been on station.

A battleship could have knocked out the Thanh Hoa bridge that I was bombing at the time I was shot down.

We lost five planes in 1 day on that one target. I point out that the Thanh Hoa bridge was only 12 miles inland, well within the range of the 16-inch guns on the *Iowa* class battlehips. There is a reason for those ships and thank God, the Navy is coming forward asking for them again.

Mr. President, I wish to address this issue, which I believe is of vital importance as we act on the fiscal year 1982 Department of Defense appropriations bill. It is my belief that the Senate's action on the pending amendment offered by the senior Senator from Pennsylvania will underscore our commitment, or lack thereof, to address effectively the growing defense imbalance between the United States and the Soviet Union.

Allies and adversaries alike are acutely aware that our naval forces have been spread dangerously thin. We have forced our one-and-a-half-ocean Navy to maintain a three-ocean commitment. This tenuous situation comes at a time when a strong naval presence is required to insure deterrence, presenting proof of our capacity to protect our interests, honor our commitments, and, above all, win the war over control of the seas should deterrence fail.

It is indeed a tribute to the quality of American seamanship that, to date, our Navy has been able to preserve success in her assigned mission. If the fleet is not brought up to the level of strength recommended by the administration, however, the naval balance of power will have been permitted to deteriorate to a condition that I must label unconscionably dangerous.

It is for this reason that I have joined with my distinguished colleagues from Pennsylvania and South Carolina, and others, in cosponsoring this amendment that seeks to appropriate the $91 million previously authorized for the reactivation of the U.S.S. *Iowa*. *Iowa* reactivation, which will follow the already initiated reactivation of the U.S.S. *New Jersey*, represents a responsible and effective effort to redress the neglect that our naval forces have endured for most of the past decade. Moreover, *Iowa*, together with her sister ships, enjoys the distinction of being the most survivable, seagoing weapons platform in our arsenal, with respect to nuclear, as well as conventional assault.

The planned phase I modernization of *Iowa* is identical to that being presently performed on *New Jersey*, and will provide these battleships with the most advanced and versatile weapons systems available, including 32 Tomhawk cruise missiles, 16 Harpoon antiship missiles, 4 Phalanx antiair systems, modernized communications, and air search radar systems.

These improvements, combined with her present configuration of nine 16-inch guns, capable of firing an unassisted 2,700-pound projectile 23 miles, transform *Iowa* into a formidable offensive platform capable of effective interdiction in both high- and low-threat contingencies. The fact that this reactivation can be undertaken at less cost and time than it would take to procure a new surface combatant with far less capability, reflects a fiscally responsible initiative that will fill a perilous gap in terms of time and capability.

The commitment of the Secretary of the Navy, together with the facts that the *New Jersey* reactivation is on cost and ahead of schedule, is indicative that *Iowa* offers a speed of production that is appropriate to the need: the mid-1980's. This need can be filled in no other manner. *Iowa* offers an opportunity to get more bang for less bucks. Moreover, the battleships in that class have a greater versatility for effective performance than any other type ship, or weapon, in the U.S. Navy. I point out that, with 19.5 inches of steel surrounding the conning tower and 13 inches around the hull, the *Iowa* class battle-

ship is an order of magnitude more survivable than any other ship afloat.

Charges have been made that the battleship is not a modern weapon. It could be said that neither is the bayonet or, for that matter, man himself. This fact becomes poignant when we realize that there are no longer any battleship men in the Navy, yet the U.S. Navy, as a whole, has passed judgment that this ship is necessary and preferable to certain new surface combatants, or even aircraft. I rely on that judgment, I have agreed with it for years, and I continue to support it wholeheartedly.

Mr. President, the Navy has asked for this ship. The administration has asked for this ship. The Department of Defense has asked for this ship. The House of Representatives has concurred in this determination, and this Senate has already authorized funding for this ship.

Finally, Mr. President, some have stated that a decision on the reactivation of the U.S.S. *Iowa* should be postponed pending an evaluation of *New Jersey* after she returns to active duty in the fleet. This course of action represents a luxury we can no longer afford.

The expansion of our Navy can no longer be viewed as a long-term goal. It is a pressing necessity. We do not have 15, 10, or even 5 years to begin to address the existing shortfall. It is imperative that we take substantive action now. I urge my colleagues to join me in demonstrating a unified and credible national resolve, and move for the adoption of this amendment.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I have been listening to my distinguished colleague from Alabama. Obviously, he knows far more about the Navy and ships and the utility of battleships than, of course, even my distinguished colleague and principal author, the Senator from Pennsylvania (Mr. HEINZ).

The Senator from Arkansas is not here just now, but it is really interesting to hear him talk about the 16-inch guns. When we make these political talks, how silly it is that we here "we are going back to World War I and World War II equipment," the fact of the matter is, Mr. President, as the Senator from Alabama has just emphasized, the reactivation of battleships has been under very, very careful study by many of us who have been working in the defense field over the years. As Senator DENTON has said, the program has been authorized by both the House and the Senate.

The amount has been included in the House appropriations bill, and the House Appropriations Committee has not been necessarily liberal or gracious toward the military. They are passing a substantially smaller defense measure than we are on the Senate side. But it has been included, Mr. President, I think for a very good reason: We are looking for hulls, ship hulls, to put afloat to carry all kinds of weapons.

Mr. President, when you come down to the capability of the United States of America to produce a vessel, it is very limited. The fact of the matter is that the Secretary of the Navy this year had to threaten the construction of Trident submarines overseas if the particular manufacturer did not come to terms with the deficiencies in construction and the stretchouts and the delays that have been suffered in the construction of the Trident sub.

On that point I wish I had the file here. I do not want to lengthen the debate, but I think our Department of the Navy now has set a new kind of precedent in not only coming to grips with General Dynamics and other manufacturers, but laying out a plan where, at Newport News and other places, we have these stopgap measures, somewhat as intended by the Nunn amendment to prevent cost overruns. We have these stopgap measures written into the various contracts so the Department of the Navy will know whether a cost overrun or a delay is imminent and they can move in adroitly and lessen any overrun or any unusual cost.

Mr. President, it is with that approach that they have been reactivating the *New Jersey*. It is on course and on schedule, and, very, very interestingly, it has attracted enlistments. In fact, it has over-enlisted its crew.

There is a good deal of latent pride in this country. We have been running it down from every angle: We do not have an energy plan, we do not have an economic plan, we do not have a defense plan, we do not have any kind of plan except some individual public officeholder running around talking about what is wrong with Government. The fact is that the people are ready, willing, and able to volunteer if given a proper assignment. They see in the reactivation of a battleship a usage, and quick usage, if you please, if for no other purpose than rapid deployment of our personnel in the Persian Gulf.

We have been trying to flesh out that commitment, Mr. President. There has been a lot of big talk. We saw on TV that if the Soviets moved toward the Persian Gulf, that would mean war. Well, Mr. President, we are not prepared in the Persian Gulf for any kind of war, in spite of the successful exercise that we have just had in Egypt. We are not about to be prepared if we are just going to sit and debate, as the Senator from Arkansas has said, for another 18 months.

Every time we come to a defense feature, there are certain Members who appeal to the Senate that we do not have the manpower if we get the equipment; or, if we get the manpower, we do not or should not have the equipment.

Mr. President, this proposal is a very well thought out and well conceived move toward increasing the range, increasing the firepower, and increasing the capability of the U.S. Navy, at the cost of one B–1—$400 million. We will get into a debate tomorrow on the Air Force and its particular equipment, specifically bombers.

The fact is that we have about 354 B–52's. We have many F–111's. We have F–15's that can be used as bombers. The Saudis were asking for bomb racks for the F–15's. We have the F–16's, which were employed by our Israeli friends in the bombing of the reactor at Baghdad. We have the F–18's a fighter bomber, which is the best of the best. We can go down the list to the A–6's, A–7's, and everything else—and in this amendment we are just talking about the cost of one B–1 which is included in this particular defense appropriation measure. I submit we are buying a lot of capability with this ship for comparatively little money.

Here is a ship that can travel over 30 knots an hour, with a range of 14,000 miles, heavily armored, double-hulled, and provide a cruise missile carrier. I think it is highly important that it be put in use.

We are not going to put all the cruise missiles under the sea, on submarines. Although we need more submarines to carry those cruise missiles. We additionally need some to protect that Navy, to be used in naval exercise. That is the whole idea.

That incidentally was one of the great reasons for the resistance I had to SALT II, where we had restricted the limit and the range of our intermediate cruise missile but had not restricted in anyway the intermediate ballistic missile or SS–20's, SS–4's, or SS–5's, which could be employed with the addition of a booster and become intercontinental. We had not restricted the intermediate ballistic missile system.

As to those who talk about waste, fraud, and abuse, and the value of a dollar spent, and trying our best to keep up and keep pace with our technology—I say yes, with our cruise missile we can increase the firepower, we can increase the range, and we can economize on the construction of ships. If you want to see an economical buy, the reactivation of the *Iowa* certainly is one.

It is said, it is an impossible task. Not so. We have reactivated one of these vessels before. We know we can put it on schedule, and we know it can be done on a 2-year schedule. You can put a better hull on line in 2 years, rather than 5 years, at one-third to one-fourth the cost; and we will have the manpower, I can guarantee, for this added ship strength of the U.S. Navy. We cannot argue on the floor of the Senate that we have only a certain force level for the Navy and therefore cannot produce new ships and can only restore old ones. I hope that is not the argument here.

I urge the Senate to approve this amendment. It is in the House appropriations bill. It is very much needed and can be employed very quickly, extending our force and firepower. And we can economize on the construction of various other vessels that would, in order to have similar armament and similar firepower, require 4 to 5 times the cost and over 2 to 3 times the construction period involved.

With respect to waste, fraud, and abuse, or cost overrun, is it the desire of those who oppose this amendment to come back after 18 months and let inflation take over, then let the contract, and then try to play catch-up ball with the Soviet Navy? I daresay not.

I think the wise course of action is to join in the amendment of the Senator from Pennsylvania and move along with our colleagues on the Armed Services Committee, in both Houses, who have ap-

proved this and get in step and move to other vital items in this measure.

(Mr. QUAYLE assumed the chair.)

Mr. STEVENS. Mr. President, it would be of no great avail to me, I guess, to debate at length with my good friend from South Carolina about the relative merits of one B–1 as opposed to one aged battleship that is to be put out in the middle of the Indian Ocean to scare the Russians. We have made that record before. But it seems strange to me that these battleships have been tied up for so long and everyone is looking around for some way to modernize the Navy, and we suddenly bring them out when we want to launch cruise missiles.

At a time when we are looking for cruise missile launchers and for versatility in the Navy as well as the Air Force, I cannot understand bringing out the great-great-granddaddies of them all and saying suddenly that we have some vessels that have some superiority. If they have that, why were they retired? If they have the invulnerability that everyone talks about, why has it taken so long for us to decide to use battleships?

I am constrained to think that the President I remember most, President Eisenhower, would say that this is another example of the military-industrial complex dreaming up something it cannot forget.

I cannot think of a mistake we have made in terms of naval policy that is greater and in the long run will cost the American taxpayers more than the concept of using these four aged battleships as the opening wedge of the naval structure for the year 2000. I wonder how many Senators realize that it will be about that time before they are all on line, because reactivation will be stretched out and stretched out once we see what the costs are.

Mr. President, I see no reason to make a motion to table. If my friend is ready to vote, I am ready to vote. A motion to table, in my opinion, will only lead to two votes, and we might as well have an up-and-down vote. If the Senator from Pennsylvania is ready, I am ready.

Mr. HEINZ. I say to my good friend from Alaska that I am ready.

Mr. President, I do have a unanimous-consent request which is in part a technical and conforming change to the amendment, in that we can reduce the number in the amendment by $1 million, because I am advised by staff that we have slightly more money in there than necessary, given the fact that there was an increase in committee.

I so modify the amendment. I have cleared this with Senator BUMPERS and Senator STEVENS.

Mr. STEVENS. Mr. President, I urge that the Senate permit this modification.

Mr. HEINZ. I send the modification to the desk.

The PRESIDING OFFICER. The amendment is so modified.

The modified amendment is as follows:

On page 21, after the semicolon in line 5, insert "for the reactivation of the U.S.S. Iowa, $88,000,000;".

On page 28, line 10, strike out "$6,111,-579,000" and insert in lieu thereof "$6,113,-579,000".

On page 22, line 13, strike out "$9,243,-900,000" and insert in lieu thereof "$9,331,-900,000".

Mr. HOLLINGS. Mr. President, let me just add one little point to the point my distinguished colleague from Alaska made.

He says that suddenly they decided there was something to do for the old battleship lying at port there at Bremerton.

The fact of the matter is I had that same attitude. I went to Bremerton when they pulled the U.S.S. *Missouri* up at Bremerton over 10 years ago and I saw her rusting up there and came upon the idea as did others, "why not bring that battleship to my home town of Charleston, S.C.?" I could get her painted up and everyone going up I-95 or U.S. 1 would see the sign that would say "turn left or right and see the Japanese surrender aboard the deck of the U.S.S. *Missouri*."

So I went about getting this particular ship, all the time claiming it was rusting and no good and of no use.

Mr. President, I learned the contrary was true. The Navy would not put her and many of these other ships on the inactive reserve for the same reasons that we now have here. They realized that we are not building ships any more. We are certainly not building them with this kind of hull strength, capability and range. The capability is just not going to be duplicated. We cannot afford for that kind of ship to be constructed any longer.

So they said no, we would have to hold up, and I have been, of course, disappointed in one sense but enthused in another sense, that they intend to move forward and go ahead with this plan. There is a good bit of usage, in other words, in these particular vessels. It was not just a quick decision of some naval preeminence who came along and said, "We need a bunch of ships; let us reactivate them." The Navy has been trying for years to have these ships renovated. Of course, the cruise missile alone has proved the worthiness of these ships as a platform, in and of itself, to increase the firepower and range of our Navy.

● Mr. SPECTER. Mr. President, I am pleased to support my distinguished colleague from Pennsylvania, Senator HEINZ, and join in cosponsoring this amendment to restore advance procurement funds for the reactivation and modernization of the U.S.S. *Iowa*, the second of four *Iowa*-class battleships that the Navy has planned to reactivate. These funds, $88 million for procurement and $3 million in R.D.T. & E., were authorized in the fiscal year 1982 Defense authorization conference report and are a vitally important element in securing a strengthened and more effective U.S. Navy.

From a once unchallenged supremacy of the seas, the U.S. Navy is now facing a growing Soviet naval threat, characterized by one of the most rapid shipbuilding and naval expansion efforts in recent history. The Soviet Navy, after many years of concerted effort and attention, has achieved a quantitative and qualitative superiority in several important aspects of their naval forces, while the U.S. Navy's resources have been stretched to a point where two aircraft carriers can no longer remain in the Mediterranean and maintain U.S. peacetime commitments. Immediate steps must be taken to redress the imbalance, and reactivating battleships is one of the most cost-effective and efficient ways to fill the needs of an overcommitted Navy.

Battleships provide speed, stability, survivability, and massive gunfire support capability. They are as fast as the *Nimitz* aircraft carrier and will be equipped with an impressive strike system and a family of cruise missiles that will allow them to be used for power projection, to enhance sea-based tactical air power and fire support. Battleships are among the least vulnerable ships because of their very resilient hulls and, as Secretary of the Navy John Lehman noted, are "tougher than any ship in anybody's navy." For the cost of a frigate, each modernized battleship will add a rapid, effective, and inexpensive capability to the naval fleet at a time when we need it the most.

I would also like to address questions that have repeatedly been raised about cost overruns and schedule delays in the battleship reactivation and modernization program. The *New Jersey*, the first of these *Iowa*-class battleships to be reactivated, is now on cost and on schedule; and the Navy has good reason to believe it will continue to meet its cost and deadline targets. Manning for the *New Jersey* is also proceeding well without adversely affecting other Navy activities. The *Iowa* will undergo an identical modernization program to the *New Jersey*, and Secretary Lehman has pledged to complete the *Iowa* by the end of 1984.

I would thus urge my colleagues to support this amendment. The Senate has already recorded its support for the battleship reactivation program in last year's defense supplemental bill and in the fiscal year 1982 authorization bills. Few programs in this year's defense budget can provide the range of force in so short a time and so cheap a price. It would be shortsighted for us not to realize these benefits and to delay advance procurement of the *Iowa*, which will lead to a year and a half delay in getting this ship to the fleet. I urge my colleagues to vote in favor of the amendment and commend Senators HEINZ and HOLLINGS for their foresight in introducing it.●

SEVERAL SENATORS. Vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from South Dakota (Mr. ABDNOR), the Senator from North Dakota (Mr. ANDREWS), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator

from Kansas (Mrs. KASSEBAUM), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE) and the Senator from Alaska (Mr. MURKOWSKI) are necessarily absent.

I further announce that, if present and voting, the Senator from South Dakota (Mr. ABDNOR) would vote "yea."

Mr. ROBERT C. BYRD. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Delaware (Mr. BIDEN), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Alabama (Mr. HEFLIN), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Louisiana (Mr. LONG), the Senator from Ohio (Mr. METZENBAUM), the Senator from Rhode Island (Mr. PELL), the Senator from Michigan (Mr. RIEGLE), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

On this vote, the Senator from Michigan (Mr. RIEGLE) is paired with the Senator from Rhode Island (Mr. PELL).

If present and voting, the Senator from Michigan would vote "yea" and the Senator from Rhode Island would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 51, nays 29, as follows:

[Rollcall Vote No. 428 Leg.]

YEAS—51

Armstrong	Ford	Nickles
Baker	Garn	Nunn
Boschwitz	Glenn	Packwood
Bradley	Grassley	Percy
Byrd, Harry F., Jr.	Hatch	Quayle
	Hawkins	Sasser
Byrd, Robert C.	Heinz	Schmitt
Cannon	Helms	Simpson
Chiles	Hollings	Specter
Cochran	Humphrey	Stennis
Cohen	Inouye	Symms
D'Amato	Jackson	Thurmond
Danforth	Jepsen	Tower
DeConcini	Johnston	Wallop
Denton	Kasten	Warner
Dixon	Laxalt	Williams
Durenberger	Lugar	
East	Melcher	

NAYS—29

Baucus	Hart	Proxmire
Boren	Hatfield	Pryor
Bumpers	Kennedy	Randolph
Burdick	Leahy	Roth
Chafee	Levin	Rudman
Dole	Matsunaga	Sarbanes
Domenici	Mattingly	Stafford
Eagleton	Mitchell	Stevens
Exon	Moynihan	Weicker
Gorton	Pressler	

NOT VOTING—20

Abdnor	Hayakawa	Metzenbaum
Andrews	Heflin	Murkowski
Bentsen	Huddleston	Pell
Biden	Kassebaum	Riegle
Cranston	Long	Tsongas
Dodd	Mathias	Zorinsky
Goldwater	McClure	

So Mr. HEINZ' amendment (UP No. 716), as modified, was agreed to.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, as my friend and colleague from Alaska is well aware, the question of a long-term basing option for the MX missile has been one of the most vexing problems we have faced. Consecutive Presidents and Congresses have grappled with it for many years.

It is a decision which has the gravest implications for the ultimate costs to the taxpayer of a multibillion-dollar missile system, and also to the sense of strategic stability which must always be present in an age shadowed by the threat of nuclear war.

My colleague from Alaska is no newcomer to this problem. He has been a leader in attempting to find an effective option for MX basing. I recall that some 2 years ago the senior Senator proposed an amendment on the floor of the Senate mandating an objective analysis by the Department of Defense of all basing options. It was an excellent amendment, receiving the unanimous support of the Senate.

Unfortunately, and perhaps predictably, the Air Force did not initiate a thorough and objective study of options which did not fit snugly into President Carter's concept of a multiple protective shelter (or "racetrack") deployment in Utah and Nevada. Other options seemed to receive distinctly short shrift, if indeed they were seriously analyzed at all. Rejection of the dubious MPS racetrack was left to President Reagan.

Given the reluctance of the Carter administration to study long-term MX basing options, it was fortunate that the Congress had the foresight to commission a comprehensive analysis by the Office of Technology Assessment. This study did undertake a thorough study of MX basing options without the notable bias found in the various branches of the Department of Defense. OTA's conclusions were published earlier this year.

The study came up with five alternatives for MX basing which could make the U.S. land-based missile force survivable. Make no mistake. All these proposed solutions had certain problems, of cost and design. Some of the most serious problems, according to the OTA study, affect two of the three proposed long-term solutions suggested by President Reagan. These two options are the continuous air patrol (CAP) option—also known as "bigbird," and the ballistic missile defense (BMD) option. The President's third option—deep mountain basing—is a new concept which was not available during OTA's study.

One of the five options studied by the OTA did remarkably well compared to the other four. This concept proposed to place MX missiles on a fleet of submarines substantially smaller in size than the current Trident force. These submarines, which would carry up to 4 missiles each outside their pressurized hull would patrol in over 1 million square miles of the near-coastal waters of the United States. They would be able to accommodate any land-based missile, while staying in continuous communications with the National Command Authority and giving missiles the accuracy normal to land basing. The small submarine alternative studied by the OTA was based on a proposal I brought to the Senate floor 2 years ago known then as the shallow underwater missile (SUM) system.

According to OTA's study, the small submarine basing option was superior to other proposed systems in a number of important ways. It provides invulnerability well into the 1990's. It will cost an estimated $39 billion to deploy and operate the small submarine with MX missiles aboard through the year 2000. With Minuteman III missiles aboard, it would cost even less. By contrast, the MPS system proposed by President Carter and the continuous air patrol system proposed by President Reagan could, for example, cost $100 billion. The costs and size of these systems depend importantly on Soviet strategic decisions, not our own. Small submarines cannot be threatened by added numbers of Soviet warheads.

In short, the small submarine alternative offers great potential in a group of long-term options which offer many drawbacks and serious flaws. I believe it is vital that such a viable alternative be thoroughly studied by the Navy as an alternative to the three long-term options we are now limited to.

I had an amendment to offer on this subject. I am hopeful that my distinguished colleague from Alaska might agree to seek strong and exact language commissioning a study by the Navy on the small submarine concept, and that such language could be incorporated into the agreements of the House-Senate conference committee. If this were possible, it would eliminate the need for an amendment at this time.

Mr. STEVENS. Mr. President, the chairman of our full Appropriations Committee makes a great deal of sense. I will commit to him that we will raise the question of the shallow underwater missile system in conference. It does seem to me that there ought to be assessed as part of our strategic package the whole variety of options that we have for missile deployment. That, of course, has been this Senator's objective over the past few years.

I can only tell the Senator that I do not know what the House position will be, but I see no reason why they should be opposed to conference report language which would guarantee that this option, the SUM option, be thoroughly explored by the Navy analysts prior to making a final decision. The Senator from Oregon will be present at the conference and will be able to assist in obtaining language in the conference report to seek his objective and I certainly will support it. I commit myself to supporting that.

Mr. HATFIELD. Mr. President, I appreciate the commitment of the Senator from Alaska, the chairman of our Subcommittee on Defense.

Mr. President, let it be known clearly for the record that I do not support the MX missile, but I do feel that before a basing mode, would be established through probably a majority vote, we should have all options before us in order that we might more intelligently make such a decision.

I would only add that with such a fleet of shallow submarines, we could

actually place the Minuteman III missile on such submarines without escalating to a new generation missile, such as the MX missile, which is a new generation, and thereby escalating the armed services. I will address the MX missile at a later time.

At this moment I only seek to get this kind of support from the chairman of the subcommittee to provide the Senate, the Congress, and the President with objective and good analyses of all the options available before we launch out on something that is pretty much open ended at this time.

Mr. President, 2 years ago I offered an amendment on the Senate floor to deny funding for the Carter administration's proposed multiple protective shelter (MPS) deployment of the MX missile. I suggested a different strategic alternative at that time which I believe made more sense. My proposal involved the deployment of a significant percentage of the U.S. land-based missile force on a new fleet of small submarines operating in almost 1 million square miles of United States near-coastal waters. The option was known as the shallow underwater missile system, or SUM.

The SUM deployment alternative was developed by two of the foremost strategic scientists in the country. It offers a remarkable and innovative solution to the vexing problems posed by land-based deployment of missiles. SUM is a system which provides virtually all the attributes of land basing, with a minimum number of the substantial environmental and strategic vulnerability problems associated with any of the proposed long-term solutions to the MX problem.

SUM provides direct communications with the National Command Authority in times of crisis; it insures the accuracy of missiles will be comparable to land-based systems; it would be dramatically cheaper than any other land-based alternative available or under serious study; it would not have to be enlarged should the Soviets decide to deploy thousands of additional warheads in the years ahead. In short, the SUM concept is designed to have virtually all the attributes of a land-based missiles system, without the deep flaws which characterize land-based designs.

Mr. President, there has been one singularly important study made of proposed deployment options for the MX missile system. That study was undertaken by the Congressional Office of Technology Assessment (OTA) and was completed this year. In it, OTA compares the SUM concept with the continuous air patrol and ballistic missile defense options proposed by President Reagan for possible long-term basing of the MX. The study also compares SUM to the MPS deployment proposed by President Carter, a derivation of which is still apparently supported by some Members of Congress. Against all of these alternatives, the SUM concept fared extremely well in the OTA study. For this reason, I have proposed an amendment today to add a submarine basing option with the basic SUM design to the list of three long-term options for MX missile basing.

The reasons for requiring a new submarine-based missile concept, one that would be independent to the Trident program, are both strategic and economic.

Strategically, the three concepts being proposed for land basing the MX have serious flaws.

The continuous aircraft patrol concept (CAP), also known as "Bigbird", would require great operational complexity, according to OTA. CAP could be vulnerable to a future submarine-launched attack by the Soviet Union, and would only remain airborne a short while after an attack before having to land and refuel. There are serious concerns whether landing fields will even exist after a nuclear attack. There are a number of other serious strategic obstacles to CAP deployment.

The proposal to guard silo-based missiles by a ballistic missile defense system (BMD) has deeply serious technical problems. First, deployment of BMD defense systems to guard more than one missile site would be a direct violation of the ABM treaty. Abrogation of that treaty would open the floodgates for a new, ominous antiballistic missile arms race on earth and in space. Furthermore, the OTA study raises grave doubts as to whether it will ever be possible to defend a missile containing 10 warheads in a single silo from Soviet attack. OTA indicates that a land- and space-based BMD system:

> ... is not a system that is developed and ready for the role of defending silo-based MX. As the concept matures, it will have to deal with the fundamental problem of decoy discrimination as well as with the design of a specific working system. For the moment, it would be quite risky to rely on the Overlay, or on layered defense as the basis for MX basing.

The final proposal that President Reagan has requested be studied for a long-term solution to land-based MX development is deep mountain basing. The concept is new that it has not been given serious consideration by Congress or OTA. There is only sparse information available on the concept at this time. On the basis of preliminary data, however, deep mountain basing of the MX would seem to also have serious strategic flaws, principally centered on the responsiveness of the system, the time it would take before final deployment of the missiles, and environmental degradation.

Mr. President, despite the obvious strategic flaws in these three systems, there is an equal weakness that they also share: enormous cost.

In a year of unprecedented budget reductions, the time has long since passed that Congress should be expected to write blank checks for gold-plated strategic concepts which may not work and which demand unprecedented amounts of taxpayer money. Compared to the SUM concept, the three, long-term basing options chosen by the President are budget busters of the first magnitude.

The OTA projected that the small submarine basing of MX missiles would cost a total of $39 billion including the missile and operating costs through the year 2000. Should the Congress choose to deploy a portion of the existing Minuteman III missile force on these submarines, the costs would obviously be reduced; $39 billion is still a great deal of money.

But the money is well spent if it prevents our own strategic planners from assuming our missiles are vulnerable and giving in to launch on warning pressures in time of international crisis or nuclear alert. A failure of nerve or judgment under these circumstances would after all likely be the last human action of our civilization and culture.

But the President's proposed three alternatives would cost far more than this. And this cost would be incurred without any guarantee of invulnerability to the missile system we are trying to protect.

For example, the CAP alternative could cost $80 to $100 billion according to the OTA. The MPS system chosen by former President Carter, should a version of that be revived, was estimated to cost between $43 and $82 billion. The ultimate cost of deep mountain basing and overlay ballistic missile defense system are unknown, but they might also be expected to be formidable. Inflation is not included in any of these estimates, nor are cost overruns.

Mr. President, the Congress has an obligation to insure that it does not inadvertently lock the Nation into long-term basing options for the MX which have virtually open-ended costs, and suffer serious technical difficulties. I believe the OTA study of basing options reveals that, on balance, the concept of basing some portion of our land-based missile force on smaller submarines operating near the coasts of the United States emerges the superior concept. And yet, this concept is not receiving $1 in funding for long-term solutions to the problem of ICBM vulnerability. The amendment I propose today would change that serious mistake.

The amendment directs that the Navy's system analysts, specifically sections OP 96 and OP 963, undertake a comprehensive study of basing the MX missile, or a portion of the present Minuteman III missile force, on submarines which are relatively small and designed to carry no more than four missiles each. In order to give the Navy maximum latitude, the amendment does not specify the exact concept of SUM studied by OTA or proposed by me. The point of the amendment is to simply guarantee that the best strategic analysts in the Navy build on this concept and, if possible, improve it to provide the Congress and the President with a viable strategic alternative to address this growing problem.

It should be made plain that this projected submarine-based concept would be independent of and in addition to the proposed Trident program. Furthermore, the study should compare the basing of the MX and Minuteman III missile on relatively small submarines with guidance systems appropriately modified in addition to the ongoing Trident program, as against the ongoing Trident

program plus the MX missile on various land-basing alternatives. The study should compare these two alternatives in terms of costs, survivability, schedule and other pertinent areas of concern.

Questions of particular interest which should also be addressed by the study should include the possibility for compressing the scheduled delivery of submarines to reduce the so-called window of vulnerability of our land-based forces, and the possibility of small nuclear reactors or other propulsion systems being incorporated into the submarines.

Mr. President, I would finally like to address the one point which is invariably raised by opponents of a new submarine concept such as SUM. They claim that deployment of a second fleet of strategic submarines will put too many of our strategic eggs into one basket. We will be vulnerable to a future Soviet breakthrough in antisubmarine warfare technology (ASW).

In response to this allegation, I will for the moment put aside the simple fact that any of the strategic options proposed by Presidents Reagan or Carter have serious vulnerabilities to Soviet technology which is in place now, or soon will be. By stark contrast, and while admitting the theoretical possibility that there may be a Soviet ASW threat in the future that may threaten U.S. submarines, OTA nonetheless says this about a Soviet threat to a small submarine system like SUM:

OTA could find no existing technology, and no technology is believed to be on the horizon, which offers any promise for permitting an effective Soviet attack on a fleet of small MX-carrying submarines.

However, the possibility that the Soviets may discover and deploy some anti-submarine warfare technology which cannot be foreseen cannot be excluded. If this were to happen, the differences between the Trident fleet (a small number of high-speed boats operating in an enormous deployment area) and the MX fleet (a large number of slower boats operating relatively close to the United States) could make it more difficult, and perhaps impossible, for the Soviets to deploy an anti-submarine warfare force capable of attacking both U.S. ballistic missile submarine forces.

Mr. President, I believe the facts accumulating in favor of this concept are close to overwhelming. At a very minimum, this concept must be given a complete and thorough analysis by the Navy. I ask the Senate to adopt this amendment.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, the Senator from Illinois has two amendments. The first one we will want a rollcall vote on. The second one the committee is prepared to accept without a rollcall. I believe there will be other amendments now that will be forthcoming.

Mr. STENNIS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. Those Senators desiring to converse, please retire from the Chamber. The Senate will come to order.

Mr. STEVENS. Mr. President, I do want to inform the Senate that other Senators now have told us of amendments that they intend to bring forward this evening and we do intend to go ahead with this bill. The Senate ought to be on notice that there will be more rollcall votes this evening.

Mr. BUMPERS. Mr. President, could the Senator from Illinois tell us about how long he intends to debate this amendment?

Mr. PERCY. I would say, at the maximum, 20 minutes.

Mr. BUMPERS. I thank the Senator.

UP AMENDMENT NO. 717

Mr. PERCY. Mr. President, I send an amendment to the desk on behalf of myself and Senator NUNN and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY), for himself and Mr. NUNN, proposes an unprinted amendment numbered 717.

On page 69, line 8, delete section 779 of H.R. 4995 and renumber the remaining sections accordingly.

Mr. PERCY. Mr. President, the amendment I offer, along with Senator NUNN, would delete section 779.

Mr. STEVENS. Mr. President, may we have order, please?

The PRESIDING OFFICER. The Senate will please come to order. Those Senators in the rear of the Chamber desiring to converse, please retire from the Chamber.

The Senator from Illinois.

Mr. PERCY. Mr. President, the amendment that I offer, along with Senator NUNN, would delete section 779 of this bill.

That section stipulates that—

None of the funds in this Act may be used to transfer any article of military equipment or data related to the manufacture of such equipment to a foreign country prior to the approval in writing of such transfer by the Secretary of the military service involved.

As presently worded, the provision would seem to require that the most routine of transfers of defense articles to a foreign government receive first the approval of a military service Secretary. This requirement even applies to routine transfers in the field, such as temporary transfers under the NATO Mutual Support Act. It would require the written approval by the Service Secretaries on all of the more than 10,000 FMS sales and roughly 90 percent of the 36,000 munition control licenses handled every year.

Mr. President, the Governmental Affairs Committee, on which the distinguished manager of the bill, the assistant majority leader, serves, has set up a Commission on Paperwork. The idea of the whole Commission was to eliminate paperwork and cut down as much of this unnecessary flow back and forth of papers that we possibly can. An awful lot of bureaucrats and an awful lot of top executives of the Government may feel important sitting there signing their signature time after time after time, but what in heaven's name is it necessary for, particularly when we are requiring that a Secretary of a particular service sign and approve and sign off on a particular item when that matter has already been cleared and approved and supported by higher authority.

So if ever there was a make-work program, this is it. Senator NUNN and I just simply feel—Senator NUNN also serves on the Governmental Affairs Committee and also on the Armed Services Committee, as well—we feel that this is absolutely unnecessary.

The provision is far too sweeping in scope and would drastically complicate management of the security assistance program and be in conflict with the Secretary of State's responsibilities under the Arms Export Control Act (AECA) and the President's prerogative for delegating authority for management of the arms sales program.

As mandated by the AECA, the Secretary of State, under the direction of the President, is responsible for the continuous supervision and direction of FMS sales and commercial exports involving defense articles. Legislative alternatives relating to arms sales should be mindful of this Presidential prerogative and should be consistent with the existing statutory requirement.

There does not appear to be a need for section 779. Currently, there are provisions requiring decisions by DOD whenever sales of defense articles from U.S. stocks could significantly impact on U.S. readiness; that is, section 21(i) of the AECA; 10 U.S.C. 975; section 813 of the DOD Appropriations Authorization Act of 1976. We know of no need to go beyond this.

I simply point out the unnecessary nature of this particular section in the bill and the reason why it should be deleted. So many times we go through and pass legislation here, not realizing the monster that we are setting up. The best time to cut back on unnecessary paperwork, unnecessary approvals and redundant authorities offered is to do so in the original bill.

For that reason I, together with Senator NUNN, respectfully bring it to the attention of the floor manager of the bill and suggest that, if it was overlooked that this authority is unnecessary and unneeded, we delete it by enacting the amendment.

Mr. STEVENS. Mr. President, I originally indicated we might want a vote on this section. I was referring to another section, I say to my good friend from Illinois. So, unless someone else wants a vote on this amendment, I shall not ask for one.

I agree with the Senator from Illinois, Mr. President. This is a paperwork burden with which I really cannot agree.

Since the provision is in the House bill, it should be deleted. We will see how the House can justify it in the conference. I know of no justification for it.

Mr. STENNIS. Will the Senator yield to me briefly?

Mr. STEVENS. I yield.

Mr. STENNIS. Mr. President, I agree with the Senator from Illinois that this needs to be stricken.

Mr. NUNN. Will the Senator yield?

Mr. STEVENS. I yield.

Mr. NUNN. I am pleased to join with the Senator from Illinois in offering this amendment. We have worked for a long time to establish more coordination with our NATO allies, less duplication, less waste, less inefficiency. The amendment that the Senator offers deleting a part of the bill will certainly further that goal. If we do not have this amendment, then all of the many efforts on standardization will certainly be diluted.

I am proud to join the Senator from Illinois in offering this amendment, and I hope it will be accepted.

Mr. PERCY. I thank my colleague.

Mr. STEVENS. Mr. President, as indicated by my distinguished friend from Mississippi, the committee is prepared to accept this amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (UP No. 717) was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 718

Mr. PERCY. Mr. President, on behalf of myself and Senator NUNN, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY), for himself and Mr. NUNN, proposes an unprinted amendment numbered 718.

Mr. PERCY. Mr. President, I ask uanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 66, line 13, delete Section 775 of H.R. 4995 and renumber the remaining sections accordingly.

Mr. PERCY. Mr. President, section 21(e)(2) of the Arms Export Control Act provides authority for the President to waive certain nonrecurring research and development costs for arms sales if such sales significantly advance U.S. Government interests in NATO standardization or if foreign procurement in the United States is advanced under coproduction arrangements.

Section 775 of this bill complicates the implementation of this worthwhile provision by requiring advance notice of such waivers to the Appropriations Committees.

The amendment which I offer together with Senator NUNN would delete this requirement for advance notification.

Section 775 was added by the House, and I understand that the Senate managers of the bill agree that this section should be deleted. The Defense Department also supports this amendment.

I would note that the Congress will be notified of the use of this waiver provision in quarterly reports under section 36(a) of the Arms Export Control Act.

Additional reporting would be duplicative of the reporting already agreed to by the DOD, when the DOD is striving to reduce or eliminate additional paperwork requirements.

None of the funds appropriated by the DOD Appropriations Act are affected by waivers made by the President under section 21(e)(2) of the Arms Export Control Act. The nonrecurring cost recoupment charge is a pro rata charge for partial recovery of past U.S. sunk investment in research, development, and production.

Mr. STEVENS. Mr. President, again, this is an amendment to delete language that the House placed in this bill. I have studied the statement of the Senator from Illinois and understand it. The matter will still be in conference. I am of the opinion that his position is correct.

As we have indicated, I would support the deletion of this section. The Department of Defense supports the deletion of it since we will have the reports of the waivers in any event. I support the Senator's amendment.

Mr. NUNN. Mr. President, I am delighted to join with the Senator from Illinois on this amendment. I think it is a step toward standardization. I would hope the Senate would accept the amendment.

Mr. STENNIS. Mr. President, I am prepared to support the amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (UP No. 718) was agreed to.

Mr. PERCY. Mr. President, I have one other matter that I would like to discuss with the distinguished floor manager of the bill.

Mr. President, a general provision was added to the fiscal year 1982 DOD appropriations bill by the House but deleted by the Senate Appropriations Committee which would prohibit the use of funds appropriated by this act after April 1, 1982, to pay for the direct or indirect hiring of any local hired non-U.S. citizen in a position in an overseas base where qualified U.S. citizens are available at the overseas area and have applied for employment by the Department of Defense in such a position.

Both the Departments of Defense and State were gratified that this provision was deleted in the Senate Appropriations Committee markup and urge that it be deleted from the joint bill in conference.

The enactment into law of section 777 of the House bill would place the United States in violation of its obligations under international agreements and international law. U.S. agreements with the Governments of the Philippines, Spain, Turkey, Iceland, and the United Kingdom, among others, granting the United States the right to use military facilities in these countries all require that local nationals be given some form of hiring preference for those positions not occupied by U.S. military personnel or U.S. civil servants.

The United States does not pay rent for major military facilities in other nations. The hiring preference for host-country nationals provides a tangible economic benefit which many nations view as a substitute for such rent. Termination of this benefit through enactment of section 777 would make it more difficult politically for the United States to use these facilities or to have access to them in times of crisis. In particular, current negotiations with Spain could be quite seriously damaged by enactment of this amendment and similar harmful effects could be expected in pending negotiations with Portugal, the Philippines, and probably Greece.

Some host nations might view enactment of 777 as a material breach of our agreements, thus entitling them to open negotiations on terminating, redefining or further restricting U.S. basing and use rights. Nations could, for example, retaliate by suspending or reducing our current rights to engage in routine military operations such as aircraft transits.

U.S. violation of international agreement and international law through adoption of section 777 would make it more difficult to obtain future base or facility rights from other countries. In addition, as the United States could be in violation of its own law by hiring host-country nationals or in violation of international law by hiring U.S. nationals we would be unable, as a practical matter, to hire anyone other than military or civil service employees of the U.S. Government. The result would be an important reduction of our ability to perform security functions.

I would ask the distinguished floor manager of this bill, Senator STEVENS, if he intends to oppose inclusion of section 777 in conference with the House on the final DOD appropriations bill?

I would like to point out, parenthetically, that I assume this does not apply to any position, of course, which is sensitive. There, of course, we would have to have our nationals perform such functions. But where you have jobs that have no particular sensitivity or where an individual resident of the host country can perform the function and be cleared for it, then it would appear that considering the problems that we have in certain areas of the world even today with a military base, where we are not paying rent, we are not leasing, we are not paying any stipend to the government for it, and there is resistance against it, we would help build up a body of support if the base does provide local employment to local nationals.

So it is not only a matter of practicality from our own standpoint, creating a climate for the establishment of such a facility, but also in the case of the countries that I have outlined a case of adhering to a binding international treaty that we now have.

Mr. President, we certainly cannot pass laws on the floor of the Senate or accept a law from the House or the Senate that abridges or breaches an existing, binding treaty supported by a two-thirds vote of the Senate.

So I pose the question to my distinguished colleague as to what position he, as the floor manager of this bill in the Senate, would intend to take in opposing inclusion of section 777 in conference with the House on the final DOD appropriations bill?

Mr. STEVENS. Mr. President, I would state to my good friend from Illinois that we have deleted this section, as he has indicated, and it would be our intention, of course, to oppose in conference any attempt to include this provision. The matter will be subject to conference, and we will need the continued support of all Members of the Senate on the conference committee to maintain this position.

I do understand the House position, however, because of the problems that we have had with regard to employment in this country. I point out that this House provision applied only where the citizen of the United States was at the overseas area and had applied for employment.

It was a limited provision. In any event, under the circumstances, we took the same position as did the Senator from Illinois and the Department of Defense. We have deleted this section and intend to maintain that position.

Mr. PERCY. Mr. President, I thank my distinguished colleague.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. JEPSEN). Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I am constrained to say that perhaps it is now time to go to third reading, unless someone is going to come forward with an amendment. I really believe that there are many issues that should be debated, and if no one wants to address them, perhaps we should vote on the bill. I am ready to go to conference with the House on the bill as it stands now.

Mr. BAKER. Mr. President, I could not agree more. I hope that Members who are hearing this colloquy will understand that the manager of the bill is dead serious. If we do not get amendments up, I think it is time to dispose of this measure.

We have not really made haste swiftly today, and I think it is time that Members either offer their amendments or we go to third reading and final passage on this bill.

Mr. NUNN. Mr. President, it is my understanding that the majority leader and the manager of the bill prefer that the MX and B–1 amendments come up tomorrow or Wednesday. Am I correct?

Mr. BAKER. Mr. President, my preference is that we do the whole thing today. As I indicated earlier today, I am prepared to ask the Senate to remain late in order to do that and, in any event, to finish it by tomorrow, which I believe is the statement I made.

However, I also suggested a possible form of unanimous-consent agreement that would provide for final passage not later than 4 p.m. on Wednesday, with a vote at 2:30 tomorrow on either the MX or the B–1 and a vote at 2:30 on Wednesday on either the MX or the B–1.

All I was trying to do was to arrange a schedule of events that would provide the maximum convenience for the greatest number of Senators.

Let me make another suggestion: If we are not going to finish this tonight—and that would be my preference—then I think that rather than waste a good part of the Senate's time tomorrow, since it appears that some Members will not be here tomorrow and will not be able to vote on critical issues tomorrow, perhaps we should temporarily lay aside this bill and take up something else on Tuesday, with the proviso that we return to this measure on Wednesday and then have a vote on final passage sometime Wednesday afternoon.

Other matters that could be handled are the military construction bill, S. 10, the Hoover Commission bill; S. 881, the small business bill; S. 1700, the Court of Claims Act. All these are matters that could be done tomorrow. There may be others.

All I want to do is to see that we try to make some progress. It is November 30, and I devoutly wish for sine die adjournment in the next 18 days or less.

So, Mr. President, in answer to the Senator from Georgia, I am willing to do it any way we can, but the one thing I am not willing to do is to continue to fritter away the valuable time of the Senate.

Mr. NUNN. I agree with the Senator from Tennessee on that.

I had understood that it was the hope of the manager of the bill that we would have the MX and B–1 amendments no sooner than Tuesday and Wednesday.

Mr. STEVENS. I say to the Senator that, with the cooperation of the majority leader, I was trying to work out a schedule so that we would be certain that Members would be on notice as to when the important votes would take place.

We are trying to have the votes no later than tomorrow, if it is at all possible. I think we could finish this bill by 3 o'clock tomorrow, if we really tried. But we cannot seem to get an agreement to vote.

I can only say that I will continue to press for third reading if we cannot get an agreement. There is no reason to delay this bill.

Mr. STENNIS. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. STENNIS. I have no specific suggestion to make. There is an impression that the main amendments would probably come up on Tuesday and Wednesday. This situation here seems to me to be that a good part of the debate has sort of blown over and blown out. If we could carry it over until Wednesday and have an agreement to vote on both these major items and final passage on Wednesday, that might meet the situation.

Mr. STEVENS. I thank the Senator from Mississippi. I think that is true. But I do not understand why we cannot get an agreement to vote tomorrow on one of the main amendments and on Wednesday on the other, or some alternative.

Maybe we should work with the majority leader and the minority leader and get an agreement to vote on both main amendments on Wednesday and take up the military construction bill tomorrow and some other bills.

This Senator changed his plans that had been made for over a year in order to be here today and tomorrow, and he does not relish the circumstance of now not being able to continue with the bill. So I am prepared to go to third reading, Mr. President.

Mr. PRYOR. Mr. President, may I address an inquiry to the Senator from Alaska? Is the Senator from Alaska looking for amendments to be offered at this time?

Mr. STEVENS. Yes.

Mr. PRYOR. I inform the Senator that I do have an amendment, and I will send it to the desk in a moment. I should like to make a brief statement. I see both leaders in the Chamber. I wonder if I am preempting their time.

Mr. BAKER. We are listening with great interest and hoping that the Senator will offer an amendment.

Mr. PRYOR. I can tell that the Senator is breathless.

UP AMENDMENT NO. 719

(Purpose: To place a limit on the use of appropriations to pay for lobbying costs under Government contracts)

Mr. PRYOR. Mr. President, 2 months ago I delivered a little speech on the Senate floor. As usual, the persons listening were a few pages and the Senate Chaplain. I made a talk about the practice in the Department of Defense of contractors charging lobbying expenses against existing contracts with the Department.

I continue to find it unbelievable that contractors are allowed to charge to the Government their costs in attempting to influence the legislative process where their action is undeniably designed to benefit themselves.

This practice of the Government's underwriting lobbying expenses exists for no other group, and I consider it an injustice to allow such a favored treatment to continue. When I brought this to my colleagues' attention in September, I announced my intention to introduce legislation intended to prevent the continuation of this subsidy, and today I am pleased to present an amendment to the Senate which I hope will prohibit the continuation of that practice.

Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. PRYOR) proposes an unprinted amendment numbered 719.

Mr. PRYOR. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 71, between lines 3 and 4, insert the following new section:

SEC. . (a) No funds made available under this Act may be used to pay, directly or under any contract with the Federal Government, any costs directly associated with lobbying, including any amounts attributable to salaries and fees, or portions thereof, of any person engaged in lobbying.

(b) For the purposes of this section:

(1) Except as provided in paragraph (2), the term "lobbying" means—

(A) any activity or communication which is directed to any Member of Congress or any member of the legislative body of any State or political subdivision thereof, or to any individual on the staff of a Member of Congress or of a member of any such legislative body, or to any member of a staff of a committee of Congress or of any such legislative body, and which is intended to influence—

(i) the introduction, content, or disposition of any bill or resolution in either House of Congress or any house of any such legislative body,

(ii) the content or disposition of any report of a committee of Congress or of any such legislative body, or

(iii) the conduct, content, or disposition of any hearing or investigation being conducted by the Congress or any such legislative body or any committee or subcommittee thereof; and

(B) any activity or communication which is directed to any person for the purpose of encouraging such person to engage in any activity or communication described in subparagraph (A).

(2) The term "lobbying" does not include—

(A) a communication made in response to a request from any individual or committee referred to in paragraph (1)(A);

(B) attendance, without engaging in an activity or communication described in paragraph (1), at a proceeding of Congress or a legislative body of a State or political subdivision thereof;

(C) a communication made through—

(i) a speech or address; or

(ii) a newspaper, book, periodical, or magazine published for distribution to the general public, or a radio or television transmission, unless such communication is a paid advertisement; and

(D) an inquiry which concerns only the existence, subject matter, or status of any bill, resolution, hearing, report, or investigation.

(3) The term "agency" shall have the meaning provided in section 551(1) of title 5, United States Code.

(4) The term "communication" includes any personal discussion, paid advertisement, telegram, telephone communication, and letter.

(5) The term "contract" means a written agreement, including amendments and modifications thereto, between an agency and any person for the procurement of goods or services.

(6) The term "person" shall have the meaning provided in section 551(2) of such title.

Mr. PRYOR. Mr. President, this amendment, put simply, prohibits the use of appropriated funds to pay, under contract with the Federal Government, any costs directly associated with lobbying.

The key element in this prohibition lies in the definition of lobbying. For the purposes of this legislation, lobbying is defined as any activity or communication directed to—

First, a Member of Congress,

Second, a member of a State or political subdivision legislative body,

Third, any member of the staff of such members, or

Fourth, any member of the staff of a committee of Congress or such other legislative body which is intended to influence the content or disposition of any pending or anticipated bill or resolution, report of a committee, or any hearing or investigation being conducted.

Lobbying is also defined to include activities or communications directed to other persons for the purpose of encouraging such other persons to engage in a defined lobbying activity. Thus, contractors cannot do indirectly what they are prohibited from doing directly.

While lobbying may be conceived as somewhat broad, certain activities are excluded from the definition, such as the following: communications made in response to a request from a Member of Congress; passive attendance at legislative proceedings, that is, attendance without engaging is prohibited lobbying activities; nonpaid communications made through public information channels; and inquiries made regarding the existence or status of legislation.

Mr. President, this is not just a minor problem of a few dollars. Procurement dollars in the Department of Defense have grown over the last 20 years to such a point that a single contract may be worth hundreds of millions of dollars. Many defense contractors have come to realize the importance of a Washington office and the services it can perform.

The irony is that these services and functions delegated to the Washington office have changed from information gathering and monitoring to a focus of pressure and absolute influence. Whether defined as lobbying or "public relations," the thrust is usually the same: Pressure on the executive and legislative branches designed to shape legislative, procurement, and appropriations decisions that affect all citizens. Often the influence takes the form of strategy involving not only direct pressure but also grassroots efforts and campaign contributions.

In 1976 and 1977, the Defense Contract Audit Agency (DCAA) undertook a series of special audits of 10 defense contractors based in Washington, the Nation's Capital. In both the preliminary and final audits, DCAA found that a substantial part of the expenditures was for "lobbying activities." Much of this expense had been charged against existing Government contracts and thus was subsidized by Federal dollars, that is, paid for by the taxpayer. While not questioning the right of the contractors to engage in such activity, DCAA did question whether such expenditures should be charged to Government contracts.

For the 2 years in question, DCAA questioned over $11 million for five of the contractor's Washington offices alone. In plain English, what was happening was that the taxpayer was footing the bills for the contractors to exert their influence to benefit guess who?—themselves.

DOD reacted I think in an expected fashion. To address the issue of allowability of lobbying costs, DOD spent several years trying to decide how to define lobbying. After some effort the attempt was abandoned. No regulation was issued, and the problem was ignored. If it had not been for the fortitude of Common Cause, and its willingness to go to court to seek disclosure of these audits, the problem would very likely have been forgotten and the taxpapers allowed to continue taking it on the chin year after year. Today, however, the taxpayer is striking back. Through this amendment, the issue should be laid to rest once and for all.

Mr. President, this situation cannot be allowed to continue. Only a few weeks ago, Common Cause published a follow-up article to its original expose of this situation. In that second article it was revealed that Rockwell's Los Angeles division charged at least $653,000 in lobbying expenses to Government contracts—all of which DCAA questioned as inappropriate expenses for the Government to pay.

How many other untold millions have been charged, and not discovered by audit, is anyone's guess. It is clear from these few past audits that contractors involved have been less than candid in reporting such expenditures and, in the audit process even refused to allow thorough investigation by Government auditors. While the degree of cooperation between auditors and contractors itself raises a concern on my part I will refrain from diverging.

Mr. President, no doubt the fact that DOD has recently directed that such a prohibition be incorporated into the Defense Acquisition Regulations will be raised against the need for a legislative solution. But I think this is insufficient to moot the legislative need.

First, the legislation is aimed not only at present practices within DOD but potential problems at the various other agencies and departments.

Second, to resolve the issue once and for all I feel legislation is appropriate and absolutely necessary. Regulations do not have the force that laws have; further, laws are not subject to degrees of implementation which regulations so often are depending on the present circumstances and personnel in office.

Finally, the outline for the DOD regulation reveals a number of shortcomings and loopholes which I feel will act to allow, in many circumstances, the continuation of this subsidy. I am very pleased that DOD recognizes the severity of this problem and the need for a solution which will lay to rest this improper spending of taxpayer funds. I urge them to support this legislation.

I also urge my colleagues to support this initiative. It is a sound response to a problem which if left unchecked will grow like a weed with the victim being the taxpayer. Subsidization such as this cannot continue as it erodes the confidence the taxpayers have in our Government.

Mr. President, I ask unanimous consent that the distinguished Senator from Wisconsin (Mr. PROXMIRE) be added as a cosponsor of this legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRYOR. Mr. President, I also ask unanimous consent to have printed in the RECORD two Common Cause articles regarding this matter, and a letter which I received today from Fred Wertheimer, president of Common Cause.

There being no objection, the material

was ordered to be printed in the RECORD, as follows:

THE HIGH AND THE MIGHTY

(By Florence Graves)

Can you imagine the U.S. government picking up the costs incurred by political activist Jane Fonda and her husband Tom Hayden for trips to Washington to lobby against the B–1 bomber, the MX missile or the F–14?

Can you imagine the U.S. government picking up all or part of the tab for you or a member of your family to travel to Washington to encourage your congressman to vote against or even for selling AWACS to Saudi Arabia?

Now try to figure out why the government was expected to pick up the salary of the Martin Marietta Co.'s director of Washington relations whose job functions, according to audits released recently to Common Cause, "relate to liaison with congressmen and their staff aides. He builds rapport with Congressmen—from 35 states in which Martin Marietta has divisions and solicits Martin Marietta employees for campaign contributions."

Try to figure out why the government was expected to shoulder the retainer fees paid to Gen. W. W. Quinn, USA (Ret.), also a lobbyist for Martin Marietta.

Or the salary of Sperry Univac's public relations and sales promotion managers who, in effect, was a lobbyist?

The government has footed untold millions of dollars of defense contractors' lobbying expenses because the Defense Department has no definition of "lobbying" and therefore no regulation that specifically prevents lobbying costs from being charged against government contracts.

Sen. William Proxmire (D-Wis.) is incredulous. "Every citizen has the right to communicate with his elected representatives. However, no citizen has the right to ask the government to reimburse the costs of these communications and, to my knowledge, no segment of society other than government contractors has had the temerity to make such a request."

A fascinating but incomplete picture of the millions of dollars in lobbying expenses charged against government contracts by defense contractors emerges in the audits of 10 major defense contractors' Washington offices released to Common Cause four years after the Air Force denied a Freedom of Information Act (FOIA) request.

After CC's FOIA request was refused, Common Cause went to court to win the release of the audits which were conducted in 1976 and 1977 and cover the years 1974 and 1975.

The audits include those of the Washington offices of the Boeing Company, Rockwell International, Lockheed Aircraft, Raytheon, Hughes Aircraft, General Dynamics, Martin Marietta, Collins Radio Group, Sperry Univac and Sperry Rand Corp.

The exact extent to which the taxpayers are footing contractors' lobbying costs is not known. But these audits reveal a total of more than $2 million in lobbying-related costs questioned by auditors during 1974 and 1975 for these ten contractors. There are hundreds of defense contractors. Of the top 100, 67 have Washington offices. So simple mathematical calculations indicate the grand total could be many millions.

Despite the fact that Defense Department auditors strongly oppose contractors' charging of lobbying costs to taxpayers, it is unlikely the practice will be discontinued because the powerful defense contractors have vigorously opposed any attempts to prohibit this practice.

The audits were kicked off by the highly publicized revelations in 1975 that some defense contractors, Rockwell and Northrop Corp., in particular, had entertained military and congressional personnel with parties at hunting lodges on the Maryland shore, goose hunts, rides on corporate jets and yachts, and football tickets.

During hearings held in 1976 in Proxmire's aggressive Committee on Joint Defense Production, the Defense Department announced it was auditing the Washington offices of several contractors to determine if the costs of any of this lavish entertainment were being charged to the taxpayers. And that's the last the public heard of the audits until their release to Common Cause.

CLASSIC WASTE

If the Marx Brothers, themselves, had decided to make a film about defense contractors, they probably wouldn't have come up with more classic examples of waste than those found by the contract auditors.

Raytheon claimed the costs of lodging, meals, and guides for goosehunts in the Maryland area for company employees and unidentified guests.

General Dynamics wanted the taxpayers to foot the bill for F–16 tie tacs.

Hughes Aircraft claimed some costs for a condominium in the Shoreham (an exclusive Washington apartment house). The costs represented depreciation, garage maintenance, maid service and other expenses related to the condominium purchased in 1972. Also claimed were entertainment supplies and services which included silverware, linens, bartender, reception and limousine services as well as decorations and furnishings for a "sky suite" at the Capital Center (a sports arena).

Lockheed Aircraft charged off travel expenses to the Farnborough and Paris Air shows, including first class air fare and wives' travel costs.

Rockwell Corp. claimed the bill for 100 prints of the film, "The Threat, What Can One Do?" The auditors felt the film "furthers the image of the B–1 bomber programs. It appears the films are being shown to the public and Members of Congress. We question the costs because they represent effort designed to influence legislation. The contractor does not concur. It maintains this is public relations effort."

("Public relations" costs, it should be noted, are considered legitimate expenses to changes to government contracts.)

The Defense Contract Audit Agency, which plays an advisory role in negotiating contracts, allocating costs, and seeing that terms of contracts have been met, questioned the legitimacy of not only more than $2 million in lobbying-related costs but more than $2.5 million in entertainment expenses as well. These totals do not include the more than $2 million which the contractors originally charged, but voluntarily deleted, during the audit negotiations. Furthermore, all of the totals are probably much higher, but auditors repeatedly said that most of the contractors refused to let them see the proper records to verify costs.

A Pentagon official, John Kendig, deputy director for cost, pricing and finance, says "it is reasonable to assume" that not all of these costs were eventually paid by the government. As part of the overhead, he says, some of these costs may have been eventually allocated to a company's commercial divisions as well.

However, Christopher Paine, a staff assistant for arms control at the Federation of American Scientists, maintains that defense contractors try to put as many of their total expenses as they can into government overhead. "They all do it. They think, if you can get the government to pay for it, why not?"

While the government explicitly forbids federal employees from using taxpayers' money to engage in lobbying, there is no specific regulation prohibiting contractors from charging lobbying expenses against contracts. (There are, however, specific regulations prohibiting contractors from charging entertainment and some advertising expenses.[1])

However, in lieu of a specific lobbying cost principle, the auditors could question the costs on such bases as "reasonableness" or appropriateness and aggressively did so, touching off a several-year debate in the defense community about the validity of contractors charging such expenses to their overhead.

In response to these audits, the Pentagon tightened its conflict of interest standards and most observers agree the lavish entertainment has been kept to a minimum. To address the lobbying costs, the Pentagon spent several years trying to come up with a definition of lobbying which would outlaw such costs being charged to the government.

The effort was abandoned, however, in June 1980 because officials say it was too hard to define lobbying.

The audits, which give an exclusive, inside glimpse of the kinds of costs contractors expected the government to bear, also give an indication of the magnitude of the lobbying effort being made in the Washington offices, the nerve center of contractors' selling efforts. The audits also reveal:

Defense contractors are spending large sums of money to lobby for their weapons and are reporting only a fraction of these costs under the loophole-ridden 1946 Federal Regulation of Lobbying Act. In 1974–75, for example, the DCAA questioned more than $2 million as possible lobbying expenses.

This total does not include those amounts which the contractors voluntarily did not charge to the government, so the actual amounts spent on lobbying are not known. In those same years, only three of those 10 companies had registered lobbyists and they reported spending only $89,251.20.

The auditors' inquiries met a consistent pattern of stonewalling. In audit after audit, the auditors noted, as in the case of Martin Marietta, "The scope of our review was severely restricted. . . . This prevented the full application of generally-accepted auditing standards and tests of accounting records which would ordinarily be done."

In the audit of Hughes Aircraft, the auditor wrote: "The contractor imposed rigid conditions under which we were allowed to interview its personnel. It required the corporate marketing vice president to be present at each interview and a contractor stenographer to record the entire interview. The contractor refused to answer any questions on details or activities relating to unclaimed costs.

"It also would not permit questions relating to an apartment which the contractor owns and maintains in the Washington area. We advised the vice president that the cost of this apartment had been claimed by the contractor in its 1972, 1973, and 1974 overhead claims.

"Nevertheless, the contractor requested that the auditor not ask any further questions about it since most of the employees were not even aware of its existence. . . ." Moreover, "the lack of time or activity records, denial of access to documentation, and restrictions imposed by the contractor during our review prevented us from reaching an unqualified opinion on the allowability of costs not otherwise specifically questioned."

While theoretically, the auditors should have access to all necessary records, audit officials say the contractors vehemently dispute what records are really "necessary." An intransigent contractor can keep such disputes in the courts for years.

The interdependent relationship between

[1] An official says that when contractors were questioned about expenses they charged which were clearly related to entertainment, they would just say they'd made a "mistake."

defense contractors, Congress and the executive branch brings contractors "so close to government that they not only carry out military policy, but often create it," says Gordon Adams of the Council on Economic Priorities (a public interest group based in New York City) who just released an investigation of the politics of defense contracting, The Iron Triangle.

This "triangle" is formed, Adams says, "by the powerful flow of people and money" moving "between the defense contractors, the executive branch and Congress."

Explains Adams, "Once molded, the triangle sets with rigidity of iron. The three participants exert strenuous efforts to keep isolated and protected from outside points of view. In time, they become unwitting victims of their own isolation, convinced that they are acting not only in their own but in the public interest."

Contributing to this is a practice frequently called the "revolving door."

For example, Dale Babione, former director of contracts and system acquisition at the Department of Defense, joined the Boeing Company as the director of government business relations in 1979 during the attempt to define a lobbying principle.

The flow of personnel among the points on the triangle "creates a community of shared assumptions about policy issues and developments," Gordon Adams concludes.

THE WASHINGTON OFFICES

For a number of defense contractors, the U.S. government is one of their largest clients. It's the job of their Washington offices to grease the connections and ease the way for the multibillion dollar sales.

"Our business base is sustained in Washington," Richard Cook, a deputy assistant for congressional relations to Richard Nixon who now heads the Washington office of Lockheed Aircraft Corp. told the National Journal. (In the early 70s, Lockheed, the Chrysler of the defense industry, got a federal loan guarantee to keep it afloat.)

To sustain the business base, contractors "must succeed in the influence business," says Adams.

Contractors do not consider the efforts of most of those in their Washington offices "lobbying," although most would probably agree that some of what they do is "lobbying," which is perfectly legal. Some of the remaining activities they consider to be "legislative liaison" which means providing information to Congress and to the executive rather than exerting pressure. Most apparently consider both of these activities legitimate overhead expenses which are routinely passed onto government contracts.

But during these audits, the Defense Contract Audit Agency made a distinction between the two. They felt many of the Washington office employees were engaged in "lobbying" ("influencing legislation"), activities they felt should not be charged against government contracts. They therefore questioned whether more than $2 million charged against government contracts should be allowed, emphasizing the totals could be much higher but the contractors refused to give them the documentation they needed to make the determination.

In questioning lobbying-related costs, the auditors usually included this notation, "We found no recognizable benefit to government contracts since the Department of Defense and other executive agencies make determinations of policy and program needs, and justify their own requirements for appropriations.

"Attempts by contractors to influence legislation favoring procurement of their products can be inimical to DOD policies as well as requirement determinations."

One company, Martin Marietta (one of only two contractors who would answer any questions for this story) maintains that the company does not lobby and therefore does not have any lobbying expenses.

But the DCAA did not concur: it questioned a total of approximately $300,000 in lobbying expenses for Martin Marietta, including salaries of several staff members. For example, the DCAA found that K. K. Bigelow, the director of Washington Relations, maintains contacts with government personnel to solve problems and makes appointments for company officials to meet with government representatives.

"Mr. Bigelow follows issues in Congress that affect the company in the areas of tax reform, energy, and pollution control. He builds rapport with congressmen from the 35 states in which Martin has divisions and solicits Martin Marietta employees for campaign contributions. In our opinion, these activities are concerned with influencing legislation and are unallowable . . ."

Moreover, "a review of Mr. Bigelow's travel expense reports indicate extensive entertainment at home, the Congressional Country Club, Kennedy Center, and numerous Washington restaurants. In most cases, there is no record of who participated in this entertainment. We have questioned Mr. Bigelow's salary, his secretary's salary, the cost of the chauffeur's support, fringe benefits, travel and related expenses."

It is clear from reading the audits that the DCAA does not believe the taxpayers should be picking up lobbying costs. Fred Newman, then head of the DCAA, now with a private firm, says he does not think such costs are legitimate expenses; the current head, Charles Starrett, agrees. But the DCAA has only an advisory role; the contracting officers make the final decisions. (A contracting officer is the person at the Pentagon who has overall responsibility for an individual contract. This person monitors the defense contractor's performance and makes final determinations about costs.)

So in this case, what the DCAA thinks does not count.

No one has come right out and said it, but the Defense Contract Audit Agency must have really put the Pentagon brass on the spot by boldly questioning what appeared to the auditors to be lobbying expenses.

After the audits were completed, the Pentagon, apparently displeased with the first audits, handed the DCAA a set of guidelines to follow in questioning which costs were valid and told them to do the audits over again.

Not surprisingly, the amounts of costs questioned were significantly reduced. (As part of the documents released to Common Cause, the Air Force sent several but not all final audits which showed significant reductions in "costs questioned." However, an exact analysis is not possible because significant portions of the final audits are whited out.)

In fact, it seems clear from a memo, obtained by Common Cause, which Charles Starrett, then deputy director of the DCAA (now director) wrote to the deputy assistant secretary of defense (acquisition), that the Pentagon knew full well that some glaring costs would not be questioned as a result of their "guidance."

Starrett used examples from the audits of Rockwell's Washington office as well as an audit of Rockwell's B–1 division (which was not provided to CC).

These are some of the expenses charged by Rockwell to its overhead account which Starrett said the auditors probably would not be able to question as a result of the Pentagon's new instructions about which costs the auditors could question:

$10,000 paid a subcontractor for a study on the impact of the B–1 program on the U.S. economy. The study was used in preparing white papers designed to influence B–1 legislation.

The total costs of a military relations function in which the director provided material to editors, publishers and reporters in several states to elicit articles favorable to the B–1 and made presentations to government and contractor personnel throughout the country.

The development of a speakers' bureau on behalf of the B–1.

Several films prepared to develop positive support for the B–1 and other defense programs.

TRYING TO DEFINE "LOBBYING"

While the contractors' Washington office audits were never publicly released, Proxmire and his staff apparently got a peek and he took to the Senate floor in 1977, demanding that lobbying costs not be charged against government contracts.

Said Proxmire, "The current practice sets up a vicious circle. Contractors get generous allotments from the government to produce weapons systems. But rather than using all of it for production of these weapons systems, they siphon some of it off to lobby for even more money . . .

"There is enough favoritism and behind-the-scenes influence on large defense contracts without the added insult of having the taxpayer pay for the bill."

In an apparent attempt to pacify Proxmire, the procurement officials asked the DAR (Defense Acquisition Regulations) Council, which writes the regulations used in defense contracting, to try to come up with a lobbying cost principle. They did so, defining lobbying this way: "Lobbying is defined as any activity or communication which is intended or designed to directly influence members, their staffs or committee staffs of any federal, state, local or foreign government legislative body to favor or oppose pending, proposed or existing legislation. Lobbying activity includes but is not limited to personal discussions or conferences, advertisements, telegrams, telephone communications, letters and the like, and the directly associated costs related thereto."

"Legislative liaison" activities such as attendance at committee hearings or meetings with congressional representatives at their invitation and gathering information regarding pending legislation were not included in the definition.

The definition was circulated for comment throughout the industry and other government agencies (the government does not have a lobbying principle for other agencies' contractors either and was proposing to use the one the Defense Department wrote).

An inch-thick stack of paperwork was generated. Common Cause obtained this correspondence too, under a Freedom of Information Act request. Most government agencies which responded enthusiastically supported a lobbying cost principle, agreeing that it was inappropriate for the government to foot such costs. Several emphasized that the contractors should be required to maintain the documentation to prove the validity of their claims.

A number of industry representatives, however, vehemently opposed the principle. None of the contractors directly involved in the audits responded but another contractor, United Technologies, said the principle would, among other things, impose burdensome paperwork.

The chairman of the American Bar Association's section of Public Contract Law, contended the "lobbying principle would inhibit commercial organizations from exercising their First Amendment constitutional rights," an argument frequently made by the defense community.

Counters Proxmire. "They're perfectly free to speak all they want. They can lobby to their heart's content. But to charge the cost of all that to the taxpayer is really adding

insult to injury. It's a real loser for the taxpayer; there's no way the taxpayer can win."

But after Proxmire's spotlight had faded and three and a half years had passed. Dale Church, then deputy undersecretary of defense for acquisition policy, made the decision in June 1980 to reject the proposed lobbying principle.

John Kendig, now deputy director for cost, pricing and finance at the Pentagon, says the Pentagon dropped the proposed lobbying principle because "we really couldn't get a consensus on what constituted lobbying . . . It's very difficult. What is lobbying? Is a contractor lobbying if he goes over and speaks to a congressman? He may or may not be."

But Proxmire scoffs at that explanation. "That's absurd. It's easy to find a definition for lobbying. It would be hard to find any definition that's acceptable to everyone. You can't find a definition of 'cat' that's acceptable to everyone."

Kendig, who had a say, although not the final say, in the attempt to develop a lobbying cost principle, personally thinks lobbying should be considered a normal business expense that the government should absorb, although he concedes that the government has declared other "normal business expenses" such as entertainment and advertising unallowable.

The DAC council disagreed with Kendig. According to a memorandum obtained by Common Cause, the council concluded that "most defense contract dollars are on contracts under which contractors are able to recover costs. Expenditures for lobbying would therefore be passed through to the government.

"By contrast firms in the private sector are usually operating in a competitive market. In this situation, any expenditure for lobbying would reduce profit. We believe defense companies should be put on the same footing."

Gordon Adams says even if lobbying were a routine business expense reflected in the cost of products such as shoes or cars, lobbying expenses spent to sell weapons should not be included in the costs of those weapons. "The taxpayer, who is the ultimate consumer, is not really in a position to vote with his wallet the way he can on an automobile. It's very hard for the taxpayer not to buy and it's very hard for the taxpayer to make the argument that counters the impact of the lobbying in Washington that leads to the decision to buy . . ."

Fred Newman, the former head of the DCAA, says the proposed principle was dropped because the "procurement people felt the keeping of records was too onerous and too costly for the contractor." But Newman says if the contractors think such a principle would be "too administratively costly, then maybe they shouldn't pass on any of the costs."

Newman says "undoubtedly" there was "considerable pressure" placed on Pentagon officials by the contractors.

Proxmire attributes the failure to the "revolving door." "The difficulty is that both the Congress and especially the executive are very, very heavily lobbied. There are people in the executive who are dealing with the military and the contractors who, in many cases, are going back to work for the same contractors they dealt with.

"And then they may come down and work in the Defense Department as a civilian procurement official. Therefore, you have an atmosphere in which these people serve their continuing conflict of interest. That's why I think the regulation has not been promulgated . . ."

When it became clear the Defense Department was not going to establish a lobbying cost principle, Proxmire turned to the Office of Federal Procurement Policy (OFPP) in the White House Office of Management and Budget. He suggested such a cost principle be incorporated into government-wide procurement regulations. Again a stone wall. Karen Hastie Williams, administrator of OFPP under Carter, wrote that she was "inclined to agree with the Department of Defense's view that its present cost principles and audit guidelines are adequate to preclude the reimbursement of costs specifically identifiable with lobbying activities."

But some DCAA officials say that without a specific principle, it is very unlikely that many of the lobbying costs they question will be upheld in negotiations when contractors and Pentagon contracting officers discuss the bills.

Williams suggested that if Proxmire wanted a principle so badly, he should legislate one.

"Why doesn't he (Proxmire) pass legislation?" asks Dale Babione, the former director of contracts and systems acquisition at the Department of Defense, who is now director of government business relations for the Boeing Company. Babione, by the way, was involved in the discussion over developing a lobbying cost principle.

Concludes Babione, "Because he can't get anyone to agree with him. The fact that somebody feels strongly about something doesn't make it so. It just means he feels strongly about it. This is a democratic country, and if everyone feels the law should be changed, then why don't they change it?"

THE LOOPHOLE-RIDDEN LAW

While there may have been no attempt to pass legislation outlawing lobbying costs charged to government contracts, there have been a number of unsuccessful attempts to strengthen the 1946 lobby disclosure law.

Both contractors and government officials have said that they base their definition of lobbying on the 1946 law which they interpret as saying a person or company does not have to register unless their "principal purpose" is to lobby.

Apparently applying that rule of thumb in 1974–75, only three of the companies had any registered lobbyists or expenditures; Boeing ($33,840.85), Lockheed ($53,765); Rockwell ($1,745.25). Yet DCAA auditors questioned many times more than those amounts as probable lobbying costs. (A spot check of 1980 disclosure forms by these companies show no significant improvement in reporting.)

During the Boeing audit, the DCAA questioned the salaries and benefits of five corporate employees whom the auditors felt were involved in lobbying. In fact, the auditors said two of the employees told them that "100 percent of their work is spent on lobbying, either talking directly to congressmen or their staffs or obtaining information to support company positions."

Boeing, however, vigorously disagreed. Peter Bush, a spokesman for Boeing, says the two employees say they couldn't possibly have told the auditors they spent most of their time lobbying.

As evidence, Bush says, the lobbying reports these employees filed with Congress under the 1946 lobbying law "show only 5 to 10 percent of their time" was spent lobbying.

"Look at their lobbying reports?" says Gordon Adams in astonishment. "That's an answer? You've got to be kidding.

"Sure, given a statute that is riddled like swiss cheese, it's very easy for someone to waltz down there and say that they spent five percent of their time lobbying. Who's going to follow that up? Who audits that claim? Nobody."

The defense industry, of course, is not the only one which interprets the lobby disclosure law narrowly. Because there are numerous loopholes, and no enforcement of the law, thousands of lobbyists are not registered and hundreds of millions of dollars spent on lobbying are not reported.

In his analysis of the politics of defense contracting, Adams not surprisingly concludes that one of the steps that needs to be taken to "pry open the iron triangle of defense policy and weapons procurement" is reforming the loophole-ridden lobby disclosure act. Common Cause has worked for years for a more comprehensive law.

Why is a stronger law needed? What difference does it make to the public whether the defense or any other industry spends $5 or $5 million lobbying? After all, lobbying is perfectly legal. What difference does it make whether an individual spends all of his time or part of his time lobbying?

Says Adams, "I think the most convincing argument for revision is that the public has no idea of the magnitude of the activities of special interests in Washington. And current disclosure and reporting requirements give them no way to even begin to guess at the magnitude of the effort. The closest we can get are those DCAA audits.

"My hunch is that corporations and trade associations related to industry have massive resources that they can bring to bear (on the political process) which far outweigh those of smaller special interests or those of the public at large to present their cases. Until we have that data, what do we do? Throw up our hands and say it doesn't make a difference? It obviously makes a difference."

AUDIT FOLLOW UP

Were any of the millions of dollars of lobbying, entertainment and other costs questioned by the Defense Contract Audit Agency (DCAA) eventually paid by the contractors?

We don't know. The DCAA acts only as a financial advisor to Defense Department contracting officers who sit down with the contractors to determine which of the questioned costs will be allowed. The DCAA's audit findings are in no way binding. And, of course, the results of the negotiations between the contractors and the contracting officers are not made public.

But a study of the DCAA by the General Accounting Office (GAO), the government's watchdog, gives a clue as to what may have happened. The GAO pointed out that the contracting officers do not always use the findings of the DCAA and that disagreements between DCAA and contracting officers are rarely reported to higher officials. The contracting officer has the final say.

Moreover, contracting officers rarely report the rules of their negotiations to the auditors, GAO found. Elmer Staats, former comptroller general of the U.S., told a House committee hearing that "morale is low at DCAA. They need assurance their findings will have an impact."

The failure of agencies throughout government to follow up and resolve audit findings is, in the words of one GAO official, "a national scandal."

After much pressure, the Defense Department came up with a process for tracking the results of audits, but did not include DCAA audit findings in that process. After pressure from Rep. Jack Brooks (D–Tex.), the Department of Defense (DOD) came up with a proposed plan to follow up findings at DCAA. Deputy Secretary of Defense Frank C. Carlucci told a subcommittee of the House Committee on Government Operations in July that the Defense Department had drafted a process for monitoring follow-up action on contract audit reports, including a provision for resolving significant differences between auditors and contracting officers. Carlucci said a final directive should be issued by the end of August.

Critics say there should be some check on the enormous power of the contracting officers who make final decisions, because some feel contracting officers can become advocates

of the weapons they are responsible for and, therefore, not as objective as they might be when negotiating contract cost differences.

John Kendig, deputy director for cost, pricing and finance at the Pentagon, says such a generalization is wrong and makes him "sick."

Other critics feel the effectiveness of the DCAA could be strengthened if the DOD had an Inspector General (IG) as most other agencies do.

DOD was left out of the Inspector General Act of 1978 because of their strong objections to being included. One Capitol Hill aide says DOD was not included because the sponsors of the bill feared DOD's anticipated heavy lobbying against the act would have killed the entire act.

But Rep. Brooks does not give up easily. His bill to institute an IG at Defense (and four other agencies not covered by the 1978 act) has passed the House and is pending in the Senate.

The Defense Department opposed the House bill because, DOD General Counsel William H. Taft IV testified, an autonomous Inspector General "is completely inconsistent with the hierarchial commander/subordinate relationship that is at the heart of any military organization and embodied in the chain of command. These provisions do not encourage the individual to work with the secretary on his team."

Asked how strenuously the Defense Department had lobbied against the House bill, a Capitol Hill aide replied, "They have been spending only slightly more time on this than they are on the Russians. If they are as aggressive about the Russians as they are about this, then I guess we can sleep nights."

In Senate hearings, Taft said the Department of Defense really wants an Inspector General, but they want the secretary of defense to have the power to veto "any review process or investigation that the Inspector General may initiate which could jeopardize national security." The secretary would have to report the reasons for any veto to Congress. The House bill does not provide such "veto power."

The Defense Department also opposes including the DCAA under the aegis of an IG because, Taft says, DCAA's "principal mission is an advisory role in the acquisition process, not oversight of DOD operations."

On this point the GAO agrees with Defense. But the bill which passed the House includes the DCAA within the purview of the IG because some sponsors felt it would give the DCAA more clout.

To deflect some of the heavy criticism about the potential for finding waste in DOD, the Defense Department recently created the position of assistant to the secretary of defense for review and oversight. This office is supposed to advise the secretary of ways to combat waste, fraud and abuse, but unlike the IG proposed by the House, this position is not independent of the secretary.

CC WINS DOCUMENTS AFTER COURT BATTLE

The audits of the 10 defense contractors' Washington offices which form the basis of this story, were obtained by Common Cause under the Freedom of Information Act (FOIA). After the Air Force refused Common Cause's 1977 request for the audits, CC went to court. The audits were awarded to CC in January of this year.

In court, the Air Force maintained that release of the audits would cause competitive injury to the companies—in other words, rival contractors would be able to learn about the staffing and funding of the companies' Washington offices and somehow use this information to their own advantage. But testimony revealed most of the companies already knew about the workings of their rivals' Washington offices.

Another claim made was that the alleged "mislabeling" of certain contractor expenses as lobbying and entertainment costs by the Defense Contract Auditing Agency (DCAA) would harm the companies in the public's eye and would thus diminish their overall sales, because adverse public opinion would cause Congress to refuse to appropriate funds for defense contracts awarded to these companies.

To support their claims, the Air Force submitted affidavits from high-level officials from each of the 10 companies. "Since these officials were based all around the country, it would have proven difficult and very costly for our staff attorneys to cross examine them," says Ellen Block, Common Cause associate general counsel.

"Instead," says Block, "we drew upon the services of volunteer lawyers in California, St. Louis, Seattle and Minneapolis to take the depositions of the companies' witnesses. These depositions were key to winning the case because the testimony brought out on cross examination clearly contradicted the claims made by the Air Force."

In making the case, the Air Force relied on a provision of the Freedom of Information Act which allows the government to withhold business data only if its release would be likely to cause substantial competitive injury to the business which supplied the data.

During recent hearings on a proposed revision of the FOIA, this section was attacked by the business community. Opponents want to revise the law to prohibit the government from releasing any document that a company would not be willing to release.

TAXPAYERS FOOT B–1 LOBBY COSTS

Right now the born-again B–1 bomber has the blessings of both President Reagan and Defense Secretary Caspar Weinberger. Most people would say the B–1 is a "shoo-in."

But the political winds change quickly in Washington, and just recently there seem to be faint breezes carrying questions about the necessity of the B–1 bomber, which was axed and buried by the Carter administration in 1977 after a nasty battle in Congress.

If the Rockwell Corp., the folks who have brought us the Space Shuttle and who would like to bring us the B–1 bomber, sees the need, it could probably again launch a grassroots campaign to save the B–1—modeled on their extensive campaign waged back in 1974–76—some of it at taxpayers' expense.

Just exactly how much of that B–1 lobbying campaign was paid for by taxpayers is not known, but an audit of Rockwell's B–1 Division in Los Angeles, Calif., during 1974–75 shows Rockwell charged at least $653,400 in lobbying expenses to government contracts, all of which the Pentagon's independent Defense Contract Audit Agency (DCAA) questioned as inappropriate expenses for the government to foot.

This does not include approximately $1.5 million of costs questioned by DCAA auditors when they audited the Washington office 1974–75 expenses of Rockwell and Collins Radio Group (a Rockwell subsidiary). Those questioned costs included some $800,000 in lobbying-related expenses and more than $600,000 in entertainment expenses, as revealed in the August issue of Common Cause magazine.

A separate audit of the B–1 division was obtained by Gordon Adams of the Council on Economic Priorities. While DCAA auditors do not consider lobbying expenses legitimate charges to government contracts, the Pentagon does not have a specific regulation to prohibit contractors from charging such expenses. The auditors can question the costs as "unreasonable," but their word is not final.

A $10,000 study of the economic impact of the B–1 in congressional districts across the country—billed to taxpayers—was probably one of Rockwell's most useful expenses. The study reportedly showed Members of Congress which subcontractors in their districts were making parts for the B–1. Capitol Hill staffers say Rockwell lobbyists and subcontractors peddled the study from one Hill office to another, trying to show Members the economic importance of the B–1 to their district.

It's just that kind of pitch, which Rockwell reportedly had honed to a fine art, that might worry Sen. Barry Goldwater (R-Ariz.), dyed-in-the-wool conservative, consistent champion of military spending, retired Air Force reserves general, and more recently, a critic of waste in defense spending.

He told Time magazine that he worries about the political factors that help shape defense spending. "I don't care how good or bad the equipment or weapons system is," he says. "The senators from the states where it is put together [always] scream for it."

To sustain those kinds of screams, the Rockwell B–1 Division had a variety of programs to promote the B–1. Here's a rundown of some of the expenses auditors said the B–1 Division inappropriately charged to the taxpayers during 1974 and 1975:

$83,645 in "military relations costs" which paid for Rockwell employees to speak with editors, writers and publishers and government and contractor personnel throughout the country.

$115,895 for "Operation Common Sense" and "Keep the B–1 Sold," public relations programs to promote the B–1.

$156,235 in administrative expenses for a director of program relations "whose time appeared to be spent on efforts to influence B–1 legislation."

$152,931 for the costs of presentations, decals, pictures, displays, handouts and so forth.

$42,708 of costs associated with several films, which the auditors believed "were made and shown in attempts to develop positive support for the B–1 and other defense programs."

$36,399 for a speakers' bureau "which provides to Rockwell employees a basic speakers' package that appears to attempt to influence public opinion for the B–1 program."

$8,816 for costs associated with briefings and presentations made at or to Air Force Association symposiums, Strategic Air Command conferences, a Thunderbird reunion, the Society of Experimental Test Pilots, the Air Force Association Convention, the Strategic Air Command Bomb/Navigation Competition and more.

The B–1 Division audit report, done at the request of Sen. William Proxmire (D-Wis.), was preliminary. Which of these expenses were eventually paid for by taxpayers after negotiations with Rockwell is not known.—FLORENCE GRAVES.

COMMON CAUSE,
Washington, D.C., November 30, 1981.

Hon. DAVID PRYOR,
Russell Senate Office Building, U.S. Senate, Washington, D.C.

DEAR SENATOR PRYOR: Common Cause strongly supports your proposed amendment to the defense appropriation bill (H.R. 4995) for fiscal year 1982 to prohibit the use of appropriations for the payment of certain lobbying costs of defense contractors.

This is an area in which the Defense Department could make cuts in spending with absolutely no harm being done to the quality of the present or future defense of this nation. Government payment of contractor lobbying costs is wrong on two counts: one, there is no reason for taxpayers to subsidize defense contractors' lobbying; two, at a time of unprecedented cuts in government programs, there is no justification for continuing to pay costs which do not enhance defense capability but only add to contractor profit margins without merit.

In its September issue, Common Cause Magazine outlined one portion of the unjustifiable reimbursement of defense contractors' lobbying costs. The audits of only 10 major defense contractors' Washington offices covering the years 1974 and 1975 revealed a total of more than $2 million in lobbying-related costs questioned by the auditors. And that is just the tip of the iceberg. Of the hundreds of defense contractors, 67 of the top 100 have Washington offices. This $2 million does not even include other expenses which the contractors originally charged, but voluntarily deleted during the audit negotiations. Furthermore, all the totals are undoubtedly higher, but auditors repeatedly said that most of the contractors refused to let them see the proper records to verify the costs.

The Defense Department is currently considering adopting guidelines on lobbying expenses. Past attempts by the Defense Department, however, have failed under heavy pressure from industry representatives. Passage of your amendment would ensure that contractor lobbying costs are not passed on to taxpayers.

Debate over the nation's defense policies should involve fundamental questions of defense strategy, available resources, and foreign policy goals. The fact that defense contractors currently are able to receive government payment for their lobbying costs does not relate to any of those issues. Passage of your amendment is a cost-saving measure which all Senators serious about cutting government spending should support enthusiastically.

Sincerely,

FRED WERTHEIMER,
President.

Mr. STEVENS. Mr. President, the Senator has tackled a subject that warms the hearts of anyone who has served in any defense matter.

I am willing to recommend that we take the amendment to conference. I am not certain that it is an effective amendment. We do have existing law that prohibits this. As a matter of fact, there is not only law that prohibits lobbying of the type that he is discussing but there is another existing provision that prohibits executive lobbying.

I wonder how many Members of the Senate are aware that no funds at all could be spent to lobby a Member of the Senate on this bill from any portion of the executive branch.

All I am saying is that we have tried, tried, and tried to devise a means to prohibit the type of activity that the Senator is addressing with his amendment and ways have been found to accomplish the result in spite of the past provisions that have become law.

I know of no one on this side who would object to taking that amendment to conference.

I have not had a chance to discuss the matter with the Senator from Mississippi but under the circumstances again, since this amendment will be in conference and the Senator is aware that there is no similar provision in the House bill, I see no reason why the Senate should not adopt the amendment and discuss it with the House of Representatives to see if there is some way to work out an effective limit on charging to defense contracts—those lobbying activities which benefit the contractors.

I am prepared to recommend acceptance of the Senator's amendment.

Mr. PRYOR. I sincerely thank the distinguished floor manager. I hope this will be a step in the right direction, and I certainly hope our conferees will press hard for this step, which I say once again is a step in the right direction.

Mr. President, I ask unanimous consent that the distinguished Senator from Maine (Mr. COHEN) be added to this amendment as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COHEN. Mr. President, if the Senator will yield, I would like to raise a question. This type of lobbying activity might not be considered a legitimate business expense under existing tax laws. If in fact, a major contractor engages in substantial letterwriting activity or makes trips to Washington to speak to Congressmen, the question is whether or not that is deductible as a legitimate business expense and, if so, would there not be a possibility of collecting both ways, one, by including it in the contract itself and, second, by taking a deduction.

I wonder if the Senator from Arkansas will enlighten me.

Mr. PRYOR. If I might explain, the matter of taking a deduction as a business expense is a matter between that particular business and the IRS, and that individual's or that corporation's financial situation in its income tax returns is a matter separate from the thrust of this amendment.

This legislation is an attempt to stop these companies from getting it both ways. It is an attempt, I say to my friend from Maine, we have devised to keep those contractors who do work for the Department of Defense from charging the taxpayer with these costs by billing into their costs these lobbying expenses, as some of these audit reports have so clearly pointed out.

I once again do not know whether this is the perfect solution to the problem. I think it is an answer that we have got to try to come up with, and I think for us to basically roll over and play dead and say the issue is not there, would indicate that we are derelict in our duty. That is one of the reasons why I am so very pleased that the Senator has joined on as a cosponsor, that the distinguished Senator from Alaska has stated that this amendment would be acceptable to him and to his side of the aisle, and that it would go to conference as a part of this bill.

Mr. COHEN. I thank the Senator.

Mr. PRYOR. I sincerely appreciate the remarks of my friend from Maine and the statement of my friend from Alaska.

Mr. STEVENS. Mr. President, I see the distinguished Senator from Mississippi is here now, and I am prepared to state that we will take the amendment to conference. I do not know what is going to happen to it there, but it will be an item in conference.

Mr. STENNIS. I am sorry I was away for a few minutes. Mr. President, if the Senator will yield, I know the import of the amendment and I approve it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment (UP No. 719) was agreed to.

Mr. STENNIS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 720

(Purpose: To make available $103,500,000 for procurement of B–707 aircraft to provide for engines and parts for KC–135 aircraft and $46,800,000 for installation of modification kits into such aircraft)

Mr. DANFORTH. Mr. President, on behalf of myself and Senator EAGLETON I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Missouri (Mr. DANFORTH), for himself and Mr. EAGLETON proposes an unprinted amendment numbered 720.

Mr. DANFORTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 9, line 19, insert "of which not less than $46,800,000 shall be available only for the installation of modification kits into KC–135 aircraft," after "$16,906,069,000,".

On page 24, line 25, before "$344,300,000" insert "$103,500,000 shall be available only for the procurement of B–707 aircraft to provide for engines and parts to re-engine KC–135 aircraft,".

Mr. DANFORTH. Mr. President, I rise to offer an amendment which would get the modernization of the Air Force's KC–135 tanker fleet underway this year and save the taxpayers money at the same time.

During this fiscal year, around 3 dozen KC–135 tankers will be taken out of service temporarily for reskinning. The House of Representatives wisely recognized that all of these aircraft could be reengined with existing JT3D engines while they are grounded for reskinning. The House earmarked money from both the Air Force aircraft procurement account and the Air Force operation and maintenance account for the transplantation of engines from Boeing 707 commercial aircraft—which are being grounded because of Federal noise regulations—to the Air Force's KC–135 tankers. My amendment would make the Senate measure agree exactly with the House-passed language.

As the House Appropriations Committee indicated in its report on this legislation, there is an alternative to the JT3D engine. The Air Force is pursuing the possibility of using the CFM–56 engine, a new engine which would improve the KC–135's capabilities and cost-effectiveness even more than the JT3D would.

But CFM–56's cost more than five times what JT3D's would cost and, even more importantly, it is not possible to reengine a substantial number of the KC–135s with CFM–56's this year.

The House, by earmarking funds for the JT3D program this year, would make it possible to proceed with that program and thereby get some of the modernization work behind us, and, at the same time, it would make it possible to proceed with the CFM–56 program and put these engines to work for the Air Force as soon as they are ready for installation.

Like the House, the Senate should approve this approach as the best way to make every defense dollar count.

In short, Mr. President, here is the situation with respect to this amendment. The United States now flies tankers known as KC–135's, and the tankers are used for the purpose of refueling aircraft.

The tankers now bear engines known as J–57's. These J–57 engines are old, they are noisy, they are fuel-guzzling, and it is universally agreed, as far as I know, that these old engines must be replaced.

For this reason in both the House bill and the Senate bill appropriations are set aside for the purpose of replacing the old engines on the tankers. Both bills have approximately a quarter of a billion dollars appropriated for the purpose of replacing the engines on the tankers.

The Senate bill, while it does not specify the precise way in which the engines are to be replaced, I think it is fair to say that the Senate bill anticipates that the engines, the old engines, will be replaced by new engines known as CFM–56's. The new engines are now being developed for the purpose of installation on the tankers. However, it would be approximately late 1983 before a replacement program would be underway for the new CFM–56's.

The House bill by contrast, specifies that slightly over $150 million of the available funds for replacing the old engines would be earmarked to be spent for an engine known as the JT3D. Mr. President, the JT3D is the engine which is now presently being used on 707 aircraft, commercial 707 aircraft. In fact, the engine that now is used to fly Air Force 1 is the JT3D.

These JT3D engines must be taken off commercial aircraft. Why? They must be taken off commercial aircraft because they do not meet the new Federal noise-pollution standards.

So they would just, under normal circumstances, be taken off and discarded. The House recognized that, instead of just throwing them away, these same JT3D engines could be used to be placed on the tankers, replacing the old J–57's; and that if that were done, first of all, instead of waiting until late 1983 and 1984 and 1985 to substantially reequip the tankers, we could begin the process now. And in fact, in 1982, some three dozen airplanes which are going to be overhauled anyhow, which are going to be reskinned, as they say in the trade, could be outfitted in 1982 with the JT3D.

Second, the cost per airplane of using the 707 engines is about 20 percent per airplane, about 20 percent of the cost of the new engines, the CFM–56's. So it is a savings of 20 percent to the dollar, 20 cents to the dollar.

Third, and finally, it is not as though the JT3D is an old, outmoded, useless engine. In fact, it has been estimated that the engines are good until the year 2000. So they have a very substantial useful life. They are being taken off the 707's merely to meet noise pollution problems.

So, Mr. President, in order to get the show on the road, in order to begin the process of reequipping these tankers at the earliest possible date when they are in for being reskinned, in any event, and in order to save about 80 percent of the cost that would otherwise go for new engines, this amendment is offered.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, as pointed out on page 87 of our report, the Senator from Missouri is correct. We do have $250 million to reengine and modernize this KC–135 tanker. And the program is designed to reengine the KC–135 with a CFM–56 engine. It is a total tanker modernization program. It is going to provide substantial fuel savings, increased fuel offload and some vastly improved environmental benefits.

Now the Department has told us that they did evaluate the program that is supported by the Senator from Missouri, and there is no question that there is an interim advantage to pursue his suggestion.

However, this program would be very short-lived. The suggestion he makes would not increase the takeoff gross weight of the KC–135, which is one of the goals. It would not meet the Federal Aviation Administration regulation standards for noise, smoke, and pollution.

As the Senator has pointed out, the airlines have to retire those engines because they do not meet those FAA noise, smoke, and emission standards. But also let me point out that they are not fuel efficient either. It is true that the military does not have to meet these standards yet and it may be possible for the military to use the engines that the civilian airlines cannot use because Congress has not required the military to meet the same standards as far as noise, smoke, and emissions standards are concerned.

I would hope that the Senate will allow us to maintain our position. This issue will be in conference, and it is a question that we may be able to work out on a short term, interim basis with the House.

But I personally see no reason to put us in the position where we tell the civilian airlines that they cannot use these engines which are in the 707 aircraft because of EPA and FAA noise, smoke, and emission standards which we have mandated and then turn around and buy them for the military to have the military use them in tankers.

It is one thing to say that we are not going to impose the same standards on the military because of the necessity of defense policy; it is another thing to take action directly contrary to standards we have established and to allow the military to install as a modernization step engines which do not meet standards which we have imposed upon them.

Again, let me point out that the JT3D is only a limited system of modernization. It would not be a new system. We would be installing used equipment.

I hope that the Senate will look at our report and see that we have dealt with this fully. We want to have the Air Force follow the directions of Congress. We gave the Air Force the direction to go into long leadtime materials and tool up to replace the engines on the KC–135 tanker to re-engine; and we have the new CFM–56 engines which will bring about a total modernization of that tanker.

I, for one, cannot support the concept of using these used engines or retooled engines in a modernization program. And I hope the Senate will support the committee in opposing this concept.

Now, again, I say to the Senator from Missouri, we know that in conference we are going to have to deal with the House on this matter and it is possible that there will be an interim measure worked out here with the House as far as using some of those engines. But we just cannot see recommending to the Senate an abandonment of the CFM–56 program in order to earmark the funds he wishes to earmark for this program.

The CFM–56 should be our priority in this measure and, above all, we should attempt to live with our own standards. We mandated the standards of the civilian airlines and I do not see any reason to let the military go backward and do what we have told the civilian airlines they must abandon.

UP AMENDMENT NO. 721

Mr. HATFIELD. Mr. President, I send a sense-of-the-Senate resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection? The Chair hears none. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes an unprinted amendment numbered 721.

Mr. HATFIELD. Mr. President, I ask unanimous consent that further reading of the resolution be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill insert the following:

Resolved, That Congress remains concerned about the rapidly escalating cost of the chemical and biological warfare programs that have not yet been adequately justified by the Administration.

Congress directed the Administration as part of the Conference Report to the fiscal year 1981 supplemental appropriations bill (H. Rept. No. 97–124) to provide studies of:

The long-range costs of the modernization program;

A country-by-country report from our NATO allies with respect to their official views on that long-range program;

An overview of the mission-oriented requirements for the various binary weapons; and

An arms control impact study of the mission-oriented requirements.

This information has yet to be supplied to

Congress. The Congress reaffirms the language of the Supplemental Conference Report as adopted earlier this year by Congress. Funding for binary weapons in this year's appropriation is not production or construction-oriented, but rather limited strictly to research and development. Therefore, these requirements do not apply to funding provided in this Act. The Congress views such requirements with the utmost concern and seriousness, and fully expects them to be fulfilled prior to any future request for production or construction-oriented binary weapons funding.

Congress also urges the Administration to resume as rapidly as possible negotiations with the Union of Soviet Socialist Republics to prohibit the development, production and stockpiling of chemical weapons. These negotiations are vital to enhance United States national security and achieve budgetary stability.

Mr. HATFIELD. Mr. President, this is really a followup to the conference report on fiscal 1981. I have discussed this with the Senator from Alaska and the Senator from Mississippi (Mr. STENNIS).

As you will recall, in that conference report what we suggested and what was adopted by the conference in both the House and the Senate was that the Congress be provided with long-range costs for the modernization program of the weapons system; that we have a country-by-country report from our NATO allies with respect to their official views on that long-range program; an overview of the mission-oriented requirements for the various binary weapons; and an arms control impact study of the mission-oriented requirements.

Basically, Mr. President, this material that we are asking for has not been forthcoming. It has only to do with construction and production.

The money in this bill has only to do with the research and development. So it does not in any way impact upon the money in this bill but, rather, it is a restatement of our expectation that such information shall be furnished the Congress before we move that program to the point of production and construction.

As I say, I have discussed this with the Senator from Alaska and the staff person of the Senator from Mississippi. I understand there is no objection to this being adopted.

Mr. STENNIS. Mr. President, if the Senator will yield, I want to endorse the sentiments of the Senator from Oregon. I approve of the resolution and I hope we can agree to it.

Mr. HATFIELD. I thank the Senator from Mississippi for his endorsement.

Mr. STEVENS. Mr. President, it is my understanding that this is a sense-of-the-Senate resolution dealing with the subject the Senator has discussed with both me and the Senator from Mississippi. We are prepared to accept the amendment.

The PRESIDING OFFICER. The Chair will advise the Senator it will take unanimous consent to set aside the Danforth amendment, which is pending.

Mr. HATFIELD. Mr. President, I ask unanimous consent to temporarily set aside the amendment of the Senator from Missouri.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I move adoption of the resolution.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (UP No. 721) was agreed to.

Mr. HATFIELD. I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, it is my understanding that the Danforth amendment is back before the Senate again.

The PRESIDING OFFICER. The Senator is correct.

Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire.

UP AMENDMENT NO. 720

Mr. HUMPRHEY. Mr. President, this Senator had an interesting experience some weeks ago when he was permitted to board a KC–135 tanker making a takeoff run from the Air Force base in the State of New Hampshire. I say it was interesting; it was also exciting in that one began to wonder as the far end of the runway came rushing into sight whether this airplane would get off the ground or not. Of course, it did, but they plan those takeoff runs with a very thin margin for error.

The fact of the matter is, Mr. President, that there is not a single strategic Air Force base today at which KC–135's are based which can handle a fully loaded KC–135 on takeoff. All of them must be restricted in weight in order to be airborne before they run out of runway.

At long last, we seem to be moving forward with a program to reengine these KC–135 tankers. A number of engines have been considered by the Air Force, principally the CFM–56 and the JT3D.

The Air Force has selected the CFM–56.

The Senate Armed Services Committee has essentially agreed with that selection and has authorized the expenditure of funds, although it leaves the final choice in the end to the Air Force.

Mr. President, my key point is aircraft performance. As the Senator from Missouri correctly pointed out, the JT3D is a fine engine, good enough to be used on *Air Force One* and other VIP aircraft. That is certainly true. It is a fine and safe engine. But the fact is that those aircraft do not carry the huge loads of fuel which these KC–135 aircraft must carry.

The key point is performance. They can reengine the KC–135's with the 15-year-old JT3D engines. Some 25 percent of the SAC bases will then be capable of taking off fully loaded KC–135's.

If we choose instead the CFM–56, which the Air Force wants, every SAC base will be capable of launching a fully loaded KC–135 tanker. It is a goal very much to be desired.

The key issue is performance of the JT3D.

The takeoff run would be much greater for the KC–135 with the old JT3D's, much greater than with the CFM–56.

There are other aspects of performance which are important; noise, pollution, and fuel efficiency. Again, the JT3D engine falls far short of the CFM–56. The JT3D is an old engine, an old design. It is noisy. It is dirty. It is not fuel efficient.

The CFM–56 is also less expensive to maintain, an estimated $26 per effective flight hour versus $45 per effective flight hour for the JT3D. So it seems to me, Mr. President, there is just not any argument for reengining the KC–135 with the 15-year-old JT3D engines which the airlines are eager to get rid of, for good reason. They are undesirable engines today.

Here is an interesting point, Mr. President: What kind of engines do you suppose the airlines are going to use as replacement for the JT3D engines which they would love to unload on the unwilling Air Force? It is the CFM–56, precisely the engine the Air Force wants and needs.

I would urge my colleagues, Mr. President, with all due respect to the Senator from Missouri—certainly, the State of Missouri and its interests deserve representation in this body, and that State and its citizens are admirably represented—to support the CFM–56. Others of us are parochially interested, too. I have a SAC base in my State. The residents in that State are eagerly looking forward to more quiet and restful nights with the CFM–56 engines coming along. They feel the aircraft thundering overhead at low altitude barely making it off the end of the runway with the JT3D engines.

Mr. President, I simply close by saying that there are few issues—I guess there is not another issue with which the Senator from New Hampshire is more familiar and better qualified to advise his colleagues than the matter of aviation and aircraft. It would just be a step backward, really, to try to modernize what is getting to be an old aircraft by putting on 15-year-old engines when we have much better, quieter, more efficient, cleaner and, in every respect, more capable engines available to us, which the Air Force wants and which, in the final analysis, represent the kind of increase and improvement in performance which is so badly needed by not only the Strategic Air Command but by the other users of the tanker fleet.

Mr. President, it is important to remember that those tankers are used not only for refueling bombers but for refueling transports as well. Their strategic capability today is very limited. We would be severely hard pressed to reinforce our troops in Europe or the Middle East if we were called upon to do it on any significant scale today.

We have to increase our capability. One KC–135, reengined with the CFM–56, is the equal of four, according to statistics, KC–135's reengined with the JT3D engine.

The case seems pretty clear to this Senator, Mr. President. I urge my col-

leagues to vote against the amendment of the Senator from Missouri.

Mr. DANFORTH. Mr. President, I shall not attempt to debate this issue much longer. It does appear that it will require a rollcall vote. Therefore, Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DANFORTH. Mr. President, before the clerk calls the roll, I should like to add a point or two of clarification.

First, this has been debated as though the JT3D, which is the 707 engine, the existing engine, would be to bump the CFM–56. It has been debated as though it is an either/or proposition: Either we install the 707 engine, the existing engine, and scrap the CFM–56, or we proceed with the CFM–56 and forget about the JT3D, the 707 engine. That is not the case that is before the Senate.

The case that is before the Senate is, can we proceed with the CFM–56? No one has stated that we should do otherwise. Proceed to develop it, use it where necessary, but, where possible, proceed at an early date to install the JT3D, which is now available—these engines are being taken off the 707—and put them on the tankers. So it would not totally replace the tanker fleet. Nobody has suggested that.

In fact, for the 1982 fiscal year appropriations, it would earmark a little over half of the appropriations for refitting the tankers, not all of them.

The issue is, Mr. President, can we get on with the job now and can we begin doing that job, and for every plane that we do it on with the 707 engine, we will do it at 20 percent of the cost of using the more expensive CFM–56.

With respect to noise, clearly, there is a de minimis rule. The same noise requirements that pertain nationwide to all of the commercial air transportation in the country do not apply to the relatively small tanker fleet. So, in the process of taking these off of the large commercial fleet, can we not make use of some of these engines, and can we not begin doing so now?

Of the three engines that are around, the old engines that are being taken off and the JT3D, which is the 707 engine, and the new CFM–56, clearly, the noisiest is the existing engine. So, from the standpoint of the constituents of the Senator from New Hampshire, the sooner we get on with the job of replacing those old noisy engines, the better they will sleep at night. I say let us get on with the job now.

Of course, Mr. President, there is a reason which is beyond all others for using the available equipment which would otherwise be scrapped. It is this: We have budget problems in this country and many people have looked to the military. Many people have said:

Can't the military give something? Can't the Pentagon give something, a little saving here and there? We do not ask that you scrap the whole Pentagon, but are there not a few places where prudence can save a few dollars for the Treasury, a few dollars for the taxpayer?

Here is a case where, on a selective basis, we could proceed with engines which otherwise would be scrapped and we could do so at 20 percent of the cost of the new engines. It seems to me, Mr. President, that here is a chance to prove that we can use a cost-effective method of satisfying the needs of the Defense Department and we can do so for the benefit of the economy and the benefit of the American people.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from South Dakota (Mr. ABDNOR), the Senator from North Dakota (Mr. ANDREWS), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), and the Senator from Alaska (Mr. MURKOWSKI) are necessarily absent.

I further announce that, if present and voting, the Senator from South Dakota (Mr. ABDNOR) would vote "nay."

Mr. ROBERT C. BYRD. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Delaware (Mr. BIDEN), the Senator from California (Mr. CRANSTON), the Senator from Alabama (Mr. HEFLIN), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Louisiana (Mr. LONG), the Senator from Ohio (Mr. METZENBAUM), the Senator from Michigan (Mr. RIEGLE), the Senator from Massachusetts (Mr. TSONGAS) and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 16, nays 65, as follows:

[Rollcall Vote No. 429 Leg.]

YEAS—16

Boschwitz	Dole	Pressler
Bradley	Eagleton	Roth
Chiles	Inouye	Weicker
Cohen	Lugar	Williams
Danforth	Mitchell	
Dodd	Pell	

NAYS—65

Armstrong	Glenn	Nickles
Baker	Gorton	Nunn
Baucus	Grassley	Packwood
Boren	Hart	Percy
Bumpers	Hatch	Proxmire
Burdick	Hatfield	Pryor
Byrd, Harry F., Jr.	Hawkins	Quayle
Byrd, Robert C.	Heinz	Randolph
Cannon	Helms	Rudman
Chafee	Hollings	Sarbanes
Cochran	Humphrey	Sasser
D'Amato	Jackson	Schmitt
DeConcini	Jepsen	Simpson
Denton	Kasten	Specter
Dixon	Kennedy	Stafford
Domenici	Laxalt	Stennis
Durenberger	Leahy	Stevens
East	Levin	Symms
Exon	Matsunaga	Thurmond
Ford	Mattingly	Tower
Garn	Melcher	Wallop
	Moynihan	Warner

NOT VOTING—19

Abdnor	Heflin	Metzenbaum
Andrews	Huddleston	Murkowski
Bentsen	Johnston	Riegle
Biden	Kassebaum	Tsongas
Cranston	Long	Zorinsky
Goldwater	Mathias	
Hayakawa	McClure	

So the amendment (UP No. 720) was rejected.

Mr. STEVENS. Mr. President, I believe the Senator from Michigan has an amendment now, and it is my understanding that he wants 20 minutes to discuss his amendment dealing with the KC–10's. It will be my intention to ask for a rollcall vote on the Senator's amendment, and unless he has some objection, I would ask for a rollcall vote at this time.

Mr. President, I ask unanimous consent that it be in order to order a rollcall vote on the amendment of the Senator from Michigan.

The PRESIDING OFFICER (Mr. DANFORTH). Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LEVIN. I thank my friend from Alaska.

The PRESIDING OFFICER. The Senator from Michigan will withhold for just a minute. The Senate will be in order.

Mr. STEVENS. Mr. President, will the Senator yield for just one moment?

Mr. LEVIN. I will be happy to.

Mr. STEVENS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. President, with the indulgence of the Senator from Michigan, and in view of the circumstances that have developed here, I ask the Senator if he would be prepared to agree to a time limit. How much would the Senator like?

Mr. LEVIN. I need 15 minutes, so whatever you need add onto that.

Mr. STEVENS. Mr. President, I ask unanimous consent that there be a time agreement of 30 minutes on the Senator's amendment, and it would be the first item on the agenda tomorrow and be voted on at the end of the 30 minutes beginning in the morning.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, I have a notation on behalf of two other Senators, I regret to say, that prevents me from doing this. I encouraged the assistant majority leader to make this request and I am somewhat embarrassed. But now I find two other Senators have requested to be consulted before any agreement in this respect is entered into.

Mr. STEVENS. Could we do it this way? Could we allow the Senator from

Michigan to lay down his amendment. It will be the first amendment on tomorrow, and I can state that the two of us can end the discussion in 30 minutes.

Mr. BAKER. That sounds to me like the best way to do it. I will ask him to obtain recognition to do that.

Mr. STEVENS. Has the Senator introduced his amendment?

Mr. LEVIN. I will send it to the desk.

Mr. BAKER. Before the Senator does that, may I say, if the managers of the bill are agreeable, that I will announce there will be no more record votes. Mr. President, there will be no more record votes tonight.

UP AMENDMENT NO. 722

(Subsequently numbered amendment No. 638.)

(Purpose: To add funds to procure four additional KC–10A tanker/cargo aircraft in fiscal 1982)

Mr. LEVIN. Mr. President, on behalf of Senators HOLLINGS, NUNN, PRYOR, EXON, and myself, I send an amendment to the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Michigan (Mr. LEVIN), for himself and others proposes an unprinted amendment numbered 722:

On page 24, line 20, strike out the figure $14,044,298,000 and insert in lieu thereof the following: "$14,266,298,000".

Mr. LEVIN. Mr. President, I now understand that there is an agreement that we have this debate and it be limited to a half hour and that it begin in the morning, and I am happy to yield the floor.

CHEMICAL AND BIOLOGICAL WARFARE PROGRAMS

Mr. WARNER. Mr. President, I would like the record to reflect my concerns about a sense of the Senate resolution adopted earlier this evening without a record vote or even a simple voice vote.

I regret that I was not consulted in advance about this resolution because, had such an opportunity been available, I would have attempted to correct several errors of fact that are contained therein.

First, I believe the administration has adequately justified the requests that have been made for funds needed to restore credibility to our chemical deterrent. If anything, the necessity of improving our ability to protect our forces against chemical attacks, and, if required, of responding in kind against such attacks, has become more obvious than ever before in the light of recent indications of Soviet and Soviet-proxy use of these weapons in nations of the Third World. I refer my colleagues to a letter sent to me by the Secretary of Defense which emphasizes this point.

Second, the resolution states that the items specifically requested in the conference report on the fiscal year 1981 supplemental appropriations bill—upon which further funding for chemical warfare preparedness was made contingent—have not been received by the Congress. In fact, the two items specifically identified as being required have been received by the Congress. The "overview of the mission-oriented requirements for the various binary weapons" and "an arms control impact study of such requirements" were provided to the Congress on the 16th and the 18th of November respectively.

Mr. President, I also wish to include at this point in the RECORD a letter from the Secretary of State urging, as did the Secretary of Defense, that the funds sought by the President and approved by the Senate Appropriations Committee be appropriated by the full Senate.

I believe that this legislative history is of crucial importance to a proper understanding of the context in which this resolution was considered and adopted. I hope that it will inform the deliberations of the conferees as they consider this issue.

The letters follow:

THE SECRETARY OF DEFENSE,
Washington, D.C.

Hon. JOHN WARNER,
U.S. Senate,
Washington, D.C.

DEAR JOHN: As the Senate prepares to consider recommendations made by the Appropriations Committee on the FY 1982 Defense Budget, I want to take the opportunity to express formally the position of the Department of Defense and the Administration on the urgent need for funds to support chemical warfare programs.

The U.S. objective in this area is to deter the use of chemical weapons against U.S. or allied forces; however, our current capability to meet this objective falls far short of requirements. The Soviets possess the world's most formidable capability to wage chemical warfare. The recent hard evidence of mycotoxin use in Laos and Kampuchea adds impetus to the need to address now the effects of years of neglect while the Soviets were expanding their capabilities.

A credible deterrent requires both the defensive capability to survive a toxic attack and continue operations and the ability to retaliate with chemical weapons to force the enemy into his protective equipment, thereby negating any major advantages to him from chemical use.

Furthermore, our chemical warfare programs must be strengthened if the Soviet Union is ever to be motivated to accept a genuine prohibition of chemical weapons.

I fully support the Appropriations Committee markup for chemical warfare funds. The full amount is urgently needed now to redress the current imbalance between U.S. and Soviet capabilities in this critical mission area, and I urge you to resist any attempt to undercut or reduce the funding for this vital area as reported by the Appropriations Committee.

Sincerely,

CASPAR W. WEINBERGER.

THE SECRETARY OF STATE,
Washington, D.C., November 30, 1981.

Hon. TED STEVENS,
U.S. Senate,
Washington, D.C.

DEAR MR. CHAIRMAN: In May of this year I wrote to Senator TOWER concerning the importance of the United States maintaining a credible and effective chemical weapons deterrent. I would like at this time to reaffirm my strong support for the chemical weapons deterrence programs contained in the defense appropriations bill which is now being considered by the United States Senate.

The Soviet Union continues to maintain its significant capability in chemical weapons, and extensive resources have been devoted by the Soviet Union to ensure its forces are capable of operating in a chemical warfare environment. The United States, however, has taken no new steps since 1969 and its chemical weapons deterrent is in danger of losing its credibility.

I firmly believe that we should take action to ensure this does not occur, and thus urge approval of the relevant programs contained in the defense appropriations bill. Please let me know if I can be of any assistance in this matter.

Sincerely,

ALEXANDER M. HAIG, Jr.,
Secretary of State.

Mr. ROTH. Mr. President, I have a matter to take up that, with the assistance of the able chairman of the Defense Appropriations Subcommittee, we can dispense with quickly. On page 86 of the committee's report, $109.5 million is earmarked for the purchase of eight C–130 aircraft, pursuant to the authorization bill. Would the chairman, Mr. STEVENS, confirm my understanding that these aircraft are intended for use by the Air National Guard and are not to be placed in the inventory of the Active Air Force.

I believe that the history of the authorization, and the discussions leading up to the inclusion of this money in the appropriation bill for fiscal year 1982 indicates that these C–130H's are needed urgently by the Air National Guard.

Mr. STEVENS. The Senator from Delaware is correct. The additional eight C–130H aircraft to be purchased are intended for the Air National Guard.

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business during which Senators may speak therein for not to exceed 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMENDING THE FIREFIGHTERS WHO FOUGHT THE RECENT FIRE IN LYNN, MASS.

Mr. KENNEDY. Mr. President, I send to the desk a resolution on behalf of myself and Senator TSONGAS and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 248) commending the firefighters who fought the recent fire in Lynn, Mass.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Massachusetts?

There being no objection, the Senate proceeded to consider the resolution.

Mr. KENNEDY. Mr. President, over the Thanksgiving break, tragedy struck the city of Lynn, Mass. One of the worst fires in our region's history devastated a half-mile area of the city, destroying 17 buildings and seriously damaging 9 others. Thousands were evacuated as their homes and apartments were destroyed.

The fire would have been even more

serious however, if it were not for the effort of the 600 firefighters who fought the blaze for 2 days. Led by the Lynn Fire Department, firefighters from communities all across Massachusetts and two other New England States brought the fire under control and prevented further loss to the city. And because of their extraordinary efforts, there were no major injuries or loss of life.

Mr. President, today I am introducing with Senator TSONGAS a Senate resolution to commend the firefighters who battled bravely and at the risk of their own safety to protect the people of Lynn. I hope that the full Senate will go on record in expressing gratitude for their heroic effort.

I urge the adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 248) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 248

Whereas on Saturday, November 28, 1981, the city of Lynn, Massachusetts, suffered one of the worst fires in New England's history;

Whereas approximately 600 firefighters from 95 communities from three New England states battled the fire for two full days;

Whereas thousands of elderly citizens were evacuated from the fire area without loss of life or major injury;

Therefore, be it resolved by the United States Senate that we join in expressing our deep appreciation to Lynn Mayor Antonio Marino, Lynn Fire Chief, Joe Scanlon and the 600 firefighters who joined in this heroic act of service to the people of Lynn, Massachusetts.

NO WARMONGERS HERE

Mr. HATCH. Mr. President, recently the President of the United States, Ronald Reagan, made a statement on this Nation's nuclear policy in an attempt to clarify his position toward nuclear weapons and their use. He made this statement in the face of a steady stream of accusations that his administration is leading us toward a renewal of the arms race and, according to some of his critics, the possibility of nuclear war. In short, this administration has been accused of saber rattling, bellicose rhetoric, and warmongering.

When Ronald Reagan was on the campaign trail he promised the American people he would return us to the position of deliberative strength. In order to accomplish this task he has been required to request increases in our defense spending levels. He had to reverse a trend which had brought our military posture to one of a force ill-equipped, undermanned, and unprepared to meet the missions it was tasked to accomplish.

A classic example of this phenomenon is the issue of theater level nuclear weapons. In a recently released report on this issue Dr. Jeffrey Record writes:

In sum, the declared functions of NATO's Theater Nuclear Forces are: (1) to deter a Soviet first use of TNW; (2) to provide a hedge against the possible failure of NATO's conventional defenses in the face of a major nonnuclear Warsaw Pact attack; and (3) to provide a credible escalatory link to the possible invocation of U.S. strategic forces." [1]

Over the years we have lost the capability to fulfill any one of these functions and as a result the NATO ministers met in December of 1979 and issued a communique which called for a thorough modernization of our theater nuclear force.

The issue of theater nuclear force (TNF) modernization is receiving quite a bit of attention in the media these days. In Europe we have seen large demonstrations against the program in cities such as Bonn, London, Paris, Brussels, and Rome. In all cases the demonstrators claim to be the "party of peace" and want to bring a halt to the spiraling arms race. In conversations I have had with various political leaders of Europe they also espouse a policy of peace, yet they are pragmatic enough to realize that we cannot achieve peace if we remain ignorant of the growing Soviet threat in central Europe.

Earlier this month Soviet President Leonid Brezhnev gave an interview with the German magazine Der Spiegel in which he claimed to be amazed at the rearmament program in the West when any student of the subject could see that the balance now present in Europe clearly favored the West. For the first time he was willing to disclose the number of missiles the Soviets have deployed in Europe, a number that I have no doubt could be inspected with a little more clarity, and stated:

When almost 600 additional missiles are stationed in Western Europe, NATO will achieve a superiority of one and a half times in the number of delivery systems and about two times in the number of nuclear warheads. Is it perhaps not obvious that it thereby could come to a significant disturbance of the existing approximate balance (considering all factors) and that a serious threat to the security of the U.S.S.R. and its allies would arise?

This statement is typical of the propaganda that has been put out by the Soviet Union for the past year in its attempt to arouse public opposition to the decision by the NATO ministers to deploy an upgraded Pershing missile along with ground-launched cruise missiles (GLCM). The Soviet press and its supporters in Europe claim that Soviet policies in the realm of nuclear armament are only reactionary to the aggressive policies of the West, particularly the United States. They try to portray the Soviet Union as a peace-loving nation that only seeks harmony within Europe. The surprising aspect of all this is how many people seem to buy this convoluted logic.

Since the end of World War II the Soviet Union has made every possible attempt to dominate European politics. The people who have demonstrated in Berlin and Bonn should look back at the Berlin blockade and decide what Soviet policy really is toward peace. The demonstrators in London should remember Soviet actions in Hungary in 1956, for all the people in Budapest wanted were the basic freedoms that all men should enjoy. The cacophony of sound coming from demonstrators in Paris and Belgium should lessen so that they can hear the cries of the people of Czechoslovakia in 1968. All of Europe should be listening and looking at the current situation in Afghanistan. Is this the policy of a nation that only seeks peace? I think not.

One must only examine the history of the past 10 to 15 years to comprehend the seriousness of the situation. In this time frame the Soviet Union and its allies have made remarkable strides in the areas of military strength. The entire basis of NATO's concept of a forward defense is based on the use of a nuclear deterrent on the theater level. This is no longer possible as the Soviets have now amassed an advantage in strategic and theater level nuclear forces. When this is coupled with their traditional advantage in conventional land forces it makes the strategies employed by the alliance appear more as political rhetoric, designed to appease a public uneasy about the thought of a Soviet invasion, than a workable war-fighting strategy.

There is a simple irony in a situation that occurred last month in Sweden. For the past several years the Soviet Union has been conducting, and with some measure of success, a massive propaganda campaign against NATO's decision to modernize its nuclear forces in Europe. At the same time Moscow has been in the forefront of a move to declare Scandinavia a nuclear free zone. All of a sudden we find that one of its submarines has run aground in a sensitive military area of Sweden. When the captain of the submarine was asked how he got there his response bordered on the ludicrous. His explanation was that his submarine was suffering from a malfunctioning of navigation equipment. Something about this just failed to ring true. Here was a Soviet submarine, well into Swedish waters, in an area that would have taken considerable navigational skill to get into, and now he says his equipment is malfunctioning.

The experts that I have spoken to on this issue indicate that if he did experience navigational problems it was only when he attempted to leave, resulting in his running aground. The irony in this is that while the submarine was being detained by the Swedish authorities, pending an explanation from the Soviets, it was discovered that nuclear materials were onboard the submarine. If I were a Swedish citizen I would be a little more worried about future Soviet activities and a lot more disbelieving when it came to Soviet statements about a nuclear-free Scandinavia.

Here in the United States there has been a great deal of criticism of the actions taken in European capitals. Some have even ventured to say that maybe we ought to bring our troops home from Europe. This topic, along with the overall question, was addressed quite well in an editorial in the November 2, 1981, issue of Aviation Week by William Gregory.

Europe's peace marchers are even handed in that they are calling for removal of the Soviet SS-20 from Europe as well. That naive

[1] Jeffrey Record, "NATO's Theater Nuclear Force Modernization Program: The Real Issues," Institute for Foreign Policy Analysis, Inc., November 1981.

attitude—wishing that all nuclear weapons would go away—missed the point. Even if the Soviets did withdraw SS-20's, their tactical forces in Eastern Europe are overwhelming. U.S. tactical nuclear weapons in Europe now are short range, too short to hit Soviet targets as a deterrent to the Soviets using their massive conventional forces. If Europe decides it does not want American Pershing 2 and cruise missiles based on its soil, it will invite the very spector read into President Reagan's give-and-take with the visiting editors. If the U.S. sees no reasonable defense to a Soviet thrust in NATO's Central Region, it could simply withdraw to Fortress U.S.A., build up its strategic missile and bomber force and let Europe worry about its own defense.

Of course this is not possible, for if you will recall the introductory language in the report submitted several years ago by our colleagues, Senator NUNN and the late Senator Bartlett, the industrial heartland of central Europe, one of the richest in the world, is one of the major goals of the Soviet Union. To withdraw U.S. troops would be a signal to the Soviets that this area has been abandoned and left for their plucking.

A close look at what the President announced will disclose that he is enunicating the policy line adopted by NATO in 1979—that being to deploy and negotiate. He has expressed a willingness to come to the bargaining table with the Soviet Union, not only on the issue of theater nuclear forces, but also on the question of strategic level weapons and the entire issue of security on the European continent. Even the Washington Post has joined the call for those protagonists within the antinuclear movement in Europe to take the President's remarks in a serious vein:

Ronald Reagan has just made a genuine and unthreatening commitment to the Atlantic Alliance. He has laid out a basis on which American support for European security can be sustained indefinitely, and he has put forward a respectable position from which to launch a serious nogotiation. It is not for any American. however, to define Europe's concept of its own security. Europeans must decide for themselves whether it is better to respond or not—on the double track on which they insisted—to the new Soviet missile force and to the political purpose represented by the force. In brief, Mr. Reagan has returned the question of Europe's security to the only place where it can finally be answered: Europe. (Washington Post 19 Nov. 81)

I urge the governments in Europe as well as the people of Europe to look at this proposal closely. This President has made what many regard as the first serious attempt to bring the so-called arms race to a halt. not just slow it down. He is a man of peace and has indicated this feeling on many occasions. While many have attempted to color him as a warmonger, they do so without any credible evidence.

I was especially pleased to see the President mention the efforts that are being put forward through the session in Madrid of the Commission on Security and Cooperation in Europe. This is the proper forum to discuss the wide ranging issues that are related to peace on the continent. As a Commissioner to CSCE I am aware of the importance this vehicle can play in the promotion and implementation of policy decisions. This message sends a signal to both the Soviet Union and our European allies, especially the French, that we are serious about sitting down and finding a solution to the security problems of Europe. We are willing to discuss the issues in the broadest sense so that we might move forward to the more detailed negotiation stage. Let us hope that the leadership within the Kremlin can see the wisdom in this offer.

In conclusion, I would like to emphasize that President Reagan is a man of not only peace, but vision. He has looked ahead and tried to conceptualize a world of peace, one that is "free from the fear of nuclear war" if I may paraphrase a former President. While many may applaud the actions of the demonstrators in Europe, it can be pointed out that they are a conglomeration of various groups, all opposing the deployment of nuclear weapons for a wide variety of reasons. At the same time, it is equally evident that an undercurrent exists that forments such dissidence for the express reason that it benefits the Soviet Union.

Last week West German Chancellor Helmut Schmidt met with Soviet President Leonid Brezhnev and the topic of TNF was at the top of the agenda. Chancellor Schmidt, under fire in his own party for his support of the NATO decision, stressed the importance of Reagan's offer. He made the firm point that we are now dealing not only with Europe, but all the peoples of the world. It is a message that hopefully was carried back to the Kremlin for discussion within the Politburo.

Mr. President, Ronald Reagan, truly understands the forces that affect any negotiations between two superpowers. His tough line and demonstrated willingness to rearm the United States has brought the Soviets to the negotiating table with a warning that they must negotiate in good faith. Is this the action of a warmonger? President Reagan has laid down the gauntlet of an arms race, and beside it he has laid down the flower of peace. The choice is now up to the Soviets.

CRIME AND (NON)PUNISHMENT, U.S.A.

Mr. JEPSEN. Mr. President, the rising crime level is becoming the most serious problem facing America today. A recent article in Reader's Digest goes a long way toward explaining why crime is such a serious problem: The odds of a criminal escaping punishment, even if caught, have skyrocketed. I urge my colleagues to examine this interesting article.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Reader's Digest, November 1981]

CRIME AND (NON)PUNISHMENT, U.S.A.

MOORESVILLE, IND.—An Indianapolis man who has a history of vicious attacks on women has been charged with the slayings of Mrs. Terry Chasteen and her three small children.

Only days before the murders, Stephen T. Judy, 22, had been released on bond following an arrest for armed robbery. At the time he was free on parole from the Illinois State Penitentiary. He has a long criminal record, including convictions in Indiana and Illinois for offenses similar to the abduction of Mrs. Chasteen and her children.

Police say Mrs. Chasteen's auto was stopped on an interstate highway near Indianapolis. Her bound, nude body and those of her children were later discovered in a creek near the highway.

Marion County prosecutors had opposed the reduction of Judy's bond to $7,500 at a recent hearing, but Indiana law prevented them from introducing evidence of previous criminal convictions.

"It's nonsense that he was released," declared prosecutor Stephen Goldsmith. "This is sad testimony of how our criminal-justice system has failed." [Some 16 months after this tragedy, the bond law was changed.]—Indianapolis Star.

MIAMI.—One man charged with the killing of off-duty policeman Sgt. Alfred Terrinoni had been set free on probation the previous day despite the plea of a police officer who urged that he be jailed.

Tommie Jerome Hicks, 18, a suspect in at least three similar armed robberies, is charged with murder in connection with the death of Terrinoni as he carried night deposits from a restaurant.

Metro Dade Officer Larry Gray had arrested Hicks three months earlier for petty theft. In Hicks' car police found three knives, a pellet gun, and credit cards bearing various names. Gray says he warned the prosecutors that Hicks was a suspect in several armed robberies of restaurants and was dangerous.

"Terrinoni's dead because nobody listened," Gray believes.—Miami Herald.

CHICAGO.—For many years, on the corner of Rockwell Street and Potomac Avenue, there was a drive-in drug business.

It was no secret. No business that makes $20,000 a day could be a secret. But, so brazen were the drug dealers that nothing, not even police raids, slowed them down. If arrested, they had the money—from the sales of heroin, cocaine, PCP and LSD—to post bail and return to the corner.

The police department's narcotics unit and the federal Drug Enforcement Administration filmed the operation and made buys. They spent almost $60,000 on the investigation and then arrested 23 people for selling drugs to undercover police.

That was over a year ago. Now the five leaders of the drive-in drug business have been in court. According to police, all five had previous histories of drug arrests. All five pleaded guilty to the drug-selling charges. All five were put on probation by Criminal Court Judge Robert Massey.

At Roberto Clemente High School the students know the corner of Rockwell and Potomac well. After reading that nothing happened to the operators of the drive-in, students in two English classes wrote letters to the judge.

"Your Honor," began one student, "the pushers are destroying our community. They sell drugs to young kids. If they already had criminal records, why shouldn't they be kept in jail?"

A police investigator said simply, "You wonder why drugs are our No. 1 problem?"—Column by Anne Keegan in Chicago Tribune.

BALTIMORE.—There were photographs on the desk. "Anybody want to look?" asks Bill Swisher, State's Attorney for Baltimore.

They were baby pictures, only the baby was dead. In a courtroom across the hall, James McClain, the man convicted of killing the child, had just been released.

The baby belonged to McClain's girlfriend. She was out when a friend came to the high-

rise apartment and showed McClain a picture of his girl with another man.

In his confession, McClain said, "I carried (the baby) to the garbage opening, (laid) him in (it) and just let him go." McClain was convicted of killing the child and sentenced to life behind bars.

Almost 18 months after that confession, the Court of Appeals, Maryland's highest court, ruled in another case that a defendant had to be taken before a court commissioner within 24 hours of arrest, or the state could not use any subsequent confession. McClain was not taken before a commissioner until he had given his confession—24 hours and 12 minutes after arrest.

The Court of Appeals decided to make its ruling retroactive.

So James McClain is a free man.—Column by Michael Olesker in Baltimore Sun.

ESSEX JUNCTION, VT.—Her small body, bound and gagged, was found hidden under an abandoned mattress. Melissa Walbridge, 12, had been tortured and stabbed to death. Authorities say the assailants took "calculated actions intended to cause as much pain as possible." A companion, also 12, was sexually assaulted and stabbed in the chest. Miraculously, that child survived.

Police arrested two local youths—ages 16 and 15—for aggravated sexual assault and murder.

The 16-year-old is expected to be tried as an adult this fall. At the time of the murder, he was free on a one year's suspended sentence for threatening a woman with a knife.

His 15-year-old partner, however, can be charged only with delinquency for his alleged role in the sexual assault and murder. He may be sentenced to a juvenile institution, but at age 18, he will be freed.

A Vermont law—which State Attorney General John Easton called a "license to kill"—prevented prosecuting juveniles under age 16 as adults no matter how serious the crime. It also mandated that juvenile criminals be freed with a clean record upon reaching age 18.

That's what happened in July to a young man who was 15 when he shot and killed his 63-year-old aunt and stole her car. The shooting took place less than three years ago.

He still is regarded as a danger to society by psychiatrists and prosecutors familiar with the case. But there was no legal way to hold him in custody after his 18th birthday. And he is free.

[Outrage over the Essex Junction case forced the Vermont legislature to change the law last summer so that juveniles 10 and older can be prosecuted as adults for violent crimes. But juvenile offenders already in the system will be released in accordance with the previous statute.]—Boston Globe.

SAN FRANCISCO.—The former court-appointed attorney for a California man who confessed repeatedly to a multiple murder has written the U.S. Supreme Court to protest a state Supreme Court decision that invalidated his client's confessions.

Asserted respected defense attorney James Leonard Crew, "It is difficult to understand how a system of laws conceived to protect innocent people can become twisted to give freedom to a person who deliberately kills three innocent human beings, and then confesses repeatedly to the killings."

Crew's letter involved the case of Barry Floyd Braeseke, convicted of the murders of his mother, father and grandfather. The state Supreme Court threw out the confessions and reversed Braeseke's conviction. Earlier this year the U.S. Supreme Court refused to reinstate the conviction.

The ruling attracted widespread attention, in part because, following his conviction, he again confessed to the murders. Braeseke described the slayings on the CBS program "60 Minutes"—a confession which the high court has yet to consider. He contended that the drug "angel dust" made him commit the crimes. Braeseke is now scheduled to be retried. Michael Cardoza, prosecutor in the case, concedes he may have difficulty obtaining a second conviction if the courts forbid use of the confession.

The attorney's letter drew praise from Cardoza, who said, "In effect, Crew is saying to the court, 'As an attorney, I did what I was supposed to do. But your function is to do justice, not to buy spurious arguments.' "—Los Angeles Times.

WASHINGTON, D.C.—It is hard to comprehend that a man accused of shooting you is back on the streets.

Just ask one victim, an attorney who requests his name be withheld because he fears reprisal. "I am outraged and disgusted," he declares. His anger is directed at the criminal-justice system.

It was "the system" that permitted the attorney's accused assailant, 23-year-old Allen Graves, to make bond and disappear just before his scheduled trial. Graves was free on bond from another case the night the attorney was shot during a robbery. Less than a month before, Graves had been arrested for the kidnapping and robbery of one Washington woman and kidnapping and assault of another.

It was "the system" that had enabled Graves to be on the streets at the time the women were kidnapped, too. Before that attack, a jury had convicted Graves for armed robbery and assault with intent to kill. But that conviction was overturned on a technicality, and Graves was allowed to plead guilty to robbery only, and was freed on bond pending sentencing.

[He was apprehended and again permitted to plea bargain for conviction on lesser charges. Finally, he was sentenced to prison.]—Washington Star.

MIAMI.—Within hours of arrest and arraignment, suspected drug smugglers post huge bonds and return to South America, beyond the reach of U.S. law, according to complaints by the authorities trying to stop drug trafficking here.

Documenting the need to toughen bond standards, officials cite the case of Alfredo Gutierrez, whose arrest they called the biggest cocaine bust in the nation's history.

Gutierrez was arrested in Miami when undercover agents offered him $9 million in cash for 854 pounds of coca base, which is refined into cocaine. He was charged with conspiracy to import cocaine. Bond, first set at $3 million, was reduced to $1 million. Within hours the money was delivered to the court. Needless to say, Gutierrez did not appear for trial.

Authorities insist there should be no bonds for suspected major drug smugglers, especially repeat offenders. But a bill to toughen bond standards for drug offenders has yet to be enacted by Congress.—AP.

NEW YORK.—Manhattan Supreme Court justice Arthur Blyn has sentenced a convicted killer to five years' supervised probation because a prison sentence would have no "constructive result." Blyn—in effect—ruled that the killer's life is more important than the victim's.

We don't know of any prison sentences that produce constructive results for convicts. The purpose of a sentence is to protect society and to punish people for violating the rules of civilization. And the taking of a human life, under any circumstances, demand a severe punishment.

Sure, there were special circumstances in this case. The killer, Richard Schreiner, claimed he blacked out from too much beer and marijuana and doesn't remember tying up, then stabbing and strangling his 22-year-old victim.

By treating homicide as a venial sin, the result of a "personality disorder," Blyn—and other judges—are encouraging the current epidemic of murder and violence that is claiming a record number of our citizens. Blyn's sentence is just one of countless examples of denied justice in our criminal courts.

Laws aren't enforced. Serious crimes are too frequently plea-bargained away. Crime pays. Criminals rule our streets. We have to fight back by locking up the criminals.—An editorial in New York Daily News.

[Less than six months after Schreiner was freed on probation, he was arrested for attempted murder in the stabbing of a 15-year-old boy. Charges against Schreiner are pending.]

SENATOR HARRY F. BYRD, JR., WILL NOT SEEK REELECTION

Mr. ARMSTRONG. Mr. President, today marks the end of an era. The distinguished senior Senator from Virginia, the honorable HARRY F. BYRD, JR., has today announced his intention to retire from this body at the end of this 97th Congress.

Senator and Mrs. Byrd are doubtless looking forward to a well-earned rest following an arduous career of public service that included service as a naval aviator during World War II, six terms in the Virginia State senate, and, since November 12, 1965, as a Member of this body.

But their gain will be our loss, and the Nation's loss. During more than 16 years of service in the U.S. Senate, HARRY FLOOD BYRD, JR. has established a reputation as perhaps the foremost watchdog of the Treasury in either House of Congress. The taxpayer has had no better friend.

For years HARRY BYRD has been warning all who would listen, and many who would not, of the dangers and folly in excessive Federal spending and unmanageable deficits. We now know all too well how right he has been.

Virginia, which supplied us with Washington, Jefferson, and Madison, is accustomed to sending great leaders to Washington. HARRY FLOOD BYRD, JR. has carried on the proud Virginia tradition. His successor will have very large shoes to fill.

SENATOR HARRY F. BYRD, JR.

Mr. DOLE. Mr. President, this is a Chamber familiar with history, an institution graced for nearly two centuries by men and women with their country's best interest close to their hearts. Few names on the Senate's long rollcall have earned more luster than BYRD. And few among us have reflected as much credit upon the State of our births as HARRY F. BYRD, JR.

He comes from the Old Dominion of Virginia—a State that has nourished American leadership from the beginning of the Republic. He comes from a family whose years of service to Virginians have created a legend all their own. But HARRY BYRD, JR. has never been content merely to carry on traditions. He has made history of his own. He has written a very personal chapter in the story of this body. And his decision to leave us after 18 years leaves a hole in our ranks that can hardly be filled.

He leaves at a time when his own concerns—the concerns of Virginians for fiscal responsibility and a strong national defense—are national priorities. He leaves at a time when his personal message of conservative government—a message that spanned both major parties in his State—is now accepted as national policy. He leaves knowing that the scale of history has once more come down on Virginia's side. He leaves triumphant.

HARRY's fellow Virginian, Thomas Jefferson, was onced asked how he intended to replace America's departing Ambassador to France, Benjamin Franklin. He said that he might occupy Franklin's shoes for a while—but that no one could ever really fill them. HARRY filled some pretty illustrious shoes himself when he first came here. In 16 years since then. he only enlarged them.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–2250. A communication from the Chairman of the Joint Subcommittee on Aquaculture, Department of Agriculture, transmitting pursuant to law, the biennial Report on Aquaculture; to the Committee on Agriculture, Nutrition, and Forestry.

EC–2251. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report on twenty-six deferrals contained in the President's first special message for fiscal 1982, totaling $737.2 million; jointly, pursuant to the order of January 30, 1975, to the Committee on Agriculture, Nutrition, and Forestry; to the Committee on Armed Services; to the Committee on Commerce, Science, and Transportation; to the Committee on Energy and Natural Resources; to the Committee on Finance; to the Committee on Foreign Relations; to the Committee on the Judiciary; and to the Committee on Labor and Human Resources.

EC–2252. A communication from the Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, 45 secret Selected Acquisition Reports and Summary Tables for the quarter ending September 30, 1981; to the Committee on Armed Services.

EC–2253. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a confidential report on a proposed foreign military sale to Pakistan; to the Committee on Armed Services.

EC–2254. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a confidential report on a proposed foreign military sale to Pakistan; to the Committee on Armed Services.

EC–2255. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a confidential report on a proposed foreign military sale to Pakistan; to the Committee on Armed Services.

EC–2256. A communication from the Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, notification of a decision made to convert the maintenance and repair of office equipment at Marine Corps Base, Camp Lejeune, North Carolina to performance under contract; to the Committee on Armed Services.

EC–2257. A communication from the Assistant Secretary of the Army for Installations, Logistics and Financial Management transmitting, pursuant to law, notice of a decision made to convert the containers, textiles, tents, and tarpaulins activity at Fort Bragg, North Carolina to performance under contract; to the Committee on Armed Services.

EC–2258. A communication from the Assistant Secretary of the Air Force for Research, Development and Logistics transmitting, pursuant to law, a report on a decision made to convert the publishing distribution function at Hill Air Force Base, Utah to performance under contract; to the Committee on Armed Services.

EC–2259. A communication from the Assistant Secretary of the Air Force for Research, Development and Logistics transmitting, pursuant to law, notice of a decision made to convert the base information transfer center function at Hill Air Force Base, Utah to performance under contract; to the Committee on Armed Services.

EC–2260. A communication from the Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a decision made to contract without cost comparison analysis, for private urological medical service at the Naval Submarine Medical Center, Groton, Connecticut; to the Committee on Armed Services.

EC–2261. A communication from the Principal Deputy Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, notice of a decision made to contract, without a cost comparison study, for the aircraft maintenance function at the Naval Air Test Center, Patuxent River, Maryland; to the Committee on Armed Services.

EC–2262. A communication from the General Counsel of the Department of Defense transmitting, pursuant to law, a copy of Executive Order 12315, Amendments to the Manual for Courts-Martial, United States; to the Committee on Armed Services.

EC–2263. A communication from the Secretary of the Army transmitting, pursuant to law, the annual report of the United States Soldiers' and Airmen's Home, 1980 and the annual General Inspection of the Home, 1981; to the Committee on Armed Services.

EC–2264. A communication from the Secretary of Transportation transmitting, pursuant to law, the semiannual Report of the Inspector General of the Department of Transportation; to the Committee on Commerce, Science, and Transportation.

EC–2265. A communication from the Assistant Attorney General of the United States for Legislative Affairs transmitting a draft of proposed legislation relative to the confidentiality of information filed by individual taxpayers with the Internal Revenue Service; to the Committee on Finance.

EC–2266. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a report on the provision of emergency military assistance given to El Salvador up to $25 million; to the Committee on Armed Services.

EC–2267. A communication from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting pursuant to law, copies of international agreements, other than treaties, entered into by the United States within the previous sixty days; to the Committee on Foreign Relations.

EC–2268. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on October 27, 1981; to the Committee on Governmental Affairs.

EC–2269. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on October 27, 1981; to the Committee on Governmental Affairs.

EC–2270. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on October 27, 1981; to the Committee on Governmental Affairs.

EC–2271. A communication from the Deputy Administrator of the General Services Administration, transmitting, pursuant to law, a report on the cost of travel and the cost of operating privately owned vehicles to Government employees while engaged on official business; to the Committee on Governmental Affairs.

EC–2272. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the semi-annual report of the Office of Inspector General, Community Services Administration, for the six month period ending September 30, 1981; to the Committee on Governmental Affairs.

EC–2273. A communication from the Administrator of the Veterans' Administration, transmitting, pursuant to law, the fiscal year 1981 report on deceptive advertising; to the Committee on Veterans' Affairs.

EC–2274. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the summary report on the Assessment of Current State Practices in Title XX Funded Day Care Program; to the Committee on Finance.

EC–2275. A communication from the District of Columbia Auditor, transmitting, pursuant to law, a report entitled "Acquisition and Renovation of 1133 North Capitol Street"; to the Committee on Governmental Affairs.

EC–2276. A communication from the Attorney General of the United States, transmitting a draft of proposed legislation to provide for Seabed Boundary Agreements Between the United States and any Coastal State and the Immobilization of the Seabed Boundary of Any State; to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–614. A resolution adopted by the House of Representatives of the Second Northern Marianas Commonwealth Legislature; to the Committee on Appropriations.

"HOUSE RESOLUTION 134

"Whereas, after the cessation of hostilities in the battle of Saipan in World War II, the United States Government won control and dominion over the Northern Mariana Islands; and

"Whereas, pursuant to Chapters XI through XII of the Charter of the United Nations, on July 18, 1947 the United States Government as the Administering Authority of the Northern Mariana Islands accepted a sacred trust to perform the obligations provided by the Trusteeship Agreement for the Former Japanese Mandated Islands; and

"Whereas, Article 6 of such Trusteeship Agreement obligated the United States Government to protect the inhabitants of the Northern Mariana Islands against the loss of their lands and resources; and

"Whereas, during the period from 1944 until 1963, the United States Government took over the lands of approximately 865 inhabitants of the Northern Mariana Islands; and

"Whereas, during such land take-overs, approximately 47 landowners received nothing and approximately 81 landowners received inadequate and inequitable amounts and values in exchange for their lands; and

"Whereas, Amendments V of the United States Constitution, as applied in the Northern Mariana Islands by Section 501 of the Covenant to Establish A Commonwealth of the Northern Mariana Islands in Political Union with the United States of America (U.S. P.L. 94–241), prohibits the taking of private property without just compensation and due process of law; and

"Whereas, it is the sense of the House of Representatives that the failure of the United States Government to provide any compensation to such 47 landowners and the failure to provide adequate and equitable compensation to such 81 landowners is a clear violation of the obligations and responsibilities of the United States Government imposed by the United Nations Charter, such Trusteeship Agreement and Amendment V of the United States Constitution; now, therefore,

"Be it resolved by the House of Representatives, Second Northern Marianas Commonwealth Legislature, Third Special Session, 1981 that the United States Congress is hereby requested to appropriate an adequate and equitable amount to compensate the approximately 128 landowners in the Northern Mariana Islands for the failure of the United States Government to provide adequate compensation for land takings and land exchanges from 1944 until 1963; and

"Be it further resolved that certified copies of this Resolution be transmitted to the President of the United States; the President of the United States Senate; the Speaker of the House of Representatives of the United States Congress; and the Trusteeship Council of the United Nations."

POM–615. A petition from citizens of Texas, relative to regulation and licensing of CB radios; to the Committee on Commerce, Science, and Transportation.

POM–616. A resolution adopted by the City Council of Santa Cruz, California, opposing United States intervention in El Salvador; to the Committee on Foreign Relations.

POM–617. A resolution adopted by the City Council of Oxford, Ohio, favoring a permanent international nuclear weapons ban; to the Committee on Foreign Relations.

POM–618. A petition from a citizen of Los Angeles, California, relative to the "Gay Bill of Rights"; to the Committee on the Judiciary.

POM–619. A petition from a citizen of Washington, D.C., favoring hand gun control; to the Committee on the Judiciary.

POM–620. A petition from a citizen of Daytona Beach, Florida, relative to union violence in America; to the Committee on Labor and Human Resources.

POM–621. A petition from a citizen of Harrisburg, Pennsylvania, relative to union violence in America; to the Committee on Labor and Human Resources.

POM–622. A petition from a citizen of North Attleboro, Massachusetts, relative to union violence in America; to the Committee on Labor and Human Resources.

POM–623. A petition from a citizen of Hawthorne, New Jersey, relative to monopoly bargaining in the Federal service; to the Committee on Labor and Human Resources.

POM–624. A petition from a citizen of Portland, Oregon, relative to monopoly bargaining in the Federal service; to the Committee on Labor and Human Resources.

POM–625. A resolution adopted by the Common Council of the City of Buffalo, New York, relative to the Head Start Program; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations, without amendment:

S. 1611. A bill to amend Public Law 90–553, to authorize the transfer, conveyance, lease, and improvement of, and construction on, certain property in the District of Columbia, for use as a headquarters site for an international organization, as sites for governments of foreign countries, and for other purposes (with minority views) (Rept. No. 97–281).

By Mr. SIMPSON, from the Committee on Environment and Public Works, and on behalf of Mr. McCLURE, from the Committee on Energy and Natural Resources; with amendments:

S. 1662. A bill to establish a limited program for Federal storage of spent fuel from civilian nuclear powerplants, to set forth a Federal policy, initiate a program, and establish a national schedule for the disposal of nuclear waste from civilian activities, and for other purposes (with additional and supplemental views) (Rept. No. 97–282).

By Mr. PERCY, from the Committee on Foreign Relations with amendments:

S. 854. A bill to promote the orderly conduct of international relations by facilitating the operation of foreign missions in the United States, thereby promoting the security and efficient operation of United States missions abroad (Rept. No. 97–283); pursuant to the order of June 4, 1981, referred to the Committee on Governmental Affairs for a period of 45 calendar days, excluding weekends, holidays, and those periods when the Senate is not in session.

By Mr. LAXALT, from the Committee on the Judiciary:

Report to accompany the bill (S. 1080) to amend the Administrative Procedure Act to require Federal agencies to analyze the effects of rules to improve their effectiveness and to decrease their compliance costs; to provide for a periodic review of regulations, and for other purposes (Rept. No. 97–284).

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, without amendment:

S. Res. 249. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 3484.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations; without reservation:

Treaty Doc. Ex. L, 96–2. Reciprocal Fisheries Agreement between the Government of the United States and the Government of the United Kingdom of Great Britain and Northern Ireland, 1979, with its agreed minute, done at London, March 27, 1979 (Ex. Rept. No. 97–37).

Treaty Doc. Ex. X, 96–2. Convention on the Conservation of Antarctic Marine Living Resources adopted at a diplomatic conference held in Canberra, Australia, May 7–20, 1980, and signed on behalf of the United States on September 11, 1980, with a Process-Verbal of Rectification dated March 18, 1981. (Ex. Rept. No. 97–38).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HART (for himself and Mr. KENNEDY):

S. 1892. A bill to prohibit the U.S. Government from importing oil extracted in Libya; to the Committee on Finance.

By Mr. DIXON:

S. 1893 A bill for the relief of Alejo White and Sonia White; to the Committee on the Judiciary.

By Mr. MELCHER:

S. 1894. A bill to permit Indian tribes to enter into certain agreements for the disposition of tribal mineral resources, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. CANNON:

S. 1895. A bill to amend chapter 85 of title 5, United States Code, to revise the unemployment compensation eligibility requirements for former members of the Armed Services; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HART:

S. 1892. A bill to prohibit the U.S. Government from importing oil extracted in Libya; to the Committee on Finance.

OIL IMPORTS FROM LIBYA

● Mr. HART. Mr. President, last month, I proposed an amendment to the foreign assistance bill to ban American imports of Libyan oil. This is a matter of immense moral and political significance for the United States. When we buy Libyan oil, we replenish Colonel Qadhafi's treasuries, allowing the man whom Anwar Sadat called a certified lunatic to embark on more adventurism in the most volatile region of the world today—the Middle East and North Africa. With my amendment, offered with Senators KASSEBAUM, KENNEDY, and several other colleagues, I sought to end this embarrassing spectacle.

Today, I offer a new proposal. It is a more modest one, a bill prohibiting the U.S. Government from purchasing oil extracted in Libya.

The U.S. Government is a major importer of Libyan oil. As of October 31, 1981, the United States had bought over 23 million barrels of Libyan oil for the strategic petroleum reserve (SPR). Ten percent of all SPR oil has been bought from Libya. Only the United Kingdom and Mexico have provided more oil for the SPR than Libya. In sum, the U.S. Government has paid over $660 million for Libyan oil supplies.

Since resuming fill of the SPR in September 1980, the U.S. Government has bought 13 million barrels of Libyan oil. Out of the 32 importers of Libyan oil to the United States in 1981, the U.S. Government ranked fourth in the number of barrels imported—averaging about 30,000 barrels a day in the first 8 months of this year. Only Conoco, Gulf, and Marathon imported more Libyan oil to the United States during this period.

Although the American Government does not negotiate with the Libyan Government for these supplies, it buys from oil traders who do. For Department of Energy purposes, the United States is the importer of record.

To end American support for Colonel Qadhafi, the U.S. Government should look first to its own oil purchases. Earlier this year, when the SPR supply needed light, sweet crudes, Libyan oil was bought in great volumes. At present, the United States is not buying Libyan oil for the SPR and has not since July. But next spring, if there is sufficient

capacity available, DOE again may buy Libyan supplies especially if Qadhafi is still having trouble finding markets for his oil.

Some Senators may question the efficacy of this proposal. They may contend, as they have before, that by prohibiting the import of Libyan oil to the United States we bring greater hardship on ourselves than on the Libyans. Recent events, however, indicate this is not the case.

In the month since I offered my amendment to ban all American imports of Libyan oil, the Exxon Corp. has announced its plans to withdraw from oil and gas operations in Libya. Although Exxon has not detailed the reasons for its action, informed reports suggest the decision was motivated by the high price Libya was charging for its crude and out of concern for the safety of Exxon employees working in Libya. Whatever the reason, the decision by Exxon to withdraw from Libya has demonstrated that the withdrawal of American oil companies and the loss of American markets for Libyan oil will force Qadhafi to reevaluate not only his oil pricing strategy but also Libyan military and terrorist activities.

Since the first of the year, Libyan oil production has fallen from 1.7 million barrels a day to about 700,000 barrels a day. This has drained Qadhafi's purse. Annual Libyan oil revenues have fallen from over $22 billion to less than $10 billion. And because Libya has virtually no wealth apart from oil—little agriculture and no industry—as oil revenues fall, Qadhafi faces some painful choices—basic choices between guns and butter.

Exxon's decision, and reports that Mobil may also withdraw from Libya, clearly concern Qadhafi. Earlier this month in an effort to discourage other American companies from following Exxon's lead, Libya notified the Oasis Group—a consortium of American oil companies extracting Libyan oil—that Libya would cut the average price of its crude for these buyers by more than $1, bringing the price of Libyan oil to about $36 a barrel. This new price makes Libyan crude comparable in price to Nigerian crude—an oil of a comparable quality to Libyan crude.

If the impact of the withdrawal of American oil companies and the loss of American oil markets for Libyan oil was ever in question, recent events should relieve those doubts. Qadhafi depends heavily on American technicians and technology to produce Libyan oil. He depends on American oil companies to market and sell Libyan oil. And he depends on American consumers to purchase some 40 percent of Libyan oil exports.

By prohibiting the U.S. Government from purchasing Libyan oil, supplies that could be easily replaced with oil from other sources like Nigeria and the North Sea, the Congress can show its resolve to end American support for Colonel Qadhafi. It can provide an example for American oil companies and other national governments. And it can restore a sense of integrity to our Government's dealings in international oil markets.●

By Mr. DIXON:

S. 1893. A bill for the relief of Alejo White and Sonia White; to the Committee on the Judiciary.

RELIEF OF ALEJO WHITE AND SONIA WHITE

● Mr. DIXON. Mr. President, I send to the desk special legislation on behalf of two children in Illinois, to permit them to be classified as the son and daughter of Mr. and Mrs. Peter L. White, citizens of the United States, and ask that it be referred to the appropriate committee.

Mr. President, Alejo (note: pronounced A-lay-o) White and his sister, Sonia White, were adopted by Mr. and Mrs. Peter L. White in Argentina in May 1978. Alejo and Sonia's natural parents were close friends of the Whites.

Their natural father died in 1968 and 6 years later the children's mother passed away. Just before the mother died she asked the Whites to adopt her son and daughter as there were no other living relatives in Argentina who could take care of her children. At the time of the natural mother's death Alejo was 13 years old and Sonia was 11 years old. The Whites immediately began the long adoption procedure in Argentina to adopt the children. The Argentinian courts gave final approval to the adoption in 1978. However, because the children were over 14 years of age at the time the adoption was decreed, the Immigration Service declared the two children were not eligible for U.S. citizenship. The children are presently in the United States, Alejo on a student visa attending Rensselaer Polytechnic Institute in Troy, N.Y., and Sonia is on a multiple entry visa waiting to begin college in January.

Mr. President, the gentleman from Massachusetts, Mr. FRANK, has introduced a similar measure in the House.

I urge early consideration and passage of this bill.

Mr. President, I ask unanimous consent to have the bill printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1893

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Alejo White and Sonia White may be classified as children within the meaning of section 101(b)(1)(F) of the Act; upon approval of a petition filed in their behalf by Mr. and Mrs. Peter L. White, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.●

By Mr. MELCHER:

S. 1894. A bill to permit Indian tribes to enter into certain agreements for the disposition of tribal mineral resources, and for other purposes; to the Select Committee on Indian Affairs.

DISPOSITION OF TRIBAL MINERAL RIGHTS

● Mr. MELCHER. Mr. President, I am introducing today a bill that will permit Indian tribes greater flexibility in the development of their mineral resources. Although a number of tribes have vast mineral resources there has been little consideration since the 1938 Indian Mineral Leasing Act was passed to determine business opportunities that fit modern-day practices. That act limits tribes to leasing under long-established competitive-bidding procedures.

As energy development becomes more profitable many tribes are seeking to enter into more lucrative and beneficial agreements with energy development companies. Some have already done so but the Department of the Interior insists that the only statutory authority for disposition of tribal mineral resources is the 1938 act.

My bill will allow tribes to enter into joint venture agreements, operation agreements, joint production agreements, managerial agreements, noncompetitive lease arrangements and similar agreements both for the production and sale of oil, gas, and other mineral resources.

The Secretary of the Interior will be required to continue to exercise his trust responsibility to Indian tribes and to individual Indian owners of minerals held in trust. The bill requires the Secretary to consider a tribe's proposed energy agreement. The Secretary can disapprove if he finds in writing that an agreement is not in the best interest of the tribe. There are review provisions in the bill should the Secretary make a disapproval finding. Further, while the bill permits individual Indian owners of trust minerals to join in agreements with tribes or to make their own agreements, it provides that such agreements are subject to secretarial approval.

The bill leaves the 1938 Indian Mineral Leasing Act in place so that tribes and individual Indian mineral owners may continue to use the longstanding competitive lease procedures if they wish to do so.

The flexibility offered by my bill will, I believe, further promote Indian self-determination for energy development by allowing tribes to be involved in managing the development of their own resources in a number of ways not now possible under existing law.

Long-range economic development, which is so intertwined with the ultimate goal of tribal economic enhancement will be furthered if the tribes are given the latitude they need to seek the best return they can for their mineral resources. In short, this bill permits a tribe or individual Indians with mineral resources under the trust responsibility of the Federal Government to strike a better deal on developing their mineral resources just like any other person seeking to bargain with an energy company.

The prudent oversight responsibility of the Secretary of the Interior will remain, but the bill seeks to add flexibility to that prudent management.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1894

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any Indian tribe may enter into any joint venture agreement, operating agreement, joint production agreement, risk services agreement, managerial agreement, lease (other than a lease approved pursuant to the Act of May 11, 1938), or other agreement approved by the Secretary of the Interior (hereinafter referred to as the "Secretary") for the disposition of oil and gas, geothermal, or other mineral resources of tribal lands, or for the sale of production from operations on tribal lands. Any such agreement shall be for such term and be subject to such conditions as may be prescribed by the Secretary by regulation. The Secretary shall approve any such agreement within one year of submission to him unless the Secretary finds that—

(a) such agreement is not in the best interest of the tribe; and

(b) whenever the Secretary disapproves an agreement pursuant to subsection (a) he shall state his findings in writing within 30 days of making his decision. Upon disapproval of a tribal proposal the tribe shall have an opportunity for Presidential review provided that request for review is filed within 30 days.

SEC. 2. (a) Individual Indians owning trust or restricted minerals within the boundaries of a reservation subject to an agreement entered into pursuant to section 1 of this Act may join in such an agreement with the tribe, subject to the approval of the Secretary of the Interior.

(b) The Secretary at his discretion may approve agreements listed in section 1 for individual Indians owning trust or restricted minerals.

SEC. 3. Agreements of the type described in the first section of this Act for the development of production of oil and gas or other mineral resources of tribal lands approved by the Secretary prior to the date of the enactment of this Act are hereby ratified as of the date of such approval.

SEC. 4. Nothing in this Act shall affect the validity of any lease approved or hereafter approved pursuant to the Act of May 11, 1938 (52 Stat. 347; 25 U.S.C. § 396a *et. seq.*).

SEC. 5. Within 180 days, the Secretary of the Interior shall promulgate rules and regulations to implement the provisions of this Act.●

By Mr. CANNON:

S. 1895. A bill to amend chapter 85 of title 5, United States Code, to revise the unemployment compensation eligibility requirements for former members of the Armed Forces; to the Committee on Finance.

UNEMPLOYMENT COMPENSATION ELIGIBILITY FOR FORMER MEMBERS OF THE ARMED FORCES

● Mr. CANNON. Mr. President, I wish to introduce today a bill to make honorably discharged military members eligible for unemployment compensation.

Public Law 97–35, the Omnibus Budget Reconciliation Act of 1981, changed the unemployment compensation eligibility of honorably discharged military members.

Formerly, they received compensation on the basis that they were unemployed. Now, they are denied because they turned down reenlistment and thereby theoretically turned down a job.

There are many who enlist to discharge what they perceive to be a citizens obligation with no intention of making the military a career. After all, becoming a professional soldier is not everyone's cup of tea, but patriotism should be. Let us not discourage the concept of duty, honor, country.

The Omnibus Reconciliation Act imposed a switch that should not have happened and should make most Members of Congress uncomfortable. It is a good example of what can occur when you use the meat-ax approach in cutting the budget. Obviously this was not a thoroughly thought out, rational judgment. Unquestionably it imposes an inequity which needs correction.

The main defense strength of this Nation has always been in a voluntary armed force. Now in an unprecedented move this has all been changed. My bill aims to correct that oversight, and I urge my colleagues to support this effort.●

ADDITIONAL COSPONSORS

S. 265

At the request of Mr. PERCY, the Senator from Indiana (Mr. QUAYLE), the Senator from Idaho (Mr. SYMMS), the the Senator from Washington (Mr. GORTON), the Senator from New Mexico (Mr. SCHMITT), the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from Iowa (Mr. JEPSEN), and the Senator from New Mexico (Mr. DOMENICI) were added as cosponsors of S. 265, a bill to amend the Congressional Budget Act of 1974 to establish procedures for setting targets and ceilings, in the congressional budget process, for loans and loan guarantees under Federal credit programs.

S. 1182

At the request of Mr. NICKLES, the Senator from Virginia (Mr. HARRY F. BYRD, JR.) was added as a cosponsor of S. 1182, a bill to amend the Longshoremen's and Harbor Workers' Compensation Act to revise the manner of computing the benefits provided under such act, to provide for certification of physicians eligible to provide medical care to workers covered by such act, to provide for an attorney to serve as the representative of the special fund established under such act, to establish a Benefits Review Board the members of which are appointed by the President, to establish an advisory committee to evaluate the manner in which the provisions of the act are carried out, and for other purposes.

S. 1348

At the request of Mr. SASSER, the Senator from Georgia (Mr. MATTINGLY), and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of S. 1348, a bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds.

S. 1637

At the request of Mr. D'AMATO, the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of S. 1637, a bill to establish a Federal annuity program to compensate participants in private pension plans which terminated before July 1, 1974, for nonforfeitable pensions benefits which were lost by reason of the termination, and for other purposes.

S. 1752

At the request of Mr. HEINZ, the Senator from New Hampshire (Mr. RUDMAN) was added as a cosponsor of S. 1752, a bill to amend the Home Owners' Loan Act to increase the lending, investment and operating authority of Federal mutual savings banks.

S. 1881

At the request of Mr. SASSER, the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 1881, a bill to provide for the issuance of a commemorative stamp to honor the dedication of the Vietnam Veterans Memorial.

S. 1892

At the request of Mr. HART, the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 1892, a bill to prohibit the U.S. Government from importing oil extracted in Libya.

SENATE JOINT RESOLUTION 121

At the request of Mr. MITCHELL, the Senator from Indiana (Mr. LUGAR), the Senator from Arizona (Mr. DECONCINI), the Senator from Montana (Mr. BAUCUS), the Senator from Michigan (Mr. RIEGLE), the Senator from Illinois (Mr. DIXON), the Senator from Wisconsin (Mr. KASTEN), the Senator from Massachusetts (Mr. TSONGAS), the Senator from Colorado (Mr. HART), the Senator from Wisconsin (Mr. PROXMIRE), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Vermont (Mr. STAFFORD), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Missouri (Mr. EAGLETON), the Senator from California (Mr. CRANSTON), the Senator from Tennessee (Mr. SASSER), and the Senator from Arkansas (Mr. BUMPERS) were added as cosponsors of Senate Joint Resolution 121, a joint resolution to provide for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle" and the designation of June 20, 1982, as "National Bald Eagle Day."

SENATE JOINT RESOLUTION 130

At the request of Mr. WARNER, the Senator from Wisconsin (Mr. KASTEN), the Senator from New Mexico (Mr. DOMENICI), the Senator from Oregon (Mr. HATFIELD), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Hawaii (Mr. INOUYE), the Senator from Indiana (Mr. LUGAR), and the Senator from Washington (Mr. GORTON) were added as cosponsors of Senate Joint Resolution 130, a joint resolution designating February 22, 1982, the 250th anniversary of the birth of George Washington, a "Day of National Celebration."

SENATE RESOLUTION 209

At the request of Mr. JEPSEN, the Senator from Oklahoma (Mr. BOREN), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Utah (Mr. HATCH), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Washington (Mr. GORTON), the Senator from New Hampshire (Mr. RUDMAN), the Senator from Arkansas (Mr. PRYOR), the Senator from Alaska (Mr. MURKOWSKI), the Senator from South Dakota (Mr. PRESSLER), the Senator from Illinois (Mr.

PERCY), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of Senate Resolution 209, a resolution expressing the sense of the Senate that the President of the United States, the U.S. Senate, and the Senate Committee on Banking, Housing, and Urban Affairs should pay careful deference to the specific provisions of the Federal Reserve Act, requiring broad regional and economic representation on the Board of Governors of the Federal Reserve System, in their consideration of nominees to the Board.

SENATE RESOLUTION 248—COMMENDING THE FIREFIGHTERS OF LYNN, MASS.

Mr. KENNEDY (for himself and Mr. TSONGAS) submitted the following resolution which was considered and agreed to:

S. RES 248

Whereas on Saturday, November 28, 1981, the city of Lynn, Massachusetts suffered one of the worst fires in New England's history;

Whereas approximately 600 firefighters from 95 communities from three New England states battled the fire for two full days;

Whereas thousands of elderly citizens were evacuated from the fire area without loss of life or major injury; therefore be it

Resolved by the U.S. Senate that we join in expressing our deep appreciation to Lynn Mayor Antonio Marino, Lynn Fire Chief, Joe Scanlon and the 600 firefighters who joined in this heroic act of service to the people of Lynn, Massachusetts.

SENATE RESOLUTION 249—ORIGINAL RESOLUTION WAIVING THE BUDGET ACT

Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES 249

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 3484, the George Washington Commemorative Coin Act. Such waiver is necessary to permit consideration of an additional fiscal year 1982 authorization of appropriations for the Department of Treasury to carry out the purposes of H.R. 3484.

Such waiver is necessary as H.R. 3484 was sent to the Senate on May 19, 1981; and therefore was not reported by May 15, 1981, as required by section 402(a) of the Congressional Budget Act of 1974.

● Mr. GARN. Mr. President, last Friday, November 20, 1981, I reported to the floor H.R. 3483 which was unanimously agreed to by the members of the Committee on Banking, Housing and Urban Affairs. To facilitate consideration of this legislation, the attached resolution must be reported by the Banking Committee and then favorably reported by the Budget Committee.●

AMENDMENTS SUBMITTED FOR PRINTING

DEPARTMENT OF DEFENSE APPROPRIATION ACT, 1982

AMENDMENT NO. 638

(Ordered to be printed.)

Mr. LEVIN (for himself, Mr. HOLLINGS, Mr. NUNN, Mr. PRYOR, and Mr. EXON) proposed an amendment to the bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

AMENDMENT NO. 639

(Ordered to be printed and to lie on the table.)

Mr. GLENN submitted an amendment intended to be proposed by him to the bill H.R. 4995, supra.

REGULATORY REFORM ACT

AMENDMENT NO. 640

(Ordered to be printed and lie on the table.)

Mr. LAXALT (for himself, Mr. ROTH, Mr. LEAHY, and Mr. EAGLETON), submitted an amendment intended to be proposed by them to the bill (S. 1080) to amend the Administrative Procedure Act to require Federal agencies to analyze the effects of rules to improve their effectiveness and to decrease their compliance costs; to provide for a periodic review of regulations, and for other purposes.

REGULATORY REFORM

● Mr. LAXALT. Mr. President, today I am introducing for printing an amendment in the nature of a substitute for S. 1080, the "Regulatory Reform Act." This amendment will be proposed by the Senator from Vermont (Mr. LEAHY), the Senator from Delaware (Mr. ROTH), the Senator from Missouri (Mr. EAGLETON), and myself.

S. 1080 was introduced on April 30 of this year, was referred to the Committees on the Judiciary and on Governmental Affairs, and was favorably reported by both of those committees. Though there were some significant differences in the bill as reported by each committee, the vast majority of differences were either technical in nature, or were merely different approaches to reach the same goals.

In order to expedite the legislative process and to refine the issues for debate on the Senate floor, the committees have devoted the last months to working on a consensus version of S. 1080 which would resolve most of the differences between the bill as reported by each committee, leaving only the most significant issues open for further resolution.

The amendment submitted for printing today is the product of this effort to build a consensus. It is this version of S. 1080 which will be the vehicle for further amendment and ultimate floor action. Some matters which were considered in one or another of the committees, but which were not included in this consensus substitute, may be proposed as floor amendments and subject to further debate.

There are three discrete provisions contained in this substitute amendment on which the committees are not in agreement and which will be the subject of further debate. The Judiciary Committee provisions in these areas were removed by the Governmental Affairs Committee during its markup. For that reason, and other parliamentary reasons, it was thought fair and efficient to present these issues for debate and vote by the full Senate by having these unresolved provisions in this substitute amendment. The fact that these provisions are contained in the amendment is not in any way intended to give them preferred standing or to weigh the Senate debate in their favor.

The unresolved provisions are: First, the limited form of judicial review of the agency determination concerning whether a rule will have a $100 million impact, and therefore be a major rule subject to regulatory analysis; second, the provisions of the "Bumpers" judicial review proposal requiring that an agency have substantial support for its factual determinations and prohibiting courts from deferring to agency interpretations of law; and third, the exact language of the provision authorizing the President to establish procedures for agency compliance with the regulatory analysis requirements of the bill.

Mr. President, both committees involved with this legislation held extensive hearings and devoted time and energy to refining and improving this bill. There are many complicated and highly technical aspects involved with this legislation. With this consensus substitute amendment and with the spirit of productive cooperation that has dominated the work on this legislation, I am confident that the fundamental issues needing debate will be clearly and fully presented to the Senate in a way which will allow for their fair and expeditious resolution.

Mr. President, I ask unanimous consent that this substitute amendment and the summary of its provisions be printed in the RECORD. A more detailed explanation of the compromises contained in this substitute amendment will be inserted in the RECORD shortly.

There being no objection, the amendment and summary were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 640

On page 26, beginning on line 21, strike out through line 4 on page 103 and insert in lieu thereof the following: That this Act may be cited as the "Regulatory Reform Act".

DEFINITION OF RULE

SEC. 2. Section 551(4) of title 5, United States Code, is amended by inserting before the semicolon at the end thereof a comma and the following: "except that the term 'rule' does not include agency statements involving a matter relating to public property or contracts or general statements of policy of the Tennessee Valley Authority except where an applicable statute requires notice and hearing pursuant to this chapter or the statement to be made on the record after opportunity for an agency hearing".

RULEMAKING

SEC. 3. Section 553 of title 5, United States Code, is amended to read as follows:

"§ 553. Rulemaking

"(a) This section applies to every rulemaking, according to the provisions thereof, except to the extent that there is involved—

"(1) a matter pertaining to a military or foreign affairs function of the United States;

"(2) a matter relating to the management and personnel practices of an agency;

"(3) an interpretive rule, general statement of policy, or rule of agency organization, procedure, or practice, unless such rule or statement has general applicability and substantially alters or creates rights or obligations of persons outside the agency; or

"(4) a rule relating to the acquisition, management, or disposal by an agency of real or personal property or of services that is promulgated in compliance with criteria and procedures established by the Administrator for Federal Procurement Policy or the Administrator of General Services.

"(b)(1) General notice of proposed rulemaking shall be published in the Federal Register, unless all persons subject thereto are named and either personally served or otherwise have actual notice thereof in accordance with law. Each notice of proposed rulemaking shall include—

"(A) a statement of the time, place, and nature of public rulemaking proceedings;

"(B) a succinct explanation of the need for and specific objectives of the proposed rule;

"(C) an explanation of the specific statutory authority under which the rule is proposed;

"(D) the proposed provisions of the rule;

"(E) a statement that the agency seeks proposals from the public and from State and local governments for alternative methods to accomplish the objectives of the rulemaking that are more effective or less burdensome than the approach used in the proposed rule;

"(F) a description of any data, methodologies, reports, studies, scientific evaluations, or other similar information on which the agency plans to substantially rely in the rule making, including an identification of each author or source of such information and the purposes for which the agency plans to rely on such information; and

"(G) a statement specifying where the file of the rule making proceeding maintained pursuant to subsection (f) of this section may be inspected and how copies of the items in the file may be obtained.

"(2) Except when notice or hearing is required by statute, a final rule may be adopted and may become effective without prior compliance with the provisions of this subsection and subsections (c) and (f) of this section if—

"(A) the agency for good cause finds that providing notice and public procedure thereon before the rule becomes effective is impracticable or contrary to an important public interest;

"(B) the agency publishes the rule in the Federal Register with such finding and a succinct explanation of the reasons therefor; and

"(C) the agency complies with the provisions of this subsection and subsections (c) and (f) of this section to the maximum extent feasible prior to the promulgation of the final rule and fully complies with such provisions as soon as reasonably practicable after the promulgation of the rule.

"(3) Except when notice or hearing is required by statute, this subsection and subsections (c) and (f) of this section do not apply to a rule when the agency for good cause finds that notice and public procedure thereon are unnecessary due to the insignificant impact of the rule and publishes, at the time of publication of the final rule, such finding and a succinct explanation of the reason therefor.

"(4) Whenever the provisions of a final rule that an agency plans to adopt are so different from the provisions of the proposed rule that the original notice of proposed rule making did not fairly apprise the public of the issues ultimately to be resolved in the rule making or of the substance of the rule, the agency shall publish in the Federal Register a notice of the final rule the agency plans to adopt, together with the information relevant to such rule which is required by the applicable provisions of this section and which has not previously been published in the Federal Register. The agency shall allow a reasonable period for comment on such final rule.

"(c)(1) After providing the notice required by this section, the agency shall give interested persons at least sixty days to participate in the rule making through the submission of written data, views, or arguments.

"(2) In order to collect relevant information, and to identify and elicit full and representative public comment on the significant issues of a particular rule making, the agency may use such other procedures as the agency determines are appropriate, including—

"(A) the publication of an advance notice of proposed rule making;

"(B) the provision of notice, in forms which are more direct than notice published in the Federal Register, to persons who would be substantially affected by the proposed rule, but who are unlikely to receive notice of proposed rule making through the Federal Register;

"(C) the provision of opportunities for oral presentation of data, views, information, or rebuttal arguments at informal public hearings, which may be held in the District of Columbia and other locations;

"(D) the provision of summaries, explanatory materials, or other technical information in response to public inquiries concerning the issues involved in the rule making; and

"(E) the adoption or modification of agency procedural rules to reduce the cost or complexity of participation in a rule making.

The decision of the agency to use or not to use such other procedures in a rule making pursuant to this paragraph shall not be subject to judicial review.

"(3)(A) The opportunity for participation in a rule making for a major rule (as defined in section 621(1) of this title) shall include the opportunity for oral presentation of data, views, and information at informal public hearings. Such public hearings—

"(i) may include an opportunity for oral rebuttal or argument where appropriate; and

"(ii) shall include an opportunity for direct and cross-examination of the principal agency employees or other persons who prepared for the agency data on which the agency substantially relied in formulating the rule, and of any other persons who present testimony, documents, or other information at such hearings, where other procedures, such as the convening of public meetings, conferences or panel discussions, or the presentation of staff arguments for comment and rebuttal, are determined to be inadequate for the resolution of significant issues of fact upon which the rule is based.

"(B) No court shall hold unlawful, or set aside an agency rule because of a failure by the agency to use a particular procedure pursuant to subparagraph (A) of this paragraph unless—

"(i) an objection to the failure to use such procedure was presented to the agency in a timely fashion or there are extraordinary circumstances that excuse the failure to present a timely objection; and

"(ii) the court finds that such failure substantially precluded a fair consideration and informed resolution of a central issue of the rule making taken as a whole.

"(4) To ensure an orderly and expeditious proceeding, the agency may establish reasonable procedures to regulate the course of informal public hearings under paragraphs (2) and (3) of this subsection, including the designation of representatives to make oral presentations or engage in direct or cross-examination on behalf of several parties with a common interest in a rule making. Transcripts shall be made of all such public hearings.

"(5) An agency shall publish any final rule it adopts in the Federal Register, together with a concise statement of the basis and purpose of the rule and a statement of when the rule may become effective. The statement of basis and purpose shall include—

"(A) an explanation of the need for, objectives of, and statutory authority for the rule;

"(B) a discussion of any significant issues raised by the comments on the proposed rule, including a description of the reasonable alternatives to the rule proposed by the agency and by interested persons, and the reasons why each such alternative was rejected; and

"(C) an explanation of how the factual conclusions upon which the rule is based are substantially supported in the rule making file maintained pursuant to subsection (f) of this section.

"(6) When rules are required by statute to be made on the record after opportunity for an agency hearing, sections 556 and 557 of this title apply instead of this subsection.

"(d)(1) An agency shall publish the final rule adopted in the Federal Register at least thirty days before the effective date of the rule. An agency may make a rule effective in less than thirty days after publishing the final rule in the Federal Register in the case of a rule that grants or recognizes an exemption or relieves a restriction, or in the case of a rule for which the agency for good cause finds that such a delay in the effective date would be contrary to an important public interest and publishes such finding and an explanation of the reasons therefore, with the final rule.

"(2) In promulgating a final rule, the agency may not substantially rely on any factual or methodological material that was not placed in the rule making file maintained pursuant to subsection (f) of this section in time to afford an adequate opportunity for public comment thereon during the period for public participation in the rule making. Notwithstanding the preceding sentence, an agency may rely on such material—

"(A) if, in the case of material developed by or for the agency, such material was placed in the rule making file promptly upon its completion and, if such material is of central relevance to the rule making, was made available in time for interested persons to have an adequate opportunity to comment thereon;

"(B) if, in the case of material submitted by a person outside the agency, such material was placed in the rule making file promptly upon its receipt by the agency and, if such material is of central relevance to the rule making, the agency provided not less than fifteen days for interested persons to comment thereon in addition to the period for comment provided under paragraph (1) of subsection (c);

"(C) if such material is material of which the agency properly can take official notice; or

"(D) if such material is material referred to in subsection (f)(2) of this section and the agency has complied with the requirements of that subsection.

"(e) Each agency shall give an interested

person the right to petition for the issuance, amendment, or repeal of a rule, for an interpretation regarding the meaning of a rule, and for a variance or exemption from the terms of a rule if the agency may grant such variance or exemption. The agency shall act on such petitions with reasonable promptness. The response of the agency to each such petition shall be in writing accompanied by a statement of reasons.

"(f)(1) The agency shall maintain a file for each rule making proceeding conducted pursuant to this section and shall maintain a current index to such file. The file and the material excluded from the file pursuant to paragraph (2) of this subsection shall constitute the rule making record for purposes of judicial review. Except as provided in paragraph (2) of this subsection, the file shall be made available to the public beginning on the date on which the agency makes an initial publication concerning the rule. The file shall include—

"(A)(i) the notice of proposed rule making and any supplement to or modification or revision of such notice; and

"(ii) any advance notice of proposed rule making;

"(B) copies of all written comments received on the proposed rule;

"(C) a transcript of any public hearing conducted in the rule making;

"(D) copies, or an identification of the place at which copies may be obtained, of all material described by the agency pursuant to subsection (b)(1)(F) of this section and of other factual and methodological material not described by the agency pursuant to such subsection that pertains directly to the rule making and that the agency considered in connection with the rule making, or that was prepared by or for the agency in connection with the rule making; and

"(E) any statement, description, analysis, or any other material that the agency is required to make public in connection with the rule making, including any preliminary or final regulatory analysis issued by the agency pursuant to chapter 6 of this title.

"(2) The file required by paragraph (1) of this subsection need not include any material that need not be made available to the public under section 552 of this title if the agency includes in such file a statement that notes the existence of such material and the basis upon which the material is exempt from public disclosure under such section. The agency may not substantially rely on any such material in formulating a rule unless it makes the substance of such material available for adequate comment by interested persons. The agency may use summaries, aggregations of data, or other appropriate mechanisms so as to protect the confidentiality of such material to the maximum extent possible.

"(g) For a period of one year after the effective date of a final rule issued pursuant to this section, such rule shall not substantially change the requirements of any contract, cooperative agreement, or grant existing on such effective date between a Federal agency and a State or local government. The preceding sentence does not apply to any case in which the agency for good cause finds that a delay in the effect of the rule would be contrary to an important public interest and publishes such finding and an explanation of the reasons therefor, with the final rule.

"(h) Nothing in this section authorizes the use of appropriated funds available to any agency to pay the attorney's fees or other expenses of persons participating or intervening in agency proceedings.".

REGULATORY ACTIVITIES: ANALYSIS; PRIORITIES AND REVIEW; REPORT

SEC. 4. (a) Chapter 6 of title 5, United States Code, is amended by adding at the end thereof the following:

"Subchapter II—Analysis of Agency Proposals

"§ 621. Definitions

"For purposes of this subchapter and subchapters III and IV of this chapter:

"(1) The term 'agency' has the same meaning as in section 551(1) of this title.

"(2) The term 'person' has the same meaning as in section 551(2) of this title.

"(3) The term 'rule' has the same meaning as in section 551(4) of this title, except that such term does not include a rule of particular applicability that approves or prescribes for the future rates, wages, prices, services, or allowances therefor, corporate or financial, structures, reorganizations, mergers or acquisitions, or accounting practices or disclosures bearing on any of the foregoing.

"(4) The term 'major rule' means—

"(A) a rule or a group of closely related rules that the agency, the President, or the officer selected under section 624 of this title reasonably determines is likely to have an annual effect on the economy of $100,000,000 or more in reasonably quantifiable direct and indirect costs; and

"(B) a rule or a group of closely related rules that is otherwise designated a major rule by the agency proposing the rule, or is so designated by the President, or by the officer selected under section 624 of this title, on the ground that the rule is likely to result in—

"(i) a substantial increase in costs or prices for wage earners, consumers, individual industries, nonprofit organizations, Federal, State, or local government agencies, or geographic regions; or

"(ii) significant adverse effects on competition, employment, investment, productivity, innovation, the environment, public health or safety, or the ability of enterprises whose principal places of business are in the United States to compete in domestic or export markets.

For purposes of subparagraph (A) of this paragraph, the term 'rule' does not mean—

"(I) a rule that involves the internal revenue laws of the United States;

"(II) a rule that authorizes the introduction into commerce or recognizes the marketable status of a product, pursuant to sections 408, 409(c), and 706 of the Federal Food, Drug, and Cosmetic Act; or

"(III) a rule exempt from notice and public procedure pursuant to section 553(a) of this ttile.

"(5) The term 'benefit' means the reasonably identifiable significant benefits and beneficial effects, including social and economic benefits and effects, that are expected to result directly or indirectly from implementation of a rule or an alternative to a rule.

"(6) The term 'cost' means the reasonably identifiable significant costs and adverse effects, including social and economic costs and effects, that are expected to result directly or indirectly from implementation of a rule or an alternative to a rule.

"§ 622. Regulatory analysis

"(a) Prior to publishing notice of proposed rule making for any rule, each agency shall determine whether the rule is or is not a major rule within the meaning of section 621(4)(A) of this title and, if it is not, whether it should be designated a major rule under section 621(4)(B) of this title. For the purpose of any such determination or designation, a group of closely related rules shall be considered as one rule. Every notice of proposed rule making shall include a succinct statement and explanation of the agency's determination of whether or not the rule is a major rule within the meaning of section 621(4)(A) of this title and, if applicable, of its designation as a major rule under section 621(4)(B) of this title.

"(b) The President or the officer selected by the President under section 624 of this title may determine that a rule is a major rule within the meaning of section 621(4)(A) of this title or may designate a rule as a major rule under section 621(4)(B) of this title not later than thirty days after the publication of the notice of proposed rule making for that rule. Such determination or designation shall be published in the Federal Register, togther with a succinct statement of the basis for the determination or designation. The President or the officer selected by the President under section 624 of this title may designate not more than 75 rules as major rules under section 621(4)(B) of this title in any fiscal year.

"(c)(1) When the agency publishes a notice of proposed rule making for a major rule, the agency shall issue and place in the rule making file maintained under section 553(f) of this title a preliminary regulatory analysis and shall include in such notice of proposed rule making a summary of the analysis. When the President or the officer selected by the President under section 624 of this title has published a determination or designation that a rule is a major rule after the publication of the notice of proposed rule making for that rule, the agency shall promptly issue and place in the rule making file maintained under section 553(f) of this title a preliminary regulatory analysis for the rule and shall publish in the Federal Register a summary of such analysis. Following the issuance of a preliminary regulatory analysis under the preceding sentence, the agency shall give interested persons an opportunity to comment thereon pursuant to section 553 of this title in the same manner as if the preliminary regulatory analysis had been issued with the notice of proposed rule making.

"(2) Each preliminary regulatory analysis shall contain—

"(A) a succinct description of the benefits of the proposed rule, including any beneficial effects that cannot be quantified, and an explanation of how the agency anticipates each benefit will be achieved by the proposed rule, including a description of the persons, classes of persons, or particular levels of Government likely to receive such benefits;

"(B) a succinct description of the costs of the proposed rule, including any costs that cannot be quantified, and an explanation of how the agency anticipates each such cost will result from the proposed rule, including a description of the persons, classes of persons, or particular levels of Government likely to incur such costs;

"(C) a succinct description of reasonable alternatives for achieving the identified benefits of the proposed rule, including alternatives that—

"(i) require no Government action;

"(ii) will accommodate differences between geographic regions; and

"(iii) employ performance or other standards which permit the greatest flexibility in achieving the identified benefits of the proposed rule;

"(D) in any case in which the proposed rule is based on scientific evaluations or information, a description of action undertaken by the agency to verify the quality, reliability, and relevance of such scientific evaluations or scientific information; and

"(E) where it is not expressly or by necessary implication inconsistent with the provisions of the enabling statute pursuant to which the agency is proposing the rule, an explanation of how the identified benefits of the proposed rule are likely to justify the identified costs of the proposed rule, and an explanation of how the proposed rule is likely to substantially achieve the rule making objectives in a more cost-effective manner than the alternatives to the proposed rule.

"(d)(1) When the agency publishes a final major rule, the agency shall also issue and place in the rule making file maintained

under section 553(f) of this title a final regulatory analysis, and shall include a summary of the analysis in the statement of basis and purpose required by section 553(c)(6) of this title. Notwithstanding the preceding sentence, in any case in which an agency, under section 553(b)(2) of this title, is not required to comply with subsections (b) through (f) of section 553 of this title prior to the adoption of a final rule, an agency is not required to comply with the preceding sentence prior to the adoption of the final rule but shall comply with such sentence when complying with section 553(b)(2)(C) of this title.

"(2) Each final regulatory analysis shall contain—

"(A) a description and comparison of the benefits and costs of the rule and of the reasonable alternatives to the rule described in the rule making; and

"(B) where it is not expressly or by necessary implication inconsistent with the provisions of the enabling statute pursuant to which the agency is acting, a reasonable determination, based upon the rule making file considered as a whole, that the benefits of the rule justify the costs of the rule, and that the rule will substantially achieve the rule making objectives in a more cost-effective manner than the alternatives described in the rule making.

"(e)(1) An agency shall describe the nature and extent of the nonquantifiable benefits and costs of a proposed and a final rule pursuant to this section in as precise and succinct a manner as possible. The description of the benefits and costs of a proposed and a final rule required under this section shall include a quantification or numerical estimate of the quantifiable benefits and costs. Such quantification or numerical estimate shall be made in the most appropriate unit of measurement and shall specify the ranges of predictions and explain the margins of error involved in the quantification methods and in the estimates used.

"(2) In evaluating and comparing costs and benefits, the agency shall not rely on cost or benefit information submitted by any person that is not accompanied by data, analysis, or other supporting materials that would enable the agency and other persons interested in the rule making to assess the accuracy and reliability of such information. The agency evaluations of the relationships of the benefits of a proposed and final rule to its costs required by this section shall be clearly articulated in accordance with the provisions of this section. An agency is not required to make such evaluation primarily on a mathematical or numerical basis.

"(f) The preparation of the preliminary or final regulatory analysis required by this section shall only be performed by an officer or employee of the agency. The provisions of the preceding sentence do not preclude a person outside the agency from gathering data or information to be used by the agency in preparing any such regulatory analysis or from providing an explanation sufficient to permit the agency to analyze such data or information. If any such data or information is gathered or explained by a person outside the agency, the agency shall specifically identify in the preliminary or final regulatory analysis the data or information gathered or explained and the person who gathered or explained it, and shall describe the arrangement by which the information was procured by the agency, including the total amount of funds expended for such procurement.

"§ 623. Judicial review

"(a) Compliance or noncompliance by an agency with the provisions of this subchapter shall not be subject to judicial review except according to the provisions of this section.

"(b) Any determination by the President or by the officer selected under section 624 of this title that a rule is a major rule within the meaning of section 621(4)(A) of this title, and any designation by the President or the officer selected under section 624 of this title that a rule is a major rule under section 621(4)(B) of this title shall not be subject to judicial review in any manner.

"(c) The determination of an agency of whether a rule is or is not a major rule within the meaning of section 621(4)(A) of this title shall be set aside by a reviewing court only upon a clear and convincing showing that the determination is erroneous in light of the information available to the agency at the time it made the determination. Any designation by an agency that a rule is a major rule under section 621(4)(B) of this title shall not be subject to judicial review in any manner.

"(d) Any regulatory analysis prepared under section 622 of this title shall not be subject to judicial consideration separate or apart from review of the rule to which it relates. When an action for judicial review of a rule is instituted, any regulatory analysis for such rule shall constitute part of the whole rule making record of agency action for the purpose of judicial review of the rule and shall, to the extent relevant, be considered by a court in determining the legality of the rule.

"§ 624. Executive oversight

"(a) The President shall have the authority to establish procedures for agency compliance with this subchapter and subchapter III of this chapter. Such procedures shall be adopted after the public has been afforded an opportunity to comment thereon, and shall be consistent with the prompt completion of rule making proceedings. The President shall have the authority to monitor, review, and ensure agency implementation of such procedures. The President shall report annually to the Congress on agency compliance or noncompliance with the requirements of this chapter.

"(b) The President may delegate the authority granted by subsection (a) of this section, in whole or in part, to the Vice President or to an officer within the Executive Office of the President whose appointment has been subject to the advice and consent of the Senate. Notice of any such delegation, or any revocation or modification thereof, shall be published in the Federal Register.

"(c) The exercise by the President or by an officer to whom authority granted under subsection (a) of this section has been delegated pursuant to subsection (b) of this section, or any failure to exercise such authority, shall not be subject to judicial review in any manner under this Act.

"Subchapter III—Regulatory Priorities and Review

"§ 631. Review of agency rules

"(a)(1)(A) Not later than nine months after the effective date of this section, each agency shall prepare and publish in the Federal Register a proposed schedule for the review, in accordance with this section, of—

"(i) each rule of the agency which is in effect on such effective date and which, if adopted on such effective date, would be a major rule under section 621(4)(A) of this title, and

"(ii) each rule of the agency in effect on such effective date (in addition to the rules described in clause (i)) which the agency has selected for review.

"(B) Each proposed schedule required by subparagraph (A) shall include—

"(i) a brief explanation of the reasons the agency considers each rule on the schedule to be such a major rule under section 621(a)(4)(A) of this title or of the reasons why the agency selected the rule for review;

"(ii) a date set by the agency, in accordance with the provisions of subsection (b)(1) of this section, for the completion of the review of each such rule; and

"(iii) a statement that the agency requests comments from the public on the proposed rule.

"(C) The agency shall set a date to initiate review of each rule on the schedule in a manner which will ensure the simultaneous review of related items and which will achieve a reasonable distribution of reviews over the period of time covered by the schedule.

"(2) At least ninety days before publishing in the Federal Register the proposed schedule required under paragraph (1), each agency shall make the proposed schedule available to the President or an officer in the Executive Office of the President designated by the President whose appointment has been subject to the advice and consent of the Senate. The President or that officer may select for review in accordance with this section any additional rule that the President or such officer determines to be a major rule under section 621(4)(A) of this title.

"(3) Not later than one year after the effective date of this section, each agency shall publish in the Federal Register a final schedule for the review of the rules referred to in paragraphs (1) and (2) of this subsection. Each agency shall publish with the final schedule the response of the agency to comments received concerning the proposed schedule.

"(b)(1) Except where explicitly provided otherwise by statute, the agency shall, pursuant to subsections (c) through (e) of this section, review:

"(A) each rule on the schedule promulgated pursuant to subsection (a) of this section;

"(B) each major rule under section 621(4) of this title promulgated, amended, or otherwise renewed by an agency after the date of the enactment of this section; and

"(C) each rule promulgated after the date of enactment of this section which the President or the officer designated by the President pursuant to subsection (a)(2) of this section determines to be a major rule under section 621(4)(A) of this title.

Except where an extension has been granted pursuant to subsection (f) of this section, the review of a rule required by this section shall be completed within ten years after the effective date on which the rule is adopted, amended, or renewed, whichever is later.

"(2) If, at the time an agency intends to review a rule required to be reviewed under subparagraph (B) or (C) of paragraph (1), an agency determines that such rule would not be a major rule under section 621(4) of this title if such rule were adopted at that time, the agency need not review such rule pursuant to this section. When the agency makes such a determination, it shall publish a notice and explanation of the determination in the Federal Register.

"(c) An agency shall publish in the Federal Register a notice of its proposed action under this section with respect to a rule being reviewed. The notice shall include—

"(1) an identification of the specific statutory authority under which the rule was promulgated and a statement specifying the agency's determination of whether the rule continues to fulfill the intent of Congress in enacting that authority;

"(2) an assessment of the benefits and costs of the rule during the period in which it has been in effect;

"(3) an explanation of the proposed agency action with respect to the rule; and

"(4) a statement that the agency seeks proposals from the public for modifications or alternatives to the rule which may accomplish the objectives of the rule in a more effective or less burdensome manner.

"(d) If an agency proposes to repeal or amend a rule under review pursuant to this section, the agency shall, after issuing the notice required by subsection (c) of this section, comply with the provisions of this chapter and chapter 5 of this title or other

applicable law. The requirements of such provisions and related requirements of law shall apply to the same extent and in the same manner as in the case of a proposed agency action to repeal or amend a rule which is not taken pursuant to the review required by this section.

"(e) If an agency proposes to renew without amendment a rule under review pursuant to this section, the agency shall—

"(1) give interested persons not less than sixty days after the publication of the notice required by subsection (c) of this section to comment on the proposed renewal; and

"(2) publish in the Federal Register notice of the renewal of such rule and an explanation of the continued need for the rule, and, if the renewed rule is a major rule under section 621(4) of this title, include with such notice an explanation of the reasonable determination of the agency that the rule complies with the provisions of section 622(d)(2)(B) of this title.

"(f)(1) Any agency, which for good cause finds compliance with this section with respect to a particular rule to be impracticable during the period provided in subsection (b) of this section, may request the President, or the officer designated by the President pursuant to subsection (a)(2) of this section, to establish a period longer than ten years for the completion of the review of such rule. The President or that officer may extend the period for review of a rule to a total period of not more than fifteen years. Such extension shall be published in the Federal Register with an explanation of the reasons therefor.

"(2) An agency may, with the concurrence of the President or the officer designated by the President pursuant to subsection (a)(2) of this section, or shall, at the direction of the President or that officer, amend any schedule required by this section for the review of rules if such amendment is published in the Federal Register.

"(g) In any case in which an agency has not completed the review of a rule within the period prescribed by subsection (b) or (f) of this section, the agency shall immediately publish in the Federal Register a notice proposing to amend, repeal, or renew the rule under subsection (c) of this section, and shall complete proceedings pursuant to subsection (d) or (e) of this section within one hundred and eighty days of the date on which the review was required to be completed under subsection (b) or (f) of this section.

"(h)(1) Agency compliance or noncompliance with the provisions of subsection (a) of this section shall not be subject to judicial review in any manner.

"(2) Agency compliance or noncompliance with the provisions of subsections (b), (c), (e), (f), and (g) of this section shall be subject to judicial review only pursuant to section 706(a)(1) of this title.

"(i) Nothing in this section shall relieve any agency from its obligation to respond to a petition to issue, amend, or repeal a rule, for an interpretation regarding the meaning of a rule, for a variance or exemption from the terms of a rule, submitted pursuant to section 553(e) of this title.

"§ 632. Regulatory agenda and calendar

"(a) Each agency shall publish in the Federal Register in April and October of each year an agenda of the rules that the agency expects to propose, promulgate, renew, or repeal in the succeeding twelve months. For each such rule, the agenda shall contain, at a minimum, and in addition to any other information required by law—

"(1) a general description of the rule, including a citation to the authority under which the action with respect to the rule is to be taken, or a specific explanation of the congressional intent to which the objectives of the rule respond;

"(2) a statement of whether or not the rule is or is expected to be a major rule;

"(3) an approximate schedule of the significant dates on which the agency will take action relating to the rule, including the dates for any notice of proposed rule making, hearing, and final action on the rule;

"(4) the name, address, and telephone number of an agency official responsible for answering questions from the public concerning the rule;

"(5) a statement specifying whether each rule listed on the previous agenda has been published as a proposed rule, has been published as a final rule, has become effective, has been repealed, or is pending in some other status; and

"(6) a cumulative summary of the status of the rules listed on the previous agenda in accordance with clause (5) of this subsection.

"(b) The President or an officer in the Executive Office of the President whose appointment has been subject to the advice and consent of the Senate shall publish in the Federal Register in May and November of each year a Calendar of Federal Regulations listing each of the major rules identified in the regulatory agendas published by agencies in the preceding month. Each rule listed in the calendar shall be accompanied by a summary of the information relating to the rule that appeared in the most recent regulatory agenda in which the rule was identified.

"(c) An agency may propose or promulgate a major rule that was not listed in the regulatory agenda required by subsection (a) of this section only if the agency publishes with the rule an explanation of the omission of the rule from such agenda and otherwise complies with this section with respect to that rule.

"(d) Any compliance or noncompliance by the agency with the provisions of this section shall not be subject to judicial review.

"§ 633. Establishment of deadlines

"(a)(1) Whenever any agency publishes a notice of proposed rule making pursuant to section 553 of this title, the agency shall include in such notice an announcement of the date by which it intends to complete final agency action on the rule.

"(2) If any agency announcement under this section indicates that the proceeding relating to such rule will require more than one year to complete, the agency shall also indicate in the announcement the date by which the agency intends to complete each major portion of that proceeding. In carrying out the requirements of this subsection, the agency shall select dates for completing agency action which will assure the most expeditious consideration of the rule which is possible, consistent with the interests of fairness and other agency priorities.

"(3) The requirements of this subsection shall not apply to any rule on which the agency intends to complete action within one hundred and twenty days after providing notice of the proposed action.

"(b) If an agency fails to complete action in a proceeding, or a major portion of the proceeding, by the date announced pursuant to subsection (a) of this section, or, in the case of a proceeding described in paragraph (3) of such subsection, if an agency fails to complete action within one hundred and twenty days after providing notice of such proposed action, and the expected delay in completing action will exceed thirty days, the agency shall promptly announce the new date by which the agency intends to complete action in such proceeding and new dates by which the agency intends to complete action on each major portion of the proceeding.

"(c) Compliance or noncompliance by an agency with the provisions of this section shall not be subject to judicial review except in accordance with subsection (d).

"(d) In determining whether to compel agency action unreasonably delayed pursuant to section 706(a)(1) of this title, the reviewing court shall consider, in addition to any other relevant factors, the extent to which the agency has failed to comply with this section.

"Subchapter IV—Report to the Congress

"§ 641. Annual report

"Not later than January 31 of each year, the President shall report to the Congress on the regulatory activities of the Government. The report shall include—

"(1) a description of the regulatory functions and activities of the Government, and the relationship of such functions and activities to national needs; and

"(2) an estimate, for the national economy and for each of the major sectors of the national economy, of the costs and benefits resulting from—

"(A) all major rules promulgated during the preceding fiscal year;

"(B) all major rules included on the regulatory agenda published under section 632 of this title during April and October of the year preceding the year in which the report is made; and

"(C) all major rules scheduled for review under section 631 of this title to the extent possible.".

(b) Such chapter is further amended—

(1) by inserting after the chapter analysis the following new subchapter heading:

"Subchapter I—Regulatory Flexibility";

and

(2) by striking out "this chapter" each place it appears in subchapter I and inserting in lieu thereof in each such place "this subchapter".

(c) The chapter analysis of such chapter is amended—

(1) by inserting after the chapter heading the following new subchapter heading:

"Subchapter I—Regulatory Flexibility";

and

(2) by adding at the end thereof the following:

"Subchapter II—Analysis of Agency Proposals

"Sec.
"621. Definitions.
"622. Regulatory analysis.
"623. Judicial review.
"624. Executive oversight.

"Subchapter III—Regulatory Priorities and Review

"631. Review of agency rules.
"632. Regulatory agenda and calendar.
"633. Establishment of deadlines.

"Subchapter IV—Report to the Congress

"641. Annual report.".

JUDICIAL REVIEW

SEC. 5. Section 706 of title 5, United States Code, is amended to read as follows:

"§ 706. Scope of review

"(a) To the extent necessary to decision and when presented, the reviewing court shall independently decide all relevant questions of law, interpret constitutional and statutory provisions, and determine the meaning or applicability of the terms of an agency action. The reviewing court shall—

"(1) compel agency action unlawfully withheld or unreasonably delayed; and

"(2) hold unlawful and set aside agency action, findings, and conclusions found to be—

"(A) arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law;

"(B) contrary to constitutional right, power, privilege, or immunity;

"(C) in excess of statutory jurisdiction, authority, or limitations, or short of statutory right;

"(D) without observance of procedure required by law;

"(E) unsupported by substantial evidence in a proceeding subject to sections 556 and 557 of this title or otherwise reviewed on the record of an agency hearing provided by statute;

"(F) without substantial support in the rule making file, viewed as a whole, for the asserted or necessary factual basis, as distinguished from the policy or legal basis, of a rule adopted in a proceeding subject to section 553 of this title; or

"(G) unwarranted by the facts to the extent that the facts are subject to trial de novo by the reviewing court

"(b) In making the foregoing determinations, the court shall review the whole record or those parts of it cited by a party, and due account shall be taken of the rule of prejudicial error.

"(c) In making determinations concerning statutory jurisdiction or authority under subsection (a)(2)(C) of this section, the court shall require that action by the agency is within the scope of the agency jurisdiction or authority on the basis of the language of the statute or, in the event of ambiguity, other evidence of ascertainable legislative intent. In making determinations on other questions of law, the court shall not accord any presumption in favor of or against agency action.".

VENUE

SEC. 6. (a) Section 2112 of title 28, United States Code, is amended—

(1) by striking out the last three sentences of subsection (a);

(2) by redesignating subsections (b) and (c) as subsections (c) and (d), respectively; and

(3) by inserting the following new subsection:

"(b)(1) If proceedings have been instituted in two or more courts of appeals with respect to the same agency action and the first such proceeding was instituted more than five days before the second, the record shall be filed in that court in which the proceeding was first instituted. If the first such proceeding was not instituted more than five days before the institution of a later proceeding with respect to the same agency action, and the agency, board, commission, or officer concerned has received written notice from the parties instituting each of these proceedings, the agency, board, commission, or officer concerned shall promptly advise in writing the Administrative Office of the United States Courts, with respect to the first proceeding and all proceedings initiated within five days of the first proceeding, that such multiple proceedings have been instituted and shall identify each court for which it has notice that such proceedings are pending. Pursuant to a system of random selection devised for this purpose, the Administrative Office thereupon shall select the court in which the record shall be filed from among those identified by the agency. Upon notification of such selection, the agency, board, commission, or officer concerned shall promptly file the record in such court. For the purpose of review of agency action which has previously been remanded to the agency, board, commission, or officer concerned, the record shall be filed in the court of appeals which remanded such order.

"(2) Where proceedings have been instituted in two or more courts of appeals with respect to the same agency action and the record has been filed in one of such courts pursuant to paragraph (1), the other courts in which such proceedings are pending shall promptly transfer such proceedings to the court of appeals in which the record has been filed. Pending selection of a court pursuant to subsection (1), any court in which a proceeding has been instituted may postpone the effective date of the agency action until fifteen days after the Administrative Office has selected the court in which the record shall be filed. Such postponement by the court may thereafter be modified, revoked, or extended by the court in which the record is to be filed.

"(3) Any court in which a proceeding with respect to any agency action is pending, including any court selected pursuant to paragraph (1), may transfer such proceeding to any other court of appeals for the convenience of the parties or otherwise in the interest of justice.".

(b) Section 604(a) of title 28, United States Code is amended—

(1) by redesignating paragraphs (17) and (18) as paragraphs (18) and (19), respectively, and

(2) by inserting after paragraph (16) the following new paragraph:

"(17) Pursuant to section 2112 of this title, where proceedings with respect to action of any agency, board, commission, or officer have been instituted in two or more courts of appeals, administer a system of random selection to determine the appropriate court in which the record is to be filed.".

ADVISORY COMMITTEE

SEC. 7. Clause (iii) of section 3(2)(C) of the Federal Advisory Committee Act is amended to read as follows: "(iii) any committee which is composed wholly of full-time officers or employees of the Federal Government, or officials of State or local governments acting in their official capacities".

PRESIDENTIAL AUTHORITY

SEC. 8. Nothing in this Act (1) limits the exercise by the President of the authority and responsibility that he otherwise possesses under the Constitution and other laws of the United States with respect to regulatory policies, procedures, and programs of departments, agencies, and offices, or (2) alters in any manner rulemaking authority vested by law in an agency to initiate or complete a rulemaking proceeding, or to issue, modify, or rescind a rule.

CONFORMING AMENDMENTS

SEC. 9. (a) Section 33(c) of the Federal Energy Administration Act of 1974 (15 U.S.C. 789(c)) is amended by striking out "(without regard to subsection (a)(2) thereof)" and inserting in lieu thereof "(without regard to clauses (2) and (4) of subsection (a) of such section)".

(b)(1) Section 3(e)(1) of the Federal Hazardous Substances Labeling Act (15 U.S.C. 1262(e)(1)) is amended by striking out "(other than clause (B) of the last sentence of subsection (b) of such section)" and inserting in lieu thereof "(other than paragraphs (2)(A) and (3) of subsection (b) of such section)".

(2) Section 3(a)(3)(C) of such Act (15 U.S.C. 1262(e)(3)(C) is amended by inserting "(a)" after "section 706".

(c)(1) Section 5(3) of the Poison Prevention Packaging Act of 1970 (15 U.S.C. 1474(a)) is amended by striking out "(other than paragraph (3)(B) of the last sentence of subsection (b) of such section)" and inserting in lieu thereof "(other than paragraphs (2)(A) and (3) of subsection (b) of such section)".

(2) Section 5(b)(3) of such Act (15 U.S.C. 1474(b)(3)) is amended by inserting "(a)" after "section 706".

(d) Section 19(c)(1)(B)(iii)(II) of the Toxic Substances Control Act (15 U.S.C. 2618(c)(1)(B)(iii)(III)) is amended by striking out "section 553(c)" and inserting in lieu thereof "section 553(c)(6)".

(e) Section 4218(b) of title 18, United States Code, is amended—

(1) by striking out "section 553(b)(3)(A)" and inserting in lieu thereof "section 553(a)(3)"; and

(2) by striking out "statements" and inserting in lieu thereof "statement".

(f) Section 409 of the General Education Provisions Act (20 U.S.C. 1221e-4) is amended by striking out "exception provided under section 553(b)" and inserting in lieu thereof "exceptions provided under subsection (a)(3) and paragraphs (2)(A) and (3) of subsection (b) of section 553"

(g)(1) Section 508 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 358) is amended—

(A) by striking out "section 4 of the Administrative Procedure Act (5 U.S.C. 1003)" in subsection (c) and inserting in lieu thereof "section 553"; and

(B) by striking out "section 4 of the Administrative Procedure Act (5 U.S.C. 1003)" in subsection (e) and inserting in lieu thereof "section 553".

(2) Section 514(e)(4) of such Act (21 U.S.C. 360d(e)(4)) is amended by striking out "subsection (b)(A)" and inserting in lieu thereof "subsection (a)(3)".

(h) Section 426(a) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 936(a)) is amended by striking out "subsection (a) thereof" and inserting in lieu thereof "subsection (a) (1), (2), and (4) of such section".

(i) Section 5(a) of the Deepwater Port Act of 1974 (33 U.S.C. 1504(a)) is amended by striking out "without regard to subsection (a) thereof" and inserting in lieu thereof "without regard to clauses (1), (2), and (4) of subsection (a) of such section".

(j) Section 10(a) of the Act of June 30, 1936 (49 Stat. 2036, as amended; 41 U.S.C. 43a(a)) is amended by striking out "section 4 of the Administrative Procedure Act, such Act" and inserting in lieu thereof "section 553 of title 5, United States Code, the provisions of chapters 5, 6, and 7 of such title".

(k) Section 2(a)(2) of the Act of June 25, 1936 (52 Stat. 1196; 41 U.S.C. 47(a)(2)) is amended by striking out "subsections (b), (c), (d), and (e) of section 553 of title 5, United States Code," and inserting in lieu thereof "section 553 of title 5, United States Code (without regard to clauses (1), (2), and (4) of subsection (a) of such section)".

(l) Section 170A(c) of the Atomic Energy Act of 1954 (42 U.S.C. 2210a(c)) is amended by striking out "(without regard to subsection (a)(2) thereof)" and inserting in lieu thereof "(without regard to clauses (2) and (4) of subsection (a) of such section)".

(m) Section 6(c)(2) of the Noise Control Act of 1972 (42 U.S.C. 4905(c)(2)) is amended by striking out "the first sentence of".

(n) Section 501(b)(3) of the Department of Energy Organization Act (42 U.S.C. 7191(b)(3)) is amended by striking out "subsection (a)(2) of such section with respect to public property, loans, grants, or contracts" and inserting in lieu thereof "subsection (a)(4) of such section".

(o) Section 307(d) of the Clean Air Act (42 U.S.C. 7607(d)) is amended by striking out "subparagraphs (A) or (B) of subsection 553(b)" in paragraph (1)(N) and inserting in lieu thereof "subsection (a)(3) and paragraphs (2)(A) and (3) of subsection (b) of section 553".

(p) Section 102(a) of the Ocean Thermal Energy Conversion Act of 1980 (42 U.S.C. 9112(a)) is amended by striking out "without regard to subsection (a) thereof" and inserting in lieu thereof "without regard to clauses (1), (2), and (4) of subsection (a) of such section".

(q) Section 310 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1740) is amended by striking out "section 553(a)(2)" and inserting in lieu thereof "clauses (2) and (4) of section 553(a)".

EFFECTIVE DATE

SEC. 10. (a) Sections 2, 3, 5, and 9 of this Act, and the provision of section 4 of this Act adding a new subchapter II of chapter 6

of title 5, United States Code, shall take effect on January 1, 1983, and shall not apply to any proceeding for which a notice of proposed rulemaking was issued before such effective date or to any other agency action initiated before such effective date.

(b) The provisions of section 4 of this Act adding a new subchapter III to chapter 6 of title 5, United States Code, shall take effect six months after the date of enactment of this Act and shall apply according to the provisions thereof.

(c) Section 6 of this Act shall take effect three months after the date of enactment of this Act and shall apply, according to the provisions thereof, to review proceedings instituted after such date.

(d) The provision of section 4 of this Act adding a new subchapter IV of chapter 6, United States Code, and sections 7 and 8 of this Act shall take effect immediately upon enactment.

SUMMARY OF THE REGULATORY REFORM ACT

(Consensus substitute amendment)

INTRODUCTION

The "Regulatory Reform Act," S. 1080, contains a series of amendments to certain provisions of the Administrative Procedure Act. This legislation is not intended to be a comprehensive "regulatory reform" bill, but is focused on the procedures for rule making and for judicial review of agency actions. It is expected that legislation addressing such areas as agency adjudication, agency subpoena power, and the role of administrative law judges will be developed for future consideration.

THE CONSENSUS SUBSTITUTE

S. 1080 was introduced on April 30 of this year and referred to the Committees on the Judiciary and Governmental Affairs. Both Committees held hearings and made significant improvements in the bill as introduced. Both Committees favorably reported the bill, and, though there were some significant differences in the bill as reported by each Committee, the vast majority of those differences were either technical in nature or merely different approaches to reach the same goals. The Committees have devoted the last months to working on a consensus substitute for the versions reported by the Committees which resolves most of these differences, leaving only the most significant issues open for further resolution.

The consensus version of S. 1080 summarized here will be offered as a substitute amendment by Senators Laxalt, Leahy, Roth, and Eagleton and will become the vehicle for further floor action. Some provisions which have not been agreed upon are contained in this substitute for purposes of presenting the involved issue for floor debate. Those unresolved provisions will be noted in this summary. Other matters considered by one or both of the Committees which are not contained in the consensus substitute may be proposed as floor amendments. These matters are not summarized here.

OVERVIEW

In brief, the major changes to the A.P.A. proposed in this bill—

Require agencies to evaluate on a nonmathematical basis the trade-offs of "major rules" and to determine that such rules are worth their costs and are cost-effective;

Allow oral presentations in major rule making, including cross-examination where needed to resolve central factual issues;

Require agencies to review major rules every ten years to determine if they should be revised or withdrawn;

[Require agency factual determinations in rule making to be based on substantial support in the record,] require that agency actions be within the agency's statutory jurisdiction, and [prohibits the courts from presuming that agency interpretations of law are valid;] (Bracketed provisions are contained in this substitute, but were deleted by the Governmental Affairs Committee.)

Authorizes the President, or his designee, to establish, and ensure implementation of, procedures for the agency evaluation of the trade-offs of major rules; (Provisions insulating "independent" agencies from this Presidential oversight added by the Governmental Affairs Committee are not contained in this substitute.)

Address the "race-to-the-courthouse" problem in review of agency action by assigning a case randomly where review proceedings have been instituted in different courts within five days of each other; and

Require agencies to publish a semi-annual agenda and calendar of regulatory actions.

SUMMARY

Rule making provisions

Sections 2 and 3 of the bill amend the definitions and the "informal rule making" provisions of the A.P.A. (5 U.S.C. §§ 551, 553). The major amendments are:

In the notice of proposed rule making an agency must include:

A statement of the objectives of the rule,

A description of the legal authority for the rule and the substantive material on which the rule is based, and

A solicitation of proposals for alternatives to the rule.

Interested persons are given sixty days to submit written comments on the proposed rule.

For a normal rule making, an agency is authorized to use additional procedures to enhance public comment. A list of some alternative procedures is included. An agency choice of such procedures is not subject to judicial review.

For a major rule making, interested persons are given an opportunity to make oral presentations, including cross-examination if other procedures are inadequate to resolve a material issue of fact. Judicial review of the choice of procedure is limited to cases where an objection to the procedure used was made and where the failure to use a particular procedure precluded a "fair consideration and informed resolution of a central issue" of the rule making.

In promulgating the final rule, the "statement of basis and purpose" must include:

An explanation of the objectives of the rule;

A description of significant issues raised, including alternatives considered and the reasons for their rejection; and

An explanation of the agency's factual conclusions.

An agency must give interested persons an opportunity to comment on factual or methodological material developed by or for the agency which becomes available after the normal public comment period if the material is of "central relevance" to the rule making. If such material is submitted by a person outside of the agency, not less than an additional fifteen days for public comment must be provided.

A file of the rule making, which is the record for review, must be maintained. The file includes the notice of proposed rule making, the statement of basis and purpose, all written comments on the rule, and other documents of the rule making.

Regulatory analysis

The first part of section 4 of the bill adds a new subchapter II to chapter 6 of title 5 of the U.S. Code. The major provisions are:

Only "major rules" are subjected to regulatory analysis. A "major rule" is:

A rule that the agency, or the President, determines is likely to have an effect on the economy of $100 million or more in reasonably quantifiable direct and indirect costs; or

A rule designated as major by the agency, or the President, because it will cause a substantial increase in costs or prices for wage earners, consumers, individual industries, etc., or because it will have an adverse effect on competition, employment, public health, etc.

"Benefit" and "cost" are defined to mean significant benefits and costs, including direct and indirect social and economic benefits and costs.

The preliminary regulatory analysis, published with the notice of proposed rulemaking, must include:

A description of the quantifiable and nonquantifiable benefits and costs of the proposed major rule;

A description of alternatives to the rule; and

Where it is not expressly or by necessary implication inconsistent with the provisions of the enabling statute pursuant to which the agency is acting, an explanation of how the agency expects the benefits of the rule to justify its costs and why the rule is more cost-effective than the alternatives.

(Agency evaluations of the effects of a major rule are explicitly not required to be done mathematically.)

The final regulatory analysis, published with the final rule includes:

A description and comparison of the benefits and costs of the rule; and

Where it is not expressly or by necessary implication inconsistent with the provisions of the enabling statute pursuant to which the agency is acting, the agency's determination that the benefits of the rule justify its costs, and that the rule is more cost-effective than the alternatives considered.

The regulatory analysis cannot be contracted outside of the agency. However, the gathering and explanation of raw data to be used in the regulatory analysis can be contracted if the source is identified. (The Governmental Affairs Committee adopted a more limited version of this provision.)

Judicial review of the determination of what is a major rule and of the regulatory analysis is limited:

Regarding the major rule determination, only the agency's determination of whether a rule will have a $100 million impact may be set aside by a court if a "clear and convincing showing" is made that the determination was erroneous. (The Governmental Affairs Committee deleted this provision.)

The regulatory analysis is not subject to separate judicial review, but is a part of the rulemaking record.

No interlocutory review is allowed.

Executive oversight

In order to ensure some oversight of agency performance of regulatory analysis in the face of limited judicial review, section 4 gives the President a limited oversight role in this area:

The President is authorized to establish procedures for agency compliance with the regulatory analysis requirements. He can ensure agency implementation of these procedures.

The President may delegate this authority to the Vice President or to an officer in the Executive Office of the President confirmed by the Senate.

The President's exercise of this authority is not subject to judicial review.

(The Governmental Affairs Committee added amendments limiting Presidential review of the regulatory analyses of "independent" agencies to 120 days, and making any oversight procedures "advisory" with respect to such agencies.)

Regulatory priorities and review

The second part of section 4 of the bill adds a new subchapter III to chapter 6 of title 5 of the U.S. Code, requiring agencies to review major rules every ten years, to publish an agenda and calendar of expected regulatory

actions, and to establish deadlines for the completion of such action.

The major features of the regulatory review provisions are:

One year after the effective date of this section, each agency must publish a schedule for review of existing major rules within a ten-year period.

New major rules must be reviewed within ten years of their effective date. Amended major rules and major rules which have been reviewed must be reviewed ten years after their amendment or review.

The review is initiated by a notice which explains the proposed agency action, assesses the effects of the rule while it was in operation, determines if the rule is still a major rule, and invites suggestions for improvements in the rule.

Pursuant to the review, the agency amends, repeals, or renews the rule.

If the agency plans to amend or repeal the rule, the normal rule making procedures apply (5 U.S.C. § 553).

If the agency plans to renew the rule without change, it must allow sixty days for public comment and publish the renewed rule with a determination that the rule continues to comply with the rule making provisions.

If it is impracticable for the agency to review a rule within ten years, the President or his designee may grant an extension for up to an additional five years.

If an agency fails to review a rule within the prescribed period, it must immediately publish a notice proposing to withdraw or renew the rule and complete rule making proceedings within 180 days.

The major features of the regulatory agenda and calendar provisions are:

Each agency must publish an agenda in April and October of rules that the agency will be acting on during the following twelve months.

In May and November, the President or his designee must publish a calendar of major rules on which agencies will be acting in the following twelve months.

An agency may propose a major rule that was not included in an agenda if it publishes an explanation for the ommission.

The provisions of this section are not subject to judicial review.

The major features of the provisions for agency deadlines are:

For a rule making expected to take longer than four months, an agency must set a date in the notice of proposed rule making by which it expects to complete action on the rule, including, where the rule making will take longer than a year, dates by which each major part of the rule making will be completed.

If an agency fails to complete action by the date set, it must set a new deadline.

No judicial review of agency compliance with these provisions is allowed, except that a reviewing court is directed to consider a failure to meet deadlines in determining whether to compel delayed agency action.

Report to Congress

The last part of section 4 of the bill adds a new requirement for an annual report from the President on the regulatory activities of the government. The report includes a description of the relationship of the various regulatory activities to national needs, and an estimate, for each major sector of the economy, of regulatory benefits and costs.

Judicial review provisions

Section 5 makes three major changes in the A.P.A. provision outlining the scope of judicial review of agency actions (the "Bumpers" proposal). They are:

[Agency factual determinations made during informal rule making must have substantial support in the rule making record.]

A court must require agency action to be within their statutory authority.

[A court is prohibited from presuming that agency interpretations of law are valid. No burden of proof is shifted.]

(Bracketed provisions are contained in this substitute, but were deleted by the Governmental Affairs Committee.)

Venue ("Race-to-the-courthouse") provisions

Section 6 of the bill amends the venue provisions of the U.S. Code to deal with the so-called "race-to-the-courthouse" problem. Title 28 U.S.C. § 2112 provides that when proceedings to review an agency order have been filed in two or more courts of appeals, the agency must file the record for review in the court where such proceedings were first filed. Though the filing of the record is not legally determinative of where venue lies, as a practical matter proceedings are rarely transferred from the court where the record has been filed.

Thus, parties often "race" to file a review proceeding in what they consider to be a favorable court. This bill essentially adopts a proposal of the Administrative Conference of the U.S. to randomly select a court when review proceedings have been instituted in two or more courts of appeals within five days of each other.

Federal Advisory Committee Act amendment

Section 7 of the bill amends the Federal Advisory Committee Act to ensure that officials of State and local governments will be able to advise agency officials about the impact of proposed federal rules on those levels of government.

Presidential authority—"savings clause"

Section 8 of the bill sets out what the "Executive Oversight" provisions of this bill do not do:

S. 1080's provision for Executive Oversight does not limit either the President's inherent, Constitutional authority or his authority under other laws concerning regulatory policies and activities.

This provision also does not displace whatever person or entity might be the ultimate decisionmaker in a rule making under other provisions of law. As under current law, an agency may be authorized to promulgate rules by an enabling statute, and therefore may be the decisionmaker in a rule making under that statute; but it must do so in compliance with the provisions of the A.P.A.

Conforming amendments

Section 9 of the bill contains conforming amendments which change cross references to the A.P.A. in other statutes where S. 1080 has changed the numbering or lettering of A.P.A. provisions.●

AUTHORITY FOR COMMITTEES TO MEET

SELECT COMMITTEE ON INTELLIGENCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session on Monday, November 30, at 2 p.m. to hold a closed business meeting on pending calendar business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Monday, November 30, at 2 p.m., to hold a hearing on S. 1758, the Betamax bill.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Productivity and Competition of the Committee on Small Business be authorized to meet during the session on Tuesday, December 1, at 9:30 a.m., to hold a hearing on Federal antitrust policy implication over small business.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Energy and Mineral Resources of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Tuesday, December 1, at 9:30 a.m., to hold an oversight hearing on coal exports.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. STEVENS. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Tuesday, December 1, at 2 p.m., to hold a closed business meeting on pending calendar business.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, December 1, at 2 p.m., to hold a hearing on four treaties dealing with the South Pacific Islands.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

PROBLEMS IN GOVERNMENT BILL PAYING

● Mr. DANFORTH. Mr. President, a few weeks back I reported on the continued problems Government contractors are experiencing in securing timely payment from the Government. Senator WEICKER and I have authored legislation to address the problem, S. 1131, and 59 of our colleagues have joined in cosponsoring that effort. I am pleased to report that the subcommittee has completed its consideration of the bill and that markup before the full committee is expected soon.

The purpose of my remarks was to call attention to a GAO report which assessed the current state of bills payment performance. The GAO noted that bills were being paid late—and early—at shocking rates, at great cost to both contractors and the Government. As an example, I cited a case that had been brought to my attention involving the Department of Commerce. There, one small contractor had gone unpaid for months on several contracts while other invoices were inadvertently paid two and even three tmies.

I wrote Commerce Secretary Malcolm Baldrige concerning this case, and I am pleased to report his reply, recently received. Secretary Baldrige reports that administative changes are now underway to consolidate some 28 separate payment systems. The new system

is expected to be in place by April 1982. Administrative savings alone are expected to reach $1.5 million—but improved services to vendors and improved fiscal management can be expected to result in even greater savings.

Mr. President, I am always happy to put good news in the RECORD. I ask that Secretary Baldrige's letter be printed in the RECORD.

The letter follows:

THE SECRETARY OF COMMERCE,
Washington, D.C., November 18, 1981.

Hon. JOHN C. DANFORTH,
Committee on Governmental Affairs, Washington, D.C.

DEAR JOHN: Thank you for your letter on the bill payment practices of the Department of Commerce (DOC). I am pleased to provide details on our efforts to improve performance in this area.

We are participating with the Office of Management and Budget in a study of Government bill paying practices. We will furnish you a copy of our findings in January 1982.

Administrative payments in the DOC are processed by 28 separate and geographically dispersed offices. In fiscal year 1981, those offices processed 430,000 payments. There is a great deal of overlap, duplication and redundancy and very little standardization and coordination. The systems were established ten to fifteen years ago and are still labor-intensive despite the proven advances in automatic data processing technology.

In July 1981, the Assistant Secretary of Administration completed a plan to consolidate administrative payment systems. Administrative payments processing will begin at the Department level in April 1982. In addition to an estimated annual savings of $1,500,000, we plan to improve services to vendors. Consolidation of the administrative payments function is one of the actions the DOC is taking to improve financial management.

Sincerely,

MAC,
Secretary of Commerce.●

GOOD NEWS: THE ENERGY CRISIS IS OVER

● Mr. ARMSTRONG. Mr. President, a few days ago, the Rocky Mountain News published an excellent article which pointed out how price controls have distorted the market for oil, encouraging wasteful consumption, and discouraging conservation and new oil production.

In the article, William Tucker discusses the benefits which have resulted from President Reagan's decision to end oil price controls. I commend his excellent article to my colleagues. I ask that it be printed in the RECORD.

The article follows:

[From the (Denver, Colo.) Rocky Mountain News, Nov. 1, 1981]

GOOD NEWS: ENERGY CRISIS OVER

(By William Tucker)

On Jan. 28, 1981, President Ronald Reagan announced that he was bringing an immediate end to the price controls that had governed American oil for almost 10 years, speeding up a process already set in motion by Jimmy Carter. With that simple act, the energy crisis of the 1970s ended.

You would have hardly known it from reading the newspapers. The consumer groups put up their usual howl, complaining that the decision would only mean higher prices. There was not the slightest suggestion of what the long-term effects of the decision might be. Nor has there been since, except for some scattered editorials.

For a few weeks after Reagan's action, oil prices did rise, just as consumer groups had predicted. Within a month, gas prices at the pump had climbed about eight cents a gallon. Heating oil also went up a bit. Domestic oil prices, freed from constraints that had kept them at less half the world price of $36 a barrel, quickly jumped to around $30 a barrel. It looked as if consumers might be in for a rough time.

But then strange things started to happen.

As late as December 1980, the Department of Energy had been predicting that world oil supplies would remain tight indefinitely and that their prices might soon be moving up through the range of $45–50 per barrel. By March, however, the major oil companies suddenly found themselves with growing inventories on their hands. By May, refineries had a 20 percent oversupply of oil products and were starting to worry about storage problems. They did the only sensible thing. They started to cut prices.

At the end of May, heating oil prices were down by four to five cents throughout the country. Gas prices at the pump fell below their January levels. The national average of gasoline prices nationwide fell to its lowest level in two years. Sporadic price wars broke out in various areas. By midsummer, competition among service stations in Cincinnati, for example, had lowered the price of gasoline 75 cents per gallon in some places.

These events started to have repercussions on the world market. By early summer, every major OPEC nation found itself with growing stockpiles. Libya, always the most militant of OPEC members, lost 60 percent of its customers between April and August because it refused to lower its prices.

What happened in Mexico was tragicomic. In June the nation found itself unable to sell its oil at the premium price of $40 a barrel, so the minister for oil, Lopez el Gomez, lowered the price by four dollars. The Mexican public was outraged and demanded that the old price be restored. Lopez el Gomez, till then considered the favorite to succeed Lopez Portillo to the presidency next year, was forced to resign from office, his political career ruined.

The oil still could not be sold at $40 a barrel, and subsequent oil ministers have now lowered the price by $3.90—holding back the last 10 cents apparently in an effort to avoid Lopez el Gomez's fate.

OPEC's attempts at an emergency August meeting to reach agreement on a price and regain control of the market were a failure. Two days after the meeting fell apart, Nigeria voluntarily lowered its oil price from $40 to $36 per barrel, the largest price reduction an OPEC nation has ever imposed on itself. There is no indication that prices have hit bottom yet.

Few people seem to realize the OPEC's monopoly of the market lasted only about three years. From 1973 to 1977 the relatively few oil-producing countries probably could have charged any price they wanted to Western consumers.

Like any monopoly, it quickly attracted new competition into the field. The high price of oil sent geologists scurrying out all over the world looking for new reserves. Britain and Norway developed the fields under the North Sea; the American oil companies were allowed to finish the Alaskan pipeline, dozens of other small countries began to develop their deposits.

In addition, the old patterns of ever-increasing consumption were quickly reversed everywhere.

Everywhere, that is, except the United States. Almost from the day in February 1976 when Congress had instructed that the price of domestic oil be lowered, Americans had rushed back to their old pre-1973–74 oil embargo habits. Over the next 12 months, big-car divisions of the three major auto companies broke sales records in each succeeding month of the year. Small cars were left sitting on the lots, and even huge rebate programs failed to win back the public to conservation.

Gasoline consumption resumed its pre-embargo climb, surpassing 1973's record level in 1977 and breaking it again in 1978. We were headed for even higher consumption in 1979 until events in Iran put a stop to that. Domestic producers, on the other hand, could not begin to hope to make back their money from drilling for new oil. They sat on their hands or put their money into real estate. Once again, there was a shortage of domestic oil.

Yet there was no time between 1976 and 1979 that motorists couldn't get gas. We made up for our self-inflicted domestic shortages by importing more oil, climbing from 33 percent of domestic consumption to almost 50 percent by mid-1979.

Just about everything Congress did to solve the energy crisis in the 1970s was aimed at keeping cheap gas flowing to the consumer. Washington was filled with liberal congressmen singing the joys of conservation and wringing their hands about foreign dependence. Yet not one of them was ever willing to accept the simple formula that would have ended the whole dilemma: paying a market price for our own oil.

It is commonly assumed that the events in Iran and the gas shortages in 1979 finally curbed the nation's appetite for foreign oil. This is not quite correct. Redoubled international oil prices and the resulting rise in the cost of gasoline certainly reminded people of the realities of the world oil situation. But the effect would probably only have been a temporary one if Carter had not become convinced that domestic price controls were a self-defeating policy fit to be abandoned.

Incredibly, even at this late date, congressmen howled and consumer groups moaned. Yet the payoff came almost immediately.

Within one year, U.S. oil imports fell by 25 percent to their 1975 level. Oil drilling increased as never before, and consumers finally began demonstrating unsuspected capabilities for conserving energy. Reagan's January decision completed the process.

Drilling for new oil has increased by 50 percent in the last six months. Domestic oil production is holding steady, and consumers—finally deprived of the "protection" of Congress—seem permanently set on a conservation course.

Is the energy crisis over then? Not quite. Unfortunately, we still have a 40-year-old chaotic state of resources created by government intervention in the natural gas industry.

Price controls were originally imposed in 1939 because of a supposed "monopoly" held by the natural gas pipelines. Actually, there was no monopoly, since gas has to compete with coal, oil, electricity and other fuels. The world of natural gas producers is competitive and occupied almost entirely by small producers. One out of every 100 Americans owns interest in a natural gas well. Nevertheless, the price controls persisted.

The results have been perverse. The natural gas industry became a kind of national utility company. No one was ever encouraged to go out and find more. The only gas we have used is the "waste product" now associated with oil deposits. Yet all indications now are that we have staggering amounts of natural gas, perhaps as much as 200 years' supply at current prices.

Carter finally opted for a phased pricing program ending with complete decontrol in 1985. The results, however, have been chaos because the pricing was soon outdated. Taking inflation into account, natural gas consumers are once again paying 1960s prices

for energy. (Because of the resulting shortages, industry and utilities are rapidly being squeezed out of the market, and consumption of natural gas is now concentrated almost entirely in home heating.)

Congress also freed all gas found below 15,000 feet from price controls, which spurred new exploration. Yet new owners of gas deposits below 15,000 feet oppose decontrol, fearing they will be undersold by all the gas that obviously exists between 5,000 and 15,000 feet. In a final irony, the pipeline owners have become a principal opponent of deregulation. They are paid according to the amount of gas that flows through their lines, and they fear that if prices are decontrolled, people will start conserving gas.

The energy battle then is only half won. We have ended OPEC's dominance of the market within a few short months by swallowing what turned out to be a relatively mild pill and accepting a market price for our own oil. All we have to do now is decontrol our natural gas prices, and we will be home free.●

ATLANTA HOSPITAL HOSPITALITY HOUSE

Mr. NUNN. Mr. President, over the past 2 years many concerned Atlantans have been involved in an innovative project designed to provide lodging and supportive companionship to relatives of patients hospitalized in metropolitan Atlanta.

I believe that Atlanta Hospital Hospitality House fills a significant gap in the health care system in Atlanta. It extends a welcome of caring and concern to individuals and families at a time of personal distress and fear. I also feel that the Atlanta Hospital Hospitality House is an excellent example of a social service that has been initiated and funded by a concerned community in response to a demonstrated need and with no Government money.

Mr. President, I ask that this article, which appeared in the Atlanta Constitution on Monday, September 4, be printed in the RECORD.

The article follows:

HOSPITAL VISITORS GET A SNUG HAVEN

(By Sharon Bailey)

High on a tree-shaded knoll, the once-elegant mansion on Ponce de Leon Avenue seems a world away from the crowded corridors and antiseptic chrome-and-linoleum atmosphere of Atlanta's 40-some hospitals.

Four towering Ionic columns frame the front entrance. A wide veranda overlooks azaleas and dogwood trees. Inside, marble fireplaces and delicate plaster flowers and kissing birds add a graceful note to parlor and dining room.

But the two-story, white-stucco mansion at 1815 Ponce de Leon Ave. is not the private retreat of some wealthy Atlanta entrepreneur, although it was built in 1926 for that purpose.

Instead, newly painted and renovated from the roof to the basement, the house will become a different kind of retreat on Tuesday, when the first guest—a relative of a sick or even dying patient at some area hospital—arrives to take up quarters.

The Atlanta Hospital Hospitality House, a dream in the making for almost four years, will have become reality.

"We're almost doing this on faith," said Tom Clark, showing a visitor through the spacious and once-again cheerful rooms of the mansion Thursday. Clark is president of the board of the non-profit, private organization which will operate the facility.

The project had its beginnings in 1977, when a committee at All Saints Episcopal Church was studying ways to meet community needs, recalls Clark, a member of the church and an associate professor of management at Georgia State University.

Talking with officials at area hospitals, committee members discovered that Atlanta's many medical facilities often draw patients from far-distant places.

And for a patient's relatives, that can mean sleeping and eating in waiting-room chairs, washing clothes in a public restroom, eating meals from vending machines and—perhaps worst of all—spending endless hours waiting, often alone, to find out what will happen to a loved one.

The church contacted others interested in the problem, and in 1979 a non-profit, independent organization was formed to work for the development of a "hospital hospitality house"—a place where out-of-town relatives of hospital patients without a place to stay could find housing and emotional support as well.

In January 1980, the group located the then-vacant mansion on Ponce de Leon, originally constructed as the elegant home of Cator Woolford, founder of the retail-credit firm now known as Equifax.

For 25 years or so, however, the structure had housed other agencies: the Cerebral Palsy Center of Atlanta, then the Howard School. Its owner—the Children's Rehabilitation Center—agreed to lease it for $1 a year.

With time, the mansion had become like an old shoe, run down at the heels. "It was leaking like a sieve, there was a lot of busted plumbing," recalls Clark. More than 50 groups—churches, VFW organizations, foundations, businesses, other civic concerns—joined hands to raise the money to fix it up.

Last Thursday, the results of the $130,000 effort were clearly visible. New yellow paint brightened the parlor. Donated dishes and canned goods filled the refurbished kitchen. The final touches were being put on several sunny bedrooms upstairs.

Clark and Carolyn D. McKinney, executive director of the house, explain that only chaplains and social workers at area hospitals may refer patients' relatives in need of housing to the facility, which normally will have space for 25 persons.

The guests will have to live at least 30 miles away and have no other relatives with whom to stay in Atlanta. Children under 13—generally not permitted in hospitals to visit patients, anyway—will not be allowed.

The housing will be free of charge, and the emotional support of being with others facing similar problems—ill and perhaps dying relatives—is expected to be as important as the room and board, say the officials. A similar facility in Nashville has shown that to be the case.

In the meantime, there is still work to be done. Atlanta Hospital Hospitality House Inc. has raised $25,000 to $30,000 to begin operations, which should last through the end of the year, but fund-raising will be an ongoing effort, Clark emphasized.

The group is looking for an organization willing to sponsor a major fund-raising auction early next year and would welcome fund-raising efforts by civic or church groups.

There are other needs. Two examples: groups willing to provide covered-dish suppers for guests, and a donation of lawn furniture.

It's clearly been a labor of love.

Clark hopes that kind of public interest will continue and grow in months ahead.

DAVIS-BACON ACT

● Mr. EAST. Mr. President, I have strongly supported and will continue to support all legislative initiatives to repeal the Davis-Bacon Act. The General Accounting Office has concluded that the act costs the American taxpayers $1 billion per year. The economic growth of our country hinges on continued congressional perseverance in cutting spending by the Federal Government. The cost to our taxpayers of the Davis-Bacon Act is a luxury we in the Congress can no longer ethically afford.

Mr. President, a recent article in the Reader's Digest, by Irwin Ross, is one of the best explanations available on the compelling need to repeal the Davis-Bacon Act. I ask that the article be printed in the CONGRESSIONAL RECORD.

The article follows:

[From the Reader's Digest, December 1981]

THE OUTDATED LAW THAT'S COSTING TAXPAYER'S BILLIONS

(By Irwin Ross)

Initially, the contractor had figured the cost of a residential high-rise in Gaithersburg, Md., to be $4,694,452. But then the developer asked the Department of Housing and Urban Development to subsidize the project. Result: an extraordinary escalation of labor costs.

With federal money involved, the contractor was required, under provisions of the Davis-Bacon Act—a law passed in 1931—to pay his work force the prevailing wages in the community, as determined by the Department of Labor.

Common laborers at Gaithersburg now had to be paid $10.95 an hour, rather than the $4.50 to $6 at which they could have been hired. Excavation-equipment operators were entitled to $14.40 an hour rather than $9, carpenters to $13.61 rather than $8.60. Overall, the project's cost jumped to $5,142,260—an increase of nearly ten percent.

Most people have never heard of the Davis-Bacon Act, but it is a major cause of our skyrocketing construction costs. In 1979 the General Accounting Office surveyed 30 federal construction projects. In 12 instances, they found that rates established by the Department of Labor were unrealistically high—raising wage costs 36.8-percent higher than they should have been. The GAO also concluded that Davis-Bacon had saddled the government with excess costs of perhaps $700 million a year.

Two years ago, an inter-agency task force of the Carter Administration came to similar conclusions. It calculated that if the inflated wage rates of Davis-Bacon were eliminated, federal-construction-payroll costs would be reduced by ten percent—a saving of a billion dollars a year on a federal-construction budget of $40 billion.

The Davis-Bacon Act served a purpose during the Depression. It protected local workers from contractors who might bid low on a government project and then import itinerant workers who found substandard wages preferable to starvation. Initially, the act applied only to construction projects directly undertaken by the federal government, but gradually it was extended to include just about every construction program with a federal subsidy or loan guarantee.

The basic problem with the act involves the bewildering rules the Department of Labor uses in determining what wage "prevails." Under department regulations, the prevailing rate is the one received by a majority of workers in a specific craft. The majority rule seems fair enough, and in highly unionized areas there is generally no argument about the prevailing wage.

The rub comes, however, when 50 percent or more of the workers do not receive the same wage—a characteristic of open-shop, or lightly unionized areas. Then the Department of Labor invokes the "30-percent rule." If 30 percent of the workers in a classification receive the same wages and fringe benefits—to

the penny—then that rate becomes the prevailing one. The likeliest circumstance in which that can occur is when 30 percent of the workers in a particular craft are unionized. Thus, the minority-union rate becomes the prevailing rate, even though 70 percent of the craftsmen are paid less. Only when the 30-percent rule cannot be applied does Labor average all the local wages.

In its 1979 study, the GAO chronicled a typically absurd example of the 30-percent rule that turned up in Carson City, Nev. To determine the prevailing wage for painters, the Department of Labor surveyed 11 projects, finding eight painters at work. Two were paid $6.25 an hour, two were paid $8.74 and one $9. But three painters were getting $12.40 an hour. Three out of eight comes to 37.5 percent—so $12.40 became the prevailing wage.

Sometimes Labor does not even bother to take a wage survey. When the GAO was conducting its study, it asked the department for the basis for the 530 area-wage determinations that were in effect in October 1976. But no surveys had been conducted for 57 percent of them. The Labor Department simply adopted the union rates of each locality.

The "importing" of union rates from big cities into smaller communities also prompts a persistent criticism of Davis-Bacon. Michael Callas, a general contractor in Hagerstown, Md., told a Senate committee that he had been interested in bidding on a government project in Adams County, Pa. He was already working on a similar project four miles away, at Fort Ritchie, Md. Callas was amazed to learn that Labor Department wage rates were more than double the Davis-Bacon rates he was paying at Fort Ritchie. The reason; the department had gone to Harrisburg, Pa.—75 miles away—to find the prevailing wage rates.

Callas refused to bid on the project because of the inevitable friction that would have resulted within his work force over widely varying rates for identical work. For the same reason, many non-union contractors refuse to bid on federal construction. Where this occurs, there is less competition for government work—a phenomenon that hardly keeps prices down.

Davis-Bacon inflates costs in another way as well. Non-union contractors often employ "helpers" and "learners" at considerably lower rates to assist qualified craftsmen. But the Labor Department generally requires all workers on a federally subsidized construction project to be paid journeymen's wages.

The absurdities of Davis-Bacon have led to widespread demands for its demise. The GAO argues that besides being inflationary, "other wage legislation and changes in economic conditions makes the law obsolete. GAO believes it should be repealed." Support for repeal also comes from newspapers with such diverse editorial views as the New York Times and The Wall Street Journal. The liberal organization Common Cause as well as many building-contractor groups point to flaws in Davis-Bacon.

Several bills are currently being considered in Congress to rescind the act completely. A piecemeal approach is also being tried—tacking on a Davis-Bacon exemption to expenditure bills as they come up. Such an exemption was part of the military-construction bill that recently emerged from Senate committee.

The staunch defenders of Davis-Bacon are the construction unions of the AFL–CIO. They maintain that if the act were discarded, workers would be subject to the potential abuses that were feared in 1931. Union spokesmen also minimize any deficiencies in the Labor Department's application of the law. But organized labor has a clear economic stake, for whenever it maintains high union rates, unionized contractors can compete effectively and thus obtain more jobs for union members.

The Department of Labor and the Reagan Administration favor reform rather than repeal of the Davis-Bacon Act. Proposed reforms, announced in August, would substitute a 50-percent rule for the present 30-percent one, prohibit the importing of urban rates into rural areas, and allow one helper for every five journeymen.

But the case for repeal is more compelling. A 50-percent rule would still be inequitable, if, for example, other wage rates in an area were lower; the Labor Department would be establishing a minimum-wage rate rather than a true prevailing one. Besides such details, the problem with changing the regulations is that the reforms of one Administration can be undone by the next. Moreover, whatever the changes, the Davis-Bacon Act by its very nature imposes an impossible burden on bureaucrats by obliging them, if need be, to issue wage determinations for more than 3,100 counties and at least 19 crafts.

As Sen. Donald Nickles (R., Okla.), author of one of the repeal bills, says, "I find it ludicrous that the Department of Labor—in Washington, D.C.—is in the business of setting local wage rates for projects all across the United States."

Indeed, the country is too large and diverse, local economic conditions are too varied, for centralized bureaucratic wage determination. Beyond that, the Davis-Bacon Act is expensive, inequitable and unnecessary. We would be well off without it.●

SOCIAL DEMOCRACY: SELF-DEFEATING?

● Mr. ARMSTRONG. Mr. President, I hope every Senator will read the very thought-provoking essay by Ashby Bladen, published in Forbes magazine on November 9. Mr. Bladen argues that social democracy, the dominant political movement of the 20th century, is ultimately self-defeating. He believes, as many thoughtful observers do, that politicians in a democratic society lack the discipline necessary to avoid financial and political disaster. I am personally more optimistic than Mr. Bladen; but Mr. Bladen's concerns are well-founded and worthy of serious attention.

I ask that the article be printed in the RECORD.

The article follows:

PROMISES, PROMISES

(By Ashby Bladen)

The people who read this magazine are worried and, in my opinion, rightly so. I can see it in my mail. The basic theme running through all of my writings is that the dominant political movement of the 20th century, social democracy, is ultimately self-defeating. The heart of social democracy is the notion that people deserve an income just for being people, regardless of whether or not they contribute to the common weal. Virtually all countries that can afford it, and quite a few that really cannot, provide a "safety net" level of income as a matter of legal right.

I presume that a safety net hung somewhere above the minimum subsistence level is a political imperative today. But it does create a problem. The higher the safety net is hung, the greater the incentive it creates for people not to produce, but to live off the productive efforts of others. Thus the higher the standard of living a society promises as a matter of legal right, the lower the actual standard of living is likely to be. The practical working out of this paradox has taken Britain within a single lifetime from the richest country in the world to the poorest country in northern Europe.

I am the investment officer of a rather large financial institution. As such, I am charged with the responsibility for a few billion dollars of other people's savings.

The worst problem that my company's policyholders face is one that many investment officers choose to ignore altogether: Politicians have a penchant for promising a higher standard of living than it is practically possible to provide in real terms. They can provide it in money terms by borrowing on the credit of the State, which is unlimited because it is based on force, not on earned income. But there is no way to create with a stroke of the pen the real goods and services that make up our actual standard of living. Somebody has to go to the effort and bother of producing them. To the extent that we create more purchasing power by borrowing than we have earned by producing real goods or services, the equation is necessarily balanced by inflation. The inflation also erodes and can ultimately destroy the real value of the savings that productive people have accumulated out of their earned incomes. That is why you and I, who do not wish to spend our declining years in the safety net, are worried.

Thus, the original motive for my literary efforts was political—I wanted to help elect an Administration that would restrain the growth of social democracy before it destroyed our real standard of living. We now have such an Administration. In this column, I will continue to try to prod the Administration in the right direction. But I have also pointed out that ending the inflation will necessarily involve a financial crisis, and reader letters remind me that many of you are worried not only about what inflation is doing to the real value of all financial promises but also about the risk that the promises you are relying on will not be kept even in terms of money. Well, some such promises are worrisome but many really aren't. As a professional investment analyst, I am in a position to help you sort out the two kinds. I cannot go into the business of individual investment counseling, but from time to time, I will devote a column to telling you which kinds of financial promises are likely to be kept and which aren't.

Several of you have written me to ask whether you should worry about specific investments that are in fact full faith and credit obligations of the U.S. government. I believe that it is wholly unreasonable to worry about whether such obligations will be paid in money; although what the money will be worth at the time is, of course, a cause for concern. Any government of a sovereign state can declare its notes to be legal tender and force the people to accept them. So it can always refinance its debts unless and until its authority has dwindled to the point at which the people believe that they can defy it with impunity. When governments get to that point, they have to issue more and more promises to pay for the resources they need to maintain their authority. That is one reason why revolution and hyperinflation frequently go hand in hand. Obviously, we are very far from that point in this country.

Here is a list of the publicly held obligations that are not obviously, but are in fact, backed by the full faith and credit of the U.S. government: notes backed by the Chrysler Corp. Loan Guarantee Board; Farmers Home Administration Insured Notes and Certificates of Beneficial Ownership; Federal Housing Authority Debentures; General Services Administration Participation Certificates; Federal Home Loan Mortgage Corp. and Federal National Mortgage Association obligations (that is, those that are guaranteed by the Government National Mortgage Association); GNMA Participation Certificates and Passthroughs; Title XI Federal Maritime Administration Guarantees; New Community Debentures; Small Business Ad-

ministration Debentures; and Washington Metropolitan Transit Authority Bonds.●

REAGANOMICS

● Mr. PACKWOOD. Mr. President, Business Week magazine published an article this week about President Reagan's economic recovery program. Considering the significant and increasing budget deficits with which we are faced, I urge all my colleagues to read this insightful article.

I ask that the entire text of this article be printed in the RECORD.

The article follows:

[From Business Week, Nov. 30, 1981]

REAGANOMICS RACES THE CLOCK

Although the Reagan Administration moved swiftly to silence Office of Management & Budget Director David A. Stockman after he publicly undercut President Reagan's contention that he could cut taxes, raise defense spending, and balance the budget in the foreseeable future, the damage done by Stockman's revelations in The Atlantic Monthly may be irreparable. Stockman's sin was to admit openly what many in the business community and on Capitol Hill had already come to realize; that the short-term effect of Reaganomics is to produce enormous budget deficits and that the Administration has no viable plan to deal with them.

President Reagan is not prepared to make a U-turn in economic policy right now, and there will be little pressure on him to do so. With the economy in a deep slide—November housing starts hit a 15-year low (page 46)—no one will be asking for spending cuts or tax increases soon. But the size of future budget deficits make almost inevitable major policy initiatives in the budget for fiscal 1983 that will go to Congress two months from now. These could include:

A draconian fiscal 1983 budget that will make sharp slashes in a wide range of non-defense spending, including programs of vital interest to business.

A possible cap for safety-net programs other than Social Security.

Tacit acceptance of smaller increases in defense spending than originally proposed by the Administration.

New attempts to raise revenues by closing loopholes, particularly those that benefit business and wealthy individuals; one possible candidate for extinction is the leasing provision of the tax act.

A reassessment of Reagan's policy has long been unavoidable. But the recession, with its devastating impact on the budget deficit, is forcing the Administration's hand. Even before the economy's slide became obvious, Stockman's budget watchers at the Office of Management and Budget were looking at steadily mounting deficits. By August, before the course the economy would take this fall was known, the OMB realized that the 1982 deficit could not be held to the Administration's projection of $42.5 billion. With the recession now draining receipts and driving up expenditures, the OMB expects this year's deficit to be at least $80 billion and perhaps $100 billion. Without further budget cuts, the deficit grows in future years, reaching $145 billion in fiscal 1984.

Even the measures now under consideration at the White House will not close a budget gap of this magnitude. As Stockman was quoted as saying in the Atlantic article, even after 20 social programs had been killed and 25 more cut in half, "huge bites . . . would have to be taken out of Social Security. I mean really fierce blood-and-guts stuff. . . . And it still didn't add up to $40 billion." Concedes one dispirited senior Reagan aide: "Maybe what we'll have to do is live with those big deficits."

OBSTACLES

That will not be easy. The Administration is counting on a robust recovery starting in the middle of next year—well before the mid-term congressional elections—to save it from economic and political disaster. Reagan still believes in his program and thinks that the combination of scheduled installments of the tax cut, rising defense spending, and lower interest rates and inflation will produce a dramatic turn-around by next summer. "Reagan has great faith in his program and thinks it's going to work," says Senator Paul Laxalt (R.-Nev.). "Whenever anyone tries to get him to waver, he comes down hard."

But Reagan's faith will not make the financial markets believe, and their skepticism casts a cloud over the recovery. Although interest rates are currently plunging, the specter of deficits and a potential clash between an expansive fiscal policy and monetary restraint continues to haunt the financial community. Investors' expectations that large deficits mean high inflation rates is one reason why long-term interest rates have dropped much less than the short end of the market.

The major risk to the Administration, pointed out by Stockman in his unsuccessful bid for a policy change in early November, is that growing private credit demand will collide with the Treasury's vast borrowing needs and the Fed's continued tight rein on the money supply early in the recovery.

The problem could come even earlier than that. The Fed currently is trying to get money growth up into its target range but, as is often the case during recessions, this is proving difficult to do. Many Fed watchers believe that the central bank will not let rates plunge very much further, both because it wants to keep short-term rates a point or two above the rate of inflation and because a continued decline would begin to put serious downward pressure on the dollar in international money markets. Although sticky interest rates could prolong the recession or abort the recovery, the Fed feels it has little room to become more accommodative until the pressure caused by large deficits abates.

The Administration hopes to make the best of those deficits by using them as a spur to goad Congress to act on further spending cuts next year. The magnitude of the cuts that will be proposed is now becoming clear. The Commerce Department, which lost one-third of its budget this year, faces the elimination or sharp reduction of its trade development programs. "If we get into trying to cut the trade or economic areas, it will backfire on the taxpayers," says Commerce Secretary Malcolm Baldrige. Even so staunch a Reaganite as Environmental Protection Administrator Anne M. Gorsuch was shocked when OMB more than doubled her proposed cut in the EPA research budget to 44 percent.

ASSIGNING BLAME

But cuts of this size will be hard for Congress to swallow in the middle of a recession and with an election only months away. "They are clearly pursuing an anti-Congress strategy," says a Senate GOP aide.

The price Congress will exact for any major new budget cuts will be measures to raise substantial new revenues beginning in 1983. Reagan remains opposed to any change in the basic 1981 personal tax cuts or to the adoption of a broad-based consumption tax—he is reluctant to accept any tax increases. But if the President clings tenaciously to his belief that the supply-side program can still work without changes, Congress may seize the economic policy initiative and take his program apart piece by piece.●

ORDER OF BUSINESS

Mr. STEVENS. Mr. President, is there an order for convening tomorrow?

The PRESIDING OFFICER. The order is for 10 a.m.

ORDER FOR RECOGNITION OF CERTAIN SENATORS TOMORROW

Mr. STEVENS. Mr. President, following the time for the two leaders under the standing order, I ask unanimous consent that Senators PROXMIRE, EAGLETON, and BUMPERS be recognized for special orders for 15 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that Senator CANNON be added to the list to have a special order in the morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

Mr. STEVENS. Mr. President, is there additional morning business?

The PRESIDING OFFICER. If there is no further business, morning business is closed.

EXECUTIVE CALENDAR

TREATIES

Mr. STEVENS. As in executive session, I ask unanimous consent that at 4:20 p.m. on Wednesday, December 2, the Senate go into executive session to consider four treaties on the Executive Calendar, those being Executive Calendar items: 20, 21, 22, and 23.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. I ask unanimous consent that the four treaties be advanced through their various parliamentary stages, up to and including the presentation of the resolution of ratification, and that no other action occur on the resolutions other than a rollcall vote.

The PRESIDING OFFICER. Without objection, the treaties will be considered as having passed through their various parliamentary stages, up to and including the presentation of the resolutions of ratification, which the clerk will state.

The resolution of ratification of Treaty Document No. 97–7 was read, as follows:

EXTRADITION TREATY WITH THE KINGDOM OF THE NETHERLANDS

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty of Extradition Between the United States of America and the Kingdom of the Netherlands (Netherlands), signed at The Hague on June 24, 1980.

The resolution of ratification of Treaty Document No. 97–8 was read, as follows:

EXTRADITION TREATY WITH THE REPUBLIC OF COLOMBIA

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty of Extradition Between the United States of America and the Republic of Colombia, signed at Washington on September 14, 1979.

The resolution of ratification of Treaty Document No. 9711 was read, as follows:

MUTUAL LEGAL ASSISTANCE TREATY WITH THE REPUBLIC OF COLOMBIA

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty of Mutual Legal Assistance Between the United States of America and the Republic of Colombia, signed at Washington on August 20, 1980.

The resolution of ratification of Treaty Document No. 97–16 was read as follows:

TREATY ON MUTUAL LEGAL ASSISTANCE WITH THE KINGDOM OF THE NETHERLANDS

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty of Mutual Legal Assistance Between the United States of America and the Kingdom of the Netherlands, together with a related exchange of notes, signed at the Hague on June 12, 1981.

Mr. STEVENS. Further, I ask unanimous consent that at 4:20 p.m. on Wednesday, one rollcall vote occur, which would count for four rollcall votes, on the Resolutions of Ratification, and further, I ask that it may be in order now to order the "yeas" and "nays" on the Resolutions of Ratification.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object. The distinguished acting Republican leader is not asking unanimous consent that the rollcall vote be ordered. He is asking now that it be in order to order the yeas and nays.

Mr. STEVENS. That is correct.

Mr. ROBERT C. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Finally, I ask unanimous consent that following the 4:20 p.m. rollcall vote, and a motion to table the motion to reconsider, the Senate return to legislative session and resume the pending business. That is one unanimous-consent request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I do ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, may I ask the acting Republican leader, when will a statement appear in the RECORD in explanation of the treaties?

Mr. STEVENS. I might state to the minority leader that it is my information that a statement will be placed in the RECORD tomorrow, Tuesday.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

RECESS UNTIL 10 A.M. TOMORROW

Mr. STEVENS. Mr. President, if there be no further business to come before the Senate, I move that the Senate stand in recess in accordance with the previous order.

The motion was agreed to; and at 6:43 p.m., the Senate recessed until Tuesday, December 1, 1981, at 10 a.m.

EXTENSIONS OF REMARKS

HADLEY MEMORIAL HOSPITAL: AN ACHIEVING INNER-CITY HOSPITAL

HON. WALTER E. FAUNTROY
OF THE DISTRICT OF COLUMBIA
IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. FAUNTROY. Mr. Speaker, at a time of public concern that many organizations have been too reliant on Government aid and have failed to properly help themselves or search elsewhere for solutions, I am pleased to report that a financially pressed inner-city hospital in the District of Columbia, Hadley Memorial Hospital, has constructed a $3 million ambulatory care center, raising funds the hard way.

This 80-bed nonprofit health care institution serves the residents of wards 7 and 8 in southeast/southwest Washington, D.C., an area which comprises nearly 30 percent of the District's population. About 50 percent of Hadley Memorial's patient population receives public assistance, and it carries out its work in an area recognized as having "the greatest unmet health care need" in the Greater Metropolitan Washington, D.C., area, and where there are also the fewest physicians to population.

Consequently, and apart from most of the Nation's hospitals, Hadley Memorial's expenses are exceeding its revenues, so that little "seed money" is available for modernization and expansion.

I am pleased to report that funds for this hospital-based ambulatory care center were in-gathered after successful competition for grants from national foundations, large business corporations, small local businesses, grateful former patients, the parent Seventh-day Adventist Church, Embassies of foreign countries, hospital employees, physicians, and community.

One indigent patient, at a cost of $0.50, mailed in a money order for $3.50 saying that it was all he had. The hospital's HELPS Committee, employee volunteers, worked on yard and bake sales, group buying and theater trips, raising $100, then $250, finally raising over $6,500.

It has taken years to write, inform, persuade, call on potential givers; the result: dedication of a modern south wing ambulatory care facility on October 4, 1981.

Mr. Speaker, several of the dedicatory remarks bear stark witness to the great and unmet health care needs in the urban catchment area served by Hadley Memorial Hospital, and I submit them for review by my colleagues:

STATEMENT OF MAYOR MARION BARRY, JR.

First, let me say good afternoon to you and to tell you I am delighted to take part in the dedication of the Ambulatory Care Facility. It is a splendid example of private initiative in the service of a public good. While the District is doing all that it can to make ambulatory health services available east of the river, we need the partnership of the private sector.

The course that Hadley Hospital has chosen—emphasizing primary and preventive services, which avoid hospitalization and keep medical costs down, is supportive of good modern medical practice. Offering preventive services, rather than meeting the needs of people only when they are sick enough to need a hospital, is better for patients and pocketbooks. It is particularly important that the Center is opening in the most medically underserved area of the entire city. The resources are going where they are needed, and this will complement the focus of my community and economic development programs to focus attention, programs and assistance on this long-neglected part of the District. The District has one of the highest ratios of physicians to citizens in the nation, including more psychiatrists, per 1,000 population, than anywhere else in the world. Some other specialties are as densely represented. In contrast, however, the community in Wards 7 and 8 is one of the most medically underserved in the nation. Ward 8, alone, with some 16 percent of the population of the District, has only 4 percent of the physicians; moreover, the physician population here is aging; the number of practices is declining rather than growing; and of the two hospitals in the area, only Hadley is actively expanding its outpatient services, through the opening of this Kresge Center.

The evidence indicates that this lack of medical services is related to the income levels of residents. The study of poverty in the District, which I directed my administration to conduct, shows that 44 percent of the families in Ward 7, and 47 percent of the families in Ward 8, fall in the low-income category. It is not surprising that they do not make much use of the downtown physician community, when an initial office visit can cost more than 70 percent of their weekly income. That statistic alone makes the point about how desperately the Kresge Center is needed. Almost half of the District's Medicaid clientele lives in these two wards, and the District is working aggressively to encourage physicians to enroll in the Medicaid program as a part of a balanced medical practice and as part of their responsibility to their community. Nevertheless, the kind of walk-in family medical practice in the community that Hadley provides, with comprehensive and preventive care, clearly is an excellent way to meet the health care needs in this community.

The need for increased medical care in this part of the District is substantial. The incidence of venereal disease in Ward 7, for example, is eighteen hundred percent higher than in more affluent areas of the city. The incidence of tuberculosis is three hundred and fifty percent higher. The overall crude death rate is only twenty-one percent lower in Wards 7 and 8, which have a population with an average age under twenty-five, than it is in areas with a population half again as old.

In light of these conditions, the completion of this new facility and Hadley's continuing record of service to the community are especially significant. Early care for any condition dramatically lowers the mortality and morbidity associated with it. The key is making early care affordable and accessible.

Through a number of programs, the District has done what it can to make medical care affordable for the residents of Wards 7 and 8 who are most in need. To make this care accessible, we must depend on the cooperation of the medical community and the medical institutions of the District. Hadley Hospital has set an example of good citizenship—an example that I fervently hope the rest of the medical community in the District will follow.

The gift that Hadley has given to Wards 7 and 8 is far more precious than buildings, machinery, and medicine. It will be the gift of release from pain, from worry, and from fear. For some, it will literally be the gift of life. On behalf of not only the people that the Kresge Center will serve, but on behalf of the entire District, I would like to extend my most sincere thanks, and warmest congratulations.

STATEMENT OF MR. JESSIE BROWN, DIRECTOR GOVERNMENT RELATIONS

Good afternoon Mayor Marion Barry, Councilmembers Rolark, Mason, and Kane, members of the Hadley staff, honored speakers and Guests, Ladies and Gentlemen.

I am glad to have the opportunity today to speak with all of you about the recent achievement of our community and Hadley Memorial Hospital. Today's dedication, I hope, would honor the past history of quality health care that Hadley has provided to the Anacostia area, as well as the christening of the Kresge Medical Center.

Since the opening of Hadley Memorial some 19 years ago, our community has been part of a constant series of transitions that no other area of the country has experienced. As the focal point of the Federal Government and a constantly changing local scene, I feel that the need for a cohesive community is especially strong. We've seen the inauguration of 7 presidents, a myriad of critical legislative decisions, and the establishment and disappearance of many institutions. In order to face these transitions, I believe our community needs a common interest—something to unify us in our ability to function in a healthy way. Hadley Memorial Hospital, a mainstay of the Washington area, has provided stability and maintained the well being of our citizens in these past years. The ability of Hadley Hospital to meet our mutual concern of quality health care has made my involvement in these efforts a very memorable and rewarding experience.

I feel that the opening of the Kresge Medical Center is a victory for citizen involvement and cooperation. The Washington business community and its citizens have realized the acute need of quality health care and, I am proud to say, have responded to this need. Hadley Memorial Hospital, more than any other health care facility in the Washington area, provides vital services to a surrounding community that is severely limited in the number of hospitals and clinics. Our active participation—business, community leaders, and citizens—in united efforts with the Hadley staff, was instrumental in the successful completion of the Kresge Medical Center.

I am personally proud to be involved in the exchange of cooperation in which we've all taken part. The recent completion of the Kresge Medical Center is, so to speak, a testament of our ability to combine our efforts in a very fulfilling way. And, although the Center stands as a successful achievement of our community, I would hope it's not the culmination of our efforts to improve the quality of life in metropolitan Washington. I look forward to these efforts as the continuation of a cycle that shows the responsiveness and unselfishness of our community, and I hope we will continue to prove ourselves. Business, community leaders, and citizens must persist in our work to improve facilities for medical treatment and overall living conditions.

I am very optimistic about the future contributions of Hadley Memorial Hospital to out community. The Kresge Medical Center will, undoubtedly, provide a great source of relief to the Anacostia area. These improved medical resources have made Hadley better equipped to meet the underserved medical needs of the surrounding community. I believe that this wonderful development in the area of local medical care will help to meet the goals and aspirations of the hospital: the attraction of more medical professionals to the Anacostia area, and diversified methods of medical treatment.

We owe a great deal to Hadley Memorial Hospital for maintaining our political and business health—all of which rely on our individual, physical well-being. I believe that we've shown, through our cooperation, that we have a healthy community—a community that is able to provide, in turn, quality health care to those most in need. With the opening of the Kresge Medical Center, our community will have the capability to face the many transitions and hardships with a greater degree of stability.

On behalf of PEPCO, I would like to thank Hadley Memorial Hospital for the opportunity to be a part of the efforts that have made the Kresge Medical Center possible. I have, personally, enjoyed my work with the Hadley Community Advisory Board, and cooperation with the professional staff, who have tirelessly coordinated all our efforts. I would like to especially thank Mr. James Mailler and Mr. James Suzuki for the pleasure of working with them toward the completion of the Kresge Medical Center. My involvement in the past year has been a very fulfilling one, and I, again, thank you.

In dedicating the Kresge Medical Center, congratulations to Hadley Memorial Hospital for their successful achievements and ceaseless efforts.

REMARKS OF COUNCILMEMBER ROLARK

The Honorable Marion S. Barry, Honorable members of the D.C. City Council, Ladies and Gentleman.

It gives me great pleasure today to join all of you at this dedication ceremony of Hadley Memorial Hospital's Kresge Memorial Center—the only hospital—bases ambulatory center east of the Anacostia River.

As you know, I have always shared the health concerns of my constiutents and since I have been in office it has been one of my priorities to ensure that high quality comprehensive health services are available and accessible at reasonable cost to sustain lives and improve the phsical and mental well-being of my people.

I have long observed that poor planning by the authorities has tended to produce excesses of vital health care resources in many parts of the city while leaving the residents of other parts such as this area east of the Anacostia River served by Hadley Memorial—with extremely limited access to health care resources which has always been identified as critical. To help overcome the notoriously unmet health care needs of my people, I have, over the years, consistently supported and encouraged the struggles and activities of Hadley Memorial Hospital to build the Kresge Medical Center which will become an irreplaceable part of the community.

The expansion of primary care facilities and services at Hadley Memorial is considered vital and necessary to satisfy the unmet health care needs of my people. By the provision of the Kresge Medical Center, Hadley Memorial has been given the chance to demonstrate its commitment to the residents of Ward 7 and 8 who make up about thirty percent of the people of the District. The Kresge Medical Center is a proud reminder of Hadley Memorial's struggle, and is also a shining example of the civic contribution and cooperative vision that has enriched the quality of local health care services to the people. The Hospital's accreditation of Hospital is a further positive indication of hospital service and progress to the community.

Ladies and gentlemen, I strongly believe that Hadley Memorial Hospital with its Kresge Medical Center merits all the encouragement and the much needed financial help and partnership from the public. Owing to inadequate reimbursement and multiplying care cost to our low-income patients, Hadley Memorial may be operating on a deficit. Without necessary funds the hospital will be unable to meet the technological demands of the 1980's placed on it by our patients. Abandonment of the public to adequately finance the health care of the needy would reduce the likelihood of such partnership to meaningless rhetoric. I fervently appeal to the public and especially the business community to contribute—even if it is the widow's mite—toward Hadley Memorial's fund raising activities to sustain the plan. As you are aware, this is the only hospital east of the Anacostia River where patient admissions comprise over eighty percent (80%) of District residents. The geographical remoteness of my constituents make Hadley Hospital the only realistic accessible hospital they can use.

My people and I are proud of the achievement of Hadley Memorial Hospital. We offer our continued support to Hadley as it strives to meet the health care needs of my people. We appreciate greatly all the planning effort by all concerned; the Board of Directors, the medical staff and workers of the Hospital—which went to Kresge Medical Center Project. We share your high expectations for this new health care facility. We also share your determination to see the completion of Phase III of the project which will, among other things, provide enough beds for the facility.

Thank you.

REMARKS BY LYSLE S. FOLLETTE, M.D. MEDICAL DIRECTOR, FAMILY HEALTH SERVICE, HADLEY MEMORIAL HOSPITAL

We are pleased, Mayor Barry, that you came to share this celebration with us today. Your presence embellishes even more the historicity of this event.

Today is a day we have looked forward to for nearly 3 years. To witness this goal achieved and marked in this way today, gives us cause to thank God and be glad.

Many delays and frustrations have come our way as we have anticipated this milestone but we have pressed on knowing that with persistence and determination the goal would be realized.

Hadley Memorial Hospital has made a contribution to fulfilling the health care needs of this community through all of its years.

During the past 6 years, in face of the more keenly felt need to make a more adequate contribution in health care delivery in this community, we have moved to significantly enhance our ability to meet the need in ambulatory health care. That is the reason for and the mission of the Family Health Service.

In addition to this general mission, we are pleased to announce that we are now an official part of the team in the District of Columbia which is shouldering the responsibility of the Mayor's Health-Care Initiative.

We already have the WIC program functioning here and have more than 200 registrants in 12 weeks. the WIC program is a nutritional supplement program for truly needy women, infants and children. Just prior to the close of the fiscal year, we effected agreements with the District of Columbia which provide funds to support aggressive activity at this site with an Improved Child Heath Initiative which has both a maternal and child care component. This program provides a lever to overcome the severe infant mortality picture this area so heavily contributes to.

We have also approved as a site for the Early Periodic Screening, Diagnosis and Treatment Program which is also aimed at the needy young who might not otherwise get the care they need in their first years.

Each of these programs should have an impact on infant mortality, child health and maternal health.

The involvement of Hadley Memorial Hospital in these programs is due to a team effort of the Family Health Service Medical Staff, the Administration, our Community Board and spearheaded by the expertise, the contracts and the very fruitful efforts or Administrator, Mr. Leonard Harris.

I want to ask Mr. Harris if he will give you some further insights into our participation in these programs he has had such a strong role in establishing here and some figures which reflects the significant budgetary considerations that are such a large part of these kinds of programs.

REMARKS BY LEONARD HARRIS, ADMINISTRATOR, FAMILY HEALTH SERVICE, HADLEY MEMORIAL HOSPITAL

Thank you, Dr. Follette. I would like to summarize our operational concept in one word—"Comprehensiveness" i.e., we will provide a wide array of general medical services to include dentistry and optometry. Our concept provides for Family Health

Services patients to be followed both in the out-patient and in-patient environment as well as at home.

Also, I would like to emphasize the importance of the Improved Child Health Program to the community and Hadley Memorial Hospital as well. Without the $202,000 provided by the D.C. Government, we could not have provided many critical services. Thank you for this partnership.

Lastly, I would like to indicate to the officials of the District of Columbia how greatful we at Hadley are for your support of the Improved Child Health Program.●

COUNT POLARECZKY

HON. MILLICENT FENWICK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mrs. FENWICK. Mr. Speaker, I would like to pay tribute to Count Janos Laszlo Polareczky, a distinguished Hungarian nobleman who voluntarily participated in our national fight for freedom 200 years ago. Count Polareczky commanded the Bercsenyi hussars, a crack French-Hungarian cavalry unit. The hussars, from beginning to end, made a tremendous campaign to protect the French, later united French-American, army from enemy attack. They contributed immensely to the glorious success of Yorktown.

At the end of the war, Janos Polareczky abdicated his Hungarian rank as count and became an American citizen. He died and is buried in the State of Maine.

Joining in honoring Count Polareczky is the city of Trenton, State capital of New Jersey. Trenton, along with three other cities, has dedicated a memorial plaque to Janos Laszlo Polareczky; further, the mayor of Trenton designated October 31, 1981, as Count Janos Laszlo Polareczky Day. Governors of four States have issued proclamations in Count Polareczky's honor.

I hope my colleagues will join me in commemorating the memory of Count Janos Laszlo Polareczky, a great American patriot. It is altogether fitting that we pay homage to this great leader, and acknowledge his heroic contribution to our Nation's independence.●

SOVIET JEWS: FOUR SUCCESS STORIES TELL US THAT YOU STILL CAN "MAKE IT" IN AMERICA

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. GILMAN. Mr. Speaker, together with many of my colleagues on both sides of the aisle, I have been working to win the freedom of the Jews in the Soviet Union, who are subject to cruel oppression if they attempt to exercise their human right to practice their religion.

Many of these Soviet Jews have found refuge in the United States, coming here in strict compliance with the immigration laws; and they have, for the most part, adjusted very well to their new environment—an environment of freedom of conscience and freedom of enterprise, of considerable moral elevation, and of wide economic opportunities.

Mr. Speaker, at this point in the RECORD, for the information of my colleagues, I am inserting an article from the December 7, 1981, issue of Forbes magazine, entitled "Four Who Made It," describing the successes of four Soviet Jewish families who found new lives in the United States and are making real contributions to our society, having been here just a few years. I commend this article, Mr. Speaker, to my colleagues and their constituents.

FOUR WHO MADE IT

(By Beth Brophy)

Of all the new immigrant groups coming to America, few make a more exuberant transition from communism to capitalism than Soviet Jews. Some revel in the differences: If they make money, they don't hide it. They like Cadillacs, swimming pools, fancy clothes.

They have learned in a hard school, these Russian Jews. Survival, let alone escape, means manipulating, scheming, bribing and lying. "Their mores in society are different than ours. They're used to keeping their mouths shut, not trusting neighbors or coworkers. Some may have sticky fingers," says Celia Jacobs of Chicago's Jewish Vocational Services. To them America is fresh air after the stale atmosphere of Soviet society.

Since 1971 more than 250,000 Soviet Jews have left the Soviet Union: 150,000 heading for Israel; 90,000 for the U.S.; 10,000 to Canada and Australia. Although the exodus from the U.S.S.R. to the U.S. has tapered off to 500 a month, it nevertheless amounts to the largest migration of Jewish refugees coming to the U.S. since World War II. They concentrate in major cities: 40,000 in the New York City area; 8,000 in Los Angeles, 7,000 each in Chicago and Philadelphia; 1,000 each in Houston and Minneapolis-St. Paul.[1]

For many, perhaps most, opportunity is what they seek, not religious freedom. In fact, they are themselves often nonreligious. "Once here, they quit being Jews and become Russian immigrants," says one émigré who uncharacteristically joined a synagogue "to give Judaism a chance." Says Leon Weiner, chairman of Houston's 78-store Weiner retail chain and a job counselor to the émigrés since 1974: "They are not interested in religion. They are more interested in breathing the free air and learning how to do the grocery shopping."

The Russian Jews stick together, as immigrants do. One apartment complex in St. Paul is so inhabited by Russians it has been dubbed "Gorki Manor." And, as is also common with new immigrant groups, their neighbors aren't always enchanted. Says a resident of the Midwood section of Brooklyn: "I always had a lot of sympathy for the Russian Jews until they moved here. Some of them will knock you down to get on the subway."

Furtiveness, understandably, is another trait. "They don't always tell us where their money comes from," says Leonard Zeff of Jewish Family and Children's Service of Minneapolis. "They can't always bring cash out of Russia, but they convert jewelry they've stashed away. We've seen so many families purchase homes just one year after arriving."

Leaving the U.S.S.R., of course, is a long and painful process. Once they ask to leave, they are fired or demoted from their jobs, and relatives are pressured by the government to make them stay. The Soviet Union, after all, is losing skilled people. It can take three months to a year to get an exit permit after an invitation has been obtained from a relative or friend outside the U.S.S.R. They travel first to Vienna where they are met by a representative of the Jewish Agency for Israel. Those going to Israel are sent immediately. The others are kept longer and further encouraged to move to Israel. Then, when it is clear the refugees want to go to a Western country, those with relatives in the U.S. are referred to the Hebrew Immigration Aid Society (HIAS). HIAS takes responsibility for resettlement because often the relatives are newcomers themselves.

Once here, they must adjust to a foreign work ethic. Firings, layoffs, performance evaluations, job interviews are all alien concepts. "When a Russian finishes school, his first job is assigned to him, and then he maneuvers for promotions," says Jacobs. "It's a very corrupt system, and the road to advancement is paved with contracts, favors, no 'rocking the boat'," explains Bruce Liemsidor, exectuve staffer at HIAS.

Job mobility is another incomprehensible idea. "They can't understand that you move up to a better job, or a nicer apartment," says Weiner. "Over and over, like a broken record, I tell them your first isn't your last." Soviet training is narrow and highly specialized at an early age. That engenders an inflexible attitude toward trying a new job or career in the U.S. Some émigrés aren't entirely truthful about their former jobs, either. "Everyone says they were dentists or engineers," says Zeff skeptically. "Maybe they were some type of technician."

Why do so many of them become entrepreneurs? "It is a declaration of independence," says Leimsidor. Here are some who took that giant step.

GOLDEN TIMES OF OPPORTUNITY

Yuri Radzievsky, 36, president of Euramerica Translations, Inc., leans back in his

[1] The Immigration and Nationality Act (1965) allows 270,000 aliens into the U.S. each year under a preference system that gives priority to relatives, professionals of exceptional ability and skilled and unskilled workers in short supply. Husbands, wives and children of U.S. citizens—immediate family—are admitted immediately, without regard to quotas.

Exempt from quotas, too, are Russian Jews and others seeking to enter the U.S. to escape persecution. Under the provisions of the Refugee Act of 1980, the President after consultation with Congress, sets a ceiling for the number of refugees to be admitted each year. This year the Reagan Administration sought to admit 174,000 refugees, but the Congress trimmed the number to 125,000.

leather swivel chair in his well-decorated Fifth Avenue office and recounts how he won his first client six years ago.

"My wife and I bid on a $150,000 contract to translate technical materials into French for an American manufacturer. The vice president of the manufacturing firm was very impressed with our samples until a competitor for the job told him I was operating out of a phone booth. So he asked to inspect my offices the very next day."

In less than 24 hours Radzievsky rented a suite in midtown Manhattan, painted it himself, hauled a used desk up on his back and put in an impressive "reference" library. "The books were in Russian; how would an American businessman know they were my Tolstoy?" To make it look busy, four or five friends came in to type on borrowed typewriters. The vice president was impressed—until he asked to use the phone. It wasn't connected, and Radzievsky confessed the charade.

He won the job anyway. "The vice president said he knew he was taking a chance but didn't want to miss the opportunity to make a capitalist out of a Russian," says Radzievsky with a grin. A television personality in Moscow, Radzievsky, who was born and educated in the Latvian S.S.R., his wife—a chemical engineer—and infant daughter left the Soviet Union in 1973 after he figured his brand of wisecracking social criticism made it dangerous to stay.

Leaving was not easy. "Because of my special job and my wife's family, we were rich in Russia," he says. "We had a huge, beautiful apartment in Riga, a dacha [summer home] on the Baltic Sea with cars and a private forest." They left with a few clothes and $200, came to the Boro Park section of Brooklyn, and after three months Radzievsky landed an electrical engineering job in Parsippany, N.J. Then he worked as a free-lance translator.

He saw an opportunity in 1975. "The technological state of the translation business was a tower of Babel," says Radzievsky. "Mom-and-pop shops, an army of free-lancers just like us. The demand for good translation services was growing as the world was shrinking."

Euramerica brought professionalism to an amateur business. Today it translates audiovisual materials for 350 corporate clients into 38 languages, including commercials, training films and manuals, promotional kits, filmstrips and videotapes. It employs 70 full- and part-timers and has hundreds of consultants on call, even an Urdu-speaking expert in nuclear medicine.

In June Radzievsky sold the company to Ogilvy & Mather, the advertising agency, for more than $1 million. He retains the title and duties of president. "I'm tired of hearing that the golden times of opportunity are over in the U.S.," he says. Clearly, Radzievsky proves they are not.

OUT OF THE CLOSET

In Odessa, Frank Farber (who was Efim Farber in Russia) stood over his bench eight hours a day, making eyeglasses by hand, melting the frames over an open flame. He shared an office with 25 other opticians to make eyeglasses that were considered primitive by American standards: Prescriptions weren't accurate; bifocals were almost out of the question; there was a very limited choice of styles. "You take what you can get," says Farber, 52, a genial, balding man who dresses these days in cranberry polyester slacks, a camel-colored V-necked sweater and bright pink shirt.

After a six-month wait for an appointment, another six-month wait for the glasses, Russian customers are happy to receive anything, he says. "People get used to not seeing so well."

Like others in the Soviet Union, Farber had joined the underground economy. After hours, he worked in a large closet that served as his private office for treating paying customers, mostly friends. From his state job he earned about 200 rubles a month (about $200 at the official exchange rate) and doubled that with his private clients.

He was no rich man. His family of five lived in a three-room apartment. In 1973 he immigrated to Chicago with his wife, son and daughter-in-law, and mother-in-law. Today Farber & Son Optical Co. has two branches on Chicago's North Side. Farber and son Michael, 33, are also looking for a third place in a shopping mall in a nearby suburb.

"We knew almost nothing and learned by our mistakes. We really suffered that first year," says dark-bearded Michael, who dresses in jeans and speaks rapidly in very good idiomatic English.

The Farbers didn't pay much attention to packing and cleaning the lenses for their wholesale clients—other opticians who sent them frames and prescriptions to be filled. After all, who cared about such things in the U.S.S.R.? "Now we have learned that's as important as getting the prescription right," says Frank. The lesson cost them several accounts. They didn't know that as wholesalers they were entitled to discount rates. "Now we are experts at how to get goods better and cheaper," says Michael, who studied mechanical engineering at the technological institute in Odessa and learned the optician's trade by helping his father on Saturdays.

Last year the Farbers' gross sales passed $100,000. The two families pay themselves $400 a week each. The Farber wives run the second store. Each family owns a three-bedroom house and two cars. Frank drives a 1981 Cadillac Coupe De Ville. The Farbers are still amazed at the choices available to Americans. "There's an item for every need—ski glasses, scuba-diving glasses," says Michael. "Americans think about everything to make another dollar. There are more ideas here than requests for them."

The other side of such abundance, of course, is competition. "We have to use our brains in order to make the business run right," says Frank. "The customers won't line up outside, as they do in Russia. In Russia you get the same salary no matter how hard you work."

Yet the government does play a role in their business. The Farbers are groaning these days about President Reagan's budget cuts. The government used to allow every welfare recipient two new pairs of eyeglasses each year. "Now they get only one pair. They have to reuse the old frames, and we wait months to see if the government will pay the bill." says Michael.

STRONG PEOPLE—AN EMPTY LAND

Lida Gleizer, sleek and svelte, wearing a silk top, wool suit and gold-colored boots, seems at home among the floor-to-ceiling mirrors, thick maroon carpeting, silver walls and rock music (drowning out the blow-driers) at Lida Hair Design in Minneapolis.

Lida worked in the Ministry of Metallurgy in Moscow until 1973, when she immigrated to Minneapolis where her husband had relatives. She was an accountant, called an "economic engineer," and to earn extra money she took in typing. That was illegal, of course, as private enterprise generally is there. "America surprised me. I thought maybe it would be twice better but it's ten times better—economically, morally. I sleep better at night. It's a nice feeling to do everything under the law."

Lida, 41, learned the beauty trade working illegally during her ten-month stopover in Italy while her immigration papers were being processed. In the U.S. she attended beauty school and worked as a hairdresser and manicurist for eight years before hanging out her own shingle four months ago.

Husband Nathan was a dentist in Russia where, like his wife, he worked underground—filling cavities for friends to earn extra money. In the U.S., he worked part time as a dental technician but is now manager for a scrap-metal company.

"Our experience with the Russian government helped us," says Lida. "If you could do a job there under pressure, secretly, with the threat of jail, you can do it here better because you're free. In the Soviet Union you go to jail for buying something and reselling it; in this country it is called profit."

She's tough. Lida recounts how a cosmetics salesman tried to bully her into using his shampoo products exclusively. "I told him I am the owner and competition is good," she says.

Lida invested $50,000 plus a $10,000 bank loan to open her shop. The Gleizers had made $27,000 from buying and selling their first two homes. Then there were savings, she says, from her $400-a-week job as a manicurist.

How's she doing? "Business is good," she says. And if it fails, "I can always do manicures again." The Gleizers live comfortably in a five-room condominium they bought three years ago for $100,000, and drive a Volvo. Lida isn't interested in expanding, but wants to earn enough to help her married 21-year-old daughter buy a condominium and send her 10-year-old son to a private high school when the time comes.

She says she used to dream about what life was like in America after reading American novels. "It's true," she says. "Strong people who come to an empty land, working hard, finding success."

NO MORE POLITICAL MEETINGS

"My sense of security is high and that surprised me," says Michael Bleyzer, 30, an electrical engineer at Exxon's Baytown refinery, 20 miles east of Houston. "Soviet propaganda says in the capitalist jungle workers are laid off all the time. Everyone has an unsure future. That's a 100 percent lie. The Soviets tell you everything is nice, you're taken care of, but pensions are nothing—$20 to $30 a month."

In Russia, Bleyzer was a senior researcher at the Kharkov Pedagogical Institute. His job: to help develop an electronic device for measuring the speed of corrosion in pipelines. In 1978, two months after arriving in Houston, he was hired by Exxon. He started as an instrument engineer, then moved up to coordinate data and make a monthly plan for running the Baytown refinery. The job descriptions are similar but not the work environments, he says.

"The atmosphere is much friendlier here. When you start something new, it is a pleasant process to get help. In the Soviet Union people concentrate more on their own jobs. There is no incentive to help someone else," he says. "Surprisingly, too, there is less pressure at Exxon," he says. "Deadlines are reasonable and they are always negotiable."

No more endless political meetings, either. "In Russia, 90 percent of the meetings were ideologically oriented and had nothing to do with my work. Here people don't like to waste time. I don't even go to a meeting unless I think it will be beneficial to my everyday work."

He has also noticed a difference in job prestige. "Engineers are among the poorest people in the Soviet Union. You are just an engineer. Here I am a professional, and that's very rewarding."

Along with the prestige, of course, comes a higher standard of living that Bleyzer describes as "the difference between a barbaric and a galactic civilization." In Russia he lived with his wife and small daughter in a four-room flat, without a car, always struggling to find food on the shelves in the grocery. In Baytown he and his wife, also an engineer at Exxon, have a combined income of $65,000, which affords them a four-bedroom house with a swimming pool, two cars, a Christmas vacation in Hawaii, membership at a health spa, frequent evenings out with friends at restaurants and theaters.

Bleyzer's neat, windowless cubicle has gray carpeting, black file cabinets, a wall of green chalkboard covered with mathematical equations. A poster over his desk states, "This year in Russia it is still against the law to say 'Next year in Jerusalem' " (a traditional Jewish toast). "For a Jew there is no future in the Soviet Union," he says.

But how different is the Soviet bureaucracy from the bureaucracy of the immense, 177,000-employee Exxon Corp.?

Bleyzer's comparison is prompt and pointed: "Here the horizons are so much wider. It's all up to you. You can leave your area of specialization. In Russia an electrical engineer is always an electrical engineer. At Exxon I've also worked as a chemical engineer because I wanted to develop my expertise. At a big corporation like Exxon I can get a view of what can happen in 5 or 10 or even 20 years." But there are cultural barriers to overcome, such as learning the right moment to walk into your boss' office and how to dress. "Here you wear a different set of clothes every day while in Russia you wear the same outfit for a week," he says.

The Bleyzers are the only Russian family living in Baytown. Most of the Russian community lives in southwest Houston. "It was our conscious decision," says the young engineer. "I felt we would make a faster transition away from the environment of the Russian community in Houston."

Surely a country is mindless to lose such people. Surely a country is fortunate to receive them.●

POSITION ON H.R. 4677 PROVISIONS

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. HOLLENBECK. Mr. Speaker, I rise to clarify my position over several provisions contained in H.R. 4677, legislation introduced by my colleague from Pennsylvania, Mr. ERTEL. Although I am a cosponsor of the measure, I find I have objections over several specific sections of the bill.

Shortly after introduction, my office received a number of inquiries from businesses and individuals concerning the two sections repealing the deferral of income of Domestic International Sales Corporations (DISC) as well as repealing the deferral of taxation of undistributed profits of U.S. companies operating through foreign subsidiaries. After carefully examining the concerns and information provided, I find I have reservations over the enactment of the aforementioned provisions of H.R. 4677.

Let me take this opportunity to clarify my views. The importance of DISC is illustrated by the fact that U.S. companies have verified impressive statistics on the growth of exports as well as the important role these exports play in company employment opportunities. The repeal of these two sections will place an additional hardship on U.S. companies that have extensive foreign transactions. In addition, the revenue raising provisions of this bill, with exception of those pertaining to oil, will do little to significantly impact the Federal deficit. This circumstance coupled with the positive effect DISC and the deferral of taxation on undistributed profits has on U.S. competitiveness abroad makes it unwise at this juncture to repeal this tax language. I believe it is imperative that U.S. industries remain competitive in the world market and these provisions do promote competitiveness and growth in exports. Furthermore, it should be noted that in the recently completed General Agreement on Tariffs and Trade (GATT) Council on Credit Terms it was tentatively agreed that there was no need to repeal DISC to remain consistent with international trade policy.

Much of the same rationale in support of DISC can be applied to a discussion on the deferral of taxation on the undistributed profits of U.S. companies operating through foreign subsidiaries. This tax deferral also encourages the growth of exports which permits U.S. industry to retain its competitive edge further leading to an increased capacity for additional growth in international sales. It is imperative that we guard against putting American companies at a disadvantage with the recognition that their foreign competitors are not subject to such tax regulation.

Finally, Mr. Speaker, I want to reiterate that my concerns as discussed above do not alter my strong support for the bill's provisions calling for the repeal of an estimated $7.8 billion in tax breaks for oil and oil-related industries. During floor and conference consideration of the Tax Incentive Act of 1981 (Public Law 97-34), I indicated my strong opposition to new tax reductions for the oil industry. These costly incentives, in my view, were a dangerous departure from the original mission of Congress and the administration to arrive at comprehensive and fair tax revisions. I do not believe that the tax reductions for the oil companies have any place as expensive afterthoughts in a multibillion-dollar tax package.

I still stand ready to work with like-minded Members to remove the special tax reductions enacted in Public Law 97-34 to the benefit of the oil industry. Mr. Speaker, it is for this reason I felt it imperative to clarify my views and share them with other Members of the House.●

TRIBUTE TO MANNY BERKOWITZ

HON. ANTHONY C. BEILENSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. BEILENSON. Mr. Speaker, I would like to take the opportunity to pay tribute to Manny Berkowitz on the occasion of his retirement from Government service. I have known Mr. Berkowitz for many years, and I can attest to his unparalleled service with the Small Business Administration, especially in 1980 when he served as Acting District Director of the Los Angeles SBA for 6 months, and in his most recent position as manager of the financial and lending programs at the SBA's Los Angeles office.

Mr. Berkowitz was a small businessman for 17 years prior to his employment with the SBA. His knowledge of small business, along with his intelligence and dedication, enabled him to become an excellent administrator for that agency.

A prime example of Mr. Berkowitz's innovative leadership was his foresight in developing and promoting the guaranteed lending program through banks and private lenders. As a result of his efforts, more than 95 percent of the SBA's present loans in the Los Angeles area are being handled through private lenders.

Because of his special ability to address the concerns of small business as well as those of the larger financial community, Mr. Berkowitz's career serves as a model for Government administrators. His departure from Federal Government service will be a great loss to the SBA and to the public.●

REAGAN ADMINISTRATION AND CIVIL RIGHTS

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. EDWARDS of California. Mr. Speaker, as chairman of the House Judiciary Subcommittee on Civil and

Constitutional Rights, I have the dubious distinction of observing at close range the Reagan administration's retreat from the struggle for equal rights and opportunity for all Americans. I am, of course, committed to doing my utmost to assure that the Federal Government enforces the laws enacted by Congress to win this struggle. But, lest anyone believe that this goal and the program of the Reagan administration are not fundamentally at odds, I urge my colleagues to read the following two items. The first is an editorial which appeared in the Los Angeles Times last week. The second is a column written by my esteemed colleague, Representative PATRICIA SCHROEDER. Representative SCHROEDER's column on the Reagan administration's "Sorry Record on Women's Rights" appeared recently in the Los Angeles Times.

THE UNRAVELING FABRIC

In the last quarter-century, court decisions, congressional actions and presidential orders have painstakingly designed a fabric of civil-rights laws and practices to provide minorities and women with equal access to education, jobs and the political process. The Reagan Administration is unraveling that fabric.

There has always been a need for strong federal leadership in this area—at first because entrenched forces opposed the basic principle that blacks have the same unalienable rights as whites, and more recently because even well-intentioned people disagree on the methods through which equal opportunities should be opened to blacks, Latinos, other minorities and women.

Although there remains a need for this strong leadership, the Reagan Administration seems bent on reducing the government's role in securing and maintaining these rights. The Administration should, of course, examine old laws and existing agencies to see whether they are still necessary and, if so, whether they are performing effectively. But some of the Administration's recent proposals are disturbing. For example:

The Labor Department is backing away from requiring many of the federal government's small contractors to submit written plans outlining their hiring and promotion practices. These are the employers who often provide the entry for women and minorities into the job market.

President Reagan has named as new head of the Equal Employment Opportunity Commission William M. Bell, who runs a small job-placement service in Detroit and seems to lack the experience necessary to administer a major agency. Key civil-rights organizations oppose Bill's appointment.

The Department of Education is seeking to relax various sex-discrimination provisions, in part by reducing the number of schools to which they would apply.

The Office of Management and Budget is "definitely interested" in a House Republican plan to consolidate civil-rights enforcement into the Justice Department. That plan would mean abolishing the Labor Department's Office of Federal Contract Compliance, which monitors federal contractors' performance in hiring and promoting women and minorities.

Reagan delayed his endorsement of the Voting Rights Act extension, and even then said that he would accept some amendments that could seriously weaken the act.

And, finally, the dismissal of Arthur S. Flemming as chairman of the U.S. Commission on Civil Rights removes an advocate who has not been afraid to challenge any Administration on lax enforcement of laws on fair housing, school integration and other concerns of minorities and women.

The very same day he was fired, Flemming told reporters that he thought the Administration was headed in the wrong direction on affirmative action. "In our judgment," he said, "there is situation after situation in both the private and public sector where you're not going to achieve equal employment opportunity unless you use the management tool of affirmative action."

His replacement, Clarence M. Pendleton, president of the San Diego Urban League, has a much more restricted view of government's role. Although other black leaders are reluctant to criticize him publicly, they are not doing handstands about his appointment. They know the need for leadership at the commission, and they fear that Pendleton will not provide it.

Discrimination may be more subtle now than it was 25 years ago, but it is still very much alive. Rather than a retreat in the fight against this discrimination, the country needs vigorous government leadership and law enforcement.

[From the Los Angeles Times, Nov. 3, 1981]

A SORRY RECORD ON WOMEN'S RIGHTS

REAGAN GOES BACK ON HIS CAMPAIGN PROMISE IN A BIG WAY

(By PATRICIA SCHROEDER)

Ronald Reagan was the only major presidential candidate in the last two elections to oppose the Equal Rights Amendment. While insisting that he supported equal rights for women ("little 'e'" and "little 'r'"), he said that the ERA was not needed because he would push for legislation to advance these rights.

To back up that promise, he issued a "white paper," which stated that he "supports the enforcement of all equal-opportunity laws, and urges the elimination of discrimination against women . . . (and) therefore pledges vigorous enforcement of laws to assure equal treatment in job recruitment, hiring, promotion, pay, credit, mortage access and housing."

But, in his nine months in office, the President not only has failed to make good on his campaign promise, he also has moved in precisely the opposite direction. The only exception has been his appointment of Sandra D. O'Connor to the U.S. Supreme Court, in fulfillment of another campaign pledge. It is clear that Reagan is actively opposed to programs designed to further or protect women's rights, and that his Administration has all but declared war on women. Here is what the Reagan record shows:

Economics

Earlier this year, the President sought the elimination of the $122 minimum benefit for recipients of social security, a proposal that would have had a disproportionate effect on women. All but 700,000 of the persons who receive minimum benefits are women. The proposal was withdrawn after a storm of protest.

The economic package that Reagan pushed through Congress last summer reduced or eliminated benefits for nearly three-quarters of a million recipients of Aid to Families with Dependent Children and prohibited AFDC recipients from owning more than $1,000 worth of assets, half the amount that used to be allowed. Work incentives have been eliminated; consequently, poor women will be forced to choose between keeping their jobs and losing needed additional income or quitting to go on welfare and thereby increase their income. (Eighty percent of all AFDC recipients live in households headed by women.)

Sex discrimination

The Justice Department has abandoned the use of any numerical or statistical formulas in connection with affirmative action, thereby rendering equal-employment goals (for minorities as well as women) meaningless. The Labor Department has proposed reducing by 75 percent the number of companies that must make written reports and outline recruitment procedures; as a result, most federal contractors will have less incentive to hire and promote women.

In a move apparently aimed at weakening the Labor Department's Women's Bureau, the primary office charged with promoting equal opportunity for women in the job market, its staff was reduced 28 percent. By contrast, across-the-board staff reductions in the department amounted to only 5.5 percent. Similarly, Reagan has left vacant three of the five seats on the Equal Employment Opportunity Commission, the chief federal enforcer of Title 7 of the Civil Rights Act of 1964, which prohibits discrimination in employment. The commission thus lacks a quorum and is limited in the action it can take. At the same time, the Justice Department is seriously considering abolishing class-action discrimination suits.

Other Reagan Administration proposals would affect Title 9 of the Education Amendments Act of 1972, which bans sex discrimination in schools that receive federal aid. The Education Department has proposed narrowing the scope of Title 9 to specific programs receiving direct federal aid; these account for only 4 percent of the $13 billion in federal funds spent on schools. Vice President George Bush announced in August that his Task Force on Regulatory Relief has targeted for review regulations that protect women from sexual harassment and discrimination in college athletics.

Appointments

Here the President's record is nothing short of dismal. Only 44 of the 398 top-level appointments have gone to women. And the appointments have reflected Reagan's attitudes toward women. For example, Anne M. Gorsuch, head of the Environmental Protection Agency, is well-known to women's groups for her efforts while serving in the Colorado Legislature to dismantle the State Commission on Women. For jobs with particular significance for women, the President named Rex Lee, a leading opponent of the ERA, as solicitor general and Dr. C. Everett Koop, an active opponent of abortion, as surgeon general. Another appointee, Donald J. Devine, director of the Office of Personnel Management, eliminated abortion coverage from all federal employee health-insurance plans. (The decision was struck down by a U.S. district court but is being appealed; meanwhile, Devine has agreed to permit coverage for abortions in a small percentage of the plans.)

The President has yet to appoint a single women to the federal district or circuit bench or to fill the White House post that oversees the intergovernmental Task Force on Women.

One may quibble with some of these examples. Not every program, just because it

seems beneficial to women, is worth maintaining. We need to scrutinize all federal spending as we try to balance the budget.

But here's no question that President Reagan, instead of fulfilling his campaign promise, is moving to weaken, cut back or abolish just about every federal program, law or office designed to advance women.

(Patricia Schroeder (D-Colo.) is co-chairwoman of the Congresswomen's Caucus.)●

VOLUNTEER FIREMAN CELEBRATES 50TH ANNIVERSARY

HON. DON BAILEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. BAILEY or Pennsylvania. Mr. Speaker, John H. Simon is celebrating a very special 50th anniversary. He has been a volunteer fireman for the West Newton Volunteer Fire Department for fully one-half century now.

John, 72 years of age, is still an active member of the department, still driving the firetruck, still fighting fires in West Newton and neighboring communities. John's service to his community has been exemplary and, as often goes the life of a firefighter, he has placed his own life on the line so that other people and their property will be safe from the ravages of fire and natural disaster.

When we hear the President call for a new voluntarism in our Nation, when we hear him speak of the neighborliness of small communities, when we hear him talk of hands being extended to help others, we pause and wonder if he had John Simon in mind as an example.

I am very proud to join the citizens of West Newton and all of John's friends in honoring him on this very great occasion. John has been a quiet but important leader of West Newton. The service he has given to his town and his neighbors can never be repaid. Only in the hearts of those he has served is a true testimonial written. I only wish to add my humble congratulations to the many John has received, and ask a blessing that I be permitted to participate on the 100th anniversary of John's community service, knowing full well that the spirit of men like John continue in towns like West Newton far beyond our ability to recognize and acknowledge them.●

SHUTTLE'S CORK FROM PORTUGAL

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. COELHO. Mr. Speaker, as the only Portuguese Member of the House, I am proud that the country of my native heritage was able to contribute to the success of our recent space mission. The second flight of the *Columbia* Space Shuttle was something that the entire world will benefit from, and it certainly added to my sense of pride in the scientific boldness of the United States. It is gratifying that this effort was joined by other nations of the world, and I take particular pride in the fact that the 497 pounds of cork that insulated the *Columbia*'s huge external fuel tanks was taken from the bark of 225 cork trees in Portugal. Mr. Speaker, I would like to share with my colleagues the following article which describes Portugal's important contribution to the Space Shuttle program.

[From the New York Times, Nov. 3, 1981]

SHUTTLE'S CORK FROM PORTUGAL

CAPE CANAVERAL, FLA., November 2.—The space shuttle Columbia's huge external fuel tank is partly insulated by 497 pounds of cork taken from the bark of 225 cork oak trees in Portugal.

The cork is mixed with other material to insulate the 154-foot tall tank, which carries supercold liquid hydrogen and oxygen for the shuttle's three main engines.

The tank is the only segment of the shuttle that is not re-used. It will be jettisoned at an altitude of 70 miles and will fall in pieces into the Indian Ocean.

The tank is built by the Martin Marietta Corporation at Bay St. Louis, Miss. The company bought 45,000 pounds of cork for a series of external tanks and numerous ground tests.

Arthur Dodge, a spokesman for the Cork Institute of America, said the basic reason for the use of cork on the whole system is that "when the unit is going out, it reaches a certain speed where friction is generated high enough that it gets hot and the cork protects against that."

The cork's light weight compared with other insulating materials was also a major factor in its selection. In addition to providing insulation, Mr. Dodge said, cork burns at a uniform speed, carrying heat away from the rocket while it disintegrates.

Leslie Lieber of the Cork Institute of America said the cork used on the space shuttle came from 225 trees in Alentejo, Portugal that were especially set aside for the shuttle.●

SOVIET MILITARY EXPERTS WILLIAM F. AND HARRIET F. SCOTT—PART II

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. McDONALD. Mr. Speaker, in this part II, Mr. and Mrs. Scott continue their discussion with Dr. Eugene Griessman on the Soviet military threat to this Nation. In this part the Scotts discuss the possibility of war with the United States and how it might occur. Part I appeared in the CONGRESSIONAL RECORD of November 20, 1981, on pages E5472 and E5473. I commend part II to the thoughtful attention of my colleagues.

The Soviets for the first time are building two or three very big aircraft carriers. Why?

Dr. SCOTT. The first big effort of the Soviets after World War II was to neutralize the U.S. strategic nuclear power. First they had to break what they said was the U.S. nuclear monopoly. So in the '50's and throughout the '60's, they concentrated primarily on building up a strategic nuclear force. Once that program was going and well along, they then turned attention to building up their theater forces—combined armed forces, both conventional and nuclear—because the theater forces might be required to fight in either a nuclear or a nonnuclear environment. They built up those forces. When in the '50's we went into Lebanon, we were not particularly worried about anything the Soviets were doing or might do because we had superior strategic nuclear power. In 1962 the Soviets withdrew from Cuba because we had superior strategic nuclear power.

Okay. So they matched that.

Dr. SCOTT. So they matched that. Then the next task was to have sufficient combined armed forces, both nuclear and conventional, so that they could handle anything comfortably with respect to China or NATO. Once they had those two tasks taken care of, then the third area was to project military power. And that's the area that they're going into now and that's where the carriers become——

Project military power. For the layman, what does that mean?

Dr. SCOTT. We have been able to project military power with our Navy and with our aircraft. An example of projection of power would be the rapid-deployment force that we are talking about moving into the Persian Gulf. That is projection of power. In fact, we projected power during World War I when we put armed forces in France. We did the same thing in World War II. We probably had the greatest capability the world has ever known for the projection of military power, as witness—what we did in Southeast Asia, what we did in the Pacific, and then with the forces we put into the European theater.

Do we have anything in production to match the Backfire—the Soviet's long-range aviation aircraft? Do we need anything?

Dr. SCOTT. If we do, it is the best-kept secret in the U.S. People keep thinking we have something up our sleeves. We probably have some R and D [research and development] coming along. Yes, we need them because they can be dispersed.

Do we have anything to match their SS-18's, which I understand are the largest ICMB's in the world with twice the throw weight of the Titan? Do we have anything like that?

Dr. SCOTT. As before, it would be the best-kept secret in the——

We have nothing like it? Do we have anything on the drawing board? We must.

Dr. SCOTT. You could talk about the MX, but that, of course, is a little different category.

Do we need to match the Soviets weapon for weapon?

HARRIET SCOTT. No. We have different problems.

Could you elaborate?

Dr. SCOTT. The U.S. Army must be designed to move out of this country and fight overseas—that is, the U.S. Army is not designed to fight Canada or Mexico. It has to be formed, organized, and equipped so that is can move out and deploy wherever it might be needed in the world. The Soviets traditionally have been fighting either on

their borders, inside the country, or immediately outside. They have a completely different problem in designing forces. They have not even thought, until fairly recently, of designing forces that could be lifted by ship or by aircraft to fight battles thousands of miles away, together with the logistical support that goes with it.

And you think, that the building of these new aircraft carriers signals a change in their thinking?

Dr. SCOTT. Yes. It has come out in their writings where they talk about the external role of the Soviet armed forces.

I read that the Soviet Union's heavy bomber force is small, yet it can easily be augmented by various medium-to-long-range bombers or even by cargo aircraft. The reason is simple. Soviet aircraft seeking to drop bombs in the United States do not need speed, low-altitude, or deception to counteract American air defenses because none exist. Do we have any defenses?

Dr. SCOTT. We have a very limited air defense. It's very limited. You will note that aircraft taking off from Latin America loaded with marijuana and cocaine and so on do not have any trouble coming into the country.

One article I've read suggests a scenario of nuclear attack different from the one I've grown up with. That scenario is that the Soviets would not wipe out large segments of the civilian population or destroy the economy. Their nuclear strike objective is to destroy our nuclear weapons and leave our economy intact so that there would be very little loss of life in relative terms in their initial strike. Do you accept that scenario?

HARRIET SCOTT. No. Our nuclear weapons come first because that's what can hurt them; however, if they left our industry intact we could continue fighting.

I understand that our strategy is not the same as theirs, that our missiles are not directed at their missiles but are aimed at population centers like Moscow and the industrial sector. Is that your understanding?

Dr. SCOTT. I'd rather not comment at all upon our own targeting. Should a nonnuclear war start between NATO and the Warsaw Pact, Soviet doctrine calls for going after our nuclear weapons even though nuclear weapons are not being used.

Who has satellite superiority in terms of nuclear weapons linked to satellites? Is there any unclassified evidence of that? Do we have satellites that are nuclear armed?

Dr. SCOTT. There's an agreement on that.

Do you feel that there are none [armed satellites]?

Dr. SCOTT. I would imagine that the Soviets would be taking a tremendous risk to break a treaty that is supposed to be that binding.

HARRIET SCOTT. We know every scrap of stuff that goes up.

This would be one agreement the Soviets have kept?

Dr. SCOTT. Agreements that are in their own best interest they will sign. They have a different concept maybe of keeping an agreement than we have.

Do you believe that the Soviets have submarine superiority in terms of tactical ability?

Dr. SCOTT. I have enough confidence in the U.S. Navy and in our equipments, submarine for submarine, and in our tactical ability——

HARRIET SCOTT. But they have a whole class we don't have.

Dr. SCOTT. They are moving ahead. We keep stuff on the drawing board. They are producing it.

That's the question I wanted to ask. They have a submarine that presumably can go as low as 2,000 feet, with a titanium hull. We apparently don't have anything like that. Is that correct?

Dr. SCOTT. Again, if we have anything approaching that, no one knows about it.

Now, this ties in very much with your own research. Why is it that something a Soviet writer wrote 10 or 15 years ago is valid today?

HARRIET SCOTT. Well, you look to see if they have built the weapons systems that are consistent with the strategy that they wrote about earlier. When they first wrote about the nuclear battlefield . . . in 1960, they then proceeded to build weapons that were capable of fighting in a nuclear battlefield. And that was one way you could prove that they were writing about what they were doing.

Dr. SCOTT. We have at least several hundred books all saying the same thing. We looked at the books that the young men use for training manuals, the textbooks in their schools. We looked at everything, and they all say the same thing. It's outlined: where they were going in the '60's, what they were doing, how they were doing it.

Could you summarize what the Russians say they are going to do?

Dr. SCOTT. No. If you had asked that question 10 years ago, or even eight years ago, we could have brought out book after book, paragraph after paragraph, all saying the same thing. Today they are very, very cautious. They know that we are reading what they are writing and they are not saying nearly as much now, within the last three or four years, as they were saying previously.

Do you look for a decisive collision between the super powers or should we look for limited wars?

Dr. SCOTT. If we continue going downhill, we could get so weak that the Soviets would think it was relatively safe to strike, have the final collision with the leading capitalist power and get it over with. [But] if we maintain reasonable defenses and if we have a moderate buildup in our defense posture, then we can prevent the massive clash between the two systems.

If you were to pick places where limited wars would occur, what would you pick as say, one, two, three, four—just briefly.

HARRIET SCOTT. More likely Africa, I should think.

What about Central America?

HARRIET SCOTT. Usually there's an economic reason for a limited war. And there's more there [South Africa] I would say, than there is in Central America.

Do you think that nuclear war between the U.S. and the Soviet Union is likely in the next five years?

HARRIET SCOTT. An all-out war isn't likely within the next five years, unless perhaps our oil was cut off and we started going downhill economically. It [oil shortages] would create such tensions in the world that the outcome would be uncertain.

In an all-out war between the Soviet Union and China, who do you think would win?

HARRIET SCOTT. I just don't see that they could kill off a billion Chinese.

Dr. SCOTT. The Soviets might win, but the Chinese would not lose.

In a nuclear war between ourselves and the Soviet Union at this time, who would win?

Dr. SCOTT. That would be dependent upon who launched first.

If the Soviets launched first, would they win?

HARRIET SCOTT. If the Soviets launched first, they would win.

If we launched first.

Dr. SCOTT. We might survive.

We would not win?

Dr. SCOTT. It would be hard for us to win. But the Soviets, though, have a problem that I'm very glad we don't have. If the Soviets are damaged in a nuclear war, suppose that they destroy us but we are able to retaliate and seriously weaken the Soviet Union, then you would have the Chinese ready to move in, you would have Eastern Europe ready to rise up.

You'd have restless autonomous regions of the Soviet Union that would break away.

Dr. SCOTT. You surely would.

HARRIET SCOTT. And Estonia, Latvia, and Lithuania would probably declare themselves independent the next day.

Dr. SCOTT. The Soviet Union does not have a friendly neighbor except possibly Bulgaria. And so if they are weakened, and I think they know this, if they are weakened in a nuclear exchange, then the Chinese, Western, Eastern Europe, all the rest will be watching closely.

HARRIET SCOTT. They would dismantle them?

Dr. SCOTT. They would be ready to dismantle them. If the U.S. is injured in a nuclear strike, I feel, and this is one of Western civilization's strong points, that our good neighbors would—I think—be sympathetic and I would expect that if Western Europe, again assuming an exchange just between the U.S. and U.S.S.R. and that we are damaged, would have a Marshall Plan in reverse, and would come to our aid the best they could and then our good friends to the north and south.

Is there any way out of this unending circle [arms buildup]? They [Soviets] build more bombers and more missiles, we build more bombers and missiles. Does it ever end? Do you have any thought about how it might end?

Dr. SCOTT. Even though common sense says it will not happen, being human and being eternally optimistic, we think maybe somewhere they will see it's not getting them anywhere and they will stop building.

HARRIET SCOTT. It has kept the peace for 35 years in the big sense.

What, by being strong? The arms race has kept the peace for 35 years?

Dr. SCOTT. Careful, careful!

Say it if you think it.

HARRIET SCOTT. Yes, I think so.●

FUEL CELLS PROMISE BRIGHT FUTURE

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. AuCOIN. Mr. Speaker, one of the first field tests in the Nation of a 40 kW natural gas fuel cell will begin in Portland, Oreg., early next year. The Portland testing is part of the 40 kW onsite fuel cell field test project, sponsored by the Gas Research Institute and the Department of Energy, involving utilities throughout the Nation and Japan.

The advantages of fuel cells to consumers, utilities and the environment

abound. Fuel cells generate electricity and heat from natural gas and air with virtually no pollutant emissions. Energy losses, are minimized by the high energy-conversion efficiencies that can be achieved. With cogeneration, fuels cells can provide energy efficiencies of over 80 percent compared to the 38 percent maximum efficiencies provided by conventional powerplants. Fuel cell generators are quiet, quick to install and can be located in close proximity to the user. This lowers transmission costs, cuts energy losses, and means additional dollar and energy savings for both consumers and utilities.

For these reasons, it is with great expectation that I await the installation of the first onsite test fuel cell at Rawlinson's New System Laundry in Portland, Oreg. I am enthusiastic about the potential of fuel cells to contribute to our national energy supply and urge my colleagues to support the further research and development of this exciting power source.

With continued cooperation on the part of both government and private industry, the day rapidly approaches when the benefits of fuel cell technology—clean and efficient energy production—can be fully realized.●

LIST OF KEY VOTES

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. PEASE. Mr. Speaker, it has become my practice to periodically list in the CONGRESSIONAL RECORD the key votes I have cast in the U.S. House of Representatives.

This list of my key votes is arranged as follows: Each item begins with the rollcall number of the vote, followed by the number of the bill or resolution, and a description of the question on which the vote was taken. This is followed by my own vote on the issue. Finally, the vote of the entire House of Representatives is indicated by passed or failed followed by the yea/nay vote totals.

The list printed here includes key votes taken between July 9, 1981, and November 24, 1981.

LIST OF KEY VOTES OF CONGRESSMAN DON J. PEASE, 97TH CONGRESS, 1ST SESSION

(115) H.R. 3519. Amendment to prohibit expenditure of funds for MX missile system until both Houses of Congress have adopted a resolution approving the system selected by the President. Yes. Failed 201-207.

(117) H.R. 3519. Amendment to delete $2.4 billion for development of the MX missile system. Yes. Failed 96-316.

(127) H.R. 3975. Bill to facilitate the production of oil from tar sands on Federal lands. Yes. Passed 416-0.

(129) H.R. 3519. Amendment to permit U.S. Armed Forces personnel to participate in certain circumstances in drug seizures or arrests outside the land area of the United States. No. Passed 248-168.

(134) H.R. 3519. Amendment to delete provisions requiring selective service registrants to provide their social security numbers and allowing for the Departments of Defense, Treasury, and Health and Human Services to share names and addresses of registrants. Yes. Failed 125-290.

(136) H.R. 3519. Amendment in the form of a substitute to direct the President to submit to Congress his recommendations for improving efficiency and management in the Defense Department and for eliminating waste, fraud and abuse. Yes. Passed 416-0.

(137) 3519. Amendment to prohibit funding for research and development, testing or procurement of F-18 fighter aircraft. Directed that $3.1 billion in the bill for that program be made available for other Navy and Marine aircraft programs. Yes. Failed 101-316.

(139) H.R. 3519. Amendment to prevent any armed service from signing a contract of more than $50,000 to buy any civilian cars or light trucks not made in the United States or Canada without legislative authority. Yes. Passed 213-187.

(140) H.R. 3519. Bill to authorize $136.1 billion for Defense Department weapons procurement, military research, operations and maintenance, and civil defense in fiscal 1982. Yes. Passed 354-63.

(142) H. Res. 177. Adoption of a resolution calling on President to develop and implement a nuclear nonproliferation policy and fully implement the 1978 Nuclear Non-Proliferation Act. Yes. Passed 365-0.

(145) H. Res. 181. Motion to adopt a resolution that the House "strongly urges that the necessary steps be taken to insure that social security benefits are not reduced for those currently receiving them." Yes. Passed 405-13.

(146) H.R. 4034. Amendment to cut appropriations for the National Science Foundation from $1.06 billion to $995 million. No. Failed 152-264.

(147) H.R. 4034. Bill to appropriate $626 billion, $600 million less than President Reagan requested, for Department of Housing and Urban Development. Yes. Passed 362-54.

(153) H.R. 4035. Bill to appropriate $11.1 billion, $77 million less than President Reagan requested, for Interior Department and related agencies. Yes. Passed 358-46.

(156) H.R. 4144. Amendment to delete $189 million for the Tennessee-Tombigbee Waterway project. Yes. Failed 198-208.

(159) H.R. 4144. Amendment to cut $4 million for the Garrison Diversion water project in North Dakota. Yes. Failed 188-206.

(161) H.R. 4144. Amendment to cut $228 million for the Clinch River nuclear breeder reactor. Yes. Failed 186-206.

(163) H.R. 4144. Bill to appropriate $13.2 billion, $220 million less than President Reagan requested, for energy and water development programs. No. Passed 244-104.

(166) H.R. 4119. Bill to provide $22.7 billion, $1.1 billion less than President Reagan requested, for Agriculture appropriations. Yes. Passed 343-33.

(167) H.R. 1311. Bill to establish a "U.S. Travel and Tourism Administration" within the Department of Commerce and authorize $6.5 million for tourism programs. No. Passed 321-98.

(168) H. Con. Res. 160. Motion to express "the sense of the Congress" in opposition to destructively high interest rates and encourage the Federal Reserve to lower interest rates. Yes. Passed 403-17.

(176) H.R. 4242. Amendment in the form of a substitute that would provide for a 1-year tax cut to favor taxpayers earning less than $50,000 per year and targeting business and investment tax incentives. Yes. Failed 144-288.

(177) H.R. 4242. Amendment in the form of a substitute to adopt the Reagan tax cut bill rather than the committee approved version. Provides large business and investment tax incentives, an individual cut of 25 percent over 3 years, and indexing. No. Passed 238-195.

(182) H.R. 4121. Amendment to prevent use of Federal funds under the Federal Employees Health Benefit program for abortions, except when the life of the mother is endangered. No. Passed 253-167.

(185) H.R. 4121. Bill appropriating $9.7 billion, $120 million less than President Reagan had requested, for operations of the Treasury, Postal Service, and General Government. Yes. Passed 323-94.

(189) H.R. 4331/H.R. 3892. Bill to restore minimum social security benefits that had been ended by the administration's budget reconciliation bill. Yes. Passed 404-20.

(191) H.R. 4169. Amendment to prevent Justice Department from requiring communities to accept subsidized housing as part of its enforcement of the 1968 fair housing law. No. Failed 188-202.

(192) H.R. 4169. Amendment to prevent Justice Department from using appropriated funds to block voluntary prayer and meditation in public schools. Yes. Passed 333-54.

(193) H.R. 4169. Amendment to delete $241 million for the Legal Services Corporation. No. Failed 122-272.

(194) H.R. 4169. Bill to appropriate $8.7 billion, $77 million less than President Reagan requested, for operations of the Departments of State, Justice, and Commerce, and related agencies. Yes. Passed 245-145.

(203) H.R. 4304. Adoption of final bill appropriating $60.7 billion, $2.5 billion less than President Reagan requested, for the Department of Housing and Urban Development and 20 related agencies. Yes. Passed 209-197.

(206) H.J. Res. 325. Joint resolution providing interim funding authority to Nov. 1, 1981, for certain Federal agencies whose appropriations had not yet become law. Yes. Passed 281-107.

(207) H.R. 4241. Bill to appropriate $6.9 billion for military construction projects in fiscal 1982. Yes. Passed 382-24.

(211) H.R. 3518. Bill to authorize 1982 and 1983 programs of the State Department, the International Communication Agency, and the Board for International Broadcasting. Yes. Failed 165-226.

(219) H.R. 4. Intelligence Agent Identities Protection Act to make it a crime to disclose names of certain U.S. intelligence agents even if the information is already public knowledge. No. Passed 354-56.

(223) H.R. 1520. Bill to authorize $1.08 billion for the National Science Foundation. Yes. Passed 262-149.

(224) H.R. 3210. Bill to authorize $3.1 billion in fiscal 1983 for interstate highway construction. Yes. Passed 377-25.

(232) H. Res. 208. Resolution disapproving action of the District of Columbia Council in revising criminal penalties in certain sex-related offenses. Yes. Passed 281-119.

(233) H.R. 4612. Bill setting dairy price supports until November 15, 1981. Yes. Passed 328-58.

(242) H.R. 3112. Bill to extend key enforcement provisions of the 1965 Voting Rights Act. Yes. Passed 389-24.

(248) H.R. 4560. Motion to recommit appropriations bill for Labor and Health and Human Services Departments to committee. No. Failed 168-249.

(252) S. 1181. Adoption of final bill authorizing $4.5 billion for military pay raises. Yes. Passed 417-1.

(253) H.R. 3603. Amendments to reduce by $1 billion the committee-approved outlays for certain farm programs. Yes. Passed 400-14.

(254) H.R. 3603. Amendment to set minimum dairy price support level and allow supports to rise to a minimum of 75 percent of parity in fiscal 1983. No. Failed 123-277.

(257) H. Con. Res. 194. Resolution disapproving sale of AWACs radar planes, F-15 aircraft and other military equipment to Saudi Arabia. Yes. Passed 301-111.

(260) H.R. 3603. Amendment to repeal the poundage quota and the acreage allotment system for growing peanuts and eliminate specific loan rate for peanuts. Yes. Passed 250-159.

(261) H.R. 3603. Amendment to end the price supports program for sugar. Yes. Passed 213-190.

(271) H.R. 3603. Amendment to repeal the tobacco allotment system and tobacco price support loans. Yes. Failed 184-231.

(278) S. 884. Final approval of the Food and Agriculture Act, reauthorizing for 4 years farm program price supports and food stamps. Yes. Passed 192-160.

(282) H. Res. 251. Resolution changing House of Representatives rules to increase the amount of outside income Congressmen may earn from 15 percent to 40 percent of official salaries, and to increase the limit on individual honorariums from $1,000 to $2,000. No. Failed 147-271.

(283) H.R. 4603. Bill to provide expanded financial aid to troubled savings and loan institutions. No. Passed 371-46.

(285) H.R. 4437. Bill to extend daylight saving time by 2 months by starting it the first Sunday in March. No. Passed 243-165.

(289) S. 1193. Bill to authorize $2.9 billion in fiscal 1982 and $2.8 billion for fiscal 1983 for operation of the Department of State. Yes. Passed 317-58.

(290) H.R. 3464. Bill to prohibit construction of U.S. naval vessels in foreign shipyards except where the President determines. Yes. Passed 366-21.

(291) H.R. 3502. Bill to mandate guidelines for increased coordination and sharing of Veterans' Administration and Defense Department medical facilities. Yes. Passed 386-0.

(297) H.R. 4035. Motion to recommit to conference the Interior appropriations bill containing $7.5 billion. No. Failed 199-199.

(302) H.J. Res. 357. Motion to recommit continuing appropriations bill with instructions to committee to cut 5 percent from discretionary spending except for defense, social security, veterans' medical care, and food stamps. No. Failed 189-201.

(303) H.J. Res. 357. Resolution to provide funding authority for Federal Government agencies for the period November 20, 1981 through September 30, 1982. Yes. Passed 195-187.

(309) S. 815. Adoption of final conference report language authorizing $130.7 billion for Defense Department programs for fiscal 1982. Yes. Passed 335-61.

(311) H.R. 3454. Final bill authorizing secret amounts of funding for U.S. intelligence operations for fiscal 1982. Yes. Passed 379-22.

(312) H.R. 4522. Final bill authorizing Federal funds of $557 million, $13 million less than President Reagan's request, and local funds of $1.9 billion, the same as President Reagan's request, to the District of Columbia. Yes. Passed 228-174.

(315) H.R. 4995. Amendment to delete $1.8 billion for B-1 bomber. Yes. Failed 142-263.

(316) H.R. 4995. Amendment to delete $1.9 billion for Air Force's research, development and testing of the MX missile basing system. Yes. Failed 139-264.

(319) H.R. 4995. Amendment to exempt spare parts and ammunition from proposed 5 percent cut of another amendment. Yes. Failed 197-202.

(320) H.R. 4995. Bill to appropriate $197.4 billion, $3.5 billion less than President Reagan's request, for Department of Defense programs in fiscal 1982. Yes. Passed 335-61.

(321) H. Con. Res. 224. Concurrent resolution expressing Congressional support for President Reagan's November 18, 1981, proposals for limiting strategic and intermediate range weapons. Yes. Passed 382-3.

(322) H.R. 3413. Final bill to authorize $5.1 billion for national security programs of the Department of Energy in fiscal 1982. Yes. Passed 335-55.

(325) H.R. 3663. Bill reducing Government regulation of intercity bus industry. Yes. passed 305-83.

(326) H.J. Res. 349. Resolution authorizing U.S. participation in a multinational peacekeeping force in the Sinai Peninsula following Israeli withdrawal in April 1982, and authorizing $125 million as the U.S. contribution. Yes. Passed 368-13.

(333) H.J. Res. 357. Final bill authorizing "continuing appropriations" for Federal agencies through September 30, 1982. Yes. Passed 205-194.●

BULLDOGS AND CRUSADERS CARRY OUT PROUD FOOTBALL TRADITION

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. NELLIGAN. Mr. Speaker, northeastern Pennsylvania has a proud tradition of producing outstanding high school football teams. This tradition breeds fierce competition among area teams, and makes it all the more noteworthy that the two finalists in the eastern conference class A high school competition are both from the 11th Congressional District, which I am proud to represent.

One finalist is Wilkes-Barre's Coughlin High Crusaders, with their spirited young coach, J. P. Meck. Led by a tenacious defense, and a high-powered offense featuring quarterback Nick Volpetti and running back Joe Parsnik, the Crusaders defeated Pottsville High's Crimson Tide 37 to 9 on Thanksgiving Day to gain the finals.

The other finalist is the Berwick High Bulldogs, under the tutelage of Coach George Curry. Led by triple-threat back Keith Seely, who scored 17 points on two touchdowns, a field goal and two extra points, the Bulldogs defeated the visiting Lakeland Chiefs 25 to 11 in a semifinal game last Saturday afternoon.

With their respective victories, Coughlin and Berwick won the right to represent their leagues in the eastern conference class A finals. The game between the once-defeated Crusaders and the undefeated Bulldogs will be played Saturday, December 5, in Berwick.

No matter what the outcome, both teams are to be commended for their outstanding records this season. Their coaches and their players have given the people of Berwick and Wilkes-Barre a just reason for the community pride which has long been associated with winning football teams in our area. I salute both teams, and wish each one the best of luck in the title game next Saturday.●

VETO CANNOT MASK FAILURE OF REAGAN ECONOMICS

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. OBERSTAR. Mr. Speaker, President Reagan's veto of the continuing resolution has given him the confrontation which he sought with Congress. He has vetoed a continuing resolution which would have funded Government activities at a level below the amounts established in Gramm-Latta I and the Omnibus Reconciliation Act signed by President Reagan on August 13, 1981.

This summer, Congress enacted not only the President's budget but also his tax proposal, now labeled a "Trojan horse" by the chastened high priest of Reagan economics, David Stockman. The enactment of his tax bill assures the United States record deficits in the coming fiscal years, with a projected deficit for fiscal year 1982 of $100 billion. President Reagan vetoed the continuing resolution because he said it exceeded his latest budget request—his fourth—by some $2 billion. The projected deficit for this year resulting from his tax bill is 50 times that amount.

President Reagan is obviously trying to divert the legitimate outrage of the American people from the betrayal of their confidence in his economic program by attempting to blame Congress for the failures of that program. The people will see through this gimmick. This past summer, Congress gave the President everything he wanted: Budget, reconciliation, and taxes. So now, faced with the inevitable consequences of the failure of his program, and the notoriety of the apostate Stockman, and the accommodating Allen, the President vetoes an essential Government funding resolution which members of his own party in

the Senate believed he would sign, a resolution which they themselves signed in conference over the weekend.

At this point, there is little doubt that the continuing resolution passed by this House will ultimately hand the President the figures he wants, although I believe we all must expect those figures to change, as they have so many times in the past month as the President struggles to offset the damage resulting from his economic program. Two years ago, GEORGE BUSH, now Vice President, recognized the inherent nature of Reagan economics as "voodoo economics." In the coming months, those Members of this House who still cling to some independent judgment must bear the responsibility of serving as protectors of economic realism in the proceedings of this House.

Mr. Speaker, even if the Congress had given Mr. Reagan dollar for dollar, the exact budget proposal he wanted, we would not have changed the fundamental problem facing the administration and the American people: the deepening failure of the administration's economic program. The Reagan administration persuaded Congress to enact budget and tax proposals based on untried and questionable economic theories for the purpose of lowering the marginal tax rate for the wealthiest of Americans, financing overpriced, unnecessary, and dangerous weapons system, and destroying programs enacted over the past 40 years to address critical national problems.●

COMMUNITY BOARDS: LOCAL GOVERNMENT AT ITS BEST

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 30, 1981

● Mr. BIAGGI. Mr. Speaker, I wish to bring to the attention of my colleagues an example of how local government in New York City, called community boards, has been successful in responding to the needs of local citizens in their area for vital social and human services. Mayor Koch declared last week "Community Board Week" in order to generate public awareness of community boards and how citizens may become involved in their activities. It is both fitting and timely that attention be focused on their work as they provide a vital role for the democratic process at the grassroots level.

Community boards are composed of 30 to 50 citizens who are appointed by elected and at-large members of the city council and the borough president. Appointees serve for a term of 2 years. Each borough is divided into a number of boards, according to population. The Bronx has 12 boards, Queens 14, Staten Island 3, Manhattan 12, and Brooklyn 18 boards. Each board has its own agenda and its daily operations are conducted by a district manager who serves at the pleasure of the board and makes recommendations to the board on issues of direct concern and interest to citizens, including budget matters. The district manager is also responsible for advising board members of the concerns of the local community.

Each community board, which meets once a month, makes important decisions which directly affect the lives of residents within their districts. This includes issues such as renovation of old or abandoned buildings, seeking additional police protection, parking matters, and health services for the community. The fact that the community boards operate for and by the community makes them the proper forum where these issues can be discussed and debated. The multinatured character of New York City lends itself to neighborhoods which are economically, socially, and ethnically diverse, each with its own needs and concerns. The notion of the community boards has helped to foster and support this diversity and lends itself as a stabilizing factor in preserving and protecting these neighborhoods.

In my own 10th Congressional District, community boards are seeking to respond to residents needs in a variety of ways. For example, board 8 is conducting a neighborhood car registration program with the 50th police precinct which will assist in the tracking of vehicles. Board 9 has been actively involved in opposing the establishment of a methadone treatment center, but also is activly involved in soliciting new citizens to assist the board in its work. Community board 10 has planned several outreach tours into senior citizen centers and local public schools to enlighten residents about the role of the community board and boards 7 and 8 are jointly sponsoring an arson awareness seminar to alert residents of the problem and to halt its spread into the community.

These are but a few examples of the kinds of activities that are undertaken by community boards. They are vital units of local government and have lent stability and support to neighborhoods in New York which are seeking to preserve and protect their residents and their services. In an era of diminishing human resources, the links that the community boards provide are essential if we are to continue to address the basic needs of our citizens and insure that ever-shrinking resources are targeted to those who rightly need and deserve them.

In an effort to assist New York City residents in learning more about community board leaders and activities, I am including a list of all community boards and urge interested citizens and organizations to take this opportunity to become involved with them if they have not already done so.

COMMUNITY BOARDS

BRONX

Board No. 1: 384 East 149 St., Bronx, N.Y. 10455; 585-7117; Ms. Carmen Arroyo, Chairperson; Mr. Raymond Cruz, District Manager.

Board No. 2: 953 Southern Blvd., Bronx, N.Y. 10459; 328-9125-6; Sister Thomas, Chairperson; Mr. Peter Contillo, District Manager.

Board No. 3: 1191 Boston Road, Bronx, N.Y. 10456; 589-6300; Mr. Lawrence Burr, Chairperson; Ms. Christine P. Reeves, District Manager.

Board No. 4: 1650 Selwyn Ave., Bonx, N.Y. 10457; 299-0800; Mr. Jose Gonzalez, Chairperson; Mr. Herbert Samuels, District Manager.

Board No. 5: Bronx Community College, Sage Engineering Bldg., Rm. 212, University Ave. & W. 181 St., Bronx, N.Y. 10453; 298-3818; Mr. George P. Golovchenko, Chairperson; Ms. Lorraine Holtz, District Manager.

Board No. 6: 1932 Arthur Ave., Rm. 707, Bronx, N.Y. 10457; 583-2302; Rev. Robert Bonome, Chairperson; Mr. Edwin Martinez, District Manager.

Board No. 7: Lehman College, Poe Center, 2641 Grand Concourse, Bronx, N.Y. 10468; 933-5650; Mr. John O'Toole, Chairperson; Mr. Bernard Englander, District Manager.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, December 1, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

DECEMBER 2

9:30 a.m.

Finance

To hear and consider the nominations of Jules G. Korner III, of Maryland, Perry Shields, of Tennessee, and Meade Whitaker, of Michigan, each to be a judge of the U.S. Tax Court.

2221 Dirksen Building

10:00 a.m.

*Energy and Natural Resources

Business meeting, to resume markup of S. 1484, promoting the development of oil shale resources by revising the authority to lease lands containing oil shale deposits, and other pending calendar business.

3110 Dirksen Building

Environment and Public Works

Business meeting, to mark up S. 1692, providing for the operation, maintenance, and construction of deep-draft channels and national harbors.

4200 Dirksen Building

Foreign Relations

To hold hearings on activities of the International Atomic Energy Agency (IAEA), focusing on its programs of safeguards.

4221 Dirksen Building

10:30 a.m.

Conferees

On S. 884, authorizing funds for fiscal years 1982 through 1985 for commodity price support programs administered by the Department of Agriculture, for agriculture research and conservation, and agriculture exports.

324 Russell Building

1:30 p.m.

Foreign Relations

To hold hearings on the nominations of Kenneth L. Brown, of California, to be Ambassador to the People's Republic of the Congo, and Francis T. McNamara, of Vermont, to be Ambassador to the Gabonese Republic and to serve concurrently and without additional compensation as Ambassador to the

Democratic Republic of Sao Tome and Principe.
4221 Dirksen Building

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building

DECEMBER 3

9:30 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To resume oversight hearings on America's role in the world coal export market, focusing on the domestic coal transportation network.
3110 Dirksen Building

Finance
Health Subcommittee
To hold hearings on competitive contracting for the administration of medicare.
2221 Dirksen Building

Judiciary
To hold hearings on S. 432, establishing the Commission on the International Application of Antitrust Laws.
2228 Dirksen Building

10:00 a.m.
Environment and Public Works
Business meeting, to resume markup of proposed amendments to the Clean Air Act (Public Law 95-95).
1202 Dirksen Building

Foreign Relations
To hold hearings on the Convention on the Prevention and Punishment of the Crime of Genocide, adopted unanimously by the General Assembly of the United Nations in Paris on December 9, 1948 and signed on behalf of the United States on December 11, 1948, (Ex. O, 81st Cong., 1st sess.).
4221 Dirksen Building

Governmental Affairs
Federal Expenditures, Research, and Rules Subcommittee
To hold hearings on an Office of Federal Procurement Policy proposal establishing a uniform procurement system within the Federal Government, pursuant to Public Law 96-83.

To hold hearings on the use of Defense Production Act authorities to stimulate domestic production of titanium.
5302 Dirksen Building

SENATE—*Tuesday, December 1, 1981*

(Legislative day of Monday, November 30, 1981)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Almighty God, Supreme Ruler of the Universe, Thy word declares:

Righteousness exalteth a nation, but sin is a reproach to any people.—Proverbs 14: 34.

We do not hear these words as a threat or a warning, O Lord, but as a simple statement of fact, an inviolate rule of history. Righteousness brings blessing, sin brings a curse; righteousness is constructive, sin is destructive. No civilization or empire has been able to survive the violation of this principle.

Deliver us, O God, from the presumption that we somehow are the exception, that the rule does not apply to us and can be ignored. Protect us against the false and insidious assumption that we can disregard the divine order and get away with it. Help us to see that whatever else we do, repentence for sin and turning to righteousness is the surest way out of our critical situation. Teach us that intransigence toward God's moral order is the surest way to destruction. Help us, mighty God, to take seriously Thy word to Thy glory and to our national preservation. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the standing order, the majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that after the expiration of time allocated to the two leaders under the standing order and the four Senators under the special order entered on yesterday, there be a brief period for the transaction of routine morning business to extend not past the hour of 11:30 a.m., in which Senators may speak for not more than 3 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1982

Mr. BAKER. Mr. President, at the conclusion of morning business, what will the Chair lay before the Senate as the pending business?

The PRESIDENT pro tempore. The Senate will resume consideration of the pending business, H.R. 4995.

Mr. BAKER. Which is the defense appropriations bill.

The PRESIDENT pro tempore. The majority leader is correct.

Mr. BAKER. Mr. President, it is the hope of the leadership that good progress can be made on the defense appropriations bill today. Senators will recall that there was some difficulty with the managers of the bill being able to handle amendments yesterday because of the delay in Senators presenting them for the consideration of the Senate. I remarked on more than one occasion yesterday that time is short. Today is the first day of December and we hope for sine die adjournment on the 18th of December, and we do not have a day to waste. I hope we can do better than that today.

I now urge all Senators to come to the floor and offer their amendments this morning. I will encourage the managers of the bill to call for third reading if amendments are not forthcoming.

Mr. President, there are other matters on the calendar that may be dealt with. There are other appropriations bills, for instance the military construction appropriations bill. There is the Small Business Act, and perhaps other matters.

If my effort to move the defense appropriations bill does not succeed, and I devoutly wish for the result that it should succeed, I am prepared, Mr. President, as much as I regret to say, to lay aside the measure and take up some other bill so we can make progress. Senators should be on notice that by early afternoon if we are not making good progress on this bill, the leadership will either ask for third reading or ask unanimous consent to temporarily lay aside this measure and proceed first to the military construction appropriations bill or perhaps the small business bill. It will be the intention of the leadership, however, to resume consideration of the Department of Defense appropriations bill either later today or as the first order of business on tomorrow.

Mr. President, it may be that I will make another statement on another subject in a moment, but at present I prefer to reserve the remainder of my time under the standing order and I yield to the distinguished acting minority leader.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The distinguished acting minority leader is recognized.

Mr. INOUYE. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COCHRAN). Without objection, it is so ordered.

Mr. BAKER. Mr. President, I yield now to the distinguished Senator from Hawaii.

The PRESIDING OFFICER. The Senator from Hawaii.

POSTPONEMENT OF THE MATTER RELATING TO SENATOR WILLIAMS

Mr. INOUYE. Mr. President, according to the legislative calendar announced previously by the majority leader, the matter of the senior Senator from New Jersey is to be taken up this Thursday. For the past few weeks I have looked over the matter and I have decided to participate very actively in those proceedings. I intend to be on the floor at all times and to assure that the gentleman from New Jersey is accorded his full day in court.

In order to do that, Mr. President, I will need sufficient time to prepare myself. I do not speak as a defense counsel. I have not been asked to do that, nor am I imposing myself on the gentleman from New Jersey. But I wish to actively participate and, therefore, I will need some time.

Accordingly and most respectfully, I ask the leadership of the Senate, Mr. BAKER and Mr. ROBERT C. BYRD, to provide me sufficient time to prepare myself.

Mr. BAKER. Mr. President, I may say that the request just made by the Senator from Hawaii is not a surprise to this Senator. Indeed, he had conveyed to me privately the substance of what he has just remarked. Yesterday, I consulted with the distinguished Senator from Hawaii and with the distinguished minority leader on this subject.

I may say, Mr. President, that there have been many suggestions or reasons why this matter should be postponed, some of them more meritorious than others. But the joint leadership has resisted any suggestions that the debate on this resolution, that is to say, Sen-

ate Resolution 204, as reported by the Ethics Committee, should be postponed.

I know I speak for this part of the leadership when I say that I feel the Senate has a special and powerful responsibility to deal with this constitutional duty to pass on the fitness of its Members.

The request made informally yesterday and now stated on the floor by the Senator from Hawaii is in an entirely different category. There are no Members of the Senate held in higher regard and esteem than the Senator from Hawaii. He has few peers.

I congratulate him on his decision to participate in this matter, for no one on either side of the aisle wishes to see the Senator from New Jersey without counsel or without advocates on the floor. I believe the Senator from Hawaii is undertaking an important and honorable responsibility.

In view of that, Mr. President, it is my responsibility to say that if this request is supported by the distinguished minority leader, I am prepared to accede to it and to announce that the matter will be postponed until the convening of the Senate in January.

I may say, Mr. President, that I continue to believe that the matter should be dealt with promptly and if, indeed, it is postponed, if this becomes a decision of the joint leadership, then it will be my intention to ask the Senate to turn to consideration of this resolution as one of the earliest, if not, indeed, the earliest item of business to be considered by the Senate when we reconvene in January.

Mr. ROBERT C. BYRD. Mr. President, I share the majority leader's view and his decision that the request that has been stated to us privately on yesterday and now publicly by the distinguished senior Senator from Hawaii be granted. It is a reasonable request. It is a logical request, it is a legitimate request.

I share the majority leader's viewpoint—I do not presume to speak for him—that legal counsel from outside the Senate should not speak on the floor of the Senate. In the final analysis, that would be a judgment for the Senate to make, of course, but I do not believe that legal counsel outside the Senate should address the Senate or ask questions of Senators or examine witnesses or cross-examine witnesses in the Senate Chamber. Legal counsel outside the Senate has not been elected to the Senate by any constituency and answers to no constituency through the political and representative process. I think that only Senators should speak to the Senate on this floor with respect to this or any other similar matter.

That is not to say, however, that Senator WILLIAMS should not have ample opportunity on the floor to speak for himself or that he should not have an advocate or advocates on the floor in the persons of other Senators.

I respect Senator INOUYE for assuming this task. I admire him and, without any reservation, I join with him in expressing to the majority leader the rightness of this course of action.

I also share the majority leader's position that the Senate should not arrange its schedule in this matter in accordance with the schedule of any court. This is not a legal proceeding which will occur in this Chamber, it is a constitutional proceeding.

It should not be equated with a legal proceeding in the sense that the accused would have witnesses, witnesses would be sworn and would speak and would be examined and cross-examined by lawyers for the defense and for the opposite side. The Senate has the responsibility under the Constitution to determine the qualifications of its own Members and to make decisions in cases of expulsion and censure and so on.

I congratulate and thank the majority leader on acceding to the request of Mr. INOUYE. I also compliment the majority leader on adhering to what he believes is the overriding prerogative and responsibility of the Senate. The Senate must reach a decision at some point in this matter. The majority leader has been most considerate in his decisions in regard to this matter. He has not rushed the Senate to judgment; he has not pressed it at all unduly. But, having the responsibility of programing the work of the Senate, having the responsibility of upholding the Senate's constitutional prerogatives and pressing for a just and reasonable decision in regard to one of the Senate's responsibilities, he has, at all times, demonstrated a clear understanding of the process and also a clear understanding of the sensitivities and the needs of Senator WILLIAMS.

He has not sought for any partisan gain. If he had pressed the Senate for a decision today or tomorrow or the next day or last week or a month ago, I think there are those who might have perceived his actions and decisions as being partisan. But he has studiously bent over backward, based on my observations, to avoid that perception. I fully support his decision, as I have supported his previous inclinations in this matter, because I think they have been right. I think they have been fully cognizant of the rights of a fellow Senator. But, also, he has kept in clear view the responsibilities of the institution.

I again express my deepest admiration for Senator INOUYE and I think that this is the right conclusion. I, therefore, yield the floor.

Mr. INOUYE. Mr. President, may I just say that I am most grateful to the leadership for this most considerate accommodation.

Thank you very much.

Mr. BAKER. Mr. President, I thank the Senator from Hawaii.

Mr. President, I suppose that, in many ways, the distinguished minority leader has perhaps a heavier burden of responsibility in this matter than do I.

I wish to express now to the Senate my appreciation and gratitude to him for the exemplary way in which he has conducted himself in this matter and in the innumerable meetings that have occurred between him and me as the joint leadership. No one could have been fairer, more resolute, and more courteous than the minority leader has been in the face of this political adversity. Throughout, Mr. President, consideration of this matter has been fully and truly a bipartisan undertaking. That is not a foregone result. It could happen only with the caliber of the leadership the minority leader has brought in his role here and in his previous role as majority leader.

I remarked to the Senator from West Virginia a few days ago on the floor how fortunate I am to have been in the position he occupies as minority leader, because he knows the Senate so well and has such a feel for this institution, its traditions, and its precedents, and perhaps how unfortunate he was as majority leader to have me as minority leader for 4 years.

I freely confess, Mr. President, that he has, by reason of experience and inclination, an understanding of the Senate and the requirements of the Senate that perhaps could not be gained other than as serving in the role of majority leader.

The Senator from West Virginia has never more eloquently shown his credentials as a man of the Senate, as a distinguished Senator, than he has today, in his address with me, as the joint leadership, in this delicate but important issue.

Mr. President, I express my appreciation to him and my appreciation to the Senator from Hawaii for his careful and honorable presentation of a point of view that must be represented in the Senate as we deal with this matter.

Finally, I express my appreciation to the distinguished chairman of the Ethics Committee, Senator WALLOP, and the vice chairman, Senator HEFLIN. They have worked harder than perhaps anybody else in seeing that this matter is dealt with fairly and professionally, that they have undertaken their work with skill and dignity, and that they were fully prepared to proceed with the debate on Senate Resolution 204. It is a mark of their understanding and competence when they recognize the merit of the request made by the Senator from Hawaii and accede in the recommendation of the joint leadership. I commend them.

Mr. President, in view of the colloquy which has just transpired, I announce that the debate on Senate Resolution 204 will not occur beginning on December 3, but will be postponed until the earliest days of the next session of Congress, after sine die adjournment.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader for his kind words.

RETIREMENT FOR HARRY F. BYRD, JR.

Mr. ROBERT C. BYRD. Mr. President, it is with genuine regret that I learned yesterday of the decision by the distinguished senior Senator from Virginia not

to seek reelection next year. I know this was a difficult personal decision and one which must carry with it the mixed emotions of leaving an institution which has played so large a part in his family's history. The State of Virginia has been represented in the Senate by a member of the Byrd family for some 48 years. It is hard to realize that this era will be coming to a close.

Senator HARRY F. BYRD, JR., first came to the Senate in 1965, succeeding his illustrious father, Senator Harry F. Byrd. During his 15-year tenure in the Senate, HARRY BYRD, JR., has become best known as a champion of economy in Government and reduced Government spending. The Senator from Virginia has long warned that deficit spendign and ambitious Federal programs are unwise, and he has remained the constant guardian of the role of States' rights in our constitutional scheme. In that, he has fashioned a truly independent role and has earned the admiration of all his Senate colleagues.

It was in 1970 that the distinguished Senator from Virginia first sought reelection as an Independent. He ran on this ticket again in 1976, winning the largest vote ever given any Virginia candidate. The people of his State knew that, above all else, Senator HARRY F. BYRD, JR., represented them and their interests. That meant his commitment to coal as a crucial domestic energy resource, his concern for the unique role of Virginia's harbors in this Nation's transportation network, and his dedication to a strong and secure America. It meant his determination that the Federal tax dollars of Virginia's citizens be wisely spent. And it meant his tireless efforts to represent his beloved State of Virginia with honor and integrity.

When the distinguished Senator from Virginia retires from the Senate, I will lose a long-time friend from the Senate. I often refer to him as my "cousin," although we are of no known relation. I will miss him. Despite his independent political views, Senator HARRY F. BYRD, JR., has always caucused with this side of the aisle, lending his wisdom to our deliberations.

So, I say again and again that I will miss him, and his Democratic colleagues will miss him.

Erma and I wish for HARRY and Gretchen God's blessings in the years ahead.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. BAKER. Mr. President, I join the distinguished minority leader in his statement of regret concerning the upcoming retirement of Senator HARRY F. BYRD, JR., of Virginia.

I am sure I join every Member of the Senate when I salute Senator HARRY F. BYRD, JR., for his distinguished service and express our appreciation for his independence, for his political acuteness, and for the balanced judgment which he has contributed to the deliberations of the Senate for so many years.

More than that, Mr. President, the Senator from Virginia is a marvelous human being. On many occasions, I witnessed the warmth of that humanity permeate the most difficult and controversial debates, and that calmness and reason led to a more useful and productive result than might otherwise have been the case.

Also, he is a good friend. Many of us have visited his home in Virginia. Some of us have his apple trees in our back yard. Some of us will continue to call on him as a friend and as a political adviser for years to come. I know that the contribution of HARRY F. BYRD, JR., of Virginia, to the mainstream of the political life of this Nation will not end when his term expires in 1982; but, rather, his restless spirit and deep commitment to the welfare of this Republic will continue to make itself known and his voice heard for many years to come.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. The time for the leadership has expired.

Under the previous order, the Senator from Wisconsin (Mr. PROXMIRE) is recognized for not to exceed 15 minutes.

THE DEBT LIMIT AND THE BATTLE TO HOLD DOWN FEDERAL SPENDING

Mr. PROXMIRE. Mr. President, a week ago we stumbled through the first day in American history in which the entire executive branch of the Federal Government operated without any funds. Because Congress and the President could not agree on the level of spending, we did pass a resolution a week ago Monday that postponed a decision until December 15. On or about that date we will confront almost exactly the same situation again. We may have completed and sent to the President a defense appropriations bill that will obligate us to spend about $200 billion during the fiscal year. But we will probably have all the remaining Government spending bills pending. We could and should send all the other appropriation bills to the President by December 15, and we can and should stay here in Washington in session until we act on every spending bill even if that means we work on Christmas and New Years.

DO IT RIGHT

But, Mr. President, we should do more than simply complete this business. We should do it right. We should send the President appropriation bills that will cut spending much more deeply even than the President has asked. We must find a way to cut spending. We must slash even good, popular, and useful programs. Federal health programs, for example, have generally served an inspiring and compassionate purpose. But they have grown far faster than we can possibly afford. Twenty-one short years ago in 1960 these programs constituted 2 percent of the budget. They now make up a fat 12 percent of a much larger budget.

We have increased our spending on these programs literally 44 fold in those brief 21 years. Consider that. We have not simply doubled or tripled or quadrupled our spending on health research and medicare and medicaid. In real terms allowing fully for inflation and in per capita terms allowing for our growth in population, we have increased this spending far more than tenfold. This year we slow the momentum a little but the cost surges on.

We should promptly agree to cut the Federal payments for medicaid by 5 percent. Chairman HARRISON SCHMITT, of the Labor, Health and Human Services, Education Subcommittee, has urged that for weeks. We should limit student loans to the market rate; that is, provide the loans but eliminate the subsidy. Those two actions; particularly the medicaid cut, will save even more than the President has requested on this appropriation and almost surely assure that it could go forward forthwith and without a Presidential veto. And we should promptly get to work on workfare. We can make similar progress on other spending bills. We can and should cut the HUD budget further. In fact, if we can cut the Health and Human Services budget as I have indicated, why can we not reduce these other budgets that generally do not have as high a human-need priority? Each reduction will require sacrifice, but this is the price we must pay for an economy with more stable prices, with reasonable interest rates that allow the homebuilding and auto and other industries to prosper and provide the job essential for the economy to function.

DEBT LIMIT—THE KEY

On September 30, when we in Congress passed the increase in the Federal debt limit, we had given ourselves $94 billion of leeway before the debt limit expired on September 30, 1982. The Treasury has reported that as of November 24—that is about a week ago—less than 2 months later the Government had sunk another $25 billion into debt. As of that day the national debt had reached $1.10 trillion. They also said they did not expect to have an official projection of our debt for the remainder of the fiscal year until the President's budget report in January.

Mr. President, I call on my fellow Senators to think about these appalling figures. Far from moving toward a balanced budget, are we on the way to a $70 or $80 billion deficit in this fiscal year? Indeed, the way this fiscal year has begun we could easily exceed $100 billion. And, Mr. President, I cannot think of a worse, more damaging fiscal policy. What has caused this serious recession into which we find ourselves moving? Answer: Inflation and high interest rates. And what constitutes a prime cause of inflation and especially of high interest

rates? Answer: the domination of the credit markets by the Federal Government.

WHY INTEREST RATES ARE HIGH

With a national debt in excess of a trillion dollars—one thousand billion dollars—with a looming Federal deficit meaning a one hundred billion dollars, with this huge, exploding Federal demand for credit, can there be any wonder why private investors have become convinced that once we move out of the recession, the Federal demand for credit will choke off any reviving private demand and thwart any prospect of a sustained recovery for home building and autos? Obviously, even with the best will in the world we cannot and will not balance the budget in a recession year like fiscal 1982. But we can limit the deficit this year and we can take advantage of the 1983 recovery to balance the budget then, and the debt limit offers by far the strongest way to achieve that 1983 balance.

We have arrived at the time when prudent, restrained, conservative fiscal policy will put our people to work. Can anyone reasonably argue with the fact that failure to cut spending and hold down the deficit will cut any general economic recovery short? Who will deny that with our enormous and growing Federal borrowing, high interest rates, as they did both last year and this year, will slow recovery and turn it into recession by smothering all the credit-sensitive industries into recession? So what do we need for more jobs? The precise opposite of what we needed in our deflationary, low-interest-rate environment of the 1930's. We have to do what comes hard to economists and even harder to Members of Congress who are elected or defeated based on our constancy.

CHANGE OUR THINKING

We have to change our thinking about the economy. How beautifully simple, when people need jobs: Just appropriate Federal money to put them to work. Beautiful and under some circumstances right. But when our people need housing, for example, and also need the jobs housing construction brings, and when we know that the private sector produces that housing far more efficiently than the Government can, and when the private sector does not produce housing because mortgage interest rates are too high, and when they are too high because of excessive Government spending and borrowing, then we can actually put far more to work and far more efficiently by actually reducing Federal spending than by increasing it.

This brings us to how we solve the most difficult part of this problem. It is this: Can the President persuade Congress to make the kind of sharp and prolonged reductions in spending we need to balance the budget?

Some have argued that President Reagan has had to reduce his goal of balancing the budget in order to accommodate a hostile Congress that has far less interest in a balanced budget and far more in maintaining or increasing spending on social programs. Do you believe it? Do not. It is not true. How do I know? Here is how. President Reagan can get a balanced budget, if he wants it. And he can get it when? Precisely the year he wants it. He can force Congress to give him a balanced budget or a $20 or $30 or $100 billion deficit in 1983, 1984, or 1985 or any time.

HOW PRESIDENT USES DEBT LIMIT

How can the President do all this? Answer: By using the debt limit. And here is how: The President can decide now that he will not increase the debt limit above its present $1.79 trillion level. By the end of the current fiscal year, even with careful and conservative fiscal policies, holding down spending and with no further reduction, we will still use up almost all of the remaining $70 billion. That would mean that if we do not increase the debt limit by next September then we will have to balance the budget in fiscal 1983 or come very close to doing so. But, you ask, why could not Congress simply pass a higher debt limit? Answer: Because the President could veto any such action by Congress and Congress could not possibly override his veto.

PRESIDENT HAS POWER

In the first place, the leaders of Congress know that the President has this capacity to stop any increase in the debt limit. They know that for them to originate such an increase and try to pass it over his objections by a majority vote would, in all likelihood, fail. They also know that if, for any reason, Congress over the President's objections succeeded in the initial passage of an increase in the debt limit, they know they could not come close to persuading two-thirds of the House of Representatives, let alone two-thirds of the Republican Senate, to vote to override the President.

Would Congress then put the Federal Government at long last on a cash, pay-as-you-go basis? Yes. And here is why:

NO ALTERNATIVE

The alternative to pay as you go would be even worse, because if Congress should continue to refuse to balance the budget, then when the Government ran out of cash it could not send out social security checks. It could not meet its obligations to pay its soldiers, sailors, and marines. It could not buy oil to keep its ships sailing, its planes flying, its tanks running. Consider the plight of the Members of Congress who refused to cut spending, or, if necessary, raise taxes to meet these vital national needs. He would thereby sign his political death warrant. And not many, in fact, probably no Members of Congress would rush out to commit political suicide.

WE DO IT OUR WAY

All this would not assure the country that Congress would balance the budget the way the President wanted it balanced. We might cut military spending more than the President desired. We might reduce the space program. We might slash water projects. We might cut foreign aid. And we might increase taxes, possibly postpone some or all of the scheduled July 1, 1982 10-percent income tax cut. We might rescind some of the corporate tax cuts. But we would balance the budget and stop net off-budget borrowing. Interest rates would come down and, as long as we persisted in this absolute end of increasing Federal pressure on the credit markets, interest rates would stay down.

BALANCED BUDGET MEANS MORE JOBS

That would happen for two reasons. In the first place, a balanced budget plus the end of net off-budget borrowing by the Federal Government would mean, as compared with 1981, more than $100 billion of reduction in Federal borrowing.

Second, for the first time in many years the Federal Government would actually borrow less than in the preceding year.

Third, and most important of all, balancing the Federal budget and the adoption of a pay-as-you-go approach by the Federal Government would provide the vital psychological basis for an effective war against both inflation and high interest rates. With this firm, conservative fiscal policy in place—demonstrated—not by rhetoric but by a balanced budget, investors would have a solid basis for believing that the Federal Government at long last meant business about fighting inflation.

THE HARD SELL

But can we fight recession by slowing Government spending and possibly increasing taxes? Doesn't this run smack into the conventional wisdom that has governed this country for 50 years? Whatever psychological faith Americans may have in a balanced budget was not their belief that in a recession the Government should increase spending and cut taxes overwhelm it? And would any attempt to balance the budget in the coming year not only fail in the light of 8-percent unemployment but while failing, at the same time, aggravate and prolong the recession? Let us recognize that as of now we cannot and will not balance the budget in 1982. But we can and should balance the budget in 1983.

A DIFFERENT RECESSION

Second, we must realize that this recession differs sharply from other recessions in the following respects: First, we still suffer from extraordinarily high interest rates, especially long term mortgage rates which remain close to a devastating 16 percent. This key economic fact accounts for half or more of our present unemployment. Any expansionary fiscal policy—more Federal spending or deficit—causing tax cuts—that push this rate up will push more people out of jobs than it can employ; second, we still suffer from powerful inflationary pressures. Any spending or tax measures that increase the deficit will aggravate that inflation, and destroy the faith of consumers, savers, investors that they can count on a gradual, steady reduction in

inflation; third, potential demand for houses and autos has become enormous. Consumer income remains high. Economic recovery can become strong and sustained when people become confident that we have really begun to get inflation under control and interest rates have come down to stay.

FISCAL RESTRAINT: THE ANSWER

For each of these three reasons—because unlike previous recessions we have super-high interest rates, continued inflationary pressure and a potential demand that above all needs to find faith in a policy of fiscal restraint—the balanced budget not in 1982 but in 1983 constitutes the best policy we can follow out of this recession. Selling that policy in the teeth of the recession will be like selling a deep freeze to an impoverished Eskimo family at the Arctic Circle. It is going to be tough. We have to overcome a habit engrained by two generations of steady, unremitting, knee-jerk, increase-spending as the reaction to unemployment. We have to face the grim fact that increased spending will deepen and lengthen unemployment by keeping interest rates and inflation high and rising. And we cannot wait until late 1982 or 1983 after we start recovering to put a fiscal policy in place. We must act now and stick with it.

But the key to all is the will of the President to use the debt limit to balance the budget in 1983.

REMINDERS OF THE PAST

Mr. PROXMIRE. Mr. President, the latest work of Russian author Varlam Shalamov has just been published and was reviewed this past Sunday by Clarence Brown in the Washington Post's "Book World."

Shalamov's work has been given the English title Graphite. It consists of 31 short stories describing his experiences in Russian concentration camps. It is not pleasant reading, but it is important for anyone who wishes to better understand how life was in the Stalinist death camps of the 1930's, 1940's and 1950's.

These stories take place in the camps of Kolyma, a Siberian region infamous for its slave operated gold mines. Here the author eked out his existence for 17 years, living the terrible experiences he recounts for us in his book.

His themes revolve around man's ability to forget. Shalamov treats this ability in one sense as a much-admired feat and, at the same time, as a great tragedy. These men forget, in order to cope. They forget their wives, their children, their former lives of happiness. Their sole preoccupation is to survive. In the process they also forget they are men.

As Brown points out in his review, these men are saddled with the excusable desire to go on living. So they accommodate themselves to a world of thieves, learn their language and do whatever they must to survive.

Mr. President, in this environment human dignity is an early casualty and human life follows soon after. It is estimated that between 20 to 30 million Russians perished in these camps. Those that survived suffer permanent scars.

We are lucky that Varlam Shalamov survived. His writings remind us of the need to protect man's basic human rights. Most basic, of course, is the right to live. It transcends all political, social, or economic rights man could hope to enjoy. Yet to this day, Mr. President, we have not ratified a treaty designed to guarantee the right to live. We have avoided action on the Genocide Convention for over three decades.

Why, Mr. President? Have we forgiven a heritage whose foundation rests on the natural rights of man? Have we forgotten the misery of untold millions who have perished in the most horrible of manner? If we have forgotten, Mr. President, there will be other Shalamovs in the future to remind us—for this problem will not disappear.

As the leader of the free world—we cannot forget—if this convention is ever to have any meaningful effect. Therefore, I strongly urge my colleagues to ratify the Genocide Convention.

Mr. President, I yield the remainder of my time to the Senator from Missouri (Mr. EAGLETON) who will be on the floor in just a moment.

RECOGNITION OF SENATOR EAGLETON

The PRESIDING OFFICER. Under the previous order, the Senator from Missouri (Mr. EAGLETON) is recognized for not to exceed 15 minutes and 58 seconds.

ON PROVIDING FOR THE NATIONAL DEFENSE

THE REAGAN PROPOSAL

Mr. EAGLETON. Mr. President, the Founding Fathers entrusted the responsibility of providing for our Nation's defense to the Congress. At no time in history has this responsibility been more crucial to our well-being than it is today. It has become a regrettable fact of life that every year the Congress appropriates more funding for peacetime war preparation than any other nation in history. No matter what the outcome of the debate on the defense appropriations bill now before us, this year will prove no exception.

Even in the early post-Vietnam years, when antidefense sentiment ran high, President Carter—who was elected in part because of his pledge to reduce defense expenditures—provided for real growth in defense programs in every year of his administration. In his final budget submission to Congress, he—like his successor—proposed massive increases in defense spending in fiscal year 1982. All of this notwithstanding, the size of the defense spending proposal that we debate today is unprecedented.

President Reagan, if he has his way, will spend a staggering $1.6 trillion on defense over the next 5 years. This equates to almost $1 billion a day or about $34 million every hour. His program will cost the average American taxpayer about $10,800 over the 5-year period at a time when most Americans are finding it difficult to make ends meet.

A strengthened national defense is a clear part of President Reagan's November mandate, and all of us are aware of the need to respond to the continuing Soviet military buildup by sensible increases in defense spending—particularly in the area of conventional preparedness and readiness. Yet even as a general consensus remains about the need to strengthen our defenses, major areas of dispute continue to surface about the economic pitfalls of pursuing a massive buildup at this time.

Any earnest attempt to improve our defense capabilities must be based on a sound, realistic evaluation of the ever-changing "threat" environment. The true measure of our Nation's defense posture is how well it meets our national need, not how much it costs. As the leader of free-world nations, America must have a military capability that will effectively deter aggression by our enemies, this we do not get by throwing money about indiscriminately. During last year's election campaign, Republican candidates got a good deal of mileage out of accusing Democrats of committing this mistake in addressing domestic problems. The tables are now turned, but the stakes are substantially higher.

DAVID STOCKMAN ON FRAUD, WASTE, AND ABUSE IN THE PENTAGON

It has been clear for some time that the President's principal thought about defense spending is that we need more hardware. He was prepared to throw as much money at the problem as the generals and admirals wanted. The Pentagon was posted "strictly off-limits" to the administration's fraud, waste and abuse hunters.

In his Atlantic Monthly interviews OMB Director David Stockman expressed his frustration at the willingness of the President to overlook the massive waste involved in defense spending. He acknowledged that OMB had taken only a cursory glance at the proposed defense budget. He recognized, as he put it:

> There's a kind of swamp of $10 to $20 to $30 billion worth of waste that can be ferreted out if you really push hard.

Later in the same interview, Stockman described the problem of Pentagon spending as "blatant inefficiency, poor deployment of manpower (and) contracting idiocy."

Mr. Stockman's revelations have been widely disparaged by administration spokesmen as the indiscretions of an overworked young man. Not a word has been said about the substance of Mr. Stockman's comments. There has been no effort to deny his charges; no attempt to refute his account of White House budget making. The reason, I think, is simple. What Mr. Stockman said about indiscriminately showering tax dollars on the Pentagon without the

smallest effort to assure that the money is well spent is absolutely true.

A few days ago, this President was so anxious to demonstrate his commitment to reduce Federal spending that he was willing to close down the Government over a small dispute about spending for domestic programs. But, this same tight-fisted "watchdog of the Treasury" quietly hands a blank check to the Pentagon to spend and waste as much as it wants.

I think it is time this administration leveled with the American people and faced up to the enormous problem of waste in defense spending.

THE ABSENCE OF A CLEAR DEFENSE STRATEGY

From the outset of the Reagan Presidency, there has been no shortage of White House and Pentagon rhetoric in support of the President's enormous rearmament program. In contrast, there has been scant justification of what purpose the purported additional military capability will serve. Throughout his quest for the Presidency, Mr. Reagan strongly criticized the ideas and assumptions that have governed American defense planning from the outset of the Truman administration. In a recent column, Robert Scheer of the Los Angeles Times observed:

The emphasis of the new administration seems to be less one of preserving a delicate post-World War II peace and more that of preparing for a possible World War III.

Candidate Reagan called for the renegotiation of the SALT II Treaty. He took the hard line position that further progress in arms control could only be linked to a decrease of Soviet global adventurism. He criticized what he termed one-sided détente policies and he took exception to unilateral U.S. concessions in the area of trade, technology transfer, grain sales, and arms control.

Since moving into the White House, President Reagan has failed to articulate a clear, comprehensive alternative to the policies of past administrations.

True modernization and improvement of our military deterrent must be based on realistic assumptions. Valid Pentagon contingency planning must necessarily rely on a firm, coherent statement of domestic and foreign policy. Rhetoric alone is not enough. For instance, America must be prepared for more than an all-out strategic nuclear exchange or a short, high-intensity war in Europe. Today, a far more likely threat to our national security comes from the turbulent Persian Gulf region. That is not to say that the Soviet Union does not remain of paramount concern.

THE NEED TO RESUME ARMS CONTROL NEGOTIATIONS AND CURTAIL FOREIGN MILITARY SALES

In recent days, President Reagan took the first step toward rectifying his disturbing inattention to the most pressing issue facing mankind today: the containment and control of nuclear weapons. It took the President a full 10 months to present his views and he did so, in part, in response to the mounting pressure brought about by the growing European peace movement. I applaud the President's statement but, as the New York Times pointed out, "A speech is not a policy."

The true test of the policy espoused will be the vigor with which the administration pursues the precepts of President Reagan's speech initially at Geneva in the negotiations over theater nuclear weapons in Europe and subsequently in negotiations with the Soviets over limiting strategic nuclear weapons.

Nuclear arms control is not just an issue for liberals and Democrats; to illustrate this, I offer the following comments of three leading conservatives:

Senators JAKE GARN and PAUL LAXALT: The U.S. should make every effort to negotiate an equitable and verifiable strategic nuclear offensive arms reduction agreement with the Soviet Union at the earliest possible date. Such an agreement must contribute to the security of both countries by reducing the dimensions of their strategic arsenals, particularly in those weapons which constitute first-strike counterforce systems.

JAMES J. KILPATRICK: When will we and the Soviets come mutually to our senses? When will all the imperiled peoples of this earth rise up, and through their leaders demand that this insanity be stopped?

No problem in our lifetimes—not energy, not water, not race relations, not the trivial perplexities of politics and budgets—no problem cries so urgently for solution as the problem of atomic arms. . .

The bombs we dropped upon Japan . . . were the merest Model T's. The mind of man cannot conceive the destructive power of today's atomic missiles. We are talking of great cities wiped out in fractions of a second, of millions dead and other millions maimed, of a massive radioactive fallout spread by winds around the world. In such a war there would be no victory; there would be survival only—and survival in an unimaginable land in which civilized humans would fight like savages for the means of existence.

While certainly the most pressing concern, containment of nuclear weapons is not the only focus of attention in the area of arms control. At a most delicate time in world history, the Reagan administration has displayed a disturbing trend toward enhancing the U.S. leadership role in exporting arms abroad. Nowhere is this better illustrated than in the sale of AWACS and other arms to the Kingdom of Saudi Arabia.

Approval of the $8.5 billion arms package to the Saudis constituted the largest foreign weapons sale in history. I opposed the sale for numerous reasons. I still do not believe it will do anything to enhance Saudi security; rather, I believe it will increase local tension by destabilizing the military balance in the region, jeopardize the Middle East peace process, and ultimately endanger American security interests. Nevertheless, the sale is behind us and I can only hope that future events will prove my misgivings unfounded.

The Saudi sale is only the most notable example. Now before the Senate is a proposal to sell F–16's to Pakistan. This $1.1 billion transaction narrowly survived a 10 to 7 vote in the Senate Foreign Relations Committee; nevertheless, it survives and will probably be approved. Besides my concern over the propriety of selling such sophisticated weaponry to a developing nation, I fear that it may send just the wrong signal to the government of General Zia at a time when we are lobbying his government to desist its efforts to produce an atomic bomb.

The traffic in international arms has reached a truly frightening level; the United States must not be the leading wholesaler if we are to be credible in our efforts to reduce global tensions.

If we are going to reassert ourselves in the role as the spokesman of free world nations, we must first resume serious nuclear arms control negotiations with the Soviets and curtail the excessive exportation of weapons abroad.

THE REAGAN STRATEGIC REVITALIZATION PROGRAM: BUILD THE B–1 AND PROCEED WITH MX DEVELOPMENT

After months of deliberation and delay, the President unveiled his five-point program to revitalize America's strategic forces. In addition to placing the MX missile in existing, hardened silos in the Midwest, it calls for developing a variant of the B–1 bomber. Under this plan we would deploy 100 MX missiles and build 100 so-called B–1B's—with the first squadron to be deployed by the end of 1986.

The Reagan decision to build the B–1 is based, in part, on his belief that the earlier decision to rely on converted B–52's in the 1980's and develop the advanced technology—or Stealth—bomber for the 1990's was risky given the age and vulnerability of the B–52 force.

But at issue is the penetrating capability of the B–1. In open testimony, Secretary of Defense Caspar Weinberger has made it clear that the B–1 will have little, if any, penetration capability by the year 1990.

Soviet air defenses, by any measure, are the best in the world. The Soviet national air defense system boasts more than 500,000 individuals manning some 2,500 interceptors and 12,000 SAM's at more than 1,000 separate sites. Nonetheless, as impressive as this system is, it is not wholly effective against low-flying aircraft and high-speed ballistic missiles. Development and deployment of the radar-evading stealth technology and the cruise missile will go a long way toward mitigating this Soviet advantage: nothing short of this will.

The decision on the manned bomber is basically a choice between cruise missile platforms. We can build the B–1, as President Reagan suggests, for a total program cost of possibly $36 billion; but to be effective it will have to carry the cruise missile.

The alternative is to proceed with upgrading the B–52 force as President Carter proposed. The B–52 fleet is already undergoing such an upgrading; a complete conversion can be expected by 1988. The first aircraft will be completely fitted out this fall and a squadron of 15 aircraft will be on station by the end of 1982. By 1988, 172 of these planes will be carrying 20 cruise missiles each if the program proceeds as planned.

It makes little sense to go ahead with the B–1 when what is needed is the Stealth bomber. Better we continue with the B–52 conversion than risk losing Stealth through a B–1 drain on the budget now.

Likewise, there are reasons why basing the MX in hardened Titan silos may be the least desirable means of shoring up our strategic forces. Foremost among them is the obvious fact that if the Soviets do attack on any scale, the results could be particularly damaging. The inevitable fallout would wreak havoc across a large portion of the United States. Some projections estimate that as many as 100 million people would require relocation from areas that would remain radioactive for generations to come. Large agricultural and energy producing regions would be contaminated for decades if not totally abandoned.

Plans for a new land-based missile program have been on the drawing board for years. In September 1979, President Carter proposed that we build a "racetrack" version featuring a multiple protective structure (MPS) basing mode. He chose this over some 30-odd other alternatives such as air-launched MXS, a "trench" system, and vertical silos. Carter argued that the MPS system would "do the best job" noting that it was compatible with the then-pending SALT II Treaty and would keep the Soviets from attacking since, under SALT, they would not have enough warheads to effectively kill all 4,600 of the proposed MX shelters.

President Reagan has decided to "narrow the window of vulnerability" by putting this newest and most accurate missile in our most vulnerable hole, the present Titan hole. In my opinion, there is no way to adequately harden the Titan hole to protect it as the new receptacle for the MX.

What the President's decision does do is to enhance our first-strike capability against the Soviet Union. This may warm the hearts of America's superhawks, but will chill the minds of the Soviet Union's generals and possibly put those generals on a nuclear war hair-trigger. Seventy percent of the Soviet Union's missile force is land based—as contrasted with the United States roughly one-third land, one-third air, and one-third sea. The MX missile in the old Titan hole poses a potential first-strike threat to the heart of the Soviet missile system and thus risks greater United States/Soviet destabilization.

Further, the placement of the MX in the vulnerable Titan hole makes presumed sense from an American retaliatory point of view only if we pretend to protect that Titan hole with a point-site ABM. Thus, if the President gets his way on placing the MX in the Titan hole, he will in time then seek to abrogate the ABM treaty between ourselves and the Soviets. But do we need an ABM system?

In an editorial in the respected Strategic Review, retired Rear Adm. Arthur Metcalf argues that—

Nothing has been put forward which technologically supports the belief that we (or the Soviets) could, with any degree of confidence, expect to hit one silo at ICBM range, let alone 1,000 of them distributed over an area equal to one-third of the United States.

From this standpoint, an ABM system would be no more than symbolism.

There seems no end to the number of respected commentators and military experts who have voiced various concerns about the MX. I offer the following sampling:

Columnist JAMES J. KILPATRICK: The Pentagon budget drips with fat. In the MX missile system, beloved of the generals, the taxpayers face the biggest boondoggle of all time—a $60 or $70 billion squandering of public funds.

Former Defense Intelligence Agency Director and Co-Chair of Coalition for Peace Through Strength, General DANIEL GRAHAM: The problem is that MX is the grotesque child of bad strategy. It's grotesque to take a missile that's designed for counterforce—that is, to hit certain of the most dangerous Soviet weapons before they can hit you—and then deploy it in a system that is supposed to absorb all the effects of those weapons before you fire. That's a grotesquery, from a military standpoint.

And then to put $50–$60 billion into that grotesquery is absolutely stupid. The MX deployment scheme should be rejected, not because it's going to endanger the pronghorn antelope or the desert tortoise, but because it is the final offspring of very bad strategy.

Major General W. T. FAIRBOURN of the U.S. Marine Corps, Former Senior Strategic Planner with the U.S. Joint Chiefs of Staff: To continue with the deployment of a system that is already vulnerable, that cannot be fully deployed for 10 years, that cannot accomplish its mission when deployed, that increases the attractiveness of the United States as a target; while failing to investigate reasonable concepts such as presented herein is in the author's judgment strategic lunacy.

Former C.I.A. Director STANSFIELD TURNER: I believe the MX project as presently conceived is a serious mistake . . . There is little time left to reverse the momentum of the MX. A dramatic commitment by the new Administration will be needed to accomplish such a reversal, and the key word is 'commitment.' There are great vested and parochial interests in the military and in industry that are intent upon going ahead with the project. But the United States cannot let such interests dictate the course of its security, and indeed, the security of the world. A new program is needed to correct the strategic imbalance—to the extent that it does exist—but, especially, to correct the perception that the United States itself has generated, that it is falling behind. Thus, a prompt but thorough review of where the MX may be taking us, as well as what alternatives there are to the MX, is crucial to America's long-term security.

General MAXWELL TAYLOR: Thus far, it is my opinion that the proponents of the MX have not made a convincing case either as to the need for a new weapons system to replace our silo-based ICBMs or as to the claims of the MX as the preferred replacement. On these issues, I would need to be convinced that, during the next decade, there is a strong probability that the Soviets will launch a surprise attack upon our ICBMs, despite the risk of incurring a destructive retaliation in response. There must also be reason to believe that such an attack would destroy most of the ICBMs. I am unconvinced on both points and would give a very low probability rating to this threat.

Dr. SEYMOUR ZEIBERG, Deputy Under Secretary of Defense for Research and Engineering, Office of Technology Assessment: This (MX basing options) is a question of what is the least rotten apple in a barrel of rotten apples. We see that all available modes of basing MX pose serious problems . . . None of them is without serious risks, high cost, important uncertainties, or significant drawbacks.

WILLIAM H. GREGORY, Editor-in-Chief, Aviation Week and Space Technology: The Air Force wishes deep down the MX would go away, just as the Navy wishes Trident would. Babysitting a motionless tube in a hole in the ground or in the confines of a submerged submarine at sea for months at a time has little career appeal. It is a factor in the retention problem that both services have.

A recent New York Times article on the subject of the Reagan strategic program quoted "well-placed" administration officials as saying that Defense Secretary Caspar Weinberger and others—especially OMB officials—would not be upset if the Congress voted to delay plans to base the MX in hardened silos, but suggested that the administration would fight a little harder to save the B–1 program. But, one acknowledged that the White House is now wedded to the proposed timetable of either program. Deferring the MX basing decision and cancelling the B–1 would go a long way towards reducing a deficit now growing out of control. In addition, such an action would not jeopardize our overall defense posture.

One official, noting that Secretary Weinberger had not promised a decision on the MX basing mode until 1984, said:

You'd have to be awfully naive if you thought that date just fell out of the sky.

CONVENTIONAL FORCES: BEEFING UP THE RAPID DEPLOYMENT FORCE (RDF)

Even more critical a challenge to improving our Nation's military capabilities than putting a new face on our strategic arsenal is properly addressing the documented deficiencies in our conventional force structure. For the Reagan administration, this means developing the RDF; it is a strategy of growing controversy. Only three things can be said about the RDF today with certainty; it is not rapid; it is not deployed; and it is not a force.

On January 20, 1980, during the annual state of the Union address, President Carter announced the so-called "Carter Doctrine" and spelled out a specific U.S. policy toward the troubled Persian Gulf region. With it he gave birth to the RDF mission.

In President Carter's words:

Any attempt by any outside forces to gain control of the Persian Gulf region will be regarded as an assault on the vital interests of the United States of America, and such an assault will be repelled by any means necessary, including military force.

Initially created by Presidential Directive 18, in August 1977, the RDF was envisioned to be principally an army force of about 100,000 strong under direct control of the Army Chief of Staff.

The principal justification for creating this quick strike capability was to preserve the all-important Persian Gulf shipping lanes. No doubt that the timing of the decision was affected by the Soviet invasion of Afghanistan and it was issued as a warning to the Soviets that the United States intends to deter any form of intervention—specifically in the Middle East and Persian Gulf region. But the RDF has yet to prove itself a deterrent.

In the fall of 1980, in a test of the RDF's capabilities, it took a disappointing 6 days to complete the movement of a 900-man infantry battalion from the United States to Egypt. This is a far cry from the stated goal.

In his book, "The Rapid Deployment Force, and U.S. Military Intervention in the Persian Gulf," Jeffrey Record, a critic, charges:

> The RDF is little more than a hodgepodge of improperly equipped and structured units lumped together under a confused command apparatus rent by unusually vicious and debilitating inter-service rivalry for domination of the rapid deployment mission.

He and others claim that it will take at least 5 years and another $25 billion to field a force capable of combating large-scale aggression in the Persian Gulf region.

If there were a challenge to the security of the Persian Gulf oil fields, for instance, it is estimated that we would need three Army divisions, four air wings of 72 planes each, a Marine amphibious force of 50,000 men, and two carrier task forces on hand; the RDF of today is not equal to the challenge.

Notwithstanding the fact that the Reagan administration has budgeted an extra $2.5 billion for the RDF in fiscal years 1981 and 1982, many critics continue to argue that the developing force is still too oriented toward a Soviet takeover of the area, an area in which the United States would be unable to counter trouble caused by indigenous forces.

A Library of Congress study on the subject estimated that it would take the United States a full 10 days to transport just the 82d Airborne, its ammunition, and a 5-day supply of rations and fuel to the Persian Gulf. This does not include the tactical air wings the 82d would need for ground support.

The most serious problem confronting RDF planners is a serious shortage of airlift capability. Today, we must rely on the Air Force's fleet of 77 C–5's and 234 C–141's. The standard C–5 requires a runway of at least 5,000 feet—a rare item in most parts of the world; in addition, the C–141's are not capable of carrying our larger equipment, such as the M–1 tank. Regrettably, plans to buy a fleet of McDonnell-Douglas C–17's—the CX—have all but been abandoned. Unless changed, this apparent decision will leave the United States with a growing inventory of out-sized equipment and no effective means of transporti: ~ it.

If we are going to proceed with plans to field a force that we can rapidly project and subsequently support from a distance, we must enhance our airlift capability. In addition, we must increase the training time of our forces so as to improve the mobility of both troops and equipment. We must buy more ammunition and spare parts for our equipment. These programs are not glamorous and do not receive a great deal of attention; nevertheless, they are nothing short of essential. Finally, we must work more closely with our allies to increase the leverage of our respective military strengths and defense investments.

GLOBAL COMMITMENTS: SHARING THE BURDEN

Senator SAM NUNN said it best during consideration of this year's Defense authorization bill: "A bipartisan consensus supporting increased defense spending currently exists," but that the consensus could dissolve unless Congress is satisfied that the "spending priorities are being established within the context of a coherent national strategy." The problem we face is determining what direction to take. Many defense analysts argue that a military reorganization by the United States and its NATO allies could vastly increase the West's conventional defense capability without a large increase in costs. One such approach would be a shift in the balance of roles, with the United States increasing its naval and air defense contributions to NATO and Europe increasing ground roles.

This arrangement would go a long way toward alleviating the horrifying economic problems encountered by enlisted personnel and their dependents living in Europe and would significantly reduce the bitter exchanges we are having with our allies over the matter of NATO burden sharing.

During floor debate on the authorization bill, I spoke to this particular issue.

Burden sharing is defined as "the fair distribution of political, manpower, material and economic costs of maintaining our alliance posture." Today, relations between the United States and her major allies—the NATO countries and Japan—are strained by a basic disagreement over what constitutes a "fair distribution" of defense responsibilities.

In May 1977, the Carter administration proposed a new "long-term defense program" for NATO. The keystone of this proposal called on the NATO nations to pledge to increase defense expenditures to achieve real growth on the magnitude of 3 percent per annum. In May 1977, NATO defense ministers issued a communique that embraced the call to increase defense expenditures and stated that such increases "should be in the region of 3 percent recognizing that for some individual countries: Economic circumstances will affect what can be achieved."

A Library of Congress review of the performance of the Allies in meeting this objective during 1979 and 1980 produced mixed results. Only three countries met or exceeded the 3-percent goal. Luxembourg, 9.9 percent; United States, 3.6 percent; and Portugal, 3.2 percent.

Denmark's performance was rated so poorly—and planning for 1981 included so many reductions in defense efforts—that the term "Denmarkization" came to be used to characterize wealthy democracies with extensive social welfare programs, which in times of limited economic growth, cut defense efforts.

Burden sharing is not a new issue. It has been with us for years. Virtually every Secretary of Defense in the past 10 years has discussed this American concern in testimony before Congress.

A decade ago, then Secretary of Defense Clark Clifford testified before the Congress that:

> We are acutely aware and seriously concerned that maintaining large numbers of U.S. troops in Europe has caused a considerable budgetary strain and has contributed to a substantial deficit in the U.S. balance of payments. In this regard, we have pressed upon our allies the need for them to do more for their own defense. We have long felt that, by almost every measure, the tremendous growth in the economies of our European allies has not been accompanied by a commensurate increase in their respective contributions to the common defense.

A major U.S. role in the defense of Europe and Japan was warranted in the early post-World War II era when our allies were weak economically and had fragile political structures; but the economic and political maturity of the allies now suggests that they should play an increasingly more responsive role in providing for the common defense.

Under the protective shield of the United States, European countries and Japan have been able to modernize their industrial plants. The U.S. industrial base is, on average, considerably older than those of Europe and Japan. This gives a competitive advantage to our allies in matters of international trade.

The increased threat of Soviet aggression in the European theater mandates increases in allied defense spending. If the United States is going to make sacrifices to take the lead in this effort, the Europeans and Japanese should be encouraged to follow.

To date, America's efforts to convince our allies to increase expenditures and share a greater portion of support costs have been disappointing. It is evident that our efforts have failed to convey the message that increased participation is of critical importance. A clearer message is obviously needed.

SOME NEW THOUGHTS ON SOME OLD PROBLEMS: THE WORK OF SPINNEY AND BOYD

A considerable amount of attention is currently being paid to a small school of so-called "military reformers" who are characterized as espousing the theme that "America's defense is not giving value for the money and needs 'more bang for the buck'." The basic contention of this group is that U.S. military hardware tends to be too sophisticated, too complicated, too unreliable, and too expensive.

In the coming 5 years, the President proposes that the Congress fund the MX, the B–1 bomber, and a new generation Trident missile. The emphasis is clearly on weapons procurement and will be to the exclusion of the other key elements of a balanced defense posture. That is not

to say that vast sums have not already been expended building the most technologically sophisticated war machine ever. Make no mistake about it, in their respective classes, our front line weaponry is the world's finest, notwithstanding its shortcomings. But, weapons superiority did not prevail in Vietnam and there are those who would contend that it will never suffice in future conflicts.

Nowhere is this warning sounded louder than in an impressive pair of studies conducted by two analysts of the Secretary of Defense's program evaluation staff—his in-house think tank. Between them, John Boyd and Chuck Spinney have put together a two-session, 7-hour presentation of their material.

To my knowledge, I am the only Senator who has taken the time to attend both sessions of their briefing; I would strongly urge my colleagues to take advantage of their availability. According to the two, military conflict can generally be distilled to three basic ingredients: Manpower, weaponry, and strategy.

Boyd, in his work entitled, "Patterns of Conflict," focuses on the role of strategy and manpower in the mixture. His research and his conclusions are persuasive. Beginning with the battle of Marathon (490 B.C.) and working his way forward, Boyd points out that in a surprising number of historical engagements, superior military forces succumbed to the surprise, deception, and confusion tactics employed by a weaker opponent. Despite numerical disadvantages, successful commanders have effectively employed strategy to achieve lethal leverage over adversaries.

Perhaps the most interesting note of Boyd's historical perspective is that although military strategy remains a developing yet imprecise science, the general body of theory upon which it relies has been with us since the Chinese master Sun Tzu gave us his "The Art of War" treatise around 400 B.C.

The point to be made is that although warfare has changed dramatically since then, the basic principles of engagement have not. For that matter, evolution notwithstanding, little has changed concerning the role of the individual. As always, the foot soldier does little more than employ the weaponry available to him in the manner prescribed by his superiors. What has changed dramatically, though, is the weaponry itself. Technological breakthroughs continue to insure that our Armed Forces have the advantage of superior firepower over all adversaries.

We had such superior firepower when we went into Southeast Asia; we did not return the victors. There is still no consensus on the matter of the Vietnam war, but numerous defense experts have questioned the suitability of the weapons we employed given the nature of that guerrilla war.

Evidence continues to mount that the Defense Department's preoccupation with state-of-the-art technology has led us to develop weapon systems that are increasingly more costly and of very questionable reliability under battle conditions.

Chuck Spinney, in his work entitled, "Defense Facts of Life," explores the matter of "high-tech" complexity in weaponry—particularly as it has affected Air Force tactical aviation.

Building on the work of a former Pentagon analyst, Mr. Pierre Sprey, Spinney has analyzed the variance in the Defense budget over the past 30 years. He approached the subject with an eye toward a better understanding of how budgets have changed in the past and to better project how procurement planning will respond to future, but unforeseen, changes.

What his study dramatically depicts is that in the years of measured defense increases, funding has been disproportionately distributed between investment in weaponry and operation and maintenance accounts. While we have vigorously pursued the promise of technological achievements, we have neglected our inventories, facilities, and—most importantly—our people. While we have built a large tactical air force, we have systematically cut back the training of pilots, the replenishment of spare parts inventories, and aircraft maintenance.

All the time, the costs of providing for the national defense are rising. As vital operation and maintenance programs take a back seat to weapons procurement, the rising cost of these programs tends to decrease overall readiness.

In Spinney's words:

> This pattern reflects a tendency to reduce our current readiness to fight in order to modernize for the future; however, because of rising operating costs, the price of even low readiness is rising inexorably over the long-term. We will see this as happening despite a long-term decline in the overall quantity of people and equipment. Moreover, modernization is being slowed and forces are declining because (a) the cost of replacement is increasing and (b) because the long-term budget constraint has made it necessary to squeeze total investment growth in order to relieve the unavoidable long-term growth pressures in the O&S and Retirement accounts.
>
> We have uncovered a pattern of destructive growth—when some parts of the whole start growing faster than the whole itself, they start eating up the remaining parts. One could think of this as a form of organizational cancer. The short-term strategy of trying to hold down growth in the O&S account to pump growth into the investment account does not cure the problem because although we have been able to hold O&S growth to a level approximating overall growth, we have reduced force size and we are accumulating a current readiness bill (in terms of deferred people and material costs) that is not reflected in the budget data. Sooner or later, this bill will have to be paid.
>
> This pattern of behavior can be expected to continue as long as costs, particularly operating costs, grow faster than the budget.

The Spinney study drives home three significant points. First of all, budget growth, by itself, is not a solution to our defense problems and may, in fact, exacerbate an already difficult situation. Second, the current plans for historically unprecedented growth displays the same unrealistic pumping up investment—the same pattern that in the past has failed to yield increased readiness over the long term. Finally—and most importantly—Spinney points out that we will continue to suffer the undesirable consequences of increasing technological complexity if we continue to pursue the course of action implied in the Reagan defense proposals.

The message of the Spinney briefing is indeed disturbing. An obsession with high technology has led Pentagon planners to create a lineage of weapons in which each succeeding generation of weapons costs between 2 and 10 times more in constant dollars than its predecessors. Acknowledging that constant increases will always be a fact of life, statistical analysis indicates that no "practical" amount of spending can match the trend in increasing per unit costs. Norman Augustine, vice president of Martin Marietta puts it this way:

> From the days of the Wright brothers through the F–18, aircraft costs have been increasing by a factor of four every ten years. If the trend continues, in the 2054, the entire defense budget will purchase just one tactical aircraft. This aircraft will have to be shared between the Air Force and the Navy, three and a half days per week.

The F–16 presents a good example of a weapon system that has grown in complexity and cost over time. The constant dollar cost of the aircraft has grown strikingly since it was initially priced out in 1972. Much of the cost growth is attributed to increasing complexity of the aircraft and its changing mission.

To quote from Spinney:

> What started off as an austere high performance within visual range air-to-air fighter will be transformed by the later 1980s into a lower performance radar missile air-to-air fighter with avionics intended to attack ground targets in night or adverse weather. These increases in the complexity of the F–16 imply downstream cost and supportability consequences that were not imagined when the decision was made to develop the F–16 in 1972—consequences that, although still imperfectly understood, we will have to live with in the year 2000.

According to the Spinney findings, the rising costs and complexity of our tactical aviation programs has had a profound impact on equipment inventories and the effect is likely to grow in magnitude. According to his research, some tactical aircraft programs have experienced cost increases of between 30 and 40 percent. This has occurred at a time when the total inventory of American fighter planes has fallen off from 18,000 to about 7,000. Since the midfifties, our substantial inventory of proven aircraft have been retired and are being replaced by smaller numbers of more complex and expensive planes.

As James Fallows points out in an Atlantic article entitled, "High Tech Weaponry—Why More Money Is Buying America Less Defense," the growing cost of complex weapons is not a phenomenon unique to aircraft procurement. It is shared by every weapons system now in production or development. Pentagon designers have so successfully pushed increased technology as the solution to American defense woes, that the cost of

any new weapon is predestined to rise irrespective of increased efficiency or reliability.

In an attempt to put the magnitude of such cost increases into perspective, Fallows offers that, in constant dollars, the M–1 tank today will cost more than seven times as much as did the World War II Sherman tank, and the next nuclear aircraft carrier will cost five times as much as its World War II counterpart.

Of course, rapidly escalating costs cannot be looked at in a vacuum. They must be evaluated against the value of the high technology weaponry we are producing. But here, too, the message is sobering. Thus far, "more complex" has not meant "better". Too often, "more complex" has meant either "not combat-ready" or "still in production."

Reports by the General Accounting Office have frequently focused on reliability of high-technology weapons. For example, in a letter to Secretary Weinberger dated January 21, 1981, Comptroller General Elmer Staats noted:

> We believe that the sophistication of many weapons systems deployed today is one of the contributing factors that has led to budget problems, inventory short falls, and a low state of readiness for certain combat categories.
>
> We have not advocated that DOD elements do anything which would tend to lessen any technological advantage currently existing or that DOD use cheap or simple weapons in quantity as substitutes for more costly, more capable equipment. However . . . a much better balance between performance and reliability must be obtained.

QUALITY VERSUS QUANTITY: THE TRADE-OFF DECISION

By all odds, our individual weapon systems are the best in the world. In their respective classes, for example, the F–14, F–15, and F–16 aircraft, when in a one-on-one posture, are clearly superior to comparable Soviet craft. However, when confronted by more numerous but less sophisticated aircraft, technological superiority rapidly dissipates.

In June, CBS aired a five-part documentary entitled "The Defense of the United States." It was, in my opinion, an excellent journalistic work. The report's visual format allowed layman and expert alike to follow the lines of the arguments presented and conclusions offered. One particularly noteworthy segment dealt with the matter of quality versus quantity under combat conditions.

Both CBS and Fallows, in National Defense, point to the findings of a relatively little-known test program—code named AIMVAL/ACEVAL—conducted during the late 1970's in the skies over Nellis Air Force Base in Nevada—to support the contention that quality does not always provide the necessary edge over quantity.

For 2 years, 1976 and 1977, two teams of Air Force and Navy pilots—one flying sophisticated F–14's and F–15's, the other flying the "simple" F–5's—engaged each other in simulated aerial combat. The test results were conclusive. When the F–14's or F–15's were matched one-on-one against the F–5's, technology reigned supreme. But when the match-ups were, say four-on-four, the technological advantages of the more complex aircraft were neutralized completely. Essentially, pilots found that with eight planes in the air at one time, things were too chaotic and moving too quickly for sophisticated avionics to be of much use.

As part of CBS's look at these tests, Richard Threlkeld interviewed Bob Fay, the now-retired Air Force officer who was in charge of the testing. Quoting now from Fay:

> When you're up in the sky searching for something in that gray mass . . . your eyes tend to gravitate to the first object you see. And you can see large airplanes quicker than you can see small airplanes.

Fallows recounts the recollection of two Air Force officers who participated in the tests:

> There was not a single ACEVAL 4-versus-4 trial in which the Blue (F–15) side managed to target a missile against all four Red machines at the outset of the flight. This outcome is rather sobering given the high costs of F–15/F–14 avionics, together with the fact that air combat in a future war in Central Europe is likely to be more on the order of 50-versus-20.

Pierre Sprey, the former Pentagon analyst who contributed much to Chuck Spinney's work, once conducted a major study of the relative combat capabilities of U.S. fighter aircraft—comparing all major fighters built between 1950 and 1975. Sprey's study purposely avoided comparisons of design specification; rather, Sprey measured performance using what he termed "combat-derived criteria." The study conclusions support Mr. Sprey's contention that instead of comparing top speed figures and electronics complexity, a plane's relative worth is better measured in terms of: First, ability to surprise; second, ability to outnumber the enemy; third, maneuverability; and fourth, lethality. Of these figures, Sprey argues that the ability to surprise one's enemy is paramount.

Indeed, the "element" of surprise remains the single most important ingredient in an aerial encounter. And while advanced technology has given us bigger, more powerful, more lethal aircraft than those possessed by any other nation on Earth, it has also made us more vulnerable to attack. It is easy to appreciate that a larger aircraft is easier to see. In addition, the pilot who turns on a powerful radar to scan airspace leaves a "calling card" for all other aircraft in the area. To use Fallows' analogy:

> For the same reason that automobiles equipped with a "fuzz-buster" can tell when police are running a radar speed check, pilots with passive radar warning systems are instantly aware when another plane has turned on its radar to look for them.

A plane with a radar warning system will know that another plane is scanning the area long before visual contact is even possible.

In the words of Charles Myers, a former Pentagon official:

> Imagine yourself holding a gun and a flashlight in a pitch-dark room, with a lot of other guys with flashlights and guns. Who's going to turn on his flashlight first: Well, radar is that flashlight.

In summing up the AIMVAL/ACEVAL tests, I refer to the comments of Mr. Michael Kramer as carried in a New York magazine article.

> AIMVAL/ACEVAL taught the Air Force—or, more precisely, should have taught it—four lessons. First, combat is always confused. The only textbook battles are in textbooks. Second, the number of planes available to fight was far more important than the technical capabilities of the planes in the fight. Third, the smaller, harder-to-see planes outlived the bigger ones—no matter the advanced gadgetry on the "better" planes. And, fourth, the pilots of the smaller, less souped-up planes learned to fly them faster and, for the most part, flew them better.
>
> As for the powerful radar that our "hot" planes utilize in order to let them "see" the enemy early—well, that radar often backfires. When in use, it acts like a beacon, and thus denies its user the single most important advantage in air warfare—surprise.

THE DEFENSE ACQUISITION PROCESS: THE COST OF COMPLEXITY

It is a basic fact of life that it takes years to bring new weapons systems "on line." In recognition of the difficulties that accompany the development and construction of complex weaponry, the Congress appropriates multiyear funding to support procurement programs. Take for example, the case of shipbuilding; the Navy regularly receives a 5-year obligational authority. Unfortunately, it is all but impossible to complete a construction program in a 5-year time frame, given the complexity of the modern naval combatant. In actuality, the life span of some major ship construction programs extends to 10 years.

The first of our Trident submarines—the *Ohio*—took 7 years to build and was delivered 2½ years behind schedule and $280 million over budget. The rapidly increasing lifespan of procurement programs—coupled with the growing complexity of the weapons in general—and the perils of an uncertain economic future contribute significantly to the out-year ramifications of defense spending decisions.

When President Nixon granted production approval in the early 1970's, the Navy envisioned having seven Tridents at sea by the summer of 1983. This was considered essential to counter the decommissioning of Polaris and Poseidon submarines that will reach their planned retirement age in the early 1980's.

Last March, Vice Adm. Earl Fowler, Commander of the Naval Sea Systems Command, testified before a House subcommittee on the status of the Trident submarine construction program underway at the electric boat shipyard in Groton, Conn. According to Admiral Fowler, we will be lucky to have two Tridents at sea in 1983.

Engineering changes have caused delays and contributed to increased costs. Costs on the *Ohio* rose during its construction life from $1.5 billion to $2 billion, in fiscal year 1982 dollars. Construction delays were caused by an alarming number of basic failures; the most graphic example was the discovery of some 2,700 faulty or defective welds on the *Ohio*'s hull after it was determined that substandard grade steel with

inferior crack-resistance and "weldability" was used in hull construction.

To use another example, the M–1 tank—hailed at the Pentagon as the world's finest armored and combat vehicle—has also experienced surging costs and production delays, while questions linger about its performance. In 1972, the cost per tank was estimated at $500,000. The Pentagon's latest estimate for a production of 7,000 tanks is $2.68 million per copy, if you include research and development costs.

If this alone is not alarming enough, Chrysler, who is building the tank, reports having difficulties meeting production schedules. The company still is not producing tanks at its Lima, Ohio, plant at the specified rate of 30 per month. To boot, an internal Army report notes that while some design flaws uncovered earlier have been remedied, the tank still does not meet military requirements for durability and reliability.

The problems experienced with the Trident submarine and M–1 tank programs cannot be dismissed as aberrational. They seem to be symptomatic of serious failings in the way that the Pentagon approaches the planning and development of high-technology weapons and the shortcomings of the defense contractors who provide the weapons.

Commenting on the "Spinney briefing," James Fallows notes:

> The real message of Spinney's analysis is that unrealistic military planning, which chronologically pays too little attention to the economic and military effects of complexity, constitutes a "form of organizational cancer." The pattern, in essence, involves four steps. . . .
>
> First, the planners are eternally optimistic about the amounts of money they will be able to spend to buy new equipment.
>
> Second, in their desire to buy more equipment for the force, the planners forget or fool themselves about how much money they need to set aside for "operations and maintenance" of new equipment, especially the more complex varieties.
>
> Third, as a natural consequence of the second step, the military has to make unexpected cuts in its "investment" in order to make up the cost of maintenance and overruns on previous programs.
>
> Fourth, when certain parts of the military do enjoy monetary prosperity, they tend to use the money not to bail out the projects they have already started, but to get yet another complex system, with yet another inadequate maintenance budget, underway.

The Trident and M–1 construction problems are also symptomatic of problems faced throughout an industry that lacks the depth to competitively provide for the Pentagon's increasingly exotic needs.

Weapons systems tend to change in configuration as development programs extend in length. Whether because of the lure of evolving technology or the need to address changing mission requirements, Pentagon planners routinely reconfigure weapons without the slightest consideration for the impact change will have on basic program objectives.

In addition, the effects of escalation and cost growth caused by change are magnified by program decisions that invariably increase the complexity of systems. A good example would be the Navy F/A–18 (Hornet) program.

Initially planned to be a low-cost alternative to the expensive F–14 fighter—the mainstay of the current fleet air defense—the program quickly exploded into the "strike fighter" program known today.

Originally, the F–18 was intended to cost no more than $5 million a copy. But at the time of the fiscal year 1977 budget, the F/A–18 was priced out at $10.3 million—flyaway unit cost—per copy. In 1981, the cost grew to an incredible $16.1 million. Recent Defense Department estimates have an F/A–18 program of 1,377 aircraft costing $35.3 billion—a unit cost of $21.6 million. It is significant to note in citing these figures that "flyaway" costs do not include amounts spent on initial spares, support equipment, research and development, and military construction.

Inflation notwithstanding, the F/A–18 program has grown dramatically in cost during its short life. Nevertheless, the F/A–18 continues to be sold as the most "cost effective" solution to meeting fleet aviation requirements. When the "cost saver" becomes more expensive than the aircraft it is replacing—which is the case here—we kid ourselves to talk of low-cost or cost-effective replacement systems.

Another good example of extraordinary cost growth is the Black Hawk helicopter program. When this transport was designed in the early 1970's, planners projected that the aircraft would cost less than $1 million apiece. By fiscal year 1980, the Black Hawk costs better than $2.5 million per copy. In fiscal year 1982, the Black Hawk—with only minor engineering changes—will cost in excess of $5.2 million per, a 100-percent increase over 2 years.

To add to this dilemma, once investment decisions and commitments have been made, they acquire a momentum of their own. They are not easily undone or modified even if, as sometimes happens, evidence accumulates that the initial decision was ill advised, or is rendered obsolete by changed circumstances.

The August 11, 1980, issue of Business Week carried a much heralded article entitled "Missiles, missiles, and missiles: The New Defense Posture." The article format features this quote by William Perry, the Pentagon's chief of research and development. "The new missiles * * * will revolutionize warfare." To many, technology is synonomous with superiority; not everyone agrees. The same article recounts at length, the views of Norman Augustine, vice president of Martin Marietta and former Pentagon official, and the tale of the Maverick missile.

"Change a few of the names, and this (Maverick) could have been any account of any exciting new weapon written in the last 25 years," was the comment of one defense analyst. No matter how sophisticated we make our front-line weaponry, it is just a matter of time before advancing technology offers a new bauble to focus on. No matter how well a weapon performs, it is always behind the state-of-the-art by the time it is deployed. We must ask ourselves, "at what point should we be satisfied?"

The story of Maverick and its successors as recounted in the Business Week article, merits repeating.

Maverick was initially developed as an electro-optically guided missile that carried a small television camera in its nose. The camera was to photograph potential targets and assist the missile in locking on to them. Trouble arose when it was discovered that the camera did not work well in clouds and at night. This led the Air Force to abandon the camera in favor of an infrared guidance system.

While the infrared system made the Maverick an all-weather missile, it was not sensitive enough to distinguish between some targets, leaving the computer guidance system unable to accurately steer the missile.

Because it did not see full shapes or images, Mavericks still could not distinguish among real and spurious targets. Now we look to the air-to-ground Wasp and a new missile called AMRAAM (advanced medium range air-to-air missile), to correct this.

Perhaps the single best example of the extremes to which a runaway procurement system can take us is recounted by James Fallows in his book "National Defense":

> During the time when Curtis LeMay was the Air Force chief, there was a big movement to develop the Air Force flashlight. Flashlights never work, so they decided to develop their own. It's nice to have one to read maps in the cockpit, to count the turbine blades before you take off at night, things like that. Well, people started thinking about all the extra things it should do. Somebody said, wouldn't it be great if it were a signal flashlight, so you could read maps at night and protect your night vision. And there were the usual military specs about performing after two weeks on the North Pole, or in the Sahara. Finally, it became the Tri-Command Flashlight: the Strategic Air Command, the Tactical Air Command, and the Air Defense Command all added their requirements. By that time, the thing was so huge that you couldn't fit it in your flight suit—hell, if you had to bail out, you'd never take it with you, so what was the point of all the signal flashing or the heat and cold requirements.
>
> The Air Force turned out about 100 of the things and left them around Andrews Air Force Base for pilots to try out. General LeMay came out one time, saw one of them all wrapped up, and asked what it was. 'That's the new Air Force Flashlight, General!' the supply officer said. He asked LeMay if he wanted to take one on this flight, and LeMay said sure. So they peeled the air-tight wrapping off one of them, got out a new battery—and it just wouldn't work. The lights wouldn't even turn on. They opened up a second one, with a second battery, and it wouldn't work either. Finally they got the third one to work, but that was the end of the Air Force Flashlight. Most pilots use the $1.50 plug-in model now.

AN AILING DEFENSE INDUSTRY: A SECURITY CANCER

Last December, a special panel of the House Armed Services Committee published a report questioning the Defense Department's ability to procure military equipment in a "timely, efficient manner." The report characterizes the defense industry as "crippled" by declining productivity, aging facilities, and shortages of skilled labor and strategic materials. This assessment was bolstered by a recent study by the Defense Science Board, a group of industry executives

and former Government officials which faults the Pentagon for giving "little effective attention" to industrial preparedness.

In his book, "The Defense Industry," Jacques Gansler, former Deputy Assistant Defense Secretary for Materials Acquisition, has cataloged the bottlenecks and shortcomings afflicting the defense industry. Gansler notes that after the Vietnam war, as defense procurement decreased, the number of defense subcontractors fell dramatically, weakening the industrial base, reducing competition, and driving up costs.

One result of buying fewer more costly weapons, Gansler notes, "is that the peacetime defense industrial base cannot achieve high production rates or be easily maintained for future emergency surge demands." Generally, instability in demand has forced large contractors to undertake production chores previously farmed out to subcontractors, thereby further increasing concentration in the industry, reducing competition, and driving up costs. In short, Gansler makes the crucial point that defense contracting is presently a "thin" industry with few firms capable of providing for DOD's very demanding needs.

At the present time, for example, only one company makes castings for tank hulls, only one makes airframe bearings, and only one makes the titanium extrusions found in our more sophisticated planes. Even if these few firms could meet the demands of the administration's defense wish list—an open question among defense experts—the noncompetitive nature of the industry must raise prices higher and higher.

According to a report by Coopers and Lybrand, materials such as titanium sponges are the "driving force" in price increases. Competition between the military and commercial firms—particularly in the aviation sector—for limited production facilities and materials could increase production delays and further inflate costs. As MIT economist Lester Thurow has written:

> These companies have little extra capacity for production, and few other firms can surmount the technical and bureaucratic obstacles to entering the field. As a result, when demand goes up, as it has modestly done in the last few years and will dramatically do in the next few years, prices go up faster.

Concern about the complexity of the weapons sought by the Pentagon, and the structure of the defense industry, is intensified by the Defense Department's vulnerability to fraud, waste, and mismanagement. As Senator GOLDWATER noted in a letter to Secretary Weinberger, our defense procurement policies and the management of defense contracts have been disastrous:

> Runaway costs characterize our entire defense program. These vast expenses have nothing to do with maintaining the strength of our military forces. They are, pure and simple, the result of a system that premits DOD officials to operate as though the public purse has no limits. It is a system that can and must be changed.

During the Carter administration, W. Graham Claytor, Secretary of the Navy and then Deputy Secretary of Defense, once told Congress that "there is nothing wrong with the Navy that money won't fix." Such a mindset is wrong, and dangerously so. Given the problems often associated with high technology weapons, the present structure of the defense industry, and the Pentagon's approach to procurement and management, the worst thing we could do is simply give the Defense Department a blank check without addressing underlying problems which plague defense production.

MAINTAINING A "HIGH-TECH" INVENTORY: THE PROBLEM OF OPERATIONAL READINESS

Last year, Armed Forces Journal ran an article that quoted a then-classified memo authored by Secretary of Defense Harold Brown on the subject of readiness as it relates to "high-tech" aircraft.

As he had testified before a House Appropriations Subcommittee, Brown admitted that the overall readiness rate of tactical aircraft often hovers at about 50 percent. Loosely translated, this says that without sufficient warning, some 1,700 of the tactical aircraft now in our inventories would be inefficient or ineffective if suddenly needed. In a world where turbulence is the order of the day, such a grim assessment is cause for serious concern.

There are numerous factors that contribute to low operational readiness rates. Two key factors in the case of tactical aircraft are equipment maintenance and spare parts availability. Despite the $1 trillion pumped into the Pentagon over the past decade, these programs remain woefully underfunded.

Secretary Brown expressed his concern that—

> During peacetime, underfunding of depot maintenance . . . reduces the availability of operational aircraft despite the low operating tempos.

He pointed out that the backlog in the Navy's aircraft maintenance program has grown in 3 years from $60.3 to $284.1 million and the Air Force backlog from $67.7 to $196.1 million. Such a trend, allowed to continue unabated, threatens our ability to maintain a credible deterrent. The swiftest and surest means of enhancing military air capabilities is to revitalize our inventories and resist the temptation to divert required funding to procurement programs. Increasing spare parts inventories is deserving of the same priority treatment.

In his memo, Brown pointed out that inadequate inventories of spares requires cannibalization of aircraft and the drawing down of war reserves, especially in the case of the more complex aircraft:

> Cannibalization is a particularly inefficient use of resources in which increasingly scarce, highly-skilled manpower is wasted on the removal and reinstallation of two pieces of equipment instead of one, and aircraft bought to fight the enemy are turned into grounded "hangar queens." Drawing down war reserves to maintain peacetime activity rates can be extremely dangerous particularly since the drawdown tends to be greatest in precisely those parts we would need most in wartime.

Maintenance programs require and must receive an increased share of our limited defense dollars.

One has to take into account the time that sophisticated equipment is "down" for repair and maintenance. As a rule of thumb, the more sophisticated the weapon, the greater the likelihood it will require increased maintenance and increased skills on the part of those doing the maintaining. This raises, of necessity, the military personnel problem. We are terribly undermanned in the skills necessary to maintain the most sophisticated military equipment and the situation worsens every day. More and more of our skilled personnel opt out of the services for more lucrative job opportunities in the private sector.

We can have the best fighter aircraft on the Earth, but if we cannot maintain them adequately and keep them operational a high percentage of the time, then they do not give us the security protection that the heavy investment in such equipment ostensibly is designed to provide.

THE ALL-VOLUNTEER FORCE: DWINDLING MANPOWER RESOURCES

History shows that the single most important element in the defense equation is manpower. The military services are going to have to come to grips with its burgeoning manpower problems. According to General Edward Meyer, the Army Chief of Staff, it will take "in the neighborhood of 80,000 men" to accommodate the new Army role. If the White House persists in its plans to build a 600 ship Navy and add additional air wings to the Air Force structure, Pentagon manpower requirements are going to increase dramatically—about 200,000 additional individuals by the mid-1980's.

Dwindling manpower resources cannot be attributed solely to the All-Volunteer Force (AVF) recruitment shortfalls. Scuttling the AVF in favor of returning to the conscriptive service will not, in itself, improve the situation. At issue is the alarming exodus of those who—in years past—could be relied on to make the military a career. Today, skilled technicians are completing their tour of duty and instead of reenlisting, they are leaving the service at an increasingly alarming rate.

Statistically, the Defense Department reports achieving most of its recruitment goals. In contrast, reenlistment rates have fallen dramatically. The first-time reenlistment rates have fallen dramatically. The first-time reenlistment rate of Army personnel is down 8 percent and retention of Air Force pilots with 12 years of experience is down 9 percent. A Time magazine article on the subject, pointed out that an Air Force pilot with 12 years of experience has received pay, allowances, and training worth roughly $4 million.

The need to address the issue of the growing manpower shortage in the congressional decisionmaking process is evidenced in the growing support for reactivating the battleship fleet. While there is no doubt that room can be made in the coming year's defense bills to overhaul those mothballed giants, the Congress is in no position to ignore the vital issue of manning.

At this point, we can only hope that the Navy would be able to come up with the number of officers and enlisted per-

sonnel required to properly staff these ships. With the Navy now estimating that it is short some 21,000 petty officers—the backbone of the fleet—there is cause for skepticism.

Since the Congress moved in 1972 to increase military pay to bring it more in line with private sector compensation, there has been the need for a comprehensive revamping of the total military pay and benefits structure.

All too often, you hear the charge that the Congress has been systematically eliminating the "perks" of military life and that this has caused the mass exodus. This is simply not the case. I believe that a careful study of the issue would support the conclusion that the money we spend maintaining some of the more outmoded and increasingly more expensive benefits programs has minimal—if any—impact on retention.

Last year, Congress passed the so-called Nunn/Warner compensation package. Despite critics who say it did not go far enough, Nunn/Warner provided a fresh approach to the problem of addressing critical skill shortages. This year the Senate passed the Exon graduated pay bill. Experience has shown that "across-the-board" pay raise approach to retention has been a failure. We need to go further in this direction. I favor giving the Secretary of Defense more discretion in determining how future pay increases are to be distributed.

The military compensation issue has become increasingly more controversial in recent years. It has been nearly a decade now since Congress altered its philosophy on military pay. But retired pay, designed in part to compensate for what was once a low wage structure, has not yet been brought into line with the revised active pay structure. As a result, retirement benefits—which are linked directly to the pay system and tied to the cost of living—have skyrocketed. Even the Defense Department has been motivated at times to say that the system "provides excessively liberal benefits." Former President Carter offered some of these same sentiments—especially as they relate to federally reemployed military retirees, or "double-dippers" as they are popularly called.

> And I've been particularly concerned at the excessive retirement benefits that are available to those who served in the military, who then retire and get full-time jobs working for the government. This is too expensive.

This problem of "double-dipping" is inextricably entwined with the "20-year-and-out" syndrome so prevalent in the military services today. There is something basically wrong with a system where more than half—50.5 percent—of all military retirees leave at or shortly after reaching their 20th year of service, usually at an age of under 45. It is very disturbing to me that so much talent and expertise is being lost to the military through this premature retirement. The costs to the Defense Department are considerable in that skills, training, and professionalism developed in a 20-year career are very difficult to replace.

I do not find persuasive the argument, used so often in defense of the current system, that extended career will result in a military force that is too old to fight. Much of the support capability, command, control, and communications operations, can be handled as well—if not better—by older, more experienced personnel.

If we are going to solve the critical problem of manpower drain, some immediate action is essential. We have to come to grips with the unique aspect of military service that requires sacrifice beyond that of regular Government service. We can never be comparable in pay to the private sector, but we can be competitive.

We must reward excellence and achievement through pronounced pay differentials. If necessary, we must track military pay so that those who sign on for longer terms in critical skill areas receive higher pay and benefits than short terms and nonskilled counterparts. Such a scale could be enhanced with bonuses for greater lengths of service and rewards for filling critical combat assignments.

THE ECONOMICS OF DEFENSE: THE GREATEST DANGER

Military manpower shortages and the serious problems we are experiencing with our weapons development programs are not the only threat to our national well-being. It may well be that the greatest danger facing us today is economic. The decline in our standing in the world relates more to double-digit inflation, falling productivity, decay in our industries, and debilitating energy dependence, than it does to any shortage of military manpower. We must ask ourselves, "at what cost do we pursue a course of massive increases in defense spending?"

Sound national defense involves far more than powerful military forces. Measures to strengthen our economy, increase energy independence and improve public education are examples of nonmilitary efforts which enhance the financial, industrial, and social elements of a sound national defense program.

The proposed Reagan defense buildup threatens to divert resources from more productive investment, perhaps delaying the revitalization of U.S. industry. American allies, unburdened by similar increases in their defense programs, may well gain a competitive edge while the United States revitalizes its role as the world's preeminent military power.

In May, the Brookings Institution published its annual review of the Presidential budget. Mr. William Kaufman—a leading authority on the subject of military expenditures—observed in the publication:

> The United States can afford whatever is necessary for a prudent defense. It cannot afford to overshoot the mark . . . Aside from the undesirability of provoking an even greater arms race, the expansion of defense spending must be tempered by budgetary and economic consideration.

Certainly, we must enhance our defense, but we must do so in a way that is somehow consistent with strengthening and revitalizing our economy.

To quote from a work by John Kenneth Galbraith, entitled "The Economics of the Arms Race—and After":

> Military expenditure is at a cost to economic strength; and it is upon economic strength that our world position in the past has rested.

He reminds us that the prestige and position our Nation enjoyed in the early years that followed World War II depended more on our economic strength than our military might.

The Reagan administration would have us believe that military prowess plays a more vital role in our national and international politics than does our economic strength. The respected Wall Street economist, Henry Kaufman, disagrees:

> The influence on our economy caused by a rise in defense expenditures . . . is probably not fully appreciated. We have not had a flourishing defense sector for well over a decade.
>
> The powerful stimulative combination of large tax cuts and sizeable increases in defense spending is likely to more than off-set the restraining influence of a slow in federal expenditures.
>
> Massive tax cuts, large leaps in defense spending, and a slowdown in other Government outlays will not, in my opinion, be enough. These measures will place an extravagant strain on monetary policy, leading to further distortions in financial markets, much higher interest rates, and additional fragility of our financial system.

In an article entitled "How To Wreck the Economy," economist Lester Thurow warns that a massive increase in defense spending, undertaken during a period of tax reductions, could have a devastating effect on the economy—locking it into double-digit inflation for years to come.

Professor Thurow emphasizes three points.

First, he points out that the "military buildup that is currently being contemplated is three times as large as the one that took place during the Vietnam war."

Second, he asserts that "President Johnson's refusal to raise taxes to pay for the Vietnam war is legitimately remembered as one of the key factors leading us into our current economic mess * * * President Reagan wants both dramatic tax cuts to encourage investment and an even more extensive military buildup (without increasing taxes). If his current program is carried out, he too will wreck the economy * * *"

Thurow notes that the ill effects may not be immediately evident: "Initially, output will rise and unemployment will fall," as it did during the Vietnam experience from 1966 to 1968. "But eventually, a sustained inflation will result from the economy's inability to produce both the civilian and military goods that are being demanded of it." And unlike Vietnam, where inflation took off from a starting point of 2.9 percent in 1966 to 1967, we start this time from the neighborhood of 12 to 14 percent.

Third, in addition to dangerous inflation, the massive defense increase coupled with sizable tax cuts, threatens irreparable harm to our hope of rebuilding economic productivity. Thurow points out that the proposed buildup is to take place at a time when our allies are not raising their military expenditures at anything like the rapid pace of the United States.

THE SOVIET RESPONSE AND DOMESTIC SOCIAL COSTS

In addition to economic considerations, we must anticipate what the Soviet response will be to our massive arms buildup, however misplanned or misdirected that buildup is. Clearly the Soviets will view it as a grave threat. Clearly they will view our prospective sale of "lethal" weapons to the People's Republic of China as a grave threat. Clearly they will respond to both our massive arms buildup and our "playing of the China card" as compelling reason, to even further augment their already escalating arms buildup.

The Soviet response will surely take into account their growing alarm about the direction of American policy. According to Soviet Defense Minister Marshal Ustinov, the current U.S. policy will "undo whatever good was done in Soviet-American relations during the 1970's and break the rough military parity between the U.S.S.R. and the United States." Mr. Ustinov claims the United States hopes to undermine the Soviet bloc economies by drawing them into a heated arms race. He wrote recently:

It is already being calculated by some men in Washington how many of the U.S.S.R.'s economic programs would thereby be frustrated and how much less the people in the Socialist countries would get of food and medical care.

Five years from now, after the expenditure of $1.6 trillion and with the People's Republic of China armed with modern American equipment, we may find ourselves no better off vis-a-vis the Soviets than we are today. The Soviets will not benignly sit by and watch us attain dominance or overwhelming superiority in armaments. As we dare them, they fear us. As we build, so will they.

To me, we would be well advised to heed the prophetic words of George F. Kennan:

We have gone on piling weapon upon weapon, missile upon missile, new levels of destructiveness upon old ones. We have done this helplessly, almost involuntarily: like the victims of some sort of hypnotism, like men in a dream, like lemmings heading for the sea, like the children of Hamlin marching blindly along behind their Pied Piper. And the result is that today we have achieved, we and the Russians together, in the creation of these devices and their means of delivery, levels of redundancy of such grotesque dimensions so to defy rational understanding. . . . no one could deny, I think, that the present Soviet and American arsenals, presenting over a million times the destructive power of the Hiroshima bomb, are simply fantastically redundant to the purpose in question. If the same relative proportions were to be preserved, something well less than twenty percent of these stocks would surely suffice for the most sanguine concepts of deterrence, whether as between the two nuclear superpowers or with relation to any of those other governments that have been so ill-advised as to enter upon the nuclear path. Whatever their suspicions of each other, there can be no excuse on the part of these two governments for holding, poised against each other and poised in a sense against the whole northern hemisphere, quantities of these weapons so vastly in excess foany rational and demonstrable requirements.

If the current trend continues unabated, the likely outcome is predictable, if not pleasant: American scientists, engineers, and technicians will increasingly be drawn into the defense sector, leaving the civilian sector, while our allies' finest scientists, engineers, and technicians will be devoting their talent to civilian endeavors.

In a memorable speech delivered to the American Society of Newspaper Editors on April 16, 1953, President Eisenhower spoke passionately of the social cost of this type of resource drain.

Every gun that is made, every warship launched, every rocket fired signifies, in the final sense, a theft from those who hunger and are not fed, those who are cold and not clothed. This world in arms is not spending money alone. It is spending the sweat of its laborers, the genius of its science, the hopes of its children . . .

In the area of national defense, it is vital that we learn from our experiences of the past decade. If the record suggests high technology weapons inevitably produce soaring costs, production delays, and disappointing reliability, we ignore those lessons at our peril.

There are a range of choices available to us: For example, we could avoid the "technology trap" by turning to simpler weapons; or make improvement in technology more likely by spurring competition in the defense sector through vigorous reforms in procurement and contracting. We could—and probably should—pursue some combination of the two.

The worst possible course would be to pretend that the problems do not exist, and commit ourselves to some Pentagon "wish-list" which will never be attainable. Our defense effort must be grounded in reason, not rhetoric.

Nothing could be more important than to correctly assess the likely impact of our proposed defense buildup on our economy. We may discover that we simply cannot afford to do everything that might be desirable from a defense standpoint. Choices and tradeoffs must be made. It would not be startling to discover that we cannot cut taxes and engage in a massive military buildup at the same time.

Back in the early 1960's, Lyndon Johnson said we could have "guns and butter" at the same time. This policy, exacerbated by the energy price surge, became the inflation momentum of the 1970's. Ronald Reagan, in the face of double-digit inflation, says we can have "guns and Kemp-Roth" in the 1980's. One has to wonder if we will ever learn the lessons of history.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I am advised that the Senator from Arkansas and the Senator from Nevada have no further requirement for time under the special orders heretofore entered. I ask unanimous consent that the orders be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend past the hour of 11:30 a.m., during which Senators may speak for not more than 3 minutes each.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DURENBERGER). Without objection, it is so ordered.

CONGRATULATIONS TO DONNA AND PAT BUTLER

Mr. BAKER. Mr. President, that blessed of blessed events has been bestowed upon a member of my staff, and I want to take this opportunity to send my congratulations to Donna and Pat Butler on the birth of their first born—a baby girl.

The good news is that mother and daughter are doing fine, and anxious to go home. The bad news is that Papa Pat is a nervous wreck. We all hope things settle down for the old man, and we look forward to his return.

THE NATION'S ECONOMIC PERIL

Mr. CANNON. Mr. President, I am compelled to speak out today on an issue that is perhaps the most serious issue this country has faced during all my years in the U.S. Senate. It is the issue presented by the continuing double-digit inflation with which we are all burdened as individuals, and as a nation. Inflation and the resulting high interest rates threaten to destroy not only the traditional dreams and hopes of individual Americans and their families, but also our way of life, our economy, and our security and position in the world at large.

From every possible source and without regard to party affiliation, political ideology or economic school of thought, we are assailed by only the bleakest of forecasts for the economy. Over the next 3 years we face huge Federal budget deficits amounting to $200 or $300 billion. And we are, it is now commonly conceded, in a recession that began earlier this fall and continues to advance. All the indicators show that this current downtrend is exacting a terrible price from the American people and from the life of the country as a whole.

Housing starts have reached the lowest levels since the Depression of the 1930's. The stock market is in a long continuing decline. Unemployment is up to 8 percent and rising. Interest rates are still

too high to end the rigid credit crunch that holds our economy in check. Recession may indeed be too soft a word to describe the fix we are in today. To read or to hear the news today is to encounter over and over again a litany of words called back from the 1930's—loss, default, slumping, falling, and fear.

And there is much to fear. It is not just that the individual American cannot afford to maintain his livelihood, or that there is now little or no development money to start new enterprises. Industry itself complains that it cannot afford the credit needed to expand or, in some shocking cases, even to survive. Failure, bankruptcy, acquisition, and merger are the words today as American business and industry fight the high interest rates, the general lack of credit, and the high costs of everything that plague us all.

Worse yet, Government itself is squeezed in the prevailing vice of inflation. The Federal Government, perhaps the biggest borrower of all, has paid increasingly high interest rates in today's money market. And those higher and higher interest rates have fed inflation even more with well near disastrous results.

We are finding, for instance, that no matter how serious the weakness in our defense—and even in the face of a continually growing threat to peace throughout the world—we cannot afford the new weapons we need, and we can acquire them only at the cost of multi-billion-dollar deficits. Talk of a new bomber—the B–1 or the Stealth * * * talk of an MX missile system, of more Trident submarines and other naval weapons, of an adequate and effective rapid deployment force * * * talk of maintaining the combat effectiveness of our forces overseas and in reserve * * * all talk of achieving and maintaining military parity in the world of the future is problematical today. It all hinges on ever-rising costs, and it hinges on our resulting necessity to accept what are really unacceptable multi-billion-dollar deficits.

All talk of our ability to go on providing minimal social programs is also problematical, if not specious, with today's economy. In the face of continuing inflation and continuing high credit rates, the outlook for the individual hard-pressed American—the outlook for the American family, the outlook for American communities and their needs—is as bleak and unpromising as it is for the country as a whole. Local government is as hard pressed by inflation and high interest rates today as is the Federal Government.

Yet, it is still blandly supposed or blindly assumed that the enormous shortfalls of needed revenues can be made up by further taxing our working men and women—or that the greater share of the tax burden still to be levied can fall without further damage on the backs of our senior citizens—that the American family can somehow be made to pay the bill, or that even our children can be further penalized in order to somehow make up the deficit and bail us out.

I am reminded of the story of the old Nevada miner who, when his mule fell dead in the traces, replaced the old mule with his little terrier. "That dog," they told him, "will never pull your load." But the old miner, still stolidly determined to get where he had to go, said, "Yes, he will. I'll walk ahead of him and whistle."

Well, we can go on whistling. But, if you ask me, I have to say we have put the wrong dog in the traces. The everyday American is already asked to carry more than his or her fair share of the tax burden. But we have somehow exempted the only class of citizens who can afford to bear their share—but who do not even begin to bear their share—the super rich and the huge conglomerate corporations for whom we have provided generous tax advantages which are no longer justified, and which must be ended if any semblance of fairness or a free market economy is to survive. For the plain and simple fact is that this country can no longer afford to give the super rich a super tax break.

Consider the chief among those who have benefited from this liberality of ours in the past—the big oil companies with their windfall profits, depletion and exploration and other allowances, that run into the billions of dollars every year. And year after year since the early 1970's these oil producers—and I want to make it clear I am not talking about retailers or distributors—have reported increasing and tremendous profits. Since the mid-1970's these beneficiaries of our tax liberality have risen from 50th or 60th ranking among the richest and most profitable corporations in America to being four of the top five, according to a recent House Committee study. With what result for the rest of us?

Energy has been the single largest factor in inflation. As the oil company profits have increased, so have the prices of oil and gas at the pumps where we fill our cars, and on the meters that measure fuel fed into our homes. The high price of oil, the ever rising cost of energy, continues to escalate year after year. Yet, we have done nothing to seriously tax the rising profits big oil has earned for itself over the years since the disastrous Arab oil boycott of 1973.

On the contrary, we have, in effect, lowered their taxes and increased their profits. We did so in the conviction that those lowered tax rates and increased benefits would be plowed back into exploration and discovery of new energy supplies—and that this exploration and discovery would, in turn, lower our energy costs.

But that has not happened. And why we continue to excuse the super rich oil companies from paying their fair share of taxes to help meet the rising costs of their energy driven inflation is beyond my ability to understand. It is also beyond my ability to believe that we must continue to expect this kind of tax loss to be made up by the average American taxpayer.

But that is what we are left with at the moment—the necessity to now consider once again how to further tax retired American workers, and thus further deprive them of social security and pension benefits they have earned with their labor over their working years—how to further cut school lunch funds—how to more certainly end for American families the dream of owning a home—how to further deprive the needy—and how to further reduce our support of schools, of research, of the development of minds and of ideas on which our future as a people will depend.

Rather, I firmly believe, we must now take a look at our tax structure and our tax laws in the harsh light of today's reality. We must take a new look at the gross inequities that exist. And I encourage my colleagues of the Finance Committee to take that second hard look at the law and the legislation now proposed or still to be proposed. I charge them to search out and to close the loopholes and alter the shelters that allow—and even encourage—immoral tax inequities to stay on the books.

I do this for more than reasons of alarm at the clear and present dangers we face today—threats to our economy, threats to our defense, threats to our health as a nation. I do so for reasons other than those of concern for the injustice and unfairness suffered by most American taxpayers today. I do so for what I regard as soundly pragmatic, economic reasons as well. The present tax structure in America is more than unfair or unjust. It is dangerously inefficient and uneconomic as it is immoral.

Exempting the super rich from their share of the tax burden is a costly procedure we can no longer afford. Looking around the world we can see ample evidence that this is so. Where the super rich escape their tax responsibilities, national economies are as soft and as inflation-driven as our own. That of Great Britain is a fair reflection of this. Great Britain now has an average yearly rate of unemployment of almost 6 percent. Our own unemployment rate now stands at 8 percent. Great Britain has an average yearly increase of 14.4 percent in consumer prices. Our rate of increase is now 10 percent.

On the other hand, when we look at Germany and Japan, two of the most successful and sound economies in the world today, we see another picture.

Both Germany and Japan are 10-percent dependent on foreign oil with resulting high energy costs. Both have inflation and all that it entails. Our high interest rates, for example, impacts on their economies. In Japan, however, the unemployment rate is only 2.1 percent and their average yearly increase in consumer prices is only 6.5 percent. Germany is similarly better off than we are, with unemployment at only 4.2 percent and consumer prices increasing at only 4.1 percent. Neither Germany nor Japan faces the slowdown in growth and the enormous deficits we are facing today. That is largely because, in both Germany and Japan, the big corporations pay their share of the tax burden and also pick up the tab for many social services as well.

It is certainly true that in the past the undoubted health of the German and Japanese economies has been due to our support. Their economies have further benefited from the fact that both Japan and Germany have very low defense costs. But if the super rich in Germany and Japan were not paying their fair

share of the national tax bills, their economies would be as shaky as our own.

It therefore behooves us, it seems to me, to look askance at our own situation with respect to theirs, and to wonder at the sorry and unbelievable spectacle of an America—groggy, disabled, and all but disarmed under the blows of economic forces that Germany and Japan have survived with undeniable prosperity. And that they are prosperous is undeniable, even with their dependency on foreign oil.

We, on the contrary, have allowed our privileged few to escape their fair share of the tax burden. Year after year since the 1973 Arab oil boycott, the super rich companies have racked up billions in earnings, much of it very lightly taxed and some of it not taxed at all. Should there be any doubt of this, let me refresh your memory with some facts.

Between 1972 and 1980 the after-tax profits of the nation's 20 largest oil companies quintupled—that is, increased five-fold. From 1976 to 1980 their gains nearly tripled—from $11 to $29 billion annually. In 1980 the major petroleum, oil service, and oil supply companies showed an annual profit that increased from 29 to 46 percent, while all other major industries—including steel—showed an average after-tax profit increase of only 4 to 5 percent. Just this past weekend I read a newspaper account of a new congressional staff study, which traced the $19.6 billion increase in combined net income of the 500 largest industrial corporations during the past 2 years. The study says the 20 largest oil and gas companies accounted for 83.7 percent of the $19.6 billion, and that 24 others plus 12 industry and supply firms accounted for an additional 14.2 percent. That left only 2.1 percent—or $403 million—for the rest of the corporations. The net cash flow of just one oil company—Exxon—last year equalled $1 billion a month.

What kind of taxes do these companies pay on all that money? Not very much. By virtue of their deductions, allowances, write-offs, and adjustments, oil companies have been able to cut their Federal tax bills well below the percentage paid by all other industries. In 1977, for example, the oil industry had an adjusted income subject to tax totaling $47.7 billion. For this the industry paid $18 billion in foreign taxes—37.5 percent—and only $3.5 billion in American taxes—7.5 percent. If the oil industry would pay as much to our Treasury as they pay to foreign countries, we would have the President's $12 billion deficit paid in a year's time.

And what have the oil companies done with these enormous tax savings? They would lead you to believe they are putting money into exploration. Yet, the major oil companies spent less than 2 percent of their adjusted revenue in 1980 for exploration of new oil and other energy sources. In fact, 90 percent of all new wells being drilled, and 80 percent of all significant oil and gas discoveries, is the work—not of the major oil companies with all their tax allowances but—of wildcat independents. What the oil companies seem to be doing in this regard is not much of a mystery. They seem to be tying up land with leases and waiting for the price of oil to rise even higher.

So it is not into new oil discoveries and new wells that the major oil companies are putting their money. It is into mergers and new acquisitions. Of the 204 such mergers and acquisitions by major oil companies since 1968, 116 of them were in nonenergy fields. These include, I must advise you, life insurance companies, almond growing, fabrics, paperback books, jet engine parts, crushed stone, ready-mix concrete plants, magnetic tapes, a shipyard, carpet dyes, perfume, motel operations, shoe manufacturing, and even a Scottish trout farm—to say nothing of a computer software firm. Commendable enterprises all. But how, may I ask, do they improve our energy situation or help to relieve us of our deadly dependence on Arab oil? Must we continue to be the potential victims of blackmail by a handful of feudal Arab princes and our own oil barons so that, with the taxpayers' help, Exxon can develop a word processor to compete with Remington Rand or IBM?

And where else do you think their money goes? In a recent major newspaper investigation it was revealed that 94 oil Political Action Committees—PAC groups—doubled their congressional campaign contributions from $2.1 million in 1978 to $4.5 million in 1980. The headline of the special newspaper series was "How Oil Money Helped To Change The Face Of Congress." The article stated that four U.S. Senate candidates last year received oil money totaling $100 thousand each.

And what about advertising? Every time I turn on the television or read a newspaper or magazine, I am reminded by oil company advertisements of their efforts to spend money helping our Nation become more self-sufficient in energy. What kind of budget does the oil industry have for magazine ads, television specials, and fancy photography? I do not know what this enormous budget is. I am sure it is one of their better kept secrets. And I am sure that a portion of that budget would go a long way toward helping us find funding alternatives.

It disturbs me to realize that all this expansion into new fields by the oil companies, all this growth, and all this prosperity has been funded by the American public. And it has been funded through the guise of tax benefits granted in the belief that the American oil industry would, in turn, deliver some relief for the energy squeeze and its attendant ills of inflation, the credit crunch, and now recession, unemployment, and the rest. What has been delivered to us is not the promised energy independence. Instead, it is, as David Stockman has pointed out, a Trojan horse, saddled and bridled to fit the superrich, a long disproven Republican white elephant theory of trickle-down economics under another name, and a $200 to $300 billion deficit to be faced by the American taxpayers in the next 3 years.

Think of $200 to $300 billion. Our President seeks just $12 billion to supposedly make his economic program work. Just think of the money spent by oil companies for exploration, campaign contributions, and even advertising. Just think of the $400 million a year that an Interior Department Commission claims nine oil companies underpaid the Government for petroleum and gas produced on Federal property. Just think of the billions in taxes the oil companies should be paying to the Federal Treasury, and what it would do to end the credit crunch, stop inflation, eliminate much of our deficit, and bring our Nation back to economic health.

Instead, we have only that enormous deficit. It is a dismal prospect we face, dismal unless we call an end to unfair tax benefits and allowances and other giveaways enjoyed by the superrich today—dismal unless we call an end and say enough—stop—no more. For the truth is that if the superrich had been paying their fair share of the taxes, we would be facing no super billion-dollar deficits today. And only if they pay their fair share of the taxes can we hope to see our economy thrive as it should, and our country secure in the world as it must be.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business?

If not, morning business is closed.

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1982

The PRESIDING OFFICER. The clerk will state the pending business.

The legislative clerk read as follows:

A bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year 1982, and for other purposes.

The Senate resumed consideration of the bill.

AMENDMENT NO. 638
